¹ No record of 1919 imports and exports. ² Revised; exports of domestic gold bullion after June 1, 1931, are now valued at monthly average market price of gold. ³ Revised since the publication of the 1934-35 Year Book.

4.—Duties Collected on Exports, 1868-92, and on Imports for Home Consumption, 1868-1935, with Percentages of Expense of Collection to Gross Customs Revenue Collected, fiscal years 1868-1935.

NOTE.—Duties on exports were not collected after the year 1892. The figures in this table are the gross figures of duties collected; the net national revenue from customs taxation, because of the drawbacks paid where commodities on which duties have been collected are afterwards exported in a more highly manufactured state, is considerably smaller. For net customs revenue see statistics of revenue from customs duties, in the historical revenue table in Chapter XXI on Public Finance.

Fiscal Year.	Duties Collected on Exports.	Duties Collected on Imports.	Percentage of Expense of Collection to Gross Customs Revenue.	Fiscal Year.	Duties Collected on Exports.	Duties Collected on Imports.	Percentage of Expense of Collection to Gross Customs Revenue.

¹In this classification the expression "Canadian Farm Products" refers, in the case of exports, to commodities actually produced, in their original state, on Canadian farms. In the case of imports, it covers all commodities of which the basic raw materials are such as Canadian farms produce. "Foreign Farm Products" covers, in both imports and exports, materials or commodities such as Canada does not produce in their original forms, *e.g.*, cane sugar, tea, rubber, cotton, silk, etc.

17.—Values of Total Exports, Imports Entered for Consumption, and Duties Collected Thereon, at Certain Ports and by Provinces, fiscal years ended Mar. 31, 1934 and 1935.

NOTE.—The values of imports and exports at the several ports of entry given in the following table indicate that merchandise of the value stated was entered inwards, or passed outwards, at the ports mentioned, but it is not to be inferred that the imports were all for consumption at such ports or that the exports originated there.

Province and Port.	1934.			1935.

Subsection 11.—Comparison of the Volume of Imports and Exports.*

The statistics of the external trade of Canada have not, until lately, been analysed in detail to reveal the physical volume of external trade as well as the dollar value of that trade, and have therefore been somewhat misleading when used to show the physical growth of production and external trade. When, for example, Table 1 of this chapter is examined, it seems to show stagnation in our external trade between the early 70's and the middle 90's of last century and a very rapid growth thereafter. Yet we know that the apparent stagnation was partly due to the fall in general prices between the '70's and the middle '90's, while the rapid growth of the later figures is exaggerated by the rise of prices after 1897, especially in the war period, 1914 to 1921. Since 1929 another precipitate decline in prices has exaggerated the actual decrease of trade. Thus the figures as published give us no true measure of the volume of our external trade, yet, of the commodities that satisfy human needs, it is the *volume* rather than the *value* with which the masses of the population are more intimately concerned. Volume is, from many points of view, a more important consideration than value, and it is desirable to secure a record of the fluctuations in the volume of the country's trade as distinguished from the value thereof. This is what is attempted in Table 22.

The method adopted for ascertaining the fluctuations in volume has been to take a base year—1926—and to revalue the quantities of each commodity imported or exported in any given year at the average import or export value of that commodity in the standard or base year. Where quantities are not available, the values of items are assumed to have moved in the same direction and in the same proportions as closely related commodities. For this reason the results must not be regarded as of great precision but, since the value of goods not returned by quantity and of those not comparable over a limited series of years is small in comparison with the total trade, the amount of error introduced on their account is inconsiderable. By this method it is comparatively easy to compare the volume of the trade in a particular year with that in a recent year and the margin of error is fairly small. When, however, a comparison of the volume of trade in a particular year with that of another year ten or more years before is undertaken, the margin of error is very much greater. Certain new commodities have come into existence in the course of the decade, while the qualities of others have been materially changed; further, various new items have been added to the customs classifications, and it is not always possible to say just what customs items of 1935 correspond with those of 1914. For these reasons comparisons with the pre-war fiscal year ended 1914 have been discontinued since 1929. This comparison for 1929 and certain previous years appeared on pp. 581-583 of the 1930 Year Book.

In Table 22 the values and volumes of imports and exports respectively for the years 1929 to 1934 are compared with 1926, for the main groups, as follows: the imports and exports are first shown at the values at which the trade was recorded; the same imports and exports are then shown at the value they would have had if the average price or unit value had been the same in each year as it was in 1926. In other words, the figures on the basis of 1926 average values enable a comparison to be made of the imports or exports for the given years on the basis of variations in quantity only, variations due to different prices having been eliminated. Index numbers of declared values, that is, the total declared values of the imports or exports in each year expressed as percentages of 1926, are then given. These are

*Further information as to the methods adopted in making the following analyses will be found on p. 836 of the Annual Report on the Trade of Canada for the fiscal year ended Mar. 31, 1935, published by the Dominion Bureau of Statistics.

followed by the index numbers of average values, which show the prices at which goods were imported or exported in each year expressed as percentages of the prices in 1926. Finally, the index numbers of physical volume show the relative quantity of merchandise imported or exported in each year expressed as a percentage of the quantity of the same merchandise in 1926.

For an analysis in greater detail, dealing similarly with sub-groups and principal commodities imported and exported, the reader is referred to pp. 838-839 of the Annual Report on the Trade of Canada for 1935, published by the Dominion Bureau of Statistics.

The physical volume of imports has been fairly well maintained throughout the depression in those groups comprising goods which enter more or less directly into consumption, such as vegetable products and textiles, while the volumes of imported chemicals and non-metallic minerals (chiefly petroleum products and coal) were higher in 1935 than 1926. On the other hand, the volume of imports of durable or capital goods, largely comprised within the iron, non-ferrous metal and wood products groups, was at a very low level in 1933 and 1934 but has shown an encouraging recovery in 1935.

In the second half of Table 22 the volume of exports in 1935 of farm products, comprising both the vegetable and animal groups, is shown to be only about two-thirds those of the base year 1926. Exports of wood and paper products (another important group in the Canadian economy) recovered in 1935 to about 100 p.c. of the volume of the base year. However, of the four groups of major importance to the prosperity of Canada, the best showing was made by non-ferrous metals with a volume of exports in 1935 amounting to 184 p.c. of those of 1926. Furthermore, if the product of the chief branch of Canadian mining enterprise—namely, gold mining—had been included in the non-ferrous metal exports, instead of being treated as bullion and excluded from the commodity groups altogether, the exports of non-ferrous metals would have shown a much greater volume and the increase since 1926 would also have been much greater.

Section 4.—The Tourist Trade of Canada.*

Tourist Expenditures in Canada.—In recent years the tourist trade has become an important source of revenue in certain sections of the Dominion, materially affecting the balance of trade. It represents the economic disposition of national assets in which Canada is particularly rich, namely: its picturesque scenery; its invigorating climate; its opportunities for hunting, fishing and boating, as well as for winter sports—for the exploitation of which a considerable capital expenditure has been made on hotel accommodation, improved highways and other attractions. Those entering from the United States in automobiles are by far the most important class of tourists. The business accruing to the Dominion in this manner represents some return for expenditures on highways which have been very large in the period since the War (see pp. 686-688). In order to attract this traffic, highways have been built through regions of picturesque scenery, such as the Rocky Mountains, northern Ontario, and the Laurentians and Gaspé in Quebec. A further asset for Canada arises from the fact that these scenic regions with their invigorating climate are at their best in the summer holiday season when motorists are most ready to

*Abridged from "The Tourist Trade in Canada, 1920-26", and reports for each year from 1927 to 1935 inclusive, published by the Dominion Bureau of Statistics and obtainable on application. These reports contain a full explanation of the methods used in making the estimates.

travel. The expenditure of travellers coming to Canada from other countries on business has the same effect, so far as its influence on the balance of trade is concerned, as the export of additional commodities would have. Indeed, in so far as commodities are sold to tourists travelling in the Dominion, our exportable surplus of such commodities is reduced.

It is impossible to obtain a direct record of expenditures of this kind. Moreover, even a rough estimate of the total is extremely difficult to make, visitors to Canada being of all classes, engaging in widely different activities or forms of recreation, remaining for varying periods, with expenditures undoubtedly ranging from very small to very large amounts.

The tourists who enter Canada may be divided into three classes: (a) those coming in *via* ocean ports; (b) those entering from the United States in automobiles; (c) those entering from the United States by rail or steamer. In 1935 these classes are estimated to have expended in Canada \$10,117,000, \$131,806,000 and about \$59,104,000 respectively, or a grand total of approximately \$201,027,000.

The Department of National Revenue records the number of tourists entering Canada in automobiles from the United States through each of the ports of entry along the border. Estimates of the expenditures of tourists of this class in 1933, according to the provinces by which they entered, are as follows: Maritime Provinces, \$7,398,000; Quebec, \$28,761,000; Ontario, \$84,233,000; Manitoba, \$1,741,000; Saskatchewan, \$822,000; Alberta, \$791,000; and British Columbia, \$8,060,000.

Expenditures of Canadian Tourists Abroad.—Canadian tourists visiting other countries travel in the main to the British Isles and other European countries on visits home, or as sightseers. Again, many of them, especially elderly or delicate persons, go to Florida, Bermuda or the West Indies. These tourists may be classified in the same three classes as those entering Canada. The total expenditures of such Canadian tourists to other countries were estimated in 1935 to be as follows: to overseas countries, \$16,486,000; to the United States by automobile, \$50,206,000; and to the United States by rail and steamer, \$24,592,000; a total of \$91,284,000.

Summary.—For the years 1924 to 1935 the total estimated expenditures of tourists from other countries in Canada, as compared with those of Canadian tourists in other countries, are given in Table 23.

23.—Estimated Tourist Expenditures in Canada and of Canadians Abroad, Calendar Years 1924-35.

¹ Information not available on a comparable basis for the years 1924-28.
² Converted into Canadian funds at average rates of exchange for the period.

³ Preliminary.

Until the depression made itself felt in 1930, there was a steady increase in the amounts spent both by tourists from other countries in Canada and by Canadians in other countries. During the years 1930-32 the tourist trade, in spite of successive declines, exhibited a surprising vitality as compared with the generally depressed state of trade and industry. In each of these years the expenditures of tourists in Canada (and in the latter two the balance after deducting the corresponding expenditures of Canadians in foreign countries) constituted an "invisible" export of greater value than any single commodity exported. A marked contraction in both volume of travel and tourist expenditures occurred in 1933 and conditions in 1934 were very little better. A pronounced improvement in tourist trade took place in 1935.

Section 5.—Balance of International Payments 1920-32.*

"Balance of Trade" figures are frequently misinterpreted owing to the persistence of the doctrine long ago exploded that a nation's trade is necessarily in a healthy state when exports exceed imports, necessitating an import of gold to make up the difference. Trade was then said to show a "favourable" balance. This theory only took account of the "visible" or commodity items of trade, whereas the true balance of a nation's trade can only be known when not only the commodity items are considered, but also the "invisible" items such as interest, freight, immigrant remittances, financial services, tourist traffic, etc. In short, all debit and credit transactions must be set down in order to find out the true balance. If all the visible and invisible items are thus tabulated the debit or credit difference will be a final invisible item—capital import or export—and this will bring the nation's trade account into a state of balance.† Thus, the commodity trade balance of a country cannot be understood by itself but only as it is interpreted in the light of the invisible items of a country's international transactions. In the light of such data, it will be found that a so-called favourable or unfavourable balance will mean an entirely different thing at different times in a country's history. The balance of international payments, which takes account not only of commodity trade but of all transactions, reveals the meaning of the trade balance. It shows, for example, that in 1920, 1921 and 1922 our international accounts were balanced by large imports of capital, although our commodity trade balance was favourable in 1920 and 1922. During these years Britain repaid us war funds as follows: 1920, \$104,000,000; 1921, \$128,000,000; 1922, \$84,000,000. From 1923-28, however, the international accounts show a credit balance after allowing for interest payments and maturities, thus denoting capital exports. In these years Canada became temporarily a capital-exporting country and, therefore, the explanation of our favourable commodity trade balance was quite different from that for the period 1894 to 1903, when it was explained by payments of interest and maturities.

From the foregoing it will be seen that an estimated balance of international payments is indispensable to the understanding of trade accounts. It has, however, a great many other important uses, among which the following may be mentioned: (1) to give a comprehensive picture of our international debits and credits and how they are balanced; (2) to show the extent of our international borrowings and lend-

*Abridged from the annual report "Canada's Balance of International Payments", by Herbert Marshall, B.A., F.S.S., Chief of the Internal Trade Branch of the Dominion Bureau of Statistics. This report includes explanatory data on the methods followed in computing these statistics.

†It is impossible to obtain absolute completeness and accuracy in estimates of invisible items; hence, part of the difference will be due to errors and omissions.

ings; (3) to show the magnitude of individual invisible items, such as interest, freights, tourist traffic, etc., in our international transactions; (4) to explain exchange disturbances and the effect of international financial difficulties; and (5) to furnish data for guidance in the formulation of international fiscal, financial and commercial policy.

As already stated, in the years from 1923 to 1928 Canada became temporarily a capital-exporting country. This was the result of abundant funds accumulating in the Dominion owing to three causes. In the first place, there had come into the country during the War about \$1,250,000,000 through the purchase of our commodities at high prices; this was seeking an investment outlet. In the second place, the large investment of United States capital in the Dominion from 1914 to 1920 was now increasing the nation's output. In the third place, successive large harvests at relatively high world prices were a foundation of prosperity. These factors combined caused an unprecedented accumulation of savings, which was used by financial institutions and individuals not only to finance domestic capital needs, but also to avail themselves of opportunities for profitable investment abroad. The prolonged and extravagant "bull" market in the New York and other United States' stock exchanges culminating in the early summer of 1929, and the high interest rates prevailing in those markets, attracted enormous sums to the United States from other countries, including Canada. Thus from 1923 to 1928 we had on balance an export of capital to our credit, though at the same time other countries, particularly the United States, continued to invest large sums in the Dominion.

In contrast to this there were debit balances in 1929 and 1930, considering both visible and invisible items of \$107,000,000 and \$195,000,000 respectively, while in 1931 the balance was favourable by only a little over \$2,000,000. In the light of all available information, it appears that these balances in 1929 and 1930 represented a net movement of capital into Canada for investment. In each year from 1931 to 1935, a net outward movement of capital funds is indicated again. In these latter years, however, the outward movement of capital funds appears to have been in the main not for investment but for the purpose of retiring maturing issues and for repurchases. The credit balances from 1932 to 1935, respectively, were approximately \$27,000,000; \$55,000,000; \$81,000,000; and \$140,000,000.

In 1934 credit balances of \$152.8 million for commodities, \$100.3 million for gold and \$69.1 million for tourist trade, a total of \$322.2 million, were more than sufficient to meet net debits of \$195 million for interest and dividends, \$23.4 million for freight and \$15.0 million for insurance, totalling \$233.4 million. Minor invisible items showed a net debit of \$7.3 million.

In 1935 the largest debit balances were \$219 million for interest and dividend payments, \$29 million for freight and \$8 million for insurance. The total of these debit balances, \$256 million was much less than the large credit balances provided by the commodity and tourist trades and gold, these being \$198 million, \$100 million and \$104.4 million respectively. The remaining items showed a net debit balance of \$6 million.

Table 24 shows the preliminary estimates of the balance of international payments for 1934 and 1935. Figures for 1920-26 were given at pp. 601-602 of the 1929 Year Book, although these have since been somewhat revised in later estimates. Figures for 1927-28 will be found at p. 501 of the 1932 Year Book, those for 1929-32 at p. 601 of the 1933 Year Book and those for 1933 at p. 639 of the 1934-35 Year Book.

CHAPTER XVII.—INTERNAL TRADE.

This treatment of trade within the Dominion commences with a general statement on interprovincial trade, followed by sections dealing with the statistics of the grain trade and of the marketing of live stock and animal products. Statistics of cold storage facilities and of commodities in cold storage are next in order. Following these will be found sections relating to various administrative services connected with trade, including: the payment of bounties; the granting of patents, copyrights and trade marks; and weights and measures, electricity and gas inspection. The concluding section of the chapter deals with the statistics of wholesale and retail merchandising collected at the Census of Merchandising and Service Establishments, 1931, and estimates made subsequently.

Section 1.—Interprovincial Trade.*

Canada may be divided into the following five economic regions, each deriving its specific character from the predominant occupations of its people:—

1. *The Eastern Fishing, Lumbering and Mining Region*, comprising the river valley and gulf of the St. Lawrence, together with the Atlantic coast; in other words, the greater part of the Maritime Provinces, the northern part of the province of Quebec (excluding the former district of Ungava), and a portion of northern Ontario.

2. *The Eastern Agricultural and Industrial Region*, comprising the cultivated portions of the Maritime Provinces and of the provinces of Quebec and Ontario. In the latter provinces the cultivated areas extend along the banks of the St. Lawrence and its tributaries.

3. *The Central Agricultural Region*, extending from the Red River valley to the Rocky mountains and from the Canada-United States boundary to about 56° N. lat.

4. *The Western Fishing, Mining and Lumbering Region*, comprising the western portion of the province of Alberta, the whole of British Columbia and the southern portion of Yukon.

5. *The Northern Fishing and Hunting Region*, extending from the regions of permanent settlement northwards, and from the boundary of Labrador to the Pacific and to the Alaskan Boundary. This vast region is sparsely inhabited by indigenous nomadic tribes engaged in fishing and hunting for their own support or for exchange with the fur-trading companies, and with individual whalers and traders who visit the region.

Great differences exist between the products of these various regions; even the fisheries and lumber products of the east are quite distinct from those of British Columbia. The needs of the people throughout the country are met to a great extent by the exchange of the products of one region for those of another.

Interprovincial trade in what is now Canada had its beginning, many years before Confederation, in the exchange of the furs and lumber products of Upper and Lower Canada for the fisheries and mineral products of the Maritimes. Indeed, it was thought at the time of Confederation that the coal-fields of Nova Scotia would furnish sufficient fuel for the needs of all the eastern part of the Dominion. Later,

* Revised by G. S. Wrong, B.Sc., Chief of the Transportation Branch, Dominion Bureau of Statistics.

manufacturers of Ontario and Quebec found markets from one end of the Dominion to the other in exchange for the farm, mineral and other products required by large urban communities and produced principally in western and northern regions. Thus the principle of comparative advantage is seen operating in the increased trade between the economic regions of the Dominion, a trade which is principally carried on over the railways of the country, but also largely over its waterways. A comparatively new development is the inauguration of sea transport between Eastern Canada and British Columbia *via* the Panama Canal. (See pp. 706-707.)

Monthly railway traffic reports and an annual summary report are published by the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics showing, for each province and for the Dominion as a whole, the total *revenue* freight traffic of all railways, divided into 76 classes of commodities. The data also show the quantity of each class that originated and terminated in each province, and are of use in computing the net imports and exports of each province for each of the 76 classes of commodities. These statistics show rail traffic only, a limitation which should be borne in mind in connection with the trade of provinces having water transportation. Summary figures for all commodities are given in Table 1.

The revenue freight traffic movement on the steam railways of Canada fluctuates to a certain extent with the yield of the crops and with activity in the mining and construction industries involving heavy movements of low-grade freight. The general trend from 1921 to 1928 was upward, increasing from 83,814,436 tons of freight carried in 1921 to 119,227,758 tons in 1928. In 1929, however, a decrease to 114,600,778 tons was reported and, with the industrial depression, there were still greater decreases to 57,099,111 tons in 1933, but traffic began to improve during the last six months of 1933 and each month of 1934 showed increases over 1933 and the total for the year was 18 p.c. greater than for 1933. Due mainly to a light movement of grain in 1935, traffic for the first eight months was slightly less than in the same months of 1934 although it was 24 p.c. heavier than in those of 1933.

¹ The freight originating and that terminating will not agree because that which originates within a certain year does not all terminate within the same year. On the other hand, some which terminated in 1934, for instance, originated within the previous year.

Section 2.—Grain Trade Statistics.*

The Canada Year Book, 1922-23, contained on pp. 581-583 a historical summary of the more important points respecting the shipment, inspection and sale of Canadian grain under the Canada Grain Act, and an outline of the Canada Grain Act of 1925 appeared at p. 1017 of the 1925 Year Book. The 1929 amendments were dealt with at pp. 1047-1048 of the 1930 Year Book, and the Canada Grain Act, 1930, at p. 1101 of the 1931 Year Book.

Movement of Canadian Wheat, Crop Year 1934-35.—A *résumé* of the Canadian wheat movement naturally begins with a description of the crop of the Western Inspection Division. The wheat crop of 1934 marketed in the Western Division during the crop year from Aug. 1, 1934, to July 31, 1935, amounted to 265.2 million bushels. A carry-over of 158.6 million bushels from the previous crop year, together with some minor items, brought the stock of the Western Division to a total for the year of 424.1 million bushels. As for distribution, 204.2 million bushels were commercially disposed of, the chief items of which were 76.6 million bushels exported to the United Kingdom and 80.0 million bushels shipped to the Eastern Division. The direct exports to the United States were 13.6 million bushels and to other countries 16.5 million bushels. The total shipments from the Western Division were thus 186.7 million bushels. The wheat used by the milling companies for the manufacture of flour amounted to about 17.3 million bushels, of which 12.6 million bushels were ground into flour for domestic consumption. The all-rail movement eastward from the Western Division, including shipments to the Ogilvie Flour Mills Co. at Fort William for grindings, was 104 thousand bushels. Lake shipments from Fort William and Port Arthur were 132.4 million bushels 78.7 million bushels going to Canadian ports and 53.7 million to United States'

ports. The principal Canadian lake ports were those of lake Huron and Georgian bay, with receipts of 29.5 million bushels, and Port Colborne with 16.3 million bushels. Among the United States lake ports, Buffalo was of chief importance in the handling of Canadian wheat, with receipts by water from Port Arthur and Fort William of 43.5 million bushels. The export of wheat through Vancouver was 45.3 million bushels, as compared with 45.4 million in the previous crop year; 2.0 million bushels were exported through New Westminster, 2.2 million from Prince Rupert, 925 thousand from Victoria, and 4.0 million from Churchill. The seed requirements were estimated at 30.8 million bushels, feed for livestock and poultry at 13.3 million bushels, and the stocks at the end of the crop year were 157.3 million bushels.

The Eastern Division received during the crop year not only the eastern crop, estimated at 10.6 million bushels, but also shipments from the West aggregating 80.0 million bushels. The quantity on hand at the beginning of the crop year was 35.3 million bushels, making, with a comparatively small importation from the United States, a total stock entering the Eastern Division of 126.5 million bushels. The distribution included 45.9 million bushels carried over in store into the following year, 27.9 million bushels exported from the St. Lawrence ports, and 8.3 million bushels shipped through the winter ports of Saint John and Halifax, while 1.4 million bushels moved over the border into the United States for consumption. In addition, 38.7 million bushels were cleared for export to the United Kingdom and other countries *via* the United States Atlantic ports. The chief ports concerned with the movement of Canadian grain from both Divisions were New York, Albany, Boston and Portland.

Total exports from Canada to the United States for consumption amounted to 15.0 million bushels, to the United Kingdom 100.7 million bushels, to other countries 28.6 million bushels; 95.2 million bushels were shown to be shipped *via* Canadian ports and 34.0 million bushels *via* United States' ports, after deducting 4.6 million bushels transhipped from Buffalo to Montreal and adding the same to the Canadian movement. Total exports of wheat from Canada during the crop year amounted to 144.3 million bushels.

Table 3 shows, for the licence years 1934 and 1935, the number of elevators and their total storage capacity, the figures being given by provinces for each class of elevator, with a summary showing the total of all elevators for each province. The growth of Canadian elevators in number and capacity has accompanied the expansion of grain acreage in the present century. Canadian elevators in 1901 numbered 426 with a capacity of 18,329,352 bushels; in 1911 these had increased to 1,909 elevators and 105,462,700 bushels; and totals of 3,855 elevators and 231,213,620 bushels were reached in 1921. Further increases in the past few years have resulted in a total of 5,880 elevators with a capacity of 419,890,480 bushels in 1935.

Table 4 gives summary statistics of the inspections of grain for 1932-35, detailed statistics given in previous Year Books being omitted to save space. The latter may be found in the Reports on the Grain Trade of Canada.* Tables 5 and 6 show the shipments of grain by vessel and rail for 1934 and 1935.

Tables 7 and 8 deal with the Canadian grain handled in recent years at Eastern elevators, while Tables 9 and 10 show the average cost of delivering a bushel of wheat from the Canadian wheat producer to British ports, by both the Atlantic and Pacific routes.

* The latest report is for the crop year ended July 31, 1935, and may be obtained from the Dominion Statistician.

Flour-Milling in 1934.—The flour- and grist-milling industry in Canada in 1934 showed a decrease of 18 mills from 1933, but their capacity was increased by 571 barrels of flour a day from the 1933 figure. Capital investment was \$59,293,426. The mills were distributed by provinces as shown in Table 11. Statistics of the employees, value of products, etc., for both flour and feed mills, for the latest year available will be found in Table 7 of the chapter on manufactures, pp. 424-425 of this volume.

¹ Two chopping mills included with flour mills.

Section 3.—Marketing of Live Stock and Animal Products.*

The estimated value of farm live stock and poultry in Canada in 1934 was \$449,235,000, or 82.4 p.c. of the value of field crops grown during the year. In 1933 the value of farm live stock and poultry was \$436,591,000, or 96.3 p.c. of the value of field crops during that year. In gross value of product the slaughtering and meat-packing industry, which is dependent chiefly on animal husbandry for its materials, has since the War been one of the most important single manufacturing industries in Canada.

The Canada Year Book 1922-23 contained on pages 594-595 a brief historical description of the development and present position of the live-stock industry in the Dominion, with statistics of farm animals compiled from the decennial censuses 1871 to 1921. A summary of this data, with the addition of figures for 1931, is given in Table 12.

* Revised by Dr. T. W. Grindley, Chief, Agricultural Branch, Dominion Bureau of Statistics. For more detailed information on this subject see "Live Stock and Animal Products Statistics", published annually by the Dominion Bureau of Statistics, also "Live Stock Market and Meat Trade Review", published annually by the Live Stock Branch of the Dominion Department of Agriculture. See also the material in Chapter VIII under the heading "Farm Live Stock and Poultry".

¹ Figures for 1871-91 do not include work oxen.

² Census taken as of June 1, while previous censuses

were taken in April, so that the proportion of young animals is greater than for years previous to 1911.

³ Animals slaughtered on farms were not included. The following figures are comparable with data given for other years, the amounts being partly estimated: cattle, 1,915,059; sheep, 1,097,015; swine, 4,282,624.

⁴ Revised since the publication of the 1934-35 Year Book.

In Table 13 statistics are given showing the numbers of animals on farms for the years 1921 to 1935, expressed as percentages of the average numbers for the quinquennium 1921-25.

13.—Index Numbers of Animals on Farms in Canada, calendar years 1921-35.

¹ Revised since publication of the 1934-35 Year Book.

Live-Stock Marketings, 1934.—The numbers of cattle and calves sold at stockyards showed increases in 1934 as compared with 1933, while hogs, and sheep and lambs showed decreases. Cattle sold numbered 700,817 in 1934 and 604,077 in 1933, calves 371,110 and 317,308, hogs 964,311 and 1,044,196, and sheep and lambs 459,275 and 471,351, respectively.

Table 14 shows the receipts for sale at the various stockyards and a partial disposition of the live stock sold in 1933 and 1934.

14.—Total Receipts of Live Stock and Disposition of Slaughter and Store Stock at Principal Markets in Canada, calendar years 1933 and 1934.

¹ Included with cattle.

The interprovincial and export movement of live stock in 1934 shows increases in all classes except hogs. Total shipments in 1934 with comparative figures for 1933 in parentheses were as follows: cattle 415,872 (322,097); calves 155,272 (97,070); swine 969,426 (1,038,576); and sheep 235,228 (186,702). Figures for cattle, calves and sheep, however, are not strictly comparable, because in 1934 for the first time it was possible to include a record of *all* shipments to packers. For both years Alberta was the largest shipper in the aggregate and also the largest shipper of hogs and sheep. Saskatchewan led in cattle shipments and Ontario in shipments of calves.

The marketings of live stock through stockyards, by direct shipment to packers, or by export according to provinces of origin for the calendar year 1934 are given in Table 15. In Table 16 are given the statistics of the grading of animals from several provinces marketed through the stockyards in 1934.

¹ Including shipments direct to packers.

Slaughtering and Meat Packing.—This industry has become one of the most important branches of manufacturing in Canada. Its growth, shown by the statistics of Table 17, has been accompanied by a concentration of the major part of the production of the industry into a comparatively small number of large establishments, thereby facilitating the utilization of by-products and greater efficiency

of operation. The large increase in the number of establishments in 1931 is due to the inclusion of wholesale butchers operating small plants engaged in slaughtering only. The addition of these small establishments does not affect materially the value of production of the industry. The numbers of live stock slaughtered at Canadian inspected establishments in 1933 and 1934 are shown in Table 18.

Consumption of Animal Products.—The figures of Table 19 provide an indication of the standard of diet of the people of Canada. Animal products such as meats, butter and eggs are generally regarded as features of the diet of people with a high standard of living. In Canada the per capita consumption of beef and pork, butter and eggs is high, while that of mutton and lamb and cheese is low. The per capita consumption of these products has not been affected by the depression as much as might have been expected. The per capita consumption in 1929 was estimated as: beef 66.57 lb.; pork 77.65 lb.; total meats 153.09 lb.; butter 29.26 lb.; eggs 24.65 doz.; and poultry 10.84 lb.

¹ For estimates of population upon which per capita figures are calculated, see p. 141.

² Figures for 1932 have been revised since the publication of the 1934-35 Year Book.

Export and Import Trade in Live Stock and Live-Stock Products.—The exports of live stock and live-stock products from the Dominion to the United Kingdom, the United States and all countries, are shown for the four fiscal years ended Mar. 31, 1932-35, in Table 12 of the chapter on External Trade, at pp. 536-543, and imports in Table 13 at pp. 560-565. Exports and imports are also available by calendar years 1927-34, and may be found at pp. 71, 73 and 74 of the report on “Live Stock and Animal Products Statistics, 1934”. At pp. 75-97 of the report on “Trade of Canada (Imports for Consumption and Exports), Calendar Year 1934” figures are given of exports of “Animals and Animal Products” for 1933 and 1934 and imports of this class for the same calendar years will be found at pp. 211-234 of the same report.

Section 4.—Cold Storage.

Cold Storage Warehouses.—Under the Cold Storage Act, 1907 (6-7 Edw. VII, c. 6), now consolidated as c. 25, R.S.C., 1927, subsidies have been granted by the Dominion Government toward the construction and equipment of cold storage warehouses open to the public, the Act and regulations made thereunder being administered by the Department of Agriculture. Table 20 shows for 1934 and 1935 the number of cold storage warehouses in Canada, with the refrigerated space.

20.—Cold Storage Warehouses in Canada, by Provinces, 1934 and 1935.

NOTE.—The figures in this table are supplied through the courtesy of J. F. Singleton, Dairy and Cold Storage Commissioner, Dominion Department of Agriculture.

¹ To Oct. 31.

Cold Storage Stocks.—Statistics of the stocks of food in the cold storage warehouses of Canada are collected and published monthly by the Agricultural Branch of the Dominion Bureau of Statistics. A summary of the cold storage data is included in the report on "Live Stock and Animal Products Statistics", published annually. In Table 21 are included statistics by months, for 1934 and 1935, of the stocks of food in cold storage and in process of cure for various important commodities.

21.—Stocks of Food on Hand in Cold Storage and in Process of Cure, by Months and Commodities, 1934 and 1935.

NOTE.—Figures in this table are of stocks on hand on the first of each month as published by the Agricultural Branch, Dominion Bureau of Statistics.

¹ Revised since the publication of the 1934-35 Year Book.

Section 5.—Bounties.*

In cases where it is considered advisable for the Government to encourage the production of a particular commodity, bounties paid by the Government are recognized substitutes for protective duties. In the past they have been made use of by Canada to a considerable degree, but the only bounties which involved payments in the last few years were those on copper bars and rods, hemp and bituminous coal mined in Canada and used in the manufacture of iron or steel. The Copper Bounty Act expired on June 30, 1931, and the Hemp Bounty Act expired on Dec. 31, 1932, and a statement of the bounties paid under these Acts was given on p. 662 of the 1934-35 Year Book. The bounty on bituminous coal was the outcome of a recommendation of the Royal Commission on Maritime Claims relating to the use of Canadian coal in the manufacture of iron and steel and the payments have been as follows:—

Paid in the fiscal year—

1930-31.....	273,148 tons at 49½c.....	\$ 135,209·23
1931-32.....	126,356 tons at 49½c.....	62,546·18
1932-33.....	118,783 tons at 49½c.....	58,797·54
1933-34.....	213,841 tons at 49½c.....	105,851·25
1934-35.....	336,849 tons at 49½c.....	166,740·02
1935-36 to Sept. 30, 1935.....	188,086 tons at 49½c.....	93,102·55
Totals.....	1,257,063 tons.....	\$ 622,246·77

Bounties have been paid at various times in the past on iron and steel, on lead, on crude petroleum, on manila fibre, on zinc and on linen yarns, but the bounties on iron and steel ceased in 1911, on lead in 1918, on zinc in 1921, on linen yarns in 1923 and on crude petroleum in 1927. The total amounts paid in bounties on these commodities between 1896 and the date of expiration were: iron and steel, and manufactures of (1896-1912), \$16,785,827 (Canada Year Book 1915, p. 460); lead (1899-1918), \$1,979,216 for 1,187,169,878 lb.; zinc, \$400,000; linen yarns, \$17,523; manila fibre (1903-13), \$367,962; crude petroleum (1905-27), \$3,457,173 on 233,135,217 gallons. (For quantities of crude petroleum and bounties paid in each year, see table on p. 635 of the 1927-28 Year Book.) Total payments for expired bounties between 1896 and 1932, including the \$611,763 paid on copper bars and rods and the \$26,847 for hemp, aggregated \$23,646,311, which, with the \$622,247 paid for coal, make a total of \$24,268,558. The Year Book of 1915, pp. 459-461, gave a description of the bounties that had been payable since 1883, as well as tables showing, for each commodity, the quantities on which bounties were annually paid and the amounts of such bounties for the years 1896 to 1915 inclusive. For details of the bounties on zinc, see p. 635 of the 1927-28 Year Book.

Section 6.—Patents, Copyrights and Trade Marks.†

Patents.—Letters patent, which in England have been in the gift of the Crown from the time of the Statute of Monopolies and earlier, are a purely statutory grant in Canada and have always been so. The earliest Act was one of Lower Canada, passed in 1824, wherein provision was made for the granting of patent rights to inventors who were British subjects and inhabitants of the province. Upper Canada passed its Act in 1826, and Nova Scotia and New Brunswick passed

*Revised by L. T. Lett, Chief Accountant, Department of Trade and Commerce.

† Revised by J. T. Mitchell, Commissioner of Patents, Ottawa.

theirs at later dates. In 1849, after the Union, a consolidating Act was passed applying to both Upper and Lower Canada, and the B.N.A. Act assigned the granting of patents exclusively to the Parliament of Canada. The Dominion Patent Act of 1869 repealed the provincial Acts and has formed the basis of all succeeding Acts.

Letters patent are now issued subject to the provisions of c. 150, R.S.C., 1927 (as amended by c. 4, 1928, c. 34, 1930, c. 21, 1932, and c. 32, 1935), and application for protection relating to the same should be addressed to the Commissioner of Patents, Ottawa, Canada.

Invention means any new and useful art, process, machine, manufacture or composition of matter or any new and useful improvement in any art, process, machine, manufacture or composition of matter.

The growth of Canadian inventions is shown by the fact that the number of applications and total fees increased each year without a break from the beginning of the present century until the fiscal year ended Mar. 31, 1913, when 8,681 applications were received and the total fees amounted to \$218,125. In the fiscal year ended Mar. 31, 1935, there were 9,404 applications, with fees amounting to \$353,460, as shown in Table 23. Of the patents of 1935, 5,624 or 64 p.c. were issued to United States' inventors, 885 to Canadians and 901 to residents of Great Britain and Ireland, while Germany with 544, France with 180, Switzerland with 89, and Sweden with 83 came next in the number of inventors to whom patents were issued. Applications for patents were distributed pretty well over the whole field of invention without showing outstanding trends along any particular lines.

Copyrights and Trade Marks.—Registration of copyright is governed by c. 32, R.S.C., 1927, and applications for protection relating to same should be addressed to the Commissioner of Patents, Ottawa, Canada.

The Copyright Act of 1921 (amended in 1923 and consolidated in c. 32, R.S.C., 1927) sets out in Section 4 the qualifications for a copyright, and in Section 5 its duration: "Copyrights shall subsist in Canada . . . in every original literary, dramatic, musical and artistic work, if the author was, at the date of the making of the work, a British subject, a citizen or subject of a foreign country which has adhered to the (Berne) Convention and the additional Protocol . . . or resident within His Majesty's Dominions. The term for which the copyright shall subsist shall, except as otherwise expressly provided by this Act, be the life of the author and a period of fifty years after his death".

Copyright protection is extended to records, perforated rolls, cinematographic films and other contrivances by means of which a work may be mechanically performed. The intention of the Act is to enable Canadian authors to obtain full copyright protection throughout all parts of His Majesty's Dominions, foreign countries of the Copyright Union, and the United States of America, as well as in Canada.

The Trade Mark and Design Act (c. 201, R.S.C., 1927) was amended by c. 10 of the Statutes of 1928, bringing the Act into agreement with the terms of the Convention for the Protection of Industrial Property, as amended at The Hague in 1925 with regard to refusal to register certain trade marks. The renewal of expired trade mark registration was also provided for, while it was also enacted that in certain cases interested parties might apply to the Exchequer Court of Canada for the cancellation of a trade mark at any time within three years from its registration. The Unfair Competition Act, 1932, (22-23 Geo. V, c. 38), repealed all parts of the above Act relating to trade marks and all trade marks are now registered under and protected by the new Act.

Section 7.—Weights and Measures.*

The object of weights and measures administration is to maintain uniformity and accuracy in the use of the legal standards of the country in industry and commerce, to protect the public from short weight and measure and the trading community from unfair competition arising from such practices.

Prior to Confederation, the administration of weights and measures was in the hands of each Provincial Government but passed to the Dominion Government in 1867, under Section 91 of the British North America Act. Steps were then taken to simplify the standards in use and to establish uniformity throughout the Dominion.

What might be termed the principal Weights and Measures Act of Canada was passed in the session of 1872-73; its provisions closely followed English weights and measures law, but the system of weights and measures was greatly simplified. This Act established as the primary legal standards for Canada the imperial pound, gallon and yard, but in place of the system of stones, quarters, hundredweights (112 lb.) and the long ton (2,240 lb.) it provided a decimal series of weights, 1, 2, 3, 5, 10, 20, 30, 50, 100 lb., and the short ton of 2,000 lb. The only exception to this was the continued use of the old French land measure, the arpent, in Quebec. The troy ounce of 480 grains and its decimal submultiples are the legal weights for the weighing of gold and precious metals. The metric system is legal for all transactions.

Many changes, deletions and additions have been made to the Act of 1873 by later legislation, but its principles remain unchanged. The latest legislation is the Weights and Measures Act (c. 212, R.S.C., 1927), as amended by c. 48, 1935.

The Weights and Measures Service was first administered by the Department of Inland Revenue, and offices were opened in all the principal centres of Canada and equipped with standards and inspection equipment. In 1918 the Service was transferred to the Department of Trade and Commerce. For purposes of adminis-

* Revised by E. O. Way, Director of Weights and Measures, Department of Trade and Commerce.

tration, the Dominion is divided into 18 districts, each in charge of a district inspector. The chief rules of administration are as follows:—

(a) Every new type of weighing and measuring device must be submitted to the Department at Ottawa for approval before being placed on the market.

(b) Every new machine must be inspected and stamped by an inspector before being sold or taken into use.

(c) Imported machines are held by the customs until release is approved by the nearest inspector.

(d) All inspections take place on the traders' premises, except where devices are brought to the inspection offices.

(e) Fees are charged for inspection and stamping, the schedule being defined by Order in Council, and all moneys so collected are paid into the Consolidated Revenue Fund of Canada.

The following table is a summary of the articles and machines inspected in the fiscal years ended Mar. 31, 1934 and 1935. The total revenues collected by the Service in the fiscal years ended 1934 and 1935 amounted to \$399,717 and \$407,302, respectively, while the expenses, including salaries, totalled \$286,666 and \$291,983, respectively.

Section 8.—Electricity and Gas Inspection.*

The Electricity and Gas Inspection Branch of the Department of Trade and Commerce administers three Acts: the Electricity Inspection Act (c. 22, 1928), the Gas Inspection Act (c. 82, R.S.C., 1927), and the Electricity and Fluid Exportation Act (c. 54, R.S.C., 1927).

The latest report of the Branch shows 465,478 electricity and gas meters tested in the fiscal year ended Mar. 31, 1935, as compared with 402,662 in the preceding year. The total revenue derived from electricity and gas inspection was \$313,972, as compared with an expenditure of \$198,576. The Branch also collected \$266,622 as export duty and licence fees under the provisions of the Electricity and Fluid Exportation Act; the cost of collecting this revenue was only \$398.

Other related statistics collected in the administration of the last-named Act will be found on p. 394, in the Water Power chapter of the Year Book. Here, however, are given statistics, also collected by the Branch in the process of administra-

* Revised by J. L. Stiver, Director, Electricity and Gas Inspection Service, Department of Trade and Commerce.

tion, showing a phenomenal increase in the number of consumers of electricity in the past 20 years, from 517,629 to 1,760,262 (Table 27); a lesser increase in the gas meters in use from 267,454 in 1916 to 658,363 in 1935 (Table 28); and the number of cubic feet of gas sold in Canada from 1920 to 1935 classified as carburetted water gas, coal gas, coke oven gas, natural gas, acetylene gas and butane (Table 29).

Section 9.—Merchandising and Service Establishments.*

A comprehensive census of business carried on by trading and service establishments was undertaken for the first time in 1931 in connection with the Seventh Decennial Census. A partial survey of trading establishments had been made in 1924, but the results of this initial survey, while indicative of the extent of domestic trade, suffered from the incompleteness of the canvass made. The Census of Merchandising and Service Establishments, 1931, covered not only the operations of retail and wholesale merchandising establishments in 1930 but also those of service establishments, including hotels. In addition, information was collected to show the initial channels (manufacturers' wholesale branches, other wholesalers, retailers, industrial consumers, export sales, etc.) through which goods manufactured in Canada are distributed and the proportions of the total value of production sold through each channel. The results of the census have been published in several series of reports and will also be embodied in the census volumes.

Annual Statistics.—An outgrowth of the Census of Merchandising and Service Establishments, 1931, has been an annual survey of wholesale and retail trade based on reports from larger concerns in the respective fields. In the case of wholesale trade, the annual survey is confined to wholesalers proper and reports are secured from firms which had a volume of sales of \$100,000 or more in 1930 together with firms of a similar size which have commenced business since 1930. The survey of retail trade is based on the reports of all chain stores and of independent stores with a turnover of \$20,000 or more in 1930. Reports are also secured from newly-established independent stores. While the annual figures for merchandising are not based on such a comprehensive survey as that made in connection with the decennial census, they provide the most reliable indicators available of recent trends in merchandise trade as they cover more than two-thirds of the dollar volume of business.

Monthly Statistics.—As a further development from the Census of Merchandising and Service Establishments, 1931, it has been possible to place the monthly index of retail sales, published in recent years by the Bureau, on a permanent basis. A description of this index appears in Subsection 2 of this chapter.

Subsection 1.—Wholesale and Other Bulk or Non-Retail Merchandising.

Under this heading there appeared at pp. 670-672 of the 1934-35 Year Book a summary of trade in the wholesale field, as derived from the Census of Merchandising and Service Establishments, and tables showing, for 1930, bulk merchandising statistics (1) by provinces, and (2) by type of distributor. The interested reader is referred to that material which is the latest available. Supplementary data for the chief cities in Canada are given below.

Wholesale Trade in Canadian Cities.—Summary figures for all wholesale establishments and for wholesalers proper in cities of over 20,000 population are shown for 1930 in Table 30. Included in the figures for all wholesale establishments are data for agents, brokers, manufacturers' sales branches and other specialized wholesale agencies. Wholesalers proper embrace only regular wholesale houses, such as wholesale merchants, importers and exporters. The importance of such cities as Montreal, Toronto, Winnipeg and Vancouver as wholesale centres is clearly shown by the figures in Table 30.

*Prepared by Herbert Marshall, B.A., F.S.S., Chief, Internal Trade Branch, Dominion Bureau of Statistics. For a list of publications of this Branch, see Chapter XXIX, Section 1, under "Internal Trade".

Annual Wholesale Statistics.—In constructing an annual index of wholesale sales, the chief objective has been to obtain the most representative measure of wholesale trade and particularly of the pre-retail business. This annual index is confined to wholesalers proper. Wholesalers proper are mainly wholesale merchants, importers, exporters and supply and machinery distributors. From this group are excluded such distributors as agents and brokers, manufacturers' sales branches and other types of specialized distributors. However, in order to attain the above mentioned objective of a representative measure of wholesale trade, it has been necessary to make some alterations in the classifications used in presenting the results of the Census of Merchandising and Service Establishments, 1931. The principal alterations* have been to include with wholesalers proper shown here certain bulk distributors of petroleum products and head-office domestic sales of meat-packing plants which were not included with wholesalers proper in the presentation of the census statistics for 1930. Other minor changes have also been made. The net result has been to increase the value for 1930 sales of wholesalers proper from \$1,111,319,200 as shown on pp. 671-672 of the 1934-35 Year Book to \$1,370,066,000 as shown in Table 31.

Total sales and indexes of sales are shown by provinces and kinds of business; the 1930 figures are those of the census, while those for 1931-34 are estimates based

* These alterations are described in detail in the bulletin "Wholesale Trade in Canada and the Provinces, 1933", obtainable from the Dominion Bureau of Statistics.

on the results of the annual surveys. The wholesale trade in Canada during the year 1934 amounted to \$1,023,296,000 compared with \$1,370,066,000 in 1930. While the sales were thus 25.3 p.c. below the 1930 level, there was an advance in 1934 of 13.6 p.c. over the value of wholesale trade in 1933. This brought the total for 1934 above the 1932 figures and only 10 p.c. below that for 1931. The largest increases in sales in 1934 were reported by firms dealing in industrial equipment and supplies which had suffered the most severe losses in trade between 1930 and 1933. To what extent movements in the value of wholesale sales are due to changes in prices or to variations in the physical volume of goods handled cannot be determined accurately.

¹ The difference between this total and that shown under the heading of wholesalers proper on pp. 671-672 of the 1934-35 Year Book is due to a reclassification of some firms as between wholesalers proper and other bulk distributors.

Subsection 2.—Retail Trade and Service Establishments.

As complete a review of the retail merchandising and service statistics as will appear in the Year Book from the Census of Merchandising and Service Establishments, 1931, was given at pp. 673-690 inclusive of the 1934-35 Year Book. This review gave detailed analyses of such trade, annual net sales and employees engaged, by provinces, business groups and kinds of business, and by manner of operation (*i.e.*, independents, two-store multiples, three-store multiples, voluntary and other types of chains, etc.). Since these statistics will stand until the next census is taken, it has been considered unnecessary to reprint them in this edition of the Year Book, especially as the available space has been used to better advantage in publishing new material, such as the review of retail trade 1923-30 and the annual estimates of such trade since 1930, which would not otherwise have been possible. In this edition, therefore, the only table reprinted, and this merely in part, is that showing the retail trade in Canadian cities, which appears now as Table 32. There is, however, additional new matter presented dealing with: (1) a review of retail trade, 1923-30; (2) total sales and indexes of sales by provinces and kinds of business 1930-34 (figures for 1930 being from the census and those for other years estimates based upon returns secured for the annual surveys); (3) the growth of the chain store; (4) the new monthly index of retail sales which has lately assumed permanent form and in which corrections have been made to allow for variations in number of business days and for seasonal changes; and (5) detailed statistics showing the importance of the motion picture industry, recently made available as a result of a special study of this field.

Retail Merchandise Trade of Canadian Cities.—The retail merchandise trade in Canadian cities of over 20,000 population is shown in Table 32.* The cities are arranged in descending order according to their 1931 census populations. A notable feature of these figures is the wide variation in different cities in the relationship between population and retail sales. In general, per capita sales are high for cities which form distributing centres for large or populous areas, while such sales are lowest in residential or industrial cities adjacent to larger centres, as in the case of Verdun, Outremont, Westmount and Hull.

* A similar table showing retail merchandise trade in cities of over 10,000 population was published at pp. 684-685 of the 1934-35 Year Book.

Review of Retail Trade, 1923-30.—On the completion of the Census of Merchandising and Service Establishments, 1931, which provided a complete enumeration of merchandising establishments, it became possible to carry back to 1923 (the year for which partial returns had first been obtained) calculations of the annual value of retail merchandise trade. For certain sections of retail trade the evidence presented to the Royal Commission on Price Spreads in 1935 provided a considerable amount of information on movements in retail trade prior to 1930. In the main, however, the estimates have been made on the basis of net consumption figures derived from the production and external trade records.* While the results obtained cannot approach the accuracy or comprehensiveness of the census figures, it is believed that they are sufficiently reliable to be used as indicators of the trend in retail merchandise trade in the period from 1923 to 1930.

Changes in the value of retail sales are due both to changes in the level of retail prices and in the physical volume of goods sold. Over a period of years the quantities of commodities purchased are affected chiefly by the growth in population and the available purchasing power in the hands of consumers. The general level of retail prices remained relatively constant from 1923 to 1930, although there were significant changes in the nature of some of the goods purchased in this period. These changes are reflected in the estimated sales of retail stores by kinds-of-business groups although such figures cannot be taken as estimates of commodity sales.

Retail Sales by Kinds of Business.—Sales of retail stores handling staple commodities, such as food and clothing, showed, by the figures of Table 33, a fairly uniform rate of growth in the period prior to 1930, but the trade in semi-durable goods—automobiles, furniture, radios, household appliances, etc.—advanced to a much greater extent as the purchasing power of consumers was enlarged by rising incomes and the extension of instalment credit. Some indication of the expansion in these lines is given by the figures shown for the automotive and furniture and household groups, but the sales for these kinds of business do not indicate the full

* See the bulletin "A Decade of Retail Trade", obtainable from the Dominion Statistician, for a discussion of methods employed in the calculations.

extent of the increase in these lines as some of the commodities are handled by other trades. The expansion in the sales of the general merchandise group is significant in this connection.

RETAIL MERCHANDISE SALES BY ECONOMIC DIVISIONS 1923-1934

(SEMI-LOGARITHMIC SCALE)

Retail Sales by Economic Divisions.—The estimates of retail sales in the period prior to 1930 for economic divisions are, of course, subject to a greater margin of error than is the case for figures for Canada as a whole as consumption data are not generally available by provinces. Nevertheless, it is thought that the sales figures shown in Table 34 give a general indication of the movements in retail trade by economic divisions during the period under review.

The trend in sales from 1925 to 1928 was roughly parallel in all economic divisions. A considerable divergence at the beginning and end of the period may be noted for the Prairie Provinces, where the purchasing power of consumers is dependent, to a considerable extent, upon the level of agricultural income. The peak of sales in this region was reached in the year 1928 and thereafter the decline in trade was more severe than in other areas.

Annual Retail Statistics.—As in the case of wholesale merchandising, annual statistics of retail sales are based on the complete census covering 1930, supplemented by an annual survey of all the more important retail establishments, such establishments having accounted for over two-thirds of the total value of sales in 1930. In Table 35, therefore, the figures for 1930 are the results of the comprehensive census, while the figures for later years are estimates calculated from the annual surveys.

It is impossible to measure accurately the effect of the general decline in prices as a factor in the decrease in the total sales from 1930 to 1933. It probably was the principal factor in the food and apparel groups. On the other hand, the prices of more durable goods have not declined so much as food prices, so that the greater reduction in sales of groups handling durable goods is, no doubt, due much more to reduced volume.

Although retail sales in 1934 showed an increase of 9.4 p.c. over the total for 1933, they were still 29.5 p.c. below the 1930 level. While increases in trade were general for practically all lines in 1934, compared with 1933, the greatest gains were made by the automotive, the lumber and building materials and the furniture and household groups. Increases in the value of retail trade for 1934 were reported by all provinces; the largest increase over the preceding year, 11.4 p.c., was recorded for Nova Scotia and the smallest, 6.1 p.c., for Quebec. (See Table 35.)

Chain Stores.—During the past decade the chain store has come to occupy an important place in the field of distribution. The Dominion Bureau of Statistics classifies as chains all retail organizations operating four or more branches, excepting departmental concerns. The number of chains reported in any year thus depends not only on the rise or disappearance of firms but also on the number of units operated. As a minimum of four stores is required before a firm is classified as a chain, the reduction in branches below this number automatically removes a firm from the chain store group. In an effort to obtain some comparative information for chain stores, a careful check was made of census and other records for the year 1923. The data secured do not provide complete figures for chain stores in the early year but the figures in Table 36 give some indication of the growth in chain stores between 1923 and 1930 for the trades in which chains hold important positions.

The sales of chain stores formed 17·7 p.c. of the total retail merchandise trade in 1930 and 17·9 p.c. in 1934. Grocery and combination store chains had 29·5 p.c. of the total sales for these businesses in 1930 and 32·8 p.c. in 1934. The proportion of chain sales to total sales in some other important lines of trade for the year 1934 were: Filling stations, 30·5 p.c.; shoe stores, 29·8 p.c.; drug stores, 19·5 p.c.; and furniture stores, 19·2 p.c. Summary figures for all chain stores in Canada are given in Table 37.

Monthly Indexes of Retail Sales.—In recent years the Dominion Bureau of Statistics has published monthly indexes of the dollar value of retail sales based upon reports received from department stores and from chain organizations operating in thirteen lines of business. While these reports cover only a part of the field and relate only to the business of department and chain stores, they embrace a sufficiently large number of stores to provide a fairly accurate indication of the current movements in retail sales for the kinds of business which are included.

Two sets of figures are shown for the general indexes of retail trade in Table 38; in the first set no adjustments have been made, while in the second, corrections are incorporated to allow for variations in number of business days and for seasonal influences. This general index of retail sales shows that the low point in retail trade was reached in the early part of 1933. Since that time there has been a gradual improvement in the dollar volume of sales. It has already been pointed out in connection with the annual merchandising figures that the dollar value of retail sales is greatly affected by changes in price levels. This factor should be borne in mind when considering the monthly indexes of retail sales.

A comparison of the unadjusted indexes of retail sales based upon the aggregate monthly figures of the reporting firms reveals wide seasonal swings in most lines of retail business. In general, retail sales are lowest in January and February and are highest for the year in December. A secondary peak in the spring months is followed by a recession during July and August which brings the level of trade almost to the low point of January and February. Seasonal swings are not similar in extent or timing for all lines of business. The variations are least for those kinds of business which deal chiefly in commodities subject to regular and continuous demand, while the seasonal effects are greatest in those lines of trade dealing in merchandise for which the demand is subject to definite conventional or seasonal influences. Drug stores, grocery and meat stores and restaurants belong to the first group, while clothing, shoe, radio and music, hardware and furniture stores belong to the latter.

The indexes of retail sales for the individual lines of business mentioned in Table 39 are corrected to allow both for variations in the number of business days in different months and for usual seasonal influences.

38.—Index Numbers of Retail Sales Based on Monthly Reports of Department and Chain Stores, January, 1929, to December, 1935.

NOTE.—The general indexes are composite figures secured by weighting the indexes of sales for the thirteen kinds of business in proportion to their relative position in the total trade.

Motion Picture Statistics.—The motion picture has become the most popular form of public entertainment and the business of satisfying the demand for such amusement has assumed a corresponding importance. In 1930 the expenditure on motion picture entertainment (exclusive of amusement taxes) was \$3.77 per capita in Canada. By 1934, due to reduced patronage and lower prices of tickets, the per

capita expenditure had dropped to \$2.33. The statistics for motion picture theatres in Canada were secured for the first time in connection with the Census of Merchandising and Service Establishments, 1931. According to the results of this census, there were 910 motion picture theatres in operation in 1930. During the depression a number of theatres were closed so that in 1933 only 765 were reported. The following year some recovery took place and 799 theatres were reported in operation. Summary figures of motion picture theatres by provinces for 1930, 1933 and 1934 are given in Table 40 and the principal statistics by leading cities for 1933 and 1934 in Table 41.

CHAPTER XVIII.—TRANSPORTATION AND COMMUNICATIONS.

Canada is a country of continental dimensions, nearly 4,000 miles in length from east to west, with its relatively small population of 10,949,000 (estimated population as at June 1, 1935), in the main thinly distributed along the southern borders of its vast area. Different parts of the country are shut off from each other by areas which are almost wildernesses, such as the region lying between New Brunswick and Quebec and the areas north of lakes Huron and Superior, the last dividing the industrial region of Ontario and Quebec from the agricultural areas of the prairies. To such a country with such a population, producing, like our western agriculturists, mainly for export, or, like our manufacturers, largely for consumption in distant portions of the country itself, cheap transportation is a necessity of life. Before 1850, when the water routes were the chief avenues of transportation and were closed by ice for several months each year, the business of the central portions of the country was reduced to a state of relative inactivity during the winter. The steam railway was, therefore, required for the adequate economic development of Canada, more particularly for linking up with the commercial and industrial world the vast productive areas of the Canadian West, and thus promoting their development. The construction of the Canadian Pacific railway gave to Canada, as an economic unit, length; the building of the newer transcontinental railways has given the country breadth.

Railway transportation, though essential, is nevertheless expensive, particularly in post-war years, and for bulky and weighty commodities. Hence new enterprises have either been undertaken or are under consideration for improving water communication, such as the new and deeper Welland canal, the deepening of the St. Lawrence canals and of the channel between Montreal and Quebec, and the development of the Hudson Bay route.

Problems of transportation are, therefore, of vital importance in the economic life of Canada, occupying a large part of the time and thought of our Parliaments and public men. Scarcely less important, from the social and economic points of view, is the development of methods of communication in a country so vast and so thinly peopled. The Post Office has been a great though little recognized factor in promoting solidarity among the people of different parts of the Dominion, while telegraphs and telephones have gone far to annihilate distance; the rural telephone, in particular, has been of great social and economic benefit in country districts. The use of the automobile has also been of great benefit in promoting social intercourse and in facilitating the transaction of business among the dwellers of both urban and rural districts. The press, again, assisted by cheap telegraph and cable rates, and reaching, through the mails, all parts of the country, has been of use in developing national sentiment. To sum up, it may be said that the progress of modern inventions, not least among which is the radio, has greatly improved living conditions in both rural and urban communities throughout the Dominion.

Part I of this chapter includes a statement of the tendencies toward monopoly which have made it necessary to establish a measure of government control over those transportation and communication agencies which are not governmentally-owned and operated; to this is added an account of the origin and functions of the

Board of Railway Commissioners. The subsequent parts deal in order with steam railways, electric railways, express companies, roads, motor vehicles, air navigation, canals, shipping, telegraphs, telephones, radio and the Post Office.

PART I.—GOVERNMENT CONTROL OVER AGENCIES OF TRANSPORTATION AND COMMUNICATION.

Private enterprises engaged in the transportation and communication business in Canada have, in the past 50 years, shown the same tendency toward consolidation and amalgamation which has been evident elsewhere throughout the civilized world. The basic reason for such consolidation and amalgamation has been the fact that the business of transportation and communication is, generally speaking, a "natural monopoly", *i.e.*, a type of enterprise in which service can be more efficiently and economically rendered to the public where one or a few concerns control a particular type of service throughout the country. The outstanding example of these consolidations in Canada in our time is the concentration of control of the railways of the country in the hands of the Canadian Pacific Railway Company and the Canadian National Railway Company.

However, since such control brings with it an element of monopoly and possible overcharge which is distasteful to the public, it has been deemed advisable in Canada, as in other countries, to set up authorities controlling the rates to be charged and the other conditions on which services to the public are to be rendered by common carriers. This control, so far as railways within the jurisdiction of the Dominion Government are concerned, has been placed in the hands of the Board of Railway Commissioners, whose authority has been extended to cover various other means of transportation and communication. A brief summary of the history and functions of this body follows on pp. 651-652.

Besides the Board of Railway Commissioners, dealing with the larger public utilities coming under the jurisdiction of the Dominion Government, there exist, in several of the provinces, bodies which undertake among their duties the supervision and control of local public utilities operating under the jurisdiction of the provinces, and the regulation of their rates for service. Among these is the Ontario Department of Municipal Affairs (formerly the Railway and Municipal Board of Ontario, established in 1906), which controls the construction, operation and maintenance of railways, and approves of their rates and their rules and regulations affecting the public. Similarly, in Quebec, a Commission of Public Utilities was established in 1909 and was given superintendence over all Quebec corporations, other than municipalities, "that own, operate, manage or control any system, works, plant or equipment for the conveyance of telegraph or telephone messages or for the conveyance of travellers or goods over a railway, street railway or tramway". In Nova Scotia there is a Board of Commissioners of Public Utilities and in Manitoba a Public Utilities Commission with similar functions, while in the three westernmost provinces these same duties are performed by provincial Departments of Railways.

Due to changing conditions and increasing complexities in the transportation field, the Dominion Government appointed in 1931 a Royal Commission to inquire into the whole problem of transportation in Canada, particularly in relation to railways and shipping and communication facilities, having regard to present conditions and the probable future development of the country. (See pp. 648-650 of the 1933 Year Book.)

The Board of Railway Commissioners for Canada.*

In the early days of railway building in Canada, the provinces were more concerned with rapid development than with rate regulation. Under the Railway Clauses Consolidation Act of 1851, rates were fixed by the directors of the railway, subject to the approval of the Governor in Council. Beyond this, competition was relied upon to bring rates to a reasonable level. As time went on, however, those who believed in the efficacy of competition as a regulator were disillusioned. For example, complaints were made that the Grand Trunk gave low through transit rates, say from Chicago to New York, through Canada, and recouped itself by high non-competitive rates in Upper Canada. In 1888, the supervision of rates was assigned to the Railway Committee of the Privy Council, sitting in Ottawa.

At the turn of the century, two reports were prepared for the Department of Railways and Canals by Prof. S. J. McLean, the first setting down the experience of railway commissions in England and the United States, and the second discussing Canadian rate grievances, with a recommendation that regulation by commission be adopted in Canada. The second report found that non-competitive rates were exorbitant as compared with competitive rates and that the railways had exercised their right to vary rates without notice, to the great distress of shippers. Among the weaknesses of the Railway Committee as a rate-regulating body was its fixed station at Ottawa, which made the cost of appearing before it practically prohibitive. Besides, members of Parliament had no necessary aptitude for dealing with railway rates, and of their two functions—legislative and administrative—the legislative was to them the more important.

The Board of Railway Commissioners for Canada, as provided for by the amended Railway Act of 1903, was organized on Feb. 1, 1904. In the beginning, its membership consisted of a Chief Commissioner, a Deputy Chief and one Commissioner. In 1908 the membership was increased by the inclusion of an Assistant Chief Commissioner and two other Commissioners. According to the Act, the Board may be divided into two sections of three members but, since any two constitute a quorum, two Commissioners usually hear all but the more important cases, and, agreeing, give the decision of the Board.

The powers of the Commission, in brief, are in matters relating to the location, construction and operation of railways. The most important of these powers has to do with rate regulation. Passenger rates are divided into standard and special, freight rates into standard, special and competitive. Standard rates are maximum rates and the only ones which must be approved by the Board before they are applied. Special and competitive rates, being less than maximum rates, may be applied by railways without the Board's approval, provided that a change of rates has been advertised. But important rate adjustments usually come to the notice of the Commission, for the changed rate alters the extent of the territory in which a shipper can compete and on this account he is apt to appeal the case to the Commission. It is a knotty problem to mark the boundaries of competitive areas—to decide whether Nova Scotian manufacturers should be given rates which would allow them to compete west of Montreal, or again, whether high construction and operation costs in British Columbia should enforce a rate which prevents her goods from moving far into the prairies. By an amendment to the Railway Act, the regulation of telephone, telegraph and express rates was given to the Commission, but with narrower powers than were given to it in dealing with railways

*Revised by P. F. Baillargeon, Secretary, Board of Railway Commissioners for Canada.

The procedure of the Board is informal, as suits the nature of its work, for experience has shown that hearings in strict legal form give the parties to the argument uncompromising attitudes. If possible, matters are settled by recommendations to the railway company or the shipper; thus, during 1934, 94.7 p.c. of the applications to the Board were settled without formal hearing. The Railway Committee had kept its station at Ottawa, giving only formal hearings, so that the grievances of those who could not afford to appear in person or pay counsel went unredressed. The itineraries of the Railway Commission are arranged so that evidence may be taken at the least expense to those giving it.

The Chief or Assistant Chief Commissioner, depending upon which one is presiding, gives final judgment on points of law when, in the opinion of the Commissioners, the question is one of law. On questions of fact the findings of the Board are final and are not qualified by previous judgments of any other court. Questions of law and jurisdiction are differentiated. In the first case, the Board may, if it wishes, allow an appeal to the Supreme Court; in the second, the applicant needs no permission to present his appeal.

The Railway Committee of the Privy Council, being a Committee of the Cabinet, was responsible to Parliament. When the powers of the Committee were made over to the Railway Commission the responsibility was retained, but necessarily by a different means. There is now provision for an appeal from any decision to the Governor General in Council, who may also of his own motion rescind or vary the action of the Board, but the power to rescind or vary usually consists in referring to the Board for reconsideration. From its inception until Dec. 31, 1934, the Board gave formal hearing to 10,184 cases. Its decision was appealed in 113 cases, 68 of these being to the Supreme Court of Canada and 45 to the Governor General in Council. Of the appeals, 13 of those carried to the Supreme Court were allowed and 3 of those to the Governor General in Council.

PART II.—STEAM RAILWAYS.*

Section I.—Historical Sketch.

Construction was begun on the first Canadian railway in 1835. This was a line only 16 miles long between St. Johns and Laprairie, Quebec, intended to expedite the journey between Montreal and New York. It was opened for traffic in 1836, being operated at first with horses, for which steam locomotives were substituted a year later. About the same time, a line 6 miles long was built in Nova Scotia from Stellarton to a loading point on Pictou harbour to haul coal from the mines to vessels. On this line also the motive power was at first provided by horses, but in the spring of 1839 the "Samson", a locomotive built in England, brought over in a sailing vessel and still preserved in Halifax, was put in operation. A railway from Montreal to Lachine was opened in 1847 and another line to St. Hyacinthe in 1848. In 1850, however, there were only 66 miles of railway in Canada.

Commencement of the Railway Era—The Grand Trunk.—The railway era in Canada may be said to have begun in 1851, when charters were granted providing for the construction of a main line of railway between the two Canadas. These charters were repealed when the Grand Trunk charter was granted in 1852. The result was the completion of the Grand Trunk Railway between Montreal and

*Revised and checked by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This Branch publishes an annual report on Steam Railways, as well as numerous other reports, for a full list of which the reader is referred to Chapter XXIX of this volume.

Toronto in 1856, its extension westward to Sarnia in 1859, and eastward to Rivière du Loup in 1860. The Atlantic and St. Lawrence Railway, to Portland, Maine, was leased in 1853 and in 1859, on the completion of the Victoria bridge across the St. Lawrence at Montreal, the Grand Trunk had a through route 800 miles long from Portland to Sarnia. Within the next thirty years many important railways of Ontario, including the Great Western, were acquired and the Grand Trunk lines were extended to Chicago.

Construction of the Intercolonial.—An intercolonial railway between the Maritime Provinces and Canada had been proposed as early as the 1830's. In 1844 the Imperial Government made a survey for a military road, and in 1851 agreed to recommend to Parliament either a guarantee of interest or an advance of the sum required to build a railroad. Differences of opinion as to the route resulted in the project being dropped, but in 1853 Nova Scotia undertook to construct by 1862 a trunk line from Halifax to the New Brunswick frontier, with branch lines to Pictou and Victoria Beach. In both Nova Scotia and New Brunswick, however, the scheme of an intercolonial railway broke down for lack of funds, and in 1867 there were only 374 miles of railway in the Maritimes. These, under the B.N.A. Act, passed to the Dominion Government. The latter undertook the completion of the railway, and in 1876 the line was opened to Rivière du Loup. Later on, by acquisition of, lease of, or running rights over, other lines, the Intercolonial was extended to Montreal.

The First Transcontinental Railway—The C.P.R.—As early as 1849 a pamphlet published by Major Carmichael-Smyth advocated the construction of a Canadian Pacific railway along a route approximating that later taken. In 1851 a Parliamentary Committee reported against the enterprise at that time. In 1871 the terms under which British Columbia entered Confederation bound the Dominion to commence the Pacific railway within two years and complete it within ten years. The building of the railway as a public work actually commenced in 1874, but was not very rapidly pushed forward. In 1880 the Government entered into a contract with the Canadian Pacific Railway syndicate, granting to the syndicate all portions of the line completed or under construction, a cash subsidy of \$25,000,000, a land grant of 25,000,000 acres, free admission of materials for construction, and protection for 20 years against competing lines. The company on its side agreed to complete the railway to a fixed standard by May 1, 1891, and thereafter to maintain it efficiently. As a matter of fact, the last spike on the main line was driven on Nov. 7, 1885. Like the Grand Trunk, the Canadian Pacific Railway began to acquire branch lines as feeders in the settled parts of the country along its route.

The Second Transcontinental—The Grand Trunk Pacific.—About the end of the century the Grand Trunk, which already had a line as far west as Chicago, submitted to the Canadian Government a proposal whereby it might participate in the settlement and development of the West. Lines were to be leased from Chicago *via* Minneapolis to Winnipeg, and thence a new line, subsidized by the Government, would be built to the Pacific coast. The Government raised objections to so much of the line lying in the United States and a second proposal was made for a connecting line with larger subsidies from North Bay to Winnipeg. The Government submitted, in 1903, a counter proposal that the line, instead of terminating at North Bay, should be continued east to Moncton, New Brunswick, the eastern section from Moncton to Winnipeg to be constructed by the Government and leased to the Grand Trunk Pacific for a 50-year period, the railway paying no rent for the first seven years and 3 p.c. on the cost of the railway for the remaining

43 years. The western half of the railway from Winnipeg to Prince Rupert was to be built by the Grand Trunk Pacific, the Government guaranteeing interest on bonds to 75 p.c. of the cost of construction, not exceeding \$13,000 per mile on the prairie section and \$30,000 per mile on the mountain section. The Grand Trunk reluctantly accepted this proposition and construction of the National Transcontinental and Grand Trunk Pacific commenced.

The Third Transcontinental—The Canadian Northern Railway.—The third transcontinental railway, the Canadian Northern, was begun in 1896 with the completion by Mackenzie and Mann of the 125-mile line of the Lake Manitoba Railway and Canal Co., chartered in 1889. The charters of the Winnipeg and Hudson Bay, the Manitoba and Southeastern, the Ontario and Rainy River, and the Port Arthur, Duluth and Western were next acquired. Assisted by the Manitoba Government, which desired to establish competition with the Canadian Pacific Railway, the Canadian Northern then secured the Manitoba lines of the Northern Pacific and in 1902 completed its line from Winnipeg to Port Arthur. During the following decade, the agricultural west was filling up very rapidly and, with the public of Canada under the influence of this boom, the Canadian Northern Railway was able to secure guarantees of bonds from the Dominion and Provincial Governments to enable it to extend its lines both westward to Vancouver and eastward to Montreal and so complete the great scheme of a transcontinental road.

Effect of the War on the Railways—The Drayton-Acworth Report.—With two new transcontinental main lines, besides branches, under construction, Canadian railway mileage was doubled between 1900 and 1915, increasing from 17,657 miles in the former year to 34,882 miles in the latter. The builders of the new lines, as well as the Canadian Government and people, had expected that immigration of capital and labour from Europe would rapidly settle the areas tributary to the new railroads and give them abundant and lucrative traffic, as had been the case with the C.P.R. Instead, the War came, and European labour and capital were conscripted for the struggle; immigration fell off, while cost of operation increased, owing to the scarcity of labour and material in Canada. The interest on the bonds had to be met, and in 1915 the Government felt it necessary to give assistance to the railways. In 1916, after having again made loans to the Grand Trunk Pacific Railway and the Canadian Northern Railway Co., a Royal Commission was appointed by Order in Council of July 13, 1916, to investigate: (1) the general problem of transportation, (2) the status of each of the three transcontinental systems, (3) the reorganization of any of the said systems, or their acquisition by the State, and (4) other matters considered by the Commission to be relevant to the general scope of the inquiry. The majority report of the Commission, signed by Sir Henry Drayton and Mr. Acworth, has formed the basis of the subsequent railway policy of Canada. Their recommendation was that the public should take control of the Canadian Northern, of the Grand Trunk Pacific and the Grand Trunk proper, and that they should be administered on purely business principles by a board of trustees, such compensation as seemed proper to be decided by arbitration and given to the shareholders of the Canadian Northern and the Grand Trunk.

The process of the acquisition of these railways and the financial results of their operation down to the end of 1934 are described in Section 3, pp. 670-679.

The Royal Commission of 1931.—During 1930 and 1931 both freight and passenger traffic declined until new low records were being established each succeed-

ing month. Freight and passenger revenues consequently decreased at alarming rates and with increased capital expenditures and fixed charges, the financial condition of Canadian railways demanded re-adjustment. To study the situation and, if possible, to remedy it, the Government appointed a Royal Commission under the chairmanship of the Rt. Hon. L. P. (now Sir Lyman) Duff, Judge of the Supreme Court of Canada, which held hearings throughout the country and on Sept. 13, 1932, submitted its report, summarized at pp. 648-650 of the 1933 Year Book. During the following session of the Dominion Parliament legislation known as The Canadian National-Canadian Pacific Act, (c. 33) 1933, was passed implementing the report of the Commission.

Under this Act the former Board of Directors of the Canadian National Railways is replaced by a board of three trustees, the chairmanship of which is a full-time position. The members are appointed for terms of five years and shall not be removed from office unless for assigned cause and on Address of the Senate and House of Commons. Decisions of the majority, which must include the chairman, will prevail. The trustees must submit each year estimates of requirements to Parliament through the Finance Minister and income deficits shall not be funded. The trustees shall also present annual reports to Parliament through the Minister of Railways and Canals. Continuous audit shall be made by independent auditors appointed annually by Parliament.

Under Part II of the Act the Canadian National and Canadian Pacific Railways are required to co-operate as recommended by the report of the Commission and, in addition, the railways are to divide the employment of such co-operative activities between the employees of the two railways, the division to be made by negotiations with the employees.

The co-operative measures may include:—

- (a) New companies controlled by stock ownership, equitably apportioned between the companies;
- (b) Leases, entrusting agreements, or licences, or agreements for pooling and division of earnings arising from the joint operation of any part or parts of freight or passenger traffic, or express, telegraph, or other operating activities or services;
- (c) Joint trackage, running rights, joint ownership, or joint operating agreements, depending upon the nature of the property or services included in any co-operative plan;
- (d) Joint or individual highway services, or highway and railway services combined, in any form.

In the formation of any new company, the employees in any services taken over by the new company shall be given preference.

Under Part III provision is made for the erection of a tribunal with jurisdiction as recommended by the Commission, except that clause (e) "abandonment of lines, services and facilities" is struck out. The powers of the tribunal may be invoked by either company and decisions of the presiding officer and one member shall be final and binding on both railways, even if one railway fails to appoint a representative. The orders of the tribunal shall be binding and enforced in the same manner as orders of the Board of Railway Commissioners and shall not be subject to appeal except as to jurisdiction and only to the Supreme Court of Canada. Where an order of the tribunal conflicts with an order of the Board of Railway Commissioners the former shall prevail. Where a dispute is of substantial concern to the public, or affects any province, the presiding officer shall give due notice and the interested parties may be heard at the sitting.

Section 2.—Statistics of Steam Railways.

The mileage of steam railways in operation in Canada is given by years for each year from 1850 to 1934 in Table 1, showing the first great period of construction in the 1850's, when the mileage grew from 66 to 2,065, the lull in the 1860's, the second great period of construction in the 1870's and 1880's, the lull in the 1890's, the third great period of construction between 1900 and 1917 and the subsequent falling-off in the rate of increase.

In total railway mileage Canada now ranks fourth with 42,270 miles, the United States, Soviet Russia and British India being the only countries with greater total mileages, and in miles per capita only Australia has a greater average, Canada's density being one mile of line for each 256 persons (exclusive of 339 miles, chiefly main lines of Canadian railways crossing over United States territory).

1.—Record of Steam Railway Mileage as at June 30, 1835-1919, and Dec. 31, 1919-34.

Capital Liability.—The capital liability of the steam railways of Canada is shown in Table 3 for the years 1901 to 1934. The great increase after 1922 is due to the inclusion of all Government loans to railways and investment in road and equipment of Government railways as part of the capital liability of the railways. Statistics of individual lines are given in Table 4.

3.—Capital Liability of Steam Railways, as at June 30, 1901-19, and Dec. 31, 1919-34.

NOTE.—Corresponding figures for each year from 1876 to 1900 inclusive were given on p. 649 of the 1927-28 Year Book.

¹ Canadian lines only.² Including capital of leased lines.³ Constructed and operated by

Ontario Government Railway Commission.

⁴ Included with Canada Southern Ry.⁵ Includes \$202,483,485 Canadian railway capital owned by Canadian railways.

Capital Investment.—The capital investment in road and equipment of Canadian steam railways is shown in Table 5 for the calendar years 1929-34. The table gives the investment in new lines and in additions and betterments during the year, together with the cumulative total of such investments as at the end of each year. During 1934, \$10,987 was invested in new lines and there was a credit of \$9,016,097 for additions and betterments written off, while up to Dec. 31, 1934, a total of \$3,379,233,796 had been invested in road and equipment of Canadian steam railways. When comparison is made with the figures of Table 3, it is seen that the capital liability of the steam railways was considerably greater than the actual investment in physical property by the railways at the same date. This discrepancy is largely accounted for by the fact that the total of capital liabilities as shown in Table 3 includes loans and advances from the Government to cover deficits of the Canadian National Railways and unpaid accrued interest on such loans which, up to Dec. 31, 1934, amounted to \$459,486,187 as shown in Table 21. A further factor in the discrepancy is that some of the outstanding railway stocks represent little actual investment in physical property.

5.—Capital Invested in Road and Equipment of Canadian Steam Railways, calendar years 1929-34.

NOTE.—Figures throughout this table have been revised since the publication of the 1934-35 Year Book.

¹ Includes difference between purchase price of Atlantic, Quebec and Western; Kent Northern; Quebec, Montreal and Southern; and Quebec Oriental Railways and investment reported in 1928—a credit of \$7,198,024; difference between valuation of Northern Alberta Railways and investment of Alberta and Great Waterways, Central Canada, Edmonton, Dunvegan and British Columbia, and Pembina Valley Railways as at June 30, 1929—a credit of \$5,639,429; a credit of \$1,869,859 for the Hereford Railway which ceased operation; and additions and betterments to separately operated properties and other undistributed items amounting to a debit of \$5,828,816.

² Credit of \$13,180,692 for Canadian Northern and Grand Trunk Pacific rails lifted during the War for use in France and other lines dismantled after consolidation of the Canadian National system.

³ Includes a credit of \$6,928,410 due to balance sheet transfers, and a credit of \$1,359,261 for additions and betterments to separately operated properties of Canadian National Railways and miscellaneous credits amounting to \$309,876.

⁴ Includes \$2,900,000 due to balance sheet transfers, a credit of \$179,805 for additions and betterments to separately operated properties of the Canadian National Railways and a credit of \$1,742,894 due to adjustments in investment in leased lines of the Canadian Pacific Railway.

⁵ Includes a credit of \$1,792,204 due to balance sheet transfers of the Canadian National Railways; a credit of \$139,806 due to balance sheet transfers and a credit of \$40,295 for additions and betterments to its separately operated properties, also a debit of \$14,883,370 covering investments of its leased lines not shown in previous years; a credit of \$1,898,829 due to adjustments of expenditures of the Canadian Pacific Railway to Dec. 31, 1932, largely investments in hotels and office buildings previously carried as railway investment, and a debit of \$2,000 due to correction of expenditures for its leased and acquired lines; a credit of \$32,445,146 due to adjustments in investments of the Pacific Great Eastern Railway and a debit of \$413,210 for the Winnipeg River Railway not previously shown.

⁶ Includes a credit of \$908,923 due to balance sheet transfers of the Canadian National Railways; a debit of \$39,878 due to balance sheet transfers and a credit of \$42,032 for additions and betterments to Canadian National separately operated properties; a debit of \$229,533 for the Maritime Coal Railway and Power Co., due to auditors' adjustments; a debit of \$23,182,495 for the Toronto Terminals, also a debit of \$273,700 for the Lacombe and Blindman Valley, covering investments not previously shown.

Summary of Traffic Statistics.—A summary of freight and passenger traffic statistics and of the ratio of operating expenses to gross earnings, continuing a series which has been compiled since 1875, will be found for recent years in Table 6. This table, however, has the defect that its figures of passengers and freight carried are not comparable throughout but have been reduced as a result of the consolidation of railways. Better tests of the real volume of passenger and freight traffic are supplied in Table 9 of this chapter under the headings "Passengers carried one mile" and "Freight carried one mile". These records, commencing in 1915, show that the maximum volume of passenger traffic was reached in the calendar year 1919 and the maximum volume of freight traffic in 1928. Both freight and passenger traffic, especially the latter, have in recent years been affected by the increase in the use of motor vehicles. This traffic decrease has been much aggravated since 1929 by the general decline in commercial activity.

Operating expenses of Canadian railways rose during 1918, 1919 and 1920, much more than operating revenues, and the operating ratio, or ratio of expenses to revenues, increased from around 70 p.c. to above 90 p.c. and remained high thereafter. The United States Government took over the operation of the United States railways when that country entered the World War and increased the rates of pay of the railway employees. The Canadian railways were also obliged to make corresponding increases and this increase in payroll has been the chief factor in increased operating ratio. Declining revenues without corresponding reductions in expenses during the past five years have also maintained the high operating ratio.

6.—Summary of Steam Railway Statistics of Freight and Passenger Traffic, and Ratio of Expenses to Earnings, years ended June 30, 1911-19, and calendar years 1919-34.

NOTE.—These statistics were published for the years 1875-1910 on p. 434 of the 1916-17 Year Book, and for 1901-25 on p. 591 of the 1926 Year Book.

A summary analysis of passenger and freight traffic statistics for recent years is given in Table 9. The average haul for freight is the average for all railways, which eliminates the effects of consolidations of railways and of interchanging freight between Canadian railways. The average revenue per passenger increased in 1918 and 1919 with increases in rates, but the increases between 1924 and 1930 were largely due to decreases in the short haul traffic. The increases in freight train loading and train revenues have been due to the use of larger and more powerful locomotives.

¹ Duplications eliminated, see Table 12 for details of freight carried.

Railway Wages and Salaries.—The data in Table 10 show the number of employees and the salaries and wages, as reported by the railways, for 1912-34 inclusive and columns of adjusted data have been added. These adjusted data, as explained in footnote 2, are for comparative purposes only and were necessitated by several revisions in the method of reporting employees and wages.

The Canadian National Railways brought into their railway accounts in 1923 the express and hotel employees and, in 1928, the commercial telegraph employees. The

Canadian Pacific excluded the wages chargeable to capital account and also deducted a *pro rata* number of employees prior to 1926, and in 1915 and 1916 omitted to include outside operations employees. Because these railways were not able to correct the data, the Bureau of Statistics compiled the adjusted data on a basis as nearly comparable as possible. Employees and wages for 1926 and subsequent years are on the same basis and include the total employees and salaries and wages charged to both capital accounts and operating expenses.

The number of railway employees and the amount of their remuneration are naturally affected by the volume of traffic, which tends to rise in periods of active business conditions and fall in times of depression. The volume of traffic is also very directly affected by the size of the grain crops in the West. Thus it may be observed in Table 10 that the very favourable industrial and agricultural conditions of 1928 resulted in a considerable increase in the number of employees. The figures in the table are monthly averages, so that the average annual wages and time worked are not affected by seasonal lay-offs and fluctuations. Thus four men working three months would have the same effect on the average as one employee working twelve months.

10.—Numbers of Steam Railway Employees, Totals and Averages of Salaries and Wages, and Ratios of the Latter to Gross Earnings and Operating Expenses, for years ended June 30, 1912-19, and for calendar years, 1919-34.

¹ The ratio percentages are for payroll, chargeable to operating expenses only, for 1926 and subsequent years.

² Data for early years could not be corrected, so the other data were adjusted to be as nearly comparable as possible, but these data should be used only for purposes of comparison. (See text above.)

³ Revised to include commercial telegraph employees of Canadian National Railways.

Rolling-Stock.—Statistics of the rolling-stock of the steam railways of Canada are given for the latest seven years in Table 11. The figures may be supplemented by the statement that between 1920 and 1934 the average capacity of box cars increased from 34.779 tons to 39.635 tons, of flat cars from 33.459 to 39.962 tons, and of all freight cars from 35.141 tons to 40.188 tons. The average tractive power of the locomotive in use in 1920 was 31,112 lb. and in 1934, 37,543 lb.

¹ Include Pullman Co. cars in Canadian service.

Commodities Hauled.—In Table 12, the duplications from two or more railways handling the same freight have been eliminated. The peak year was 1928 when agricultural products were particularly heavy. The 1934 statistics show an increase of 10,672,480 tons, or 18.6 p.c. over the 1933 total and a decrease of 42.7 p.c. from 1928.

12.—Commodities Hauled as Freight on Steam Railways during the calendar years 1930-34.

NOTE.—In this table duplications are eliminated, i.e., the same freight handled by two or more railways is counted only once. In this respect these figures differ from those in the corresponding table in the 1926 and previous Year Books, and also from those of Table 6 in this chapter.

² Revised since the publication of the 1934-35 Year Book.

Government Aid to Private Railways.—In order that the private railways of Canada might be constructed in advance of settlement, as colonization, roads, or through thinly settled districts where little traffic was available, it was necessary for Dominion, Provincial and even municipal governments to extend some form of assistance. In our earlier history, when the governments had plenty of Crown land and little cash, the subsidies granted to railways frequently took the form of land grants, which had the advantage of giving the railway a direct interest in opening up the country, though they sometimes led to the railways holding large tracts of land idle for speculative purposes when intermixed Crown lands had been homesteaded, thus retarding the settlement of agricultural land. Table 13 shows the areas of the land granted as subsidies and for right of way, station grounds and townsite purposes to steam railway companies by the Dominion and Provincial Governments, with the names of the companies in the case of the Dominion Government.

As the country grew wealthier, the objections to the land-grant method became more apparent, and aid was more frequently given in the form of a cash subsidy per mile of line, a loan, or a subscription to the shares of the railway, as shown analytically in Table 14. Table 15 records the details of the most recent type of assistance given to private railways, *viz.*, by the guaranteeing of their bonds or of the interest thereupon. These guarantees enabled the railways receiving them to borrow money at rates of interest considerably lower than would otherwise have had to be paid.

¹ Does not include \$216,207,142 perpetual debenture stock and guaranteed stock of the Grand Trunk Railway, now part of the Canadian National system, on which interest and dividends are guaranteed by the Dominion Government, nor Government-guaranteed bonds held by the Government itself, but it does include \$48,000,000 advanced to the Canadian Pacific Railway by the banks and guaranteed by the Dominion Government. This latter sum is not included in the guarantees shown in Tables 24 and 25, Chapter XXI of this volume.

Railway Accidents.—The number of passengers, employees and others killed and injured in steam railway accidents is given in summary form from 1920 to 1934 in Table 16, and in detailed analysis for 1932 to 1934 in Table 17. All injuries to passengers are included, no matter how slight, but for employees only injuries which keep the employee from his work for three days during the ten days following the accident are recorded.

Accidents at highway crossings showed a reduction in both fatalities and injuries. The number of persons killed was 74, which was the lowest since 1923. The number of persons injured, 227, was also the least since 1921. Motorists accounted for the majority of these accidents. During the year 63 motorists were killed, 52 of them at unprotected crossings and 11 at protected crossings (2 at crossings protected by watchmen and 9 at crossings protected by electric bells). Two pedestrians were killed at crossings protected by gates and 3 pedestrians and 6 motorists were injured. In many cases motorists crash into lowered gates, breaking the gates and sometimes injuring themselves. Although these accidents are recorded as train accidents the motorist and pedestrian are not always blameless.

In railway accidents not resulting from the movement of trains, cars, or locomotives, which occur in shops, handling material, etc., 20 persons were killed, 14 of them being employees, and 4,094 were injured. The majority of these were trackmen handling rails, ties, etc.

16.—Numbers of Passengers, Employees and Others Killed and Injured on Steam Railways, calendar years 1920-34.

NOTE.—For the years ended June 30, 1888 to 1919, see Canada Year Books, 1910, p. 378, and 1022-23, p. 635.

Section 3.—Origin and Growth of Government-Owned Railways.

Canadian Government Railways.—The Intercolonial Railway, built as a condition of Confederation and completed in 1876, and the Prince Edward Island Railway, opened in April, 1875, have since their construction been owned and operated by the Dominion Government. In 1903 the Dominion Government undertook the construction of the National Transcontinental Railway from Moncton, N.B., to Winnipeg, to be leased to the Grand Trunk Pacific Railway Co. for a period of 50 years. However, as a result of the conditions arising from the Great War, the company was unable to take over the operation of the road when completed in 1915. The Government itself undertook its operation and was also obliged to lease the Lake Superior branch of the Grand Trunk Pacific Railway, which was

isolated from the main line. A number of eastern branch lines have been acquired in recent years. The Hudson Bay Railway, which had 332.5 miles of steel rail at the end of 1920, was declared to be comprised in the Canadian Government Railways, and until 1926 was operated to a limited extent by the Board of Directors of the Canadian National Railways. In that year, as a result of the decision to complete the road, it was returned to the Department of Railways and Canals until completed. The eastern terminus was transferred from Nelson to Churchill, and the line rehabilitated and extended through to Churchill. Construction of wharves and a grain elevator was completed in time to allow two cargoes of wheat to be shipped to Europe in September, 1931. To March 31, 1935, the total cost of this railway was \$32,397,403 and of terminal work at Churchill \$13,025,837, exclusive of the expenditures of \$6,240,201 on the terminal at Nelson, some of which was salvaged.*

Table 18, from the Annual Report of the Department of Railways and Canals, shows Dominion Government investments in the Canadian Government Railways and other lines to Mar. 31, 1935.

*These figures of total cost include deficits from operations during construction.

The Consolidation and Organization of the Canadian National System.*

—In pursuance of an Act of 1917 (7-8 Geo. V, c. 24), the Government acquired the capital stock of the Canadian Northern Railways with a mileage of 9,566.5. The insolvency of the Grand Trunk Pacific led to the appointment of the Minister of Railways as receiver on Mar. 9, 1919, and in October, 1920, the road was transferred to the Canadian National Railways. The Grand Trunk Railway was acquired under c. 13 of the Statutes of the second session of 1919, providing for arbitration of the considerations to be given to its shareholders. This arbitration finally disposed of, steps were taken to consolidate the various railways under government operation and control. In October, 1922, the Grand Trunk Board and the Canadian Northern Board gave place to a single Canadian National Board, to which the former Canadian Government Railways were turned over for management and operation. The unification of the Grand Trunk and Canadian National Railways was provided for by Order in Council of Jan. 30, 1923, which also brought into effect the Act to incorporate the Canadian National Railway Co. and respecting Canadian National Railways (c. 13, 1919).

Operation of the Canadian National Railways.—The Canadian National system's steam mileage at Dec. 31, 1934, including lines in the United States but exclusive of the Northern Alberta Railways and Toronto Terminals Railway (which

*For further details of the acquisition of the Canadian Northern, Grand Trunk Pacific and Grand Trunk Railways by the Dominion Government, see pp. 602-603 of the 1926 Year Book.

are controlled jointly by the Canadian National and the Canadian Pacific Railways), was 23,734.82. Including the Thousand Islands Railway, 4.51, and the Muskegon Railway and Navigation Co., 5.25, controlled but separately operated, the total steam mileage was 23,744.58. Including 121.11 miles of electric lines, the grand total was 23,865.69.

The Maritime Freight Rates Act (17 Geo. V, c. 44), effective July 1, 1927, ordered that the accounts of the Canadian National lines east of Lévis and Diamond Junction, Quebec, be kept separate from those of the remainder of the Canadian National system. These lines were designated the "Eastern Lines" of the Canadian National Railways. The Act ordered that specified freight rates on the Eastern Lines be reduced by 20 p.c. Other railways were allowed to make similar reductions in their freight rates in that territory and to bill on the Board of Railway Commissioners of Canada for the difference in freight receipts due to such reductions. The Government contributions to the deficits of the Eastern Lines are shown in Table 22. The differences between the reduced rates and the normal rates are treated as revenues by the Canadian National Railways and paid by the Dominion Government. The totals paid to privately-owned railways under the Act were \$421,655, \$828,893, \$811,149, \$861,195, \$669,673, \$508,233, \$611,130 and \$751,155, respectively, for the years 1927-34.

For operation, the Canadian National Railways system is divided into five divisions: the Atlantic division, including all lines east of Rivière du Loup and Monk, Quebec, 3,339 miles; the Central division, west from these stations to Port Arthur and Armstrong and south to Portland, Maine, 7,527 miles; the Western division, all lines west of Port Arthur and Armstrong including the line to Duluth, 11,407 miles; the Grand Trunk Western, all lines in Michigan, Indiana and Illinois, 1,007 miles; and the Central Vermont from Iberville, Quebec, to New London, Connecticut, 455 miles.

The Quebec Bridge across the St. Lawrence above Quebec city, with a main span of 1,800 ft., carrying a single track railway and accommodation for motor and pedestrian traffic, forms a connecting link in the Canadian National Railways system and is operated as a part of it.

Table 19 shows some of the more important train traffic statistics of Canadian National Railways operation for the years 1933 and 1934.

Subsection 1.—Finances of the Canadian National Railways.*

Operating Finances of the Canadian National Railways.—In Table 20 “Canadian Lines” include those of the Canadian Northern system, the Grand Trunk Railway of Canada, the Grand Trunk Pacific and the Canadian Government Railways. The “United States Lines” include those lines known as the New England line, the Grand Trunk Western, the Duluth, Winnipeg and Pacific and the Central Vermont from Feb. 1, 1930. The Hudson Bay Railway was returned to the Government while under construction, and appropriations, etc., for this were not included with the 1926 and later data.

Gross revenues, operating expenses and net revenues shown in Table 20 include only those from steam railway and commercial telegraph operations, but the deficits are for the entire system, including the operating results of the Niagara, St. Catharines and Toronto Railway (electric) and other railways operated separately, hotels, commercial telegraphs, coastal steamships and all other outside operations.

Up to 1928 there was a marked improvement over the results of the first year after consolidation (1923), when the deficit, including profit and loss adjustments, was \$54,634,323, but the light traffic in 1932 so reduced gross revenues that, with increased interest charges, the deficit increased to \$101,335,074. It was reduced slightly in 1933 to \$97,651,957 and in 1934 to \$89,662,354.

The figures of Table 20 are taken from the accounts of the railways as at Dec. 31, 1934.

* For detailed statistics of the operation and finances of the Canadian National Railways during 1934, see the Annual Report of the Department of Railways and Canals for the fiscal year ended Mar. 31, 1935, and Steam Railway Statistics, 1934, published by the Dominion Bureau of Statistics, also the Annual Report of the Canadian National Railways.

¹ Includes Central Vermont Railway from Feb. 1, 1930.

² Revenues and expenses 1923-27, ad-

justed to include commercial telegraph lines to be comparable with 1928-34.

³ The deficit shown is as per the accounts and includes Government interest accounting adjustments of \$14,595,102 and appropriation for insurance fund of \$9,590,148, the actual cash deficit for the period being \$333,320,435, as shown in Table 22.

⁴ Interest at 4 p.c. on \$34,927,098 G.T.P. debenture stock reduced under agreement to 2 p.c.

The Debt and Interest Charges of the Canadian National Railways.—

Table 21 analyses the increase in the debt and interest charges of the system, including both Canadian and United States lines. To define clearly what is included under debt due to the Dominion Government in Table 21, the appropriations for the Canadian Government Railways have been separated from the loans and advances to the remainder of the system. The Canadian Government Railways include the Intercolonial, National Transcontinental, Prince Edward Island and several other smaller railways in the Eastern Provinces, together with the Quebec Bridge. The Hudson Bay Railway was included in the Canadian Government Railways until 1926, when it was transferred back to the Department of Railways and Canals for completion, and appropriations on its account were deducted. These Canadian Government Railways appropriations do not include the operating deficits of the Canadian Government Railways for 1919 and subsequent years nor the deficits of other portions of the Eastern Lines since July 1, 1927, but include

investments for construction, purchase and working capital of the Canadian Government Railways. As the book value of these properties is included on the assets side of the balance sheet, the cost of these roads to the Dominion is included in the liabilities of the system as an offset. The construction or purchase of these roads was financed by the Dominion from the Consolidated Revenue Fund, and consequently no interest on such expenditures is allowed for in the railway accounts.

In a rather different class are the loans and advances made by the Government to the Canadian National Railways or constituent companies on notes, bonds and receiver certificates with accrued simple interest ranging from $3\frac{1}{2}$ to 6 p.c. In computing the public debt of Canada the Finance Department considers these railway loans and advances as "non-active assets" similar to investments in canals, public works, etc., and as such does not subtract them from the gross debt in computing the net debt. The railways, however, debit their accounts with the accrued interest on these Government advances, all of which remains unpaid.

The debt due to the public includes debenture stock maturing and perpetual, and bonds and mortgages of the constituent railways, but does not include the capital stock of the Grand Trunk Railway held by the Government, nor the cost of acquiring the same. Likewise it does not include the capital stock of the Canadian Northern system. The stock of the Grand Trunk Pacific is all held by the Canadian National system and is, therefore, not included either.

Table 22 analyses the capital received and expended by the Canadian National Railways. In addition to the funds available under long-term debt, as shown in Table 21, the railways have frequently had short-term loans.

² Deficits of Eastern Lines from July 1, 1927, and for entire system from Jan. 1, 1932, are paid by the Dominion Government and are not included in this table. See Table 22.

³ Includes \$216,207,142 perpetual debenture stock guaranteed as to interest only, formerly Grand Trunk bonds.

⁴ Amounts outstanding at dates constituent lines were taken over by Canadian National, viz.: Canadian Northern, Sept. 30, 1917; Grand Trunk Pacific, Mar. 9, 1919; Grand Trunk, May 21, 1920; Canadian Government, Mar. 31, 1919 (actual date of transfer Nov. 20, 1918).

⁵ Includes Hudson Bay \$14,531,706, eliminated from statement in 1926.

⁶ Credits for property including Hudson Bay Railway, Halifax Harbour property, etc., transferred to other Government departments or bodies.

⁷ Government loans to lines other than Canadian Government Railways now comprising Eastern Lines ceased to accrue interest after July 1, 1927. These on June 30, 1927, were: capital \$2,565,605, deficits \$8,835,176, total \$11,400,781.

⁸ Central Vermont included in annual report, excluded here.

⁹ Temporary loans and inter-line loans eliminated.

					\$87,225,238

¹ This is the net increase in par value as shown in Table 21, less issue expense and discount. Interest on Government loans is not included. ² Deficit of 1932 not paid until 1933. ³ Includes certain accounting adjustments such as increase or decrease in working capital and other balance sheet accounts, etc.

⁴ Includes increase of special deposits \$25,415,179. ⁵ Includes decrease of special deposits \$41,175,428. ⁶ Excludes accounting adjustments and appropriations for insurance funds. See note 3, Table 21.

⁷ Excludes accounting adjustments amounting to a credit of \$30,346,571 including: transfer from Investments in Affiliated Companies to Investment in Road and Equipment of \$31,583,630 in 1930 for Central Vermont; credit of \$43,542,794 per note 6, Table 21; credit of \$18,086,865 for retirement of abandoned lines, principally duplicated lines of G.T.P. and Canadian Northern west of Edmonton, held in suspense until 1930; \$3,021,486 for Toronto Suburban Railway, for which a receiver was appointed in 1931 (line was subsequently dismantled); and other miscellaneous credits and debits. ⁸ See note 7 for transfer to Investment in Road and Equipment.

The figures given in Table 22 differ from the figures given in the annual reports of the railways by reason of certain accounting adjustments. It should be noted, therefore, that the total cash deficit of \$333,320,435 for the period 1923-34 does not include \$14,595,102 of accounting adjustments and \$9,590,148 appropriated for investment in the Insurance Fund. If these items are included, the total deficit for the twelve-year period is \$357,505,685 as shown in Table 20.

Table 23 has been compiled to reconcile the investments in and loans to the Canadian National Railways (including Canadian Government Railways) as shown in the Public Accounts for the fiscal year ended Mar. 31, 1935, with the debt to the Dominion Government shown in the railway's balance sheet, Dec. 31, 1934. The right-hand side of the table shows the adjustments to the statement in Public Accounts which make up the difference.

Table 24 shows the assets of the Canadian National Railways at Dec. 31, 1922, and at Dec. 31, 1934, with the increase or decrease for the twelve-year period.

23.—Adjustments Accounting for Difference in Railway Obligations as shown by Public Accounts, Mar. 31, 1935, and by Canadian National Railways Balance Sheet, Dec. 31, 1934.

PART III.—ELECTRIC RAILWAYS.*

The cheap and reasonably rapid conveyance of human beings is a necessity of modern urban life. One important means by which this necessity is supplied throughout Canada is the electric street railway, generally operated by hydro-electric energy.

Historical.—Replacing the horse-car systems, used in Montreal and Toronto as early as 1861, electric street railways were first seen in operation in Canada in 1885, when a successful experimental railway was constructed and operated at the Toronto Exhibition grounds. Before many years their safety and convenience resulted in the discarding of the older systems. An electric system 7 miles in length was opened at St. Catharines in 1887, using the double overhead trolley. The second electric railway in Canada commenced operations in Vancouver, in June, 1890. This was followed by the completion of the Ottawa Electric Railway in 1891, and the electrification of the Montreal and Toronto systems in 1892. The street railways of other eastern cities were generally electrified during the 1890's, while in the newer western cities electricity was used from the commencement. In the cities of Eastern Canada, electric street railways are generally operated by private companies under city franchises, while in a considerable number of cities in Ontario and the West the street railways are owned and operated by the municipalities, a fact indicated in Table 28.

Many difficulties are met in operating the cars during the winter season, owing to snow. This, however, has been overcome by the use of sweepers, scrapers and ploughs. The single overhead trolley system has been found the most suitable and is in general use. During the past few years an increasing number of motor buses have been used; in 1924 only 48 were operated, but by 1934 the number had increased to 537.

In addition to street railways in the cities there are several systems serving suburban areas and also doing an interurban business, but this latter class of service is fast being supplanted by motor bus service.

Development of Electric Railway Traffic.—Figures for the year 1893 show that 30 companies, with a paid-up capital of about \$9,000,000, operated 256 miles of railway. By 1897, 35 companies made returns showing 583 miles of track, 1,156 cars, 26,431,017 miles run, 83,811,306 passengers carried and capital of \$18,727,355. In 1904, 44 companies showed 766 miles of track, 2,373 passenger cars, 42,066,124 car miles run, 181,689,998 passengers and capital of \$50,399,188.

Summary statistics of the operation of electric railways in Canada from 1911 to 1934 inclusive are given by years in Table 25. It may be noted in this table that the carriage of freight reached its maximum in 1928, with 3,888,672 tons, the number of fare passengers carried in 1929 reached a record of 833,496,866, while the mileage of track has been declining since 1925. In Table 26 statistics of mileage and equipment are given for the latest four calendar years, and statistics of the capital liability of electric railways are furnished for the years 1908-34 in Table 27. Detailed figures of the mileage operated, the capital liability, the earnings, operating expenses, passengers carried, employees and salaries and wages, are given for 1934 in Table 28, while Table 29 shows by years from 1919 to 1934 the number of passengers, employees and others killed and injured on electric railways in Canada.

* Revised and checked by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This Branch publishes an annual report on Electric Railways in Canada.

25.—Summary of Statistics of Electric Railway Operation, years ended June 30, 1911-19, and calendar years 1919-34.

NOTE.—For figures for 1901-10, see p. 676 of the 1933 Year Book.

PART IV.—EXPRESS COMPANIES.*

"Express service is an expedited freight service on passenger trains". But express companies do not own the means of performing their services; they use railway facilities by virtue of contracts with the railway companies. Express companies in Canada have had close relations with the railways practically from the beginning. A brief history of the various express companies will be found on pp. 611-612 of the 1926 Year Book.

Before 1915, an express company in Canada was not liable for delay or damage caused by anything quite beyond its control, thus maintaining itself as an entity separate from the railway company. Thenceforth an express company became liable for delay or injury of goods if either was caused by the railway company in whose cars the goods were being carried.

Goods are sent by express for quick transit, so that express rates do not compete with freight rates. Thus in its first tariff the Dominion Express Co., in pursuance of its contract with the Canadian Pacific Railway, gave a rate of $2\frac{1}{2}$ times the maximum first-class railway freight rate for the same goods carried the same distance. The majority of the contracts between express and railway companies for carrying express freight are on the basis of a percentage of the gross express revenue. The rates are subject to the approval of the Board of Railway Commissioners.

Express Company Operations.—During 1934, the latest year for which the statistics of the Transportation Branch of the Dominion Bureau of Statistics are available, there were three Canadian and one American express organizations operating in Canada. The Canadian Pacific Express Co., formerly the Dominion Express Co., is a subsidiary of the Canadian Pacific Railway and handles the express business on the railways and the inland and ocean steamship lines of the parent company. The express business of the Canadian National system is handled by a department of the railway. When the Central Canada, the Edmonton, Dunvegan and British Columbia and the Alberta and Great Waterways railways were amalgamated to form the Northern Alberta Railways Company, the express business was handled by a department of the new company from Nov. 1, 1929. The Railway Express Agency, Inc., operates over the Canadian sections of United States railways and over the route from Skagway to points in Yukon. These companies are all organized under powers conferred by Acts of the Dominion Parliament and their business consists in the expeditious shipment of valuable live stock, and such perishable commodities as fresh fish, fruit, etc., the forwarding of parcels and baggage and the issue of money orders, travellers' cheques, letters of credit and other forms of financial paper. The total capital liabilities of the three Canadian companies and departments stood at \$6,245,126 on Dec. 31, 1934.

Statistics of the receipts and expenses of express companies in Canada are given in summary form for all companies for the years 1919 to 1934 in Table 30, and for each company for the years 1933 and 1934 in Table 31. In these tables the amounts paid by express companies to the carriers, *i.e.*, railways, steamship lines, etc., for transporting the express matter, are shown under the heading "express privileges". Table 31 also shows the mileage operated by each company in 1933 and 1934. Of the total of 62,495 miles, 42,481 were over steam railways, 279 over

* Revised and checked by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This Branch issues an annual report on Express Statistics.

electric railways, 14,227 on ocean steamship services (mainly by the Canadian Pacific lines), 5,176 miles on inland or coastal steamboat routes and 332 miles over other carriers.

30.—Summary Statistics of Revenues and Expenses of Express Companies, calendar years 1919-34.

NOTE.—Corresponding figures for the years ended June 30, 1911-19, were published at p. 673 of the 1927-28 Year Book.

PART V.—ROADS AND HIGHWAYS.*

Historical.—A brief description of the early colonization roads in Canada was given at p. 733 of the 1934-35 Year Book.

Recent Highway Development.—The growth of motor traffic during and since the War has greatly stimulated the movement for increased and improved road construction. With the rapid increase in the percentage of motor car owners to the population (see pp. 689-690) the demand for improved roads became insistent after the War. Furthermore, the advantages to be gained by attracting touring motorists have been a powerful incentive to governing bodies to improve trunk roads and scenic highways within their jurisdictions. One sphere where the motor car has been of special economic advantage has been in rural areas, where its speed and economy are a great improvement over the old horse-drawn vehicle. As a result, in the Census of 1931 every second farm reported a farm-owned motor vehicle (1.96 farms per farm-owned motor vehicle). This widespread rural ownership of automobiles has resulted in the improvement of secondary rural roads.

A table of road mileage in Canada follows. These roads do not include those within the boundaries of urban municipalities and average about one mile of road for each 10 rural inhabitants or for each 26 persons, both rural and urban. There are great stretches of country in the northern portions of Quebec, Ontario, the Prairie Provinces and British Columbia with very few people and very few roads, but the southern portions are well supplied. A Trans-Canada highway is now under construction, running from the Atlantic to the Pacific oceans entirely in Canadian territory.

¹ Manitoba and Saskatchewan figures are as at April 30, 1935.

² B.C. figures are as at Mar. 31, 1934.

³ Includes 98 miles of other classes, 25 miles in Ontario and 73 in British Columbia.

The extent and character of Canadian highways, indicated above, has entailed the expenditure of large sums by governing bodies, chiefly provincial or municipal authorities, as roads are under their jurisdiction. Unfortunately, there are no comprehensive or comparable statistics available regarding these expenditures prior to 1928. Expenditures by the Dominion Government have taken the form of subsidies to the provinces for specific highways and have been made under the Canada Highways Act, 1919, (see p. 669 of the 1929 Year Book) largely in the few years immediately after the War, and under relief legislation during the present depression to aid in providing useful employment. These subsidies paid in the years 1930-34 are shown in Table 34.

*Revised by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics, which publishes an annual report entitled "The Highway and the Motor Vehicle in Canada".

Road Expenditures by Provinces and Municipalities.—Table 34 presents the available statistics of expenditures on highways in the latest five years. However, the limitations of the statistics in this table should be clearly realized. These expenditures cover only national and provincial highways, secondary highways and other important roads to which the Provincial Governments contribute, together with the bridges or ferries necessary to such highways. The figures do not include expenditures on roads or streets within urban municipalities, nor expenditures by rural municipalities on local roads to which no contribution is made by the Provincial Governments. Expenditures for both construction and maintenance of municipal roads receiving subsidies are often made over and above the amounts upon which subsidies are granted and these extra expenditures are not included. Although the record of expenditures on roads by municipalities is incomplete, the expensive roads to construct and maintain are under provincial jurisdiction, so that only a small percentage of the total expenditures is omitted. In the Maritime Provinces all road expenditures are made by the Provincial Governments.

34.—Capital, Maintenance and General Expenditures on Provincial Highways or Provincially Subsidized Highways in Canada, calendar years 1930-34.

¹Revised since the publication of the 1934-35 Year Book.

Provincial Funded Debt Incurred for Highways.—Table 35 shows the funded debts of the provinces, outstanding at Dec. 31, 1932-34, incurred for highway development. These amounts should not be confused with estimates of the total investment in highways. The cost of constructing a new road is considerably greater than that of putting a permanent surface on an old road; the latter has been the purpose of much of the provincial expenditure.

The maintenance expenditures by the Provincial Highway Departments during 1934 amounted to \$13,603,273, while the annual charges for highway debt were \$22,854,691, a total provincial charge of \$36,457,964. The provinces collected \$50,622,683 in licences, gasoline taxes, etc., in connection with highway traffic (see p. 691). While these left an apparent surplus of \$14,164,719, no provision was made for the cost of administering highway and motor vehicle departments, for traffic patrols, nor for adequate retiring charges on capital expenditures. Furthermore, motor vehicle traffic made no direct contribution to expenditures by municipalities upon streets, roads and highways.

35.—Provincial Government Funded Highway Debt and Annual Charges thereon, Dec. 31, 1932-34.

NOTE.—New Brunswick and Ontario as at Oct. 31; Manitoba and Saskatchewan as at April 30, 1933-35; Quebec as at June 30; Alberta as at Mar. 31, 1933-35; British Columbia as at Mar. 31, 1932-34. Other provinces as at Dec. 31.

PART VI.—MOTOR VEHICLES.

Like many other inventions, the motor car commenced as a toy, then became a luxury of the rich, while now it ranks as a necessity of life to a large proportion of the population. In the past few years, the motor truck and the motor bus have assumed considerable economic importance, and are separately classified in Table 37.

Up to the present the motor vehicle has affected the passenger traffic of the steam and electric railways more than the freight. Eleven inter-urban and ten urban electric railways have ceased operation since 1926, and passenger traffic on the smaller electric railways and on the steam railways has declined during the last decade instead of increasing with increased population. This diversion of passenger traffic has been effected largely by the private automobile, although the motor

bus is rapidly becoming more important and is now operating between all large centres. The motor truck is also carrying an increasing amount of freight, although no statistics showing the tonnage handled are as yet available.

Section 1.—Statistics of Motor Vehicle Operation.*

Registration.—The increase in the use of motor vehicles in Canada has been very rapid, as shown by the statistics of Table 36. In Table 37 the numbers of motor vehicles registered in 1933 and 1934 are given by provinces, classified as passenger cars, commercial cars or trucks, motor buses and motor cycles.

The average population per vehicle registered was 9.6 in 1934. Canada ranked fourth in this respect, the United States being first with 4.9. On the basis of the total registration of 1,129,532, only three countries had larger numbers in 1934, *viz.*, United States, 24,933,403; France, 1,914,561; and Great Britain and Northern Ireland, 1,878,356.

*Revised by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. The subject is treated in greater detail in "Highways and Motor Vehicles in Canada", published annually by this Branch.

36.—Numbers of Motor Vehicles Registered in Canada, by Provinces, calendar years 1904-34.

NOTE.—Registrations given here include passenger cars, trucks, buses, motor cycles, service cars, etc., but not trailers or dealers' licences. Registrations in Yukon are included in the total for Canada. The figures in this table have been completely revised since publication of the 1934-35 Year Book.

Government Revenue.—The taxation of motor vehicles, garages, chauffeurs, etc., is becoming a lucrative source of Provincial Government income. In every province the following licences or permits, duly issued by the provincial authorities, are required: motor vehicles of all kinds, trailers, operators or drivers, paid chauffeurs, dealers, garages and gasoline and service stations. Perhaps the most recent form of levy on the use of motor vehicles is the gasoline tax. The following table shows the provincial revenue for the years 1933 and 1934, indicating, at the same time, the more important sources from which it is derived.

38.—Provincial Revenues from the Taxation of the Distribution and Operation of Motor Vehicles, for the years 1933 and 1934.

Province.	Passenger Cars.	Trucks.	Motor Cycles.	Dealers' Licences.	Operators and Chauffeurs.	Mileage Tax on Motor Buses and Trucks.	Gasoline Tax.	Total, including Miscellaneous Revenue.

Apparent Consumption of Automobiles in Canada.—A brief statement of the history of automobile manufacturing in Canada was given on pp. 432-436 of the 1924 Year Book. The principal statistics of the industry will be found in the Manufactures chapter (XIV) of this volume, and more detailed statistics in the report "Iron and Steel", issued annually by the Dominion Bureau of Statistics. The apparent consumption of automobiles in Canada in any year may be computed by deducting the number exported from the sum of the production and imports. Table 39 shows the statistics worked up on this basis for the years 1917 to 1934. Prior to 1925 the figures of apparent consumption do not show a pronounced trend but between 1925 and 1929 they increased substantially. From 1929 to 1932 the decrease was rapid and continuous but was practically halted in 1933, in which year production showed some improvement but mainly on account of the export demand. In 1934 the apparent consumption showed an increase of 62.6 p.c. over the figure for 1933.

Gasolene Consumption.—All provinces require retail sales of gasolene to be reported and a tax is imposed on all gasolene consumed by motor vehicles using the highways and streets and also on that used for an increasing number of other purposes. The taxable gasolene is, however, still largely consumed by motor vehicles and indicates in a general way the increase or decrease in the use of motor vehicles. Net sales are the differences between the total or gross sales reported and the quantities on which the tax is refunded in whole or in part, or on which the tax is not imposed at the time of sale.

Motor Vehicle Accidents.—Motorists are required to report accidents but comprehensive statistics are not available in all provinces. The Vital Statistics Branch of the Bureau of Statistics compiles statistics on all deaths from motor vehicle accidents and these are shown in Table 41. A direct comparison of such statistics between the provinces is of little value due to differences in size, population, motor vehicle density, etc., but, to put them on somewhat the same basis, the average number of deaths per 10,000 registered motor vehicles has also been tabulated. Although this treatment puts the data on a better footing than the absolute figures, it still gives no weight to differences in use of motor vehicles, differences in climate, roads, tourist cars, etc., all of which are factors in accidents.

Table 42 shows the number of persons killed and injured in automobile accidents as reported by the motor vehicle branches of the Provincial Governments. It is quite possible that the latter reported some persons as injured who subsequently died from the injuries and these would be included in the fatalities of the vital statistics shown in Table 41; also accidents might occur late in December and the deaths charged to December by the provincial authorities but to January of the next year in the vital statistics. Consequently, these data do not agree. No compilation of accidents has been reported by Alberta.

41.—Deaths Resulting from Motor Vehicle Accidents in Canada by Provinces, calendar years 1926-34.

Section 2.—Motor Vehicle Acts and Regulations.*

NOTE.—In this Section, it is obviously impossible to include the great mass of detailed regulations in force in each province. The purpose in view is to provide only the more important general information which would be useful, for example, to visiting motorists. Therefore, the regulations given for specific provinces are confined chiefly to those dealing with registration and speed limits. In addition, the sources are given from which more detailed information may be obtained.

General.—The licensing of motor vehicles and the regulation of motor vehicle traffic lies within the legislative jurisdiction of the Provincial Governments in Canada. Regulations which apply in all the provinces may be summarized as follows:—

Operators' Licences.—The operator of a motor vehicle must be over a specified age (usually 18 years) and must carry a licence, obtainable only after prescribed qualification tests and renewable annually. Special licences are required for chauffeurs, beginners, and operators under 18 years of age who have become qualified.

Motor Vehicle Regulations.—All motor vehicles and trailers must be registered annually, usually for the calendar year, with the payment of specified fees, and must carry two registration plates, one on the front and one on the back of the vehicle (one only, for the back, in the case of trailers). A change in ownership of the vehicle must be recorded with the registration authority. However, exemption from registration is granted for a specified period (usually at least 90 days) in any year to visiting private vehicles registered in another province or a State which grants reciprocal treatment. Further regulations require a safe standard of efficiency in the mechanism of the vehicle and in its brakes, and provide for its equipment with non-glare headlights and a proper rear light, with a satisfactory locking device, a muffler, a windshield wiper and a rear-vision mirror.

Traffic Regulations.—In all the provinces, vehicles keep to the right-hand side of the road. Motorists are everywhere required to observe traffic signs, lights, etc., placed at strategic points on highways and roads. While permissible speeds vary in different provinces, slower speeds are always required in cities, towns and villages, in passing schools and public playgrounds, at road intersections, railway crossings, or at other places or times where the view of the highway for a safe distance ahead is in any way obscured. Motor vehicles must not pass a street car which has stopped to take on or discharge passengers except where safety zones are provided. Accidents resulting in personal injury or property damage must be reported to a provincial or municipal police officer and any driver involved must not leave the scene of accident until he has rendered all possible aid.

Penalties.—These ascend in scale from small fines for minor infractions of any of the regulations to a suspension of the operator's driving permit, impounding of the car or imprisonment for serious infractions, recklessness, driving without an operator's licence, and especially for attempting, while intoxicated, to operate a motor vehicle.

While the above regulations apply in all the provinces, certain important details in which the provinces differ are mentioned below:—

Prince Edward Island.—*Administration.*—The Provincial Secretary, Charlottetown. *Legislation.*—The Highway Traffic Act (c. 1, 1930) and amendments.

Motor Vehicle Regulations.—Registration fees are \$2.50 for cars not previously registered in the province and an annual marker fee of \$1 and tax of 50 cents per 100 pounds weight, both payable on Mar. 1 of each year.

*The information in this Section has been revised from material provided by the officials in charge of the administration of Motor Vehicle and Traffic Acts and Regulations in the individual provinces

Traffic Regulations.—The speed limits are: in cities, towns and villages, at intersections and where the driver has not a clear view of the road for at least one hundred yards, 15 miles per hour; on approaches to steep descents, bridges or highway crossings, 10 miles per hour; and in other places a speed reasonable and proper.

Nova Scotia.—*Administration.*—Motor Vehicle Branch, Department of Highways, Halifax. *Legislation.*—The Motor Vehicle Act (c. 6, 1932) and amendments.

Traffic Regulations.—There is no set speed limit. The rate of speed must be reasonable and proper and 20 miles per hour is *prima facie* reasonable and proper in a residential district, at intersections, passing schools, etc., and 40 miles per hour is *prima facie* reasonable and proper in open country. Commercial motor vehicles having a gross weight in excess of 4,000 lb. are limited to a maximum speed of 25 miles per hour.

New Brunswick.—*Administration.*—Motor Vehicle Branch, Department of Public Works, Fredericton. *Legislation.*—The Motor Vehicle Act (c. 20, 1934).

Traffic Regulations.—The speed of a motor vehicle must not be greater than is reasonable or proper, having due regard to the traffic and use of the highway or such as to endanger life or property. A commercial vehicle must not exceed 30 miles per hour when not carrying a load, or 25 miles per hour when carrying any load.

Quebec.—*Administration.*—Motor Vehicle Bureau, Office of the Provincial Treasurer, Quebec. *Legislation.*—The Motor Vehicle Act (c. 35, R.S.Q. 1925) and amendments.

Motor Vehicle Regulations.—Free registration is granted certain government and municipal cars and farm tractors. Exemptions from registration apply not only to private vehicles as cited in the summary for all provinces, but also to commercial vehicles in cases specified in Article 10 of the Act or under agreement with other governments.

Traffic Regulations.—For private passenger vehicles, speed limits are: when meeting another vehicle, 16 miles; in cities, towns, villages and on highways where the land is closely built up, 20 miles; and in open country, 30 miles per hour. Motor buses are allowed a speed of 30 miles per hour in open country. For commercial vehicles having non-pneumatic tires, speed limits are 8 miles when loaded and 10 miles per hour without load. When equipped with pneumatic tires, the corresponding rates are 12 and 15 miles per hour. All motor vehicles must be brought to a stop before proceeding over a railway crossing.

Ontario.—*Administration.*—Motor Vehicles Branch, Department of Highways, Toronto. *Legislation.*—The Highway Traffic Act (c. 251, R.S.O. 1927) and amendments.

Motor Vehicle Regulations.—Passenger cars registered in the United States may be operated in Ontario without registration for 30 days in any one year. Under Part XIII of the Act (c. 47, 1930), a person convicted of certain serious offences in connection with the operation of motor vehicles or a person against whom an unsatisfied judgment is outstanding is required to file proof of his financial responsibility.

Traffic Regulations.—Speed limits are: at intersections, level railway crossings and where the view of the driver is obscured, 10 miles within and 15 miles per hour outside of cities; towns and villages; otherwise in cities, towns and villages, 20 miles per hour; and in open country, 35 miles per hour. Before entering or crossing a through highway a vehicle must be brought to a full stop.

Manitoba.—*Administration.*—Municipal Commissioner, Tax Commission Office, Winnipeg. *Legislation.*—The Highway Traffic Act (c. 19, 1930) and amendments.

Motor Vehicle Regulations.—Registration is renewable annually on Jan. 1, but for registration on April 1, five-sixths of the annual fee and on Aug. 1, one-half of the annual fee is payable.

Traffic Regulations.—No person may operate a motor vehicle upon any highway or street at a greater speed than is reasonable and proper, having regard to the condition of the highway and the traffic. The onus of proof is on the motorist.

Saskatchewan.—*Administration.*—Motor Licence Office, Department of Highways, Regina. *Legislation.*—The Vehicles Act (c. 68, 1935).

Motor Vehicle Regulations.—Registration fee is \$6 for a motor cycle; for private vehicles it is computed on the wheel base and is from \$10 to \$30; for livery privileges, the fee is \$15 more than for a similar private vehicle; for motor trucks it is computed on the gross weight. To operate a truck or passenger car for gain, the owner must first secure a permit from the Highway Traffic Board. Dimension limits for a vehicle and its load are: width 96 inches, height 14 feet, length for one vehicle 33 feet and for vehicles coupled together 85 feet and maximum loaded weight per vehicle 10 tons.

Traffic Regulations.—Cities, towns and villages have authority to regulate speed limits within their boundaries. Other speed limits are: for any vehicle when meeting another vehicle 35 miles; for a loaded truck, 25 miles; and for an unloaded truck, 35 miles per hour. Otherwise speed is governed by the amount of traffic, the nature, condition and use of the highway.

Alberta.—*Administration.*—Motor Vehicle Branch, Department of the Provincial Secretary, Edmonton. *Legislation.*—The Vehicles and Highway Traffic Act (c. 31, 1924) and amendments.

Motor Vehicle Regulations.—Visiting motorists from other provinces are required to register with the Provincial Police but are exempt from other registration for six months, while motorists from the United States may carry their customs certificates in lieu of registration. The carrying of loaded weapons in an automobile is prohibited as a preventive measure against accidents during hunting trips.

Traffic Regulations.—The speed limits are: 10 miles per hour at street crossings and bridges; 20 miles per hour in cities, towns and villages; and 30 miles per hour in open country.

British Columbia.—*Administration.*—Motor Vehicle Branch, Commissioner of Provincial Police, Victoria. *Legislation.*—The Motor Vehicle Act (c. 50, 1935) and the Highway Act (c. 24, 1930) and amendments.

Motor Vehicle Regulations.—Visiting motorists are granted reciprocal exemption from registration up to six months provided they obtain non-resident touring permits or carry the customs permits in the case of residents of the United States. Special permits at one-twelfth the annual fee are issued to non-resident vehicles bringing loads into the province. No person may ride as a passenger on a motor cycle in front of the operator. Drivers' and owners' licences of all persons convicted for certain serious offences, as well as all persons against whom an unsatisfied judgment in excess of \$100 is outstanding, are suspended until such time as proof of financial responsibility is furnished and adjudication therein complied with.

Traffic Regulations.—The onus is on the driver for driving to the common danger if exceeding the speed of 20 miles per hour in any city, town or village, or 30 miles per hour outside cities, towns or villages, or the maximum speed stated on

signs erected on certain portions of the highways. The speed limit is 15 miles per hour when passing schools or public playgrounds.

Yukon.—*Administration.*—Territorial Secretary, Dawson, Yukon. Information regarding regulations may also be obtained from The Director, Lands, Northwest Territories and Yukon Branch, Department of the Interior, Ottawa. *Legislation.*—The Motor Vehicle Ordinance, No. 14, 1914, and amendments.

Traffic Regulations.—Speed limits are 10 miles per hour at street intersections and otherwise 15 miles per hour in cities, towns and villages.

PART VII.—AIR NAVIGATION.*

During 1934 civil aviation was well maintained. Aircraft are a ready means of obtaining accurate information of conditions in remote and unsettled parts, and provide easy access thereto. Their use in developing and conserving natural resources has increased each year. Air-mail and air-transport lines are in operation in many parts of the Dominion.

Civil aviation in Canada is divided into two classes: (1) civil operations, carried out for other Government Departments under the Royal Canadian Air Force; (2) commercial aviation, under the regulation of the Controller of Civil Aviation. Both are under the Department of National Defence.

Civil Government Air Operations.—This branch carried out flying on forest fire patrols, fire suppression, oblique and vertical photography for surveys, transportation, etc., for different Government Departments in various parts of the country.

Provincial Operations.—The Ontario Provincial Air Service owns and operates 21 aircraft on forest fire protection, transportation, air photography and sketching in northern Ontario. Operations covered an area of about 800 miles from east to west, and 400 miles from north to south. A total of 7,223 hours was flown during 1934, as compared with 8,731 hours in 1933. The Manitoba Government Air Service operated 5 aircraft on forest protection in the province for the Forestry Branch; a total of 646 hours was flown on this work. The Saskatchewan Government Air Service operated 4 aircraft on forest protection in the province for the Department of Natural Resources; a total of 291 hours was flown on this work. British Columbia and Quebec contracted with commercial aircraft operators for flying required.

Commercial Aviation.—During 1934 there were 128 commercial aircraft operators in Canada. Their activities included forest fire patrols, timber cruising, air photography, transportation of passengers, express and mail, instruction, advertising, short passenger flights, etc., in various parts of the country.

Air-Mail Services.—Regular air-mail services were established in December, 1927. During 1934 commercial firms operated the following air-mail routes under Post Office Department contracts: *Yearly Services.*—Montreal-Albany, Sioux Lookout-Narrow Lake, Fort McMurray-Aklavik, Prince Albert-Lac la Ronge, Amos-Siscoe, Winnipeg-Pembina, Prince Albert-Ile à la Crosse, Lac du Bonnet-Bissett, Cameron Bay-Coppermine, Fort Chipewyan-Fond du Lac, Fort Resolution-Cameron Bay, Rouyn-Kewagama, Atlin-Telegraph Creek; *Summer Services.*—Rimouski-Montreal, Vancouver-Victoria; *Winter Services.*—Leamington-Pelee Island, Quebec-Sept Iles, Sept Iles-Natashquan, Havre St. Pierre-Port Menier,

*Revised under the direction of J. A. Wilson, Esq., Controller of Civil Aviation, Department of National Defence.

Moncton-Charlottetown, Charlottetown-Magdalen Islands. The weight of mail carried in 1934 was 625,040 lb.

Encouragement of Aviation.—To encourage a more widespread interest and knowledge of aviation, the Department of National Defence, since 1928, has assisted by issuing two light aeroplanes and making grants to each of the twenty-three flying clubs in the following localities: Halifax, Cape Breton, Saint John, Montreal, McGill University, Brant and Norfolk, Fort William, Hamilton, Kingston, London, Ottawa, St. Catharines, Toronto, Border Cities, Kitchener, Brandon, Winnipeg, Moose Jaw, Regina, Saskatoon, Calgary, Edmonton, Vancouver. The total membership at present is 2,200. A total of 10,581 hours was flown. 133 members obtained private pilots' licences, and 21 members obtained commercial pilots' licences during 1934. Many aerodromes have been established through this movement.

A large air terminal has been built at St. Hubert, 7 miles south of Montreal. A mooring tower for airships and an aerodrome have been constructed there, and immigration, customs and postal facilities are available. A terminal aerodrome has also been constructed at Rimouski for the dispatch and reception by air of trans-Atlantic mails.

Manufacture of Aircraft.—An aircraft industry, to construct in Canada the aircraft and equipment required for aviation, is essential to the sound development of flying. Canadian Vickers, the pioneer firm in Canada, has produced several original types specially suited to operation in Canada. Several aircraft constructors from England and the United States have formed branches in Canada for the assembly and service of their products. The De Havilland Aircraft of Canada, Ltd., established a plant in Toronto; the Curtiss-Reid Aircraft Co. established a factory at Cartierville, Que.; the Fairchild Aircraft, Ltd., at Longueuil, Que.; Fleet Aircraft, Ltd., at Fort Erie, Ont.; the Boeing Aircraft of Canada, Ltd., at Vancouver; and the Ottawa Car Manufacturing Co., one at Ottawa for A. V. Roe aircraft. Aero engine factories are established for construction or assembly and service of their products as follows: Armstrong-Siddeley Motors, Ltd., at Ottawa; Aero Engines of Canada, Ltd., at Montreal, for "Wright" and "Bristol" engines; Canadian Pratt and Whitney Aircraft Co., Ltd., at Longueuil, Que.

¹ These figures show duplication, since practically all aeroplanes are convertible to float seaplanes.

² The basis of classification was changed in 1935. Figures on the old basis for 1929-1934 will be found at p. 746 of the 1934-35 edition of the Year Book.

PART VIII.—CANALS.*

Before the period of extensive railway construction which commenced for Canada in the 1850's, the water routes, more especially the St. Lawrence, the Great Lakes and the Ottawa, were the chief avenues of transportation. These routes were interrupted at certain points, necessitating portages, and to eliminate the toil of unloading, transporting and reloading at the portages the canals of Canada were constructed.

The earliest mention of canals in Canada is in connection with the Lachine canal, begun by early French settlers in 1700, but only after the conquest of Canada by the British were improvements of the main water routes made, and in the early part of the 19th century increased internal and foreign trade and the introduction of steam navigation resulted in more attention being given to this work. Although some of the early canals were constructed primarily for military purposes they soon became essential to the commercial life of the country. However, since the development of railways in Canada, and even more since the growth of motor vehicle traffic, the canals, with the exception of those on the Great Lakes and St. Lawrence river, are playing a minor part in the transportation activities of the country.

Section 1.—Canal Systems.

There are in Canada seven canal systems under the control of the Dominion Government in connection with navigable lakes and rivers. They consist of the canals: (1) between Port Arthur or Fort William and Montreal; (2) from Montreal to the International Boundary near lake Champlain; (3) from Montreal to Ottawa; (4) from Ottawa to Kingston and Perth; (5) from Trenton, lake Ontario, to lake Huron (not completed); (6) from the Atlantic ocean to Bras d'Or lakes, Cape Breton; and (7) from Winnipeg to lake Winnipeg. By means of these canals a total waterway of 1,846 miles has been opened to navigation, the actual mileage of canals being 509.40.

*Revised by G. S. Wong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics. This Branch publishes an annual report on "Canal Statistics".

A detailed description of the individual canals was given on pp. 626-629 of the 1926 Year Book. Summary statistics of their length and lock dimensions are given in Table 44.

¹ Navigable depths are occasionally less at times of extremely low water.

² Minimum depth between locks 25 feet.

³ With lake Ontario at elevation 244 feet above sea-level.

Government Expenditures on Canals.—Tables 45 and 46 deal with the expenditures of the Dominion Government on the construction and maintenance of canals. The principal source of revenue is rentals for water for power purposes. All canals, it may be added, have since 1904 been free of tolls to vessels applying for the privilege of locking facilities. The total capital cost of Canadian canals since their construction was begun is set at \$250,396,930. The heavy capital expenditures in recent years are due to the construction of the Welland Ship Canal, on which \$131,522,667 had been spent up to Mar. 31, 1935. The lock gates were first opened on April 21, 1930.

45.—Expenditures and Revenues of Canals for Period Before Confederation, 1868-1910, 1911-29, 1921-30, and fiscal years ended Mar. 31, 1931-35.

NOTE.—For the individual years 1868 to 1910, see Canada Year Book 1916-17, p. 462, and 1911-30, see p. 748 of the 1934-35 Year Book.

¹ The records relating to cost of construction by the Imperial Government were destroyed by fire in 1852 and the statistics prior to that year are not included in this table.

Section 2.—Canal Traffic.

Tables 47 to 52 deal with the traffic passing through Canadian canals in recent years up to and including 1935. By the summer of 1931, the new Welland Ship Canal was advanced sufficiently to allow vessels drawing up to 18 feet of water to pass through and the allowable draught has since been increased to 22 feet. Iron ore, which had previously been shipped by rail from Point Edward to Hamilton, has since been shipped through from Lake Superior to Hamilton by water, and increased quantities of coal and other commodities have been shipped through the canal.

For details of traffic handled through each canal, see the annual report on Canal Statistics published by the Dominion Bureau of Statistics.

47.—Total Traffic through Canadian Canals, by Nationality of Vessels and Origin of Freight, navigation seasons 1911-35.¹

NOTE.—For Canadian canal traffic from 1886 to 1899, see 1902 Year Book, p. 398, and for the figures for 1900-10, see the 1933 Year Book, p. 697.

The Panama Canal.*—The Panama canal, which was opened to commercial traffic on Aug. 15, 1914, is a waterway which is destined to be of the greatest importance to the British Columbian ports, from which vessels now leave direct for Great Britain and European ports throughout the year. As an alternative route to that of the transcontinental railway lines, such a passage by water is of vital importance in the solution of the larger transportation problems of the continent, and while its influence is perhaps more potential than actual, such a check on trans-continental rail rates is a valuable one. During the War the great expectations based upon the opening of the canal were not realized, owing to the scarcity of shipping, but, with the post-war decline in ocean freight rates, an increase in traffic between our Pacific ports and Europe has taken place, and, while the proportion carried in vessels of Canadian registry is comparatively small, the cargo tonnage has nevertheless assumed considerable proportions.

Table 53 shows the amount of traffic originating in or destined for Canada carried through the canal. The greater importance of the route as one from Pacific to Atlantic ports is illustrated by the much larger volume of freight originating at western ports than at eastern ports, and the larger volume destined for eastern than for western Canadian ports. Strictly intercoastal Canadian cargo during the latest year aggregated 89,444 long tons as compared with 106,519 long tons in 1934.

With respect to traffic by nationality of vessels and cargo carried, vessels of United States registration carried 10,825,573 tons, or 42.8 p.c. of the total cargo of 25,309,527 loaded through in the year 1935. British vessels carried 5,776,021 tons, or 22.8 p.c.; Norwegian vessels 2,463,675 tons, or 9.6 p.c.; Japanese vessels 1,446,049 tons, or 5.7 p.c.; and German vessels 1,300,991 tons, or 5.1 p.c.

*Revised, and figures supplied, by courtesy of the Governor of the Panama Canal Zone.

PART IX.—SHIPPING AND NAVIGATION.

Canadian shipping may be divided into three classes: (1) ocean or sea-going shipping; (2) inland or rivers and lakes international shipping (exclusive of ferriage); and (3) coasting trade or coastwise shipping. Ocean shipping covers the sea-going vessels arriving or departing from Atlantic and Pacific Coast ports, including St. Lawrence River ports up to Montreal. Inland international shipping is the term used to cover shipping between Canadian and United States ports on the Great Lakes and international rivers and on lakes and rivers accessible to shipping from United States ports such as the Ottawa, Rideau, Trent, etc. (Ferriage is, however, excluded from this and other classes of shipping.) Coastwise shipping or the coasting trade covers shipping between one Canadian port and another on the Atlantic coast, on the Pacific coast and on the inland international lakes and rivers or lakes and rivers accessible to them. It does not, however, include shipping on isolated Canadian waterways, such as the Mackenzie river, lake Winnipeg, lake St. John, etc.

Tables 55-64, following, have been adapted from the Shipping Report of the Department of National Revenue for the fiscal year ended Mar. 31, 1935.

Whereas, in the case of most countries of such extensive coast line, the ocean shipping is much the more important, in Canada the shipping on inland waters, while finally dependent to a large extent on ocean traffic to foreign ports, shares, almost equally with that on the Atlantic and Pacific oceans, the attention devoted to water traffic. The Great Lakes are among the leading highways of the international trade of the world; consequently, the statistics of inland international shipping are included with those of sea-going shipping in Table 55, while those of sea-going shipping alone will be found in Table 57.

55.—Sea-Going and Inland Vessels (Exclusive of Coasting Vessels and Ferriage) Arrived at and Departed from Canadian Ports, fiscal years ended Mar. 31, 1911-35.

NOTE.—For the years 1868-1910, see Canada Year Book 1911, p. 380.

Section 1.—Ocean Shipping.

Canadian ocean shipping dates back to the days of early European fishermen who frequented the shores of Newfoundland and the Maritime Provinces. Later on exploration and settlement produced a larger volume of traffic. The first ocean-going vessels in Canada were probably built by Pont-Gravé, one of the first settlers in New France, and soon afterwards Talon and Hocquart, intendants of the colony, realizing the advantages offered to the industry by the timber resources available, gave it every encouragement. Shipyards were established at Quebec and other points along the St. Lawrence, and these, together with later establishments in the Maritime Provinces and on the western coast, have formed the principal bases of Canadian shipping on the Atlantic and the Pacific.

Canadian shipping attained some prominence in the days of fast wooden sailing vessels, and also at a later date when steam power first came into use. In 1833 the *Royal William*, a Canadian ship built to ply between Quebec and Halifax, crossed the Atlantic from Pictou to London, the first vessel to navigate the Atlantic under steam power. At the present time, in addition to other lines of less importance, both the Canadian Pacific and the Dominion Government operate fleets on the Atlantic and Pacific oceans.*

Since the dates between which free navigation is possible down the St. Lawrence are so very important to Central Canada and also have an important influence upon the volume of Atlantic shipping through the port of Montreal, the following historical table is provided showing these dates since 1911.

*The Dominion Government sold the merchant marine in April, 1936, but still operates the West Indies Steamships. (See p. 724).

56.—Duration of the Season of Open Navigation in the St. Lawrence Ship Channel, calendar years 1911-35.

NOTE.—For the years 1882-1910, see Canada Year Book 1934-35, p. 756.

¹ A channel clear of ice is signalized by the arrival of an ice breaker at Victoria pier, Montreal.

The numbers and particularly the tonnages of vessels entered and cleared at Canadian ports, in both ocean and coasting trade, indicate clearly the predominance of British and Canadian shipping over that of all other nations. This is particularly the case on the Atlantic coast, where the bulk of our European and South American trade is handled. The figures in Table 57 show a significant and fairly steady expansion in the total of ocean shipping through Canadian ports during the period since 1911.

57.—Sea-Going Vessels Entered and Cleared at Canadian Ports with Cargo and in Ballast, fiscal years ended Mar. 31, 1911-35.

NOTE.—For the years 1868-1910, see Canada Year Book 1911, p. 379.

Section 2.—Inland Shipping.

Inland shipping is associated in its beginning with the birch-bark canoe of the American Indian. Later the *bateau* and Durham boat came into common use after the migration of the U. E. Loyalists. In the absence at that time of any roads to make land travel possible, the St. Lawrence river and the Great Lakes formed the main highway to the interior. The route from Montreal to the Upper Lakes was broken at three places—from Montreal to Kingston transportation was by *bateau* or Durham boat; from Kingston to Queenston schooners were used; then there was the portage road from Queenston to Chippawa and, finally, schooner again to the destination.

In 1809, the *Accommodation*, the first Canadian steamship, was built for the Hon. John Molson, to run between Montreal and Quebec. On lake Ontario, the *Frontenac* was used from 1817 on a weekly service between York and Prescott and, following this beginning, came a period of great activity in lake and river shipping. In 1845, the *Gore* reached lake Huron by way of the Welland canal to carry on transport trade on the Upper Lakes, where previously there had not been enough traffic to support a large ship. Shipping on the Upper Lakes became brisker now, for there were settlers to be carried from Buffalo to the western United States and grain to be brought back. In this period Canadian shipping made its profit by carrying United States goods, for there was little traffic originating in the Canadian near-West.

Upon the advent of steam railways, water-borne traffic did not decrease but, on the contrary, increased, and at present the greater part of the western grain is shipped *via* the Great Lakes route to eastern ports. The iron ore and coal traffic between lake Superior and lake Erie ranges between 60 and 80 million short tons per annum; the total traffic on these upper lakes alone is greater than that carried by all Canadian railways and about one-twelfth of that carried by all United States railways.

Statistics of arrivals and departures at Canadian ports on inland international waterways, as given in Table 60, are exclusive of ferry services between Canada and the United States and of coastwise shipping between Canadian ports.

Section 3.—Coasting Trade.

Statistics of the arrivals and departures of the vessels engaged in the coasting trade of Canada, whether on the sea or the Great Lakes and international rivers, are given for the latest five years in Table 61. These statistics do not include vessels plying on inland waterways inaccessible to international shipping nor do they include ferry services between one Canadian port and another.

Section 4.—Grand Total Shipping Trade.

Statistics are given in Table 62 showing sea-going, inland international, coastwise and total vessels (exclusive of ferriage) entered and cleared at Canadian ports, by provinces, during the fiscal year ended Mar. 31, 1935, and totals for the fiscal years 1923 to 1935. It is noteworthy in this table that the volume of coastwise shipping is the greatest, while sea-going is next in tonnage. Both sea-going and coastwise shipping show marked expansion since 1923, although the effect of the depression is evident here also. Inland international shipping, on the other hand, has varied considerably and shows a more definite downward trend since 1929. It is, however, significant of the importance of water-borne traffic on the inland rivers and lakes that the total tonnage of shipping entered and cleared was almost as great for Ontario as for British Columbia in the fiscal year ended 1935. This was due to the fact that the great bulk of the inland international shipping was through Ontario ports, while there was also a large tonnage of coasting trade through these ports. British Columbia came first in total shipping in 1935, followed by Ontario, after which came Quebec, Nova Scotia and New Brunswick.

62.—Totals of Numbers and Tonnages of All Vessels Entered and Cleared at Canadian Ports, Exclusive of Ferriage, 1923-35, With Details by Provinces for the fiscal year ended Mar. 31, 1935.

The relative volume of shipping in the leading ports of the provinces of Canada is shown in Table 63. Details are given of the sea-going vessels and of the total of all shipping (exclusive of ferriage) arrived at and departed from each port. In the fiscal year ended Mar. 31, 1935, the tonnage of sea-going vessels arriving at and departing from Vancouver exceeded that of any other port in Canada; Victoria was next, followed by Montreal and Halifax. In total shipping, which included coastwise and inland international as well as sea-going shipping, Vancouver was considerably in the lead, followed by Montreal, Victoria and Halifax.

63.—Number and Tonnage of Sea-Going and of All Vessels Entered and Cleared at each Principal Canadian Port (Exclusive of Ferriage), fiscal year ended Mar. 31, 1935.

NOTE.—For details of coastwise and inland international shipping at these ports and at all other ports of Canada, see the Shipping Report of the Department of National Revenue for the fiscal year ended Mar. 31, 1935.

Section 5.—Shipping Constructed and on the Registry.

The shipbuilding industry in Canada dates from the earliest settlement of the country, and up till the 1870's was one of the leading industries of Quebec and of the Maritime Provinces, 490 vessels with a total tonnage of 183,010 being constructed in the calendar year 1874. About that time, however, the advent of the steel ship rendered the wooden vessels, the material for which was so abundant in Canada, obsolete, with the result that the tonnage built has never since reached the above figure. Statistics of ships built and registered in Canada or sold to other countries are given in Table 64. For the principal statistics of the shipbuilding industry, see Table 7 of the chapter on Manufactures, pp. 428-429.

64.—Vessels Built and Registered in Canada and Vessels Sold to Other Countries, fiscal years ended Mar. 31, 1911-35.

NOTE.—For 1874-1900, see Canada Year Book, 1911, p. 383, and for 1901-10, see 1932 Year Book, p. 597. Statistics are from the Shipping Reports of the Department of National Revenue.

¹ Revised since the publication of the 1934-35 Year Book.

Section 6.—The Department of Marine.*

Administration of the general shipping interests of Canada is in the hands of the Dominion Department of Marine. It deals with: (1) administration of the Canada Shipping Act and other Acts of the Dominion Government relating to marine transportation; (2) pilotage; (3) the construction and maintenance of lighthouses, lightships, fog alarms, buoys and beacons; (4) ports, harbours, piers, wharves and breakwaters; (5) the Meteorological Service of Canada; (6) relief of distressed seamen; (7) hydrographic, tidal and current surveys; (8) inquiries into the causes of shipwrecks and casualties, and the collection of wreck statistics; (9) life-saving service; (10) the inspection of steamboats; (11) the construction and maintenance of the St. Lawrence River ship channel; (12) marine signal service; (13) ice breaking; and (14) the administration of Government radiotelegraph stations and the supervision of private stations in Canada.

A summary statement of the revenue and expenditure of the Department of Marine is given for each fiscal year since 1901 in Table 66, while details for the six years from 1930 to 1935 are presented in Tables 67 and 68.

* Revised by E. Hawken, Assistant Deputy Minister, Department of Marine.

66.—Total Net Revenues and Expenditures of the Department of Marine, fiscal years ended June 30, 1901-06, and Mar. 31, 1907-35.

NOTE.—For fiscal years 1868 to 1900, see 1933 Year Book, p. 715.

¹ Revenue includes the licence fees for radio receiving sets in Canada.

² Nine months.

³ Includes \$493,000 from sale of steamer *Earl Grey* to the Russian Government.

⁴ The increase in expenditure in 1920 and later years was due to the shipbuilding program and to loans to harbour commissions.

¹ Included with "Ship channel, river St. Lawrence" for 1933.

Steamboat Inspection.—The Steamboat Inspection Service of Canada, maintained under the authority of the Department of Marine, comprises the Board of Steamboat Inspection, together with staffs of inspectors at the principal ocean and inland ports. The Board decides on the standards required of all vessels coming under its jurisdiction. These must be attained by all ships given official warrant as to their seaworthiness and mechanical condition. Regulations for the issue of safety certificates under the International Convention for the Safety of Life at Sea were approved by Order in Council of Oct. 18, 1934, and are now being administered by the Board.

The Board is also responsible for the examinations for competency of marine engineers and grants certificates of competency to successful candidates.

Section 7.—Merchant Marine Services Operated by the Canadian Government.*

Canadian Government Merchant Marine.—The circumstances under which the Canadian Government became possessed of and responsible for the operations of a merchant marine are explained on p. 776 of the 1934-35 Year Book.

This merchant fleet reached its greatest development in 1924 and at Dec. 31 of that year numbered 57 vessels of a total deadweight tonnage of 353,450, representing an original capital investment of \$79,661,921. At Dec. 31, 1934, the fleet com-

*Revised under the direction of Geo. W. Yates, Assistant Deputy Minister Department of Railways and Canals.

prised 10 vessels with a deadweight tonnage of 88,579, representing a capital investment of \$18,168,023. In addition to the capital outlay, the Government has advanced \$10,280,175 for working capital, etc., which is still outstanding also. Operating income results from the date of the inception of these services have been as follows, exclusive of interest and depreciation on the original high cost of the vessels. Operating deficits are indicated by a minus sign:—

Calendar Year.	Operating Results.	Calendar Year.	Operating Results.
	\$		\$
1919.....	1,056,767	1927.....	-720,735
1920.....	1,263,307	1928.....	-1,209,083
1921.....	-2,325,906	1929.....	-878,907
1922.....	-2,470,089	1930.....	-834,210
1923.....	-1,873,695	1931.....	-444,285
1924.....	-1,450,887	1932.....	-326,613
1925.....	-926,844	1933.....	-17,938
1926.....	-90,159	1934.....	-127,265

The net cash deficit, 1921-34 inclusive, amounted to \$12,473,479, depreciation accruals \$9,925,939, and interest due the government and unpaid \$20,234,435. Against this total of \$42,633,853, there is applicable an insurance reserve of \$3,000,000 to reduce loans from the Dominion of Canada. Taking this into account, the total book deficit of the Canadian Government Merchant Marine, at Dec. 31, 1934, was \$39,633,853.*

Canadian National (West Indies) Steamships.—In conformity with the Canada-West Indies Trade Agreement Act of 1926 (16-17 Geo. V, c. 16), the Dominion Government has provided direct steamship services to the West Indies through the medium of Canadian National (West Indies) Steamships, Ltd. The service is provided by a fleet of eleven vessels of a total deadweight tonnage of 63,426. Five of these boats, known as the "Lady" ships, were specially constructed for passenger service on this route, while the remaining six vessels previously formed part of the Canadian Government Merchant Marine fleet, and were taken over by the Canadian National (West Indies) Steamships, Ltd., for operating purposes, under entrusting agreements with the respective companies which owned the ships. The investment in vessels at Dec. 31, 1934, amounted to \$10,760,850, mainly made up of the construction cost of the "Lady" ships and the present-day valuation of the other six ships, together with the cost of conversion for use in the West Indies service of three of the latter. The financial results of the operations of the Canadian National (West Indies) Steamships, Ltd., have been as follows:—

Calendar Year	Operating Revenues.	Operating Expenses.	Net Operating Loss.	Depreciation.	Interest.	Book Loss.
	\$	\$	\$	\$	\$	\$
1929.....	3,332,683	3,780,524	447,841	227,315	442,739	1,117,895

1934.....	3,509,738	3,606,416	96,678	319,967	762,033	1,178,678

* Since the above material was prepared, the Government has issued a statement to the effect that the ten vessels of the Canadian Government Merchant Marine have been disposed of to British interests (April 25, 1936).

PART X.—TELEGRAPHS.*

The early history of telegraphic communication in Canada, given on p. 778 of the 1934-35 Year Book, is not repeated in this volume in order to economize space.

Dominion Government Telegraph Service.—This service is operated by the Telegraph Branch of the Department of Public Works. Its general object has been to furnish rapid communication for outlying and sparsely settled districts where the amount of business is so small that commercial companies will not enter the field but where the public interests require that there should be communication. Thus these facilities include: telegraph and telephone services to scattered settlements around the coasts of Cape Breton island; cable services to Campobello, Grand Manan and other islands in the bay of Fundy, to Prince Edward Island, Magdalen islands and Anticosti island in the gulf of St. Lawrence; telegraph or telephone services along the north shore of the gulf of St. Lawrence from Quebec to the straits of Belle Isle; cable connections with Pelee and Manitoulin islands in Ontario; some lines to northern outlying districts in Saskatchewan; lines from Edmonton to the Athabaska and Peace River country in Alberta; telegraph or telephone communications around the coast of Vancouver island and to fishing, lumbering and mining settlements along the coast of the mainland of British Columbia, as well as to isolated mining centres in the interior; and finally the overland telegraph line to Dawson and other settlements in Yukon. All these services, on Mar. 31, 1934, comprised 8,864 miles of pole line, 10,782 miles of wire, 326 knots of cable and 705 offices, with 535 salaried employees engaged in operation and maintenance, as well as 171 other persons. The lines in operation amounted to 3,767 miles of pole line in British Columbia and an additional 555 miles in Yukon, 1,675 miles in Quebec, 1,442 in Alberta and 877 miles in Nova Scotia, as well as smaller mileages in New Brunswick, Ontario and Saskatchewan.

Telegraph Systems.—The Canadian telegraph systems are composed of lines owned by the Dominion Government and by chartered railway and telegraph companies. The lines previously owned by the Great North Western Telegraph Co., the Grand Trunk Pacific Telegraph Co., the Canadian Northern Railway Co. and the National Transcontinental Railway are now owned by the Government and are operated by the Canadian National Telegraph Co. (formerly Great North Western Telegraph Co.).

The Canadian system, in proportion to population, is one of the most extensive in the world, and is operated under considerable climatic and geographic disadvantages. In the operation of railways and in the receipt and dispatch of market and press reports, its services to the nation are invaluable.

Telegraph Statistics.—A brief summary table giving the more important figures of the operation of Canadian telegraphs from 1920 to 1934 follows. For details, see the Annual Report on Telegraph Statistics published by the Dominion Bureau of Statistics.

*Revised by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics, which issues an annual report dealing with telegraph statistics.

¹ Cablegrams not included. The total in Table 73 includes messages handled by the Marconi Wireless Telegraph Co.² The figures for Table 73 include offices of wireless and cable companies and to that extent are larger than the sums of the items given here for corresponding years.³ Included with Canadian National offices.

Submarine Cables.—Six transoceanic cables have termini in Canada—five of them on the Atlantic coast and one on the Pacific. The year in which the cable was first demonstrated to be of commercial value was 1866, and up to the present its use has greatly increased. The Atlantic cables are controlled by English and United States interests. The Pacific cable, from Canada to Australia and New Zealand, has been in operation since 1902, and was owned by a partnership of the Governments of Great Britain, New Zealand, Australia and Canada. As a result of the recommendation of the Imperial Wireless and Cable Conference of 1928, in view of increased wireless competition, it was decided to dispose of the Pacific and West Indian Islands cable systems to the Imperial and International Communication Co., a company formed to take over all Empire-owned cables and lease the Empire-owned beam wireless systems. The necessary legislation was passed by the United Kingdom in February, 1929, and by Canada in June, 1929.

PART XI.—TELEPHONES.*

A brief historical account of the early development of telephones in Canada appeared at p. 781 of the 1934-35 Year Book.

Telephone Systems.—The 2,388 telephone systems existing in 1934 (Table 75) include the three large provincial systems in Manitoba, Saskatchewan and Alberta, and a smaller governmental system in Ontario, together with the system operated by the National Parks of Canada, Department of the Interior. There were also 141 municipal systems, the largest operated by the cities of Edmonton, Fort William and Port Arthur. Out of the 1,494 co-operative telephone companies, no fewer than 1,160 were in Saskatchewan alone and 207 in Nova Scotia.

*Revised by G. S. Wrong, B.Sc., Chief of the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics, which issues an annual report dealing with telephone statistics.

¹ The years 1911-18 are from July 1 to June 30. Figures for 1919 to 1934 are for the calendar years.

Telephone Statistics.—The financial statistics of Table 76 show that the investment in telephone property in Canada, represented by the cost of property, is a very large item and is exceeded in the field of transportation and communications only by the investments in steam railways (pp. 657-659) and roads and highways (pp. 687-688).

Up to 1930 there was a steady growth in the number of telephones but in the three following years to 1933 there were declines aggregating 15 p.c. However, there was a slight increase again in 1934. The number of telephones per capita is second only to that of the United States, the numbers being 13.29 telephones per 100 population in the United States and 11.01 in Canada. This is a favourable showing in view of the low density of population in Canada as a whole and the fact that 46 p.c. (46.30 p.c. in 1931) of the population is rural.

Estimates of the numbers of telephone conversations during 1934 were 2,273,112,000 local and 25,395,566 long-distance calls. Systems operating almost 90 p.c. of all telephones in Canada made estimates by actual count on days of normal business, and, after adjusting for uncompleted calls, holidays, Sundays, etc., the average was multiplied by 365. The long-distance calls in practically all cases were the actual long-distance calls put through or completed. The averages were 1,904 local and 21 long-distance calls per telephone and 212 telephone conversations per capita as compared with 213 in 1933. The estimated per capita average for the United States in 1933 was 191.

PART XII.—RADIO.*

Under the Radiotelegraph Act (c. 43, 1913, now c. 195, R.S.C., 1927), the administration of radio within the Dominion was vested in the Department of Marine. Dominion jurisdiction has been questioned by certain of the provinces from time to time, but on Feb. 9, 1932, the Judicial Committee of the Imperial Privy Council ruled that the control and regulation of radio communication is within the jurisdiction of the Dominion Parliament. This decision was a very important one and has done much to further the nationalization of radio broadcasting in Canada. (See pp. 734-735.)

Section 1.—Radiotelegraphy.

The Coast Station Radiotelegraph System.—The present coast station system of 76 stations consists of three chains—one extending from Vancouver to Prince Rupert on the Pacific, another from Port Arthur to the Atlantic ocean in the east, and the third from Port Churchill to Resolution island at the entrance to Hudson strait. The Great Lakes coast stations connect with those of the east coast, which, in turn, connect with the Hudson Bay Route chain. There is no direct radio connection between the Great Lakes and the Pacific Coast chain.

Of the above stations, 15 on the east coast and Great Lakes are operated by the Canadian Marconi Co. under contract with the Department, and the remaining 61 on the east coast, west coast and Hudson bay and strait are operated directly by the Department. Twice daily, at advertised hours, a number of these stations broadcast messages to shipping containing such important information as weather forecasts, storm warnings, reports in connection with floating derelicts, ice and other dangers to navigation. In the interests of navigators, to whom accurate time is essential in computing observations on celestial bodies, three Canadian coast stations—two on the west coast and one on the east coast—transmit time signals at advertised hours daily.

* Sections 1 and 2 have been revised by Commander C. P. Edwards, O. B. E., Director, Radio Service, Department of Marine, Ottawa. A fuller treatment of the historical and descriptive background of radio communication was published at pp. 607-610 of the 1932 Year Book.

Some years ago the discrimination of underwriters in the matter of insurance rates charged on ships plying to Canadian ports led the Department to feel that any reasonable expenditure which would tend to reduce these charges would be a sound investment. To this end 13 direction-finding stations have been established at specially selected sites with respect to navigational routes—7 on the east coast, 5 on Hudson bay and strait, and 1 on the west coast. These stations are fitted with special apparatus which enables the direction of the incoming radio signal transmitted by a ship to be accurately determined.

A more recent extension of the shore direction finder is the development of the direction-finding instrument on board ship. To assist this development, the Department has established radio beacon transmitters at a number of lighthouses and lightships (see Table 80). These radio beacons transmit characteristic radio signals with an approximate range of 50 miles every hour at advertised times during clear weather and continuously when the atmosphere in the vicinity of the station is so obscure as to impede navigation.

To insure the safety of life at sea, all passenger steamers and freighters plying to and from Canadian ports must carry radio equipment manned by competent operators in possession of a certificate of proficiency in radio. The Department maintains a complete radio inspection service to enforce this regulation. Inspectors located at various ports throughout the Dominion are responsible for checking the efficiency of the radio equipment on ships of all nationalities, and seeing that only competent operators are carried. Ships are also surveyed with a view to the issuance of the necessary certificates prescribed under the Safety of Life at Sea and Load Line Conventions Act, 1931. Examinations for certificates of proficiency in radio are conducted by the Radio Branch, and 5,631 certificates had been issued up to Mar. 31, 1935.

Section 2.—Radiotelephony.

Transatlantic Radiotelephone Service.—A radiotelephone service between Canada and Great Britain was first made available to the Canadian public, through the medium of the Bell Telephone Co. *via* the transatlantic radio circuit operated by the American Telegraph and Telephone Co. from New York, in March, 1928. In 1932 a direct circuit with Great Britain was opened through the medium of the beam station of the Canadian Marconi Co. at Drummondville, P.Q.

Radio Broadcasting.—Broadcasting of the human voice by radio first commenced in Canada with test programs carried out by the Canadian Marconi Co. in Montreal during the winter evenings of 1919. Regular organized programs were commenced in December, 1920, by the same company, on a wavelength of 1,200 metres.

In April, 1922, the establishment of broadcasting stations on a general scale commenced, 52 private, commercial and amateur broadcasting licences being granted during the fiscal year 1922-23. During the fiscal year 1934-35, 76 broadcasting stations were in operation in the Dominion, and the number of licensed receiving sets was 812,335. The licence fee for a broadcasting station is \$25 for a period of 6 months, and for a receiving set \$2 per annum.

Approximately \$250,000 is expended annually by the Radio Branch of the Department of Marine for the suppression of inductive interference in the interests of broadcast listeners. This service is entirely free. Upwards of 100 men and 32 fully equipped cars are engaged in this work.

The extent to which private receiving sets are used for the reception of public broadcasting is indicated by the number of private receiving licences issued in the various provinces of the Dominion during the fiscal year 1934-35 as follows:—Alberta, 49,107; British Columbia, 70,759; Manitoba, 52,928; New Brunswick, 20,194; Nova Scotia, 28,989; Ontario, 342,394; Prince Edward Island, 1,945; Quebec, 204,096; Saskatchewan, 41,573; Yukon and Northwest Territories, 350.

Section 3.—The Canadian Radio Broadcasting Commission.*

During 1935, the third year of its operations, the Canadian Radio Broadcasting Commission substantially extended and improved the national broadcasting service which was established in 1933. The amount of daily broadcasting was considerably increased, coverage in various parts of the country was enlarged by the addition of new broadcasting stations to the Commission's networks, and the scope of the service was extended, especially by the daily broadcasting of programs from Great Britain. Network operation was increased from 4½ hours to 6 hours daily on week days and Sunday operations extended to 9 hours. With allowance made for the difference in time zones, this increase meant that the Commission was broadcasting continuously between 5.30 p.m. in the East and 1.30 a.m., Eastern Standard Time, on the Pacific coast. During part of this period the broadcasting is on a coast-to-coast network and during other parts it is on regional networks. The Commission's system of wire networks extends from Sydney, N.S., to Vancouver. It is linked with 58 stations, of which 3 are short-wave stations, the remainder being stations on the regular broadcast band. Of these stations 28 are known as basic stations being either stations operated by the Commission itself or commercial stations from which the Commission purchases broadcasting time for the carrying of its programs. The other stations on the networks have the privilege of using Commission programs when it is convenient for them to do so, and do use them when their broadcasting time is not occupied with commercial programs. The Commission itself now operates stations at Chicoutimi, Quebec, Montreal, Ottawa, Toronto, Windsor and Vancouver.

An important development during the year was the gradual filling of gaps in coverage. A large section of southwestern Ontario, which formerly did not receive the national broadcasting service through lack of facilities, is now receiving it from a new station at Windsor operated by the Commission itself. A new commercial station at Sudbury is serving a wide area in northern Ontario where Commission broadcasting was formerly not satisfactorily received. Another section in northern Ontario is receiving the Commission's service through new or improved stations at Kirkland Lake and Timmins. The Commission had hoped to commence during the year the carrying out of a construction plan which would have included new high-power broadcasting stations at various points, but action had to be deferred owing to lack of financial provision.

Another important step taken by the Commission in 1935 was that of the establishment at Ottawa of a powerful short-wave receiving station for the reception of overseas programs to be supplied to listeners on the networks. Formerly the Commission had to secure programs from overseas by commercial radiotelephone. The new station enables it to secure direct reception. The equipment, a late development of the Canadian Marconi Co., is so designed as to overcome the difficulties commonly encountered in ordinary short-wave reception. By means of a duplicate antenna system, "fading", one of the major handicaps of short-wave receiving, is largely eliminated. Programs from Great Britain, received at this station during the hours of network operation, are transferred by wire to the studios in Ottawa and there placed on the network wires for stations throughout the country. Programs received at other times may be recorded by the blattnerphone magnetic process and rebroadcast on the networks at any suitable time.

* Supplied by Hector Charlesworth, Esq., Chairman, Radio Broadcasting Commission.

Extension of the daily period of network operation necessitated a corresponding enlargement of program production activities. Efforts were made also to improve the quality of Commission broadcasting. Several series of programs of a distinctively Canadian character, some of them based on subjects of historical interest, were developed. Improvement was sought in informative and educational broadcasts. The informative item, "A Fact a Day About Canada", broadcast daily in the news period, continued to have a very large following, especially among teachers and students. This item is compiled and supplied to the Commission by the Dominion Bureau of Statistics. The Northern Messenger Service, a weekly short- and long-wave broadcast of personal messages and news summaries for the special benefit of persons stationed in the Arctic and sub-Arctic regions, gave increasing satisfaction. It was established that between 75 p.c. and 80 p.c. of the personal messages carried on this service were received by those to whom they were addressed. A number of special broadcasts of exceptional interest were given, including a broadcast of the opening of Parliament. The Commission continued to lend its facilities in connection with efforts for international peace, relief, and causes being promoted by various departments of the Government service, and other public causes.

PART XIII.—THE POST OFFICE.

Historical.—A brief account of the pre-Confederation development of postal services in Canada was given on pp. 789-790 of the 1934-35 Year Book.

At Confederation the provincial systems were transferred to the Dominion. The Post Office Act of 1867 established a service throughout Canada. The domestic rate on letters was reduced from 5 to 3 cents per half-ounce, and in 1870 the rates to the United States and the United Kingdom were reduced from 10 to 6 cents and from 12½ to 6 cents, respectively, per half-ounce. In 1875 a convention between Canada and the United States reduced postal rates between the countries to the domestic level. In 1878, on the admission of Canada to the Postal Union, letter postage to the countries of the Postal Union was reduced to 5 cents per half-ounce. After a conference in 1897 Imperial penny postage (2 cents per half-ounce) was established on Dec. 25, 1898, while the domestic rate was reduced from 3 to 2 cents per ounce. These rates were maintained until 1915, when, with the rising costs of the war period, rates were increased. Penny postage again became effective for Canada, to the United States, Newfoundland and other countries of North America on July 1, 1926, and to the United Kingdom and all other places within the British Empire on Dec. 25, 1928, with later extensions to France and South America. On July 1, 1931, a special revenue tax, imposed by the Government for the purpose of obtaining additional revenue, came into effect on letters addressed to places in Canada, throughout the Empire, to France and to North and South America generally, making the rate in these cases 3 cents for the first ounce and 2 cents for each succeeding ounce.

The Post Office Department is administered by the Postmaster General. Besides the several administrative branches at Ottawa, the Dominion is divided into 15 districts, each in charge of a Superintendent of Postal Service. The Canadian system embraces a territory more extensive than that served by any other system, excepting those of United States and Russia, and the sparsity of population and the comparative lack of development make inevitable a peculiarly difficult and relatively expensive service.

Rural Mail Delivery.—A system of rural mail delivery was inaugurated in Canada on Oct. 10, 1908, limited at that time to existing stage routes. The service was greatly extended by new regulations taking effect on April 1, 1912. The result has been an increase in the number of rural routes from approximately 900 in 1912 to 4,343 in 1934, having 238,764 mail boxes as against approximately 25,000 in 1912.

Statistics.*—Tables 83 to 85 show, respectively, the numbers of post offices in operation in Canada in the latest six years, the gross revenue in each office collecting \$10,000 and upwards in 1934 and 1935, and the net revenues and expenditures of the Department in various years since 1890.

* Revised as to financial transactions by H. E. Atwater, Financial Superintendent, Post Office Department.

83.—Numbers of Post Offices in Operation, by Provinces, Mar. 31, 1930-35.

¹ "Net Revenue" is exclusive of salaries and allowances to postmasters and some other smaller items. The gross revenue in the fiscal year 1934 was \$36,352,253 and in 1935, \$37,577,241.

Auxiliary Services.—The auxiliary postal services—the issuing of money orders (including postal notes) and the facilities offered by the Post Office savings banks—have expanded enormously since Confederation. In 1868, there were 515 money order offices in operation, issuing orders to an amount of \$3,342,574, while the following tables show the magnitude of operations now. Statistical tables showing deposits with the Government savings banks since Confederation and the business of the Post Office savings banks, 1930-35 are included in the chapter on Currency and Banking, (Chapter XXII).

86.—Operations of the Money Order System in Canada, fiscal years ended Mar. 31, 1911-35.

NOTE.—For 1868 to 1910, see Canada Year Book, 1911, p. 289. For 1901-10, see 1932 Year Book, p. 622.

Total notes received and paid..... No.	8,145,855	7,227,262	5,963,810	5,115,761	5,772,119
Total value, including postage and postal note stamps affixed..... \$	14,681,376	12,629,304	10,530,490	9,247,459	10,246,800

Postage Stamps.—The value of the postage stamps, post cards, etc., sold during each of the latest seven fiscal years, was: \$26,475,541 in 1929, \$27,101,353 in 1930, \$25,769,781 in 1931, \$27,242,715 in 1932, \$25,999,159 in 1933, \$25,541,129 in 1934, and \$26,303,451 in 1935. Receipts from postage paid in cash were as follows: \$8,410,255 in 1929, \$9,045,805 in 1930, \$8,887,322 in 1931, \$9,078,136 in 1932, \$8,173,950 in 1933, \$8,129,387 in 1934 and \$8,619,712 in 1935.

Air-Mail Services.—The total weight of mail carried by air throughout Canada during the year ended Mar. 31, 1935, was 691,767 lb., an increase of 17 p.c. over the previous year, while the mileage flown showed an increase of approximately 11 p.c.

An interesting feature of the returns is the continued volume of mail carried by air into the several mining districts, and there would seem to be little doubt that aerial postal communication contributes materially to the development of Canada's natural resources.

¹ Includes extra trips performed at contractors' convenience.

Subsidies, etc.—The conveyance of mail by land, water and air entailed a total expenditure of \$13,000,557 during the fiscal year ended 1935. Land transportation (largely that by rural delivery) cost \$5,920,714, railway carriage cost \$6,581,284, conveyance by steamship cost \$275,387, while that by air cost \$223,172. These amounts were paid solely for services rendered as carriers. In addition

however, considerable mail is carried, on both the Atlantic and Pacific coasts, by steamships and steamship lines which are especially subsidized by the Government. Table 89, showing amounts paid under the head of Mail Subsidies and Steamship Subventions in 1933, 1934 and 1935, follows.

89.—Mail Subsidies and Steamship Subventions, fiscal years ended Mar. 31, 1933-35.

NOTE.—The figures in the following table were supplied by F. E. Bawden, Esq., Director of Steamship Subsidies, Department of Trade and Commerce. Such data appear annually in the Annual Report of the Auditor General and represent the amounts paid in connection with contracts made under statutory authority by the Department of Trade and Commerce for trade services, including the conveyance of mails.

CHAPTER XIX.—LABOUR AND WAGES.*

PART 1.—LABOUR.

Section 1.—Occupations of the Wage-Earning Population.

The occupations of the working population of a country are, at any time, mainly determined by its natural resources and the stage which has been reached in their development. The outstanding characteristics of Canada are its enormous extent, its immense natural resources and the comparatively slight development of these, only the resources of the southern portions being as yet at all well-known. The developed areas fall into four economic units with quite distinct physical characteristics: first, the Maritime Provinces, where lands, forests, mines and fisheries are the chief natural resources; secondly, Ontario and Quebec, with lands, forests, mines and abundant water power for manufacturing purposes; thirdly, the Prairie Provinces, where the land is the chief natural resource, except in Alberta which contains immense coal deposits; lastly, British Columbia, with fisheries, forests and mines, where agriculture plays a comparatively minor part.

In Canada, as in other new countries, the labouring population (using the term in its widest sense) bears a larger proportion to the total than is the case in older civilizations where there exists more realized wealth. In addition to our native-born workers, great numbers of young males and smaller numbers of females, have, in the past, immigrated from older countries to Canada to find here a better market for their labour. Thus both the sex distribution and the age distribution of the population of Canada is rendered somewhat abnormal, an unusually large percentage of that population being of working age and of the male sex—that is, of the sex which is most generally gainfully employed.

At the census, the total population in gainful occupations is recorded. At pp. 799-803 of the 1934-35 Year Book, the total gainfully occupied in 1931 were dealt with rather extensively under the heading "Occupations of the People". A treatment so broad is perhaps somewhat out of place as a subdivision of "Labour". Normally it is considered as a sectional heading under "Population" and in accordance with this view, this Section is now limited to occupations of wage-earners. The gainfully occupied population is composed of four classes of persons: (1) employers, (2) own accounts, (3) wage-earners, (4) unpaid family workers. The third class, *i.e.*, the wage-earners, comprises that portion of the gainfully occupied which in the course of its employment receives either wage or salary payment. In Canada the wage-earners numbered 2,570,097 at the 1931 Census, representing 31.50 p.c. of the total population in gainful occupations. The number of male wage-earners was 2,022,260 or 78.68 p.c. of the total of both sexes combined and the number of female wage-earners was 547,837 or 21.32 p.c. of the total.

* The sections and subsections of this chapter, with the exceptions of Sections 1, 3, 7 and 9, Subsections 3 and 5, and section 10, all of Part I, and Section 4 of Part II, have been revised by, or under the direction of, W. M. Dickson, Deputy Minister, Department of Labour, Ottawa. The information in Section 3, Part I, has been obtained through the courtesy of the Provincial Departments of Labour or Bureaus of Labour, and that in Section 7, Part I, has been revised by the chairmen of the respective provincial Workmen's Compensation Boards. Section 10 has been revised under the direction of Dr. W. C. Clark, Deputy Minister, Department of Finance, Ottawa. The remaining sections have been prepared in the Dominion Bureau of Statistics.

† On the sex distribution of the population, see pp. 107-109; on the age distribution, see pp. 111-112.

Table 1 shows the numerical and percentage distribution of the wage-earners by provinces in 1931.

1.—Numerical and Percentage Distribution of Wage-Earners, by Provinces, 1931.

Province.	Numbers.			Percentages.		
	Total.	Male.	Female.	Total.	Male.	Female.
Canada	2,570,097	2,022,260	547,837	100.00	100.00	100.00
Prince Edward Island.....	12,344	9,159	3,185	0.48	0.45	0.58
Nova Scotia.....	117,781	95,244	22,537	4.58	4.71	4.11
New Brunswick.....	84,232	66,310	17,922	3.28	3.28	3.27
Quebec.....	696,339	535,203	161,136	27.09	26.47	29.41
Ontario.....	965,607	752,851	212,756	37.57	37.23	38.84
Manitoba.....	170,739	132,883	37,856	6.64	6.57	6.91
Saskatchewan.....	145,568	116,157	29,411	5.66	5.74	5.37
Alberta.....	142,421	116,005	26,416	5.54	5.74	4.82
British Columbia.....	235,066	198,448	36,618	9.15	9.81	6.68

It will be seen that almost two-thirds of the wage-earners were found in Ontario and Quebec at the last census, a little less than one-fifth in the Prairie Provinces, and somewhat less than one-tenth in British Columbia and the Maritimes.

In Table 2 the numbers and percentages of the wage-earners in the main industrial groups are given for Canada, while in Table 3 the distribution is according to broad occupational groupings. The differences between these industrial and occupational classifications, as explained on p. 745, should be carefully noted. For more detailed analyses of wage-earners the reader is referred to Section 4 of Part II of this chapter, pp. 800-803.

2.—Numerical and Percentage Distribution of Wage-Earners, by Industrial Groups for Canada, 1931.

Industrial Group.	Numbers.			Percentages.		
	Total.	Male.	Female.	Total.	Male.	Female.
All Industries	2,570,097	2,022,260	547,837	100.00	100.00	100.00
Agriculture.....	198,592	196,675	1,917	7.73	9.73	0.35
Forestry, fishing, trapping.....	57,844	57,550	294	2.25	2.85	0.05
Mining, quarrying.....	68,962	68,610	352	2.68	3.39	0.06

Labourers and unskilled workers (not agricultural, mining or logging).....	433,916	422,284	11,632	16.88	20.88	2.12
Unspecified.....	1,585	1,291	294	0.06	0.06	0.05

¹ Less than one-hundredth of one per cent. ² Includes "Electric Light and Power". ³ Includes "Warehousing and Storage". ⁴ Includes "Laundering, Cleaning, Dyeing and Pressing".

The above occupational classification of the wage-earners differs from the industrial classification (Table 2) in that, in Table 3, all persons following occupations similar in nature come under the same occupational group irrespective of the industry in which employed, whereas in Table 2 persons in the same occupation may appear under several industrial groups, and any one industrial group may be made up of quite diverse occupations. For example, under "manufacturing", as an occupational group, are included only such occupations as are concerned with the making of some product, and each of these occupational classes contains every person following the occupation whether employed in factory or elsewhere. On the other hand, the group or division "manufacturing", in the industrial classification, includes occupations commercial, clerical, professional, etc., in their nature, as well as those directly connected with the making of various products, but only persons actually employed in factories come under this group. In other words, all machinists, all blacksmiths, in fact all persons following processing occupations, whether employed in factories or elsewhere, are included under the occupational group "manufacturing" in Table 3, while the industry group "manufacturing" in Table 2 includes machinists and blacksmiths working in factories only, also persons following such occupations as clerks, civil engineers, truck drivers, etc., who were employed by manufacturing concerns.

Section 2.—The Dominion Department of Labour.

The Department of Labour of the Dominion Government was established in 1900 under the authority of the Conciliation Act, 1900 (63-64 Vict., c. 24). Its chief duties originally comprised the administration of certain provisions of this statute designed to aid in the prevention and settlement of labour disputes, the administration of the Government's fair wages policy for the protection of workmen employed on Dominion Government contracts and on works aided by grants of public funds, the collection and classification of statistical and other information relative to conditions of labour, and the publication of a monthly periodical known as the *Labour Gazette*. From 1900 to 1909 the Department was administered by

the Postmaster General, who was also Minister of Labour. It was constituted a separate Department under the Labour Department Act, 1909 (R.S.C., 1927, c. 111).

The work of the Department was greatly increased in 1907 by the passage of the Industrial Disputes Investigation Act (R.S.C., 1927, c. 112). At present the Department is also charged with the administration of an Act passed in 1918 known as the Employment Offices Co-ordination Act (R.S.C., 1927, c. 57), the Government Annuities Act of 1908 (R.S.C., 1927, c. 7), the Technical Education Act enacted in 1919 (R.S.C., 1927, c. 193), the White Phosphorus Matches Act of 1914 (R.S.C., 1927, c. 128), the Fair Wages and Eight Hour Day Act of 1930 (20-21 Geo. V, c. 20), the Vocational Education Act, 1931 (21-22 Geo. V, c. 59), the Minimum Wages Act of 1935 (25-26 Geo. V, c. 44), the Unemployment and Farm Relief Act, 1931 (21-22 Geo. V, c. 58), the Unemployment and Farm Relief Continuance Act, 1932 (22-23 Geo. V, c. 13), the Relief Act, 1932 (22-23 Geo. V, c. 36), the Relief Act, 1933 (23-24 Geo. V, c. 18), the Relief Act, 1934 (24-25 Geo. V, c. 15), and the Relief Act, 1935 (25-26 Geo. V, c. 13). The scope of the Department has increased in other directions, especially in investigating the cost of living, and in connection with the International Labour Organization of the League of Nations. For the operation of the Government Annuities Act of 1908 and the Technical Education Act, see the chapters on Insurance and Education, respectively.

Industrial Disputes Investigation Act.—The Industrial Disputes Investigation Act (R.S.C., 1927, c. 112), has attracted considerable favourable attention from legislators and publicists throughout the world. As enacted in 1907, it forbids strikes and lockouts in mines and certain public utility industries until the matters in dispute have been dealt with by a board of conciliation and investigation consisting of three members, two appointed by the Minister of Labour on the recommendation of the respective parties to the dispute, the third on the recommendation of the first two, or, if they fail to agree, by the Minister himself. Should either of the parties fail to nominate a board member, the Minister may appoint a fit person on its behalf. After the board has made its report, either of the parties to the dispute may reject it and declare a strike or a lockout, a course adopted, however, only in a small percentage of cases. The machinery of the Act may be extended to other industries with the consent of the parties concerned. In January, 1925, a judgment was rendered by the Judicial Committee of the Privy Council declaring that the Act as it stood was not within the competence of the Dominion Parliament.* At the ensuing session of Parliament amendments were made to the statute, with the object of limiting its operation to matters not within exclusive provincial jurisdiction. It was also provided by these amendments that the statute should apply in the case of "any dispute which is within the exclusive legislative jurisdiction of any Province and which by the legislation of the Province is made subject to the provisions of this Act".

The Legislatures of all provinces except Prince Edward Island have taken advantage of this provision and enacted enabling legislation, by which the Dominion Industrial Disputes Investigation Act becomes operative in respect of disputes of the classes named in the Dominion law and otherwise within exclusive provincial jurisdiction.

A review of the proceedings under the Industrial Disputes Investigation Act from its enactment in March, 1907, to Mar. 31, 1935, shows that, during the 28 years, 818 applications were received for the establishment of boards of conciliation

* See p. 241 of the *Labour Gazette* for February, 1925, for text of judgment of the Judicial Committee of the Privy Council in regard to the validity of this statute.

and investigation, as a result of which 538 boards were established. In all but 38 cases, strikes or lockouts were averted or ended.

Fair Wages Branch.—The Fair Wages Branch of the Department of Labour is charged with the preparation of fair wages conditions and schedules of minimum wage rates, which are inserted in Dominion Government contracts for works of construction, remodelling, repair or demolition. The number of fair wages schedules so prepared, from the adoption of the Fair Wages Policy in 1900 up to the end of the fiscal year 1934-35, was 6,505. The number of fair wages schedules furnished during the fiscal year 1934-35 was 374.

The Department of Labour also co-operates closely with other Departments of the Dominion Government in ensuring the observance of fair wages conditions inserted in contracts for the manufacture of various classes of equipment and supplies for Government use.

The Department is frequently consulted by other Departments of the Government regarding the prevailing rates of wages to be observed on works which are undertaken on the day-labour plan.

The fair wages policy of the Government of Canada was originally based on a resolution adopted by the House of Commons in 1900 and expressed in an Order in Council adopted on June 7, 1922, amended on April 9, 1924, and again on Dec. 31, 1934. As drawn up by Order in Council certain specified conditions were designated as being applicable to contracts for building and construction operations, and other conditions as being applicable in the case of contracts for the manufacture of certain classes of government equipment and supplies. The policy required that the current wage rates and working hours of the district should be observed in the case of all workmen employed, or if there were no current rates or hours in existence, then fair and reasonable conditions in both respects. Contracts for railway construction to which the Dominion Government has granted financial aid, either by way of subsidy or guarantee, are likewise subject to fair wages conditions. The policy has, moreover, been extended within recent years to cover contracts for works carried out by the several Harbour Commissions and aided by grants of public funds.

On May 30, 1930, an Act of Parliament was adopted, known as the Fair Wages and Eight Hour Day Act, 1930, which provides for the payment of current wage rates to all persons employed on contracts made with the Government of Canada for works of construction, remodelling, repair or demolition, provided that the wages in all cases shall be fair and reasonable. This statute also directed that the working hours of persons, while so employed, shall not exceed eight hours a day. It was further declared that the foregoing conditions are to be applied to all workmen employed by the Government itself on the construction, remodelling, repair or demolition of any work.

The Fair Wages and Eight Hour Day Act, 1930, was superseded, however, by the coming into force on May 1, 1936, of The Fair Wages and Hours of Labour Act, 1935, which was adopted by Parliament on June 28, 1935. This latter statute re-enacts a number of the sections of the former, and adds new provisions to comply as far as possible with the recommendations of the Royal Commission on Price Spreads. Like its predecessor, the Act makes provision for "fair wages" and an eight-hour day on Government construction works, but also provides for a forty-four hour week on such works and extends the Dominion Government's policy of fair wages and an eight-hour day to works carried out by any provincial or municipal authority to which financial aid is given by the Dominion, as well as other works aided by the Government of Canada.

On Mar. 27, 1930, an Order in Council was passed providing that, except in cases where the work of employees was intermittent in character, or the application of the rule was not deemed to be practicable, or in the public interest, the hours of work of any Dominion Government employees who had up to that time been required to work more than eight hours daily should be reduced to eight hours a day, with a half-holiday on Saturday.

An Order in Council was adopted on Dec. 31, 1934, rescinding the labour conditions previously applied to contracts for the manufacture of various classes of government supplies, and substituting other conditions therefor. The provision for the payment of wages not less than current rates, or fair and reasonable rates if there are no current rates, is retained in the new conditions, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, 20 cents an hour. It is also declared that males and females under 18 years of age shall be entitled to rates of wages not less than those provided for women and girls in the minimum wage scales of the respective provinces, and that, in any cases where the provincial minimum wage laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Dominion contract work.

Labour Gazette.—A monthly publication, known as the *Labour Gazette* has been issued by the Dominion Department of Labour since its establishment in 1900. It contains a monthly review of the industrial situation in Canada and of the state of employment, including reports of the operations of the Employment Service of Canada in the various provinces, also information relative to: labour legislation, wage rates and hours of labour, wholesale and retail prices of staple commodities in Canada and other countries, labour disputes (including the proceedings under the Industrial Disputes Investigation Act), industrial accidents, legal decisions affecting labour, industrial training and technical education, proceedings under the Combines Investigation Act, and other matters of general or current industrial interest. The *Labour Gazette* is widely distributed throughout Canada, and the statistical and other information contained therein is constantly used in connection with wages and other issues between employers and workers. A subscription charge of 20c. per annum is made for this publication.

Labour Legislation.—Much attention is devoted to labour legislation. Information as to new laws enacted by the Dominion and the provinces is kept up to date, while notes or articles regarding their provisions are published in the *Labour Gazette*. Since 1917, the Department has published annual reports containing the text of Canadian labour laws enacted during each year, together with an introduction summarizing this legislation under subject headings. The first of these reports was based on Dominion and provincial labour legislation as existing at the end of 1915. Reports on the labour laws enacted in the four succeeding years were published in regular order. In 1920 a further consolidation was brought out and annual reports supplementary thereto were issued in 1921, 1922, 1923, 1924, 1925 and 1926. A third consolidated report on labour legislation, containing the texts of the Dominion and provincial labour laws up to the end of 1928, was issued in 1929. Annual supplements containing labour laws of subsequent years were issued in 1930 to 1934, respectively. The Department of Labour has also published articles dealing with various provincial labour laws, indicating the extent to which these have been standardized and the differences which exist.

Section 3.—Provincial Labour Departments and Bureaus.

The rapid industrial development at the end of the nineteenth century in Quebec and Ontario, the leading manufacturing provinces, brought with it the recognition of the need of special provincial offices to safeguard the interests of labour, with the result that the Ontario Bureau of Labour was established in 1900 and the Quebec Department of Public Works and Labour in 1905. In 1904 an Act was passed in New Brunswick providing for a Bureau of Labour, but this never became operative. Some years later, to cope with conditions created by the growth of industry in the West, Acts were passed providing for the creation of Provincial Bureaus of Labour in Manitoba (1915), in Saskatchewan (1920), and in Alberta (1922), while a Department of Labour was established in British Columbia in 1917. A Department of Labour was established in Nova Scotia by c. 3 of the Statutes of 1932, and the Manitoba Bureau of Labour became a Department in 1934. All these authorities publish annual reports on their activities.

The Nova Scotia Department of Labour.—The Act establishing the Nova Scotia Department of Labour provides that “the Department of Labour shall take cognizance of all matters relating to labour and shall administer such affairs, matters, Acts and regulations as the Governor in Council from time to time assigns to that Department, whether or not the same have been assigned or have belonged by or under any Act of the Legislature of Nova Scotia or otherwise to some other Department or to some member of the Executive Council”.

The Department is in charge of a Minister of Labour, who has under him a Deputy Minister of Labour. The latter is empowered to collect and publish information and statistics affecting labour, and to administer such Acts as may be assigned to the Department by Order in Council. At present, labour bureaus in the province, the administration of the Factories Act, Minimum Wage Board, Limitation of Hours Board and unemployment relief have been assigned by Order in Council to the Department of Labour.

The Quebec Department of Labour.—This Department was formerly known as the Department of Public Works and Labour, each division having a separate Deputy Minister, but in 1931 the Legislature raised each division to a distinct Department.

The duties of the Department of Labour include the institution and control of inquiries into important industrial questions and those relating to manufactures, and it may collect useful facts and statistics relating thereto, to be transmitted to the Quebec Bureau of Statistics. The Department is charged with the administration of provincial Acts respecting industrial and commercial establishments, trade disputes, and the maintenance of fair wages clauses in Provincial Government contracts. The Women’s Minimum Wage Commission is under its jurisdiction, together with the Provincial Employment Service.

The Department is responsible for the licensing and qualification of electricians, moving-picture machine operators, stationary enginemen and firemen, and pipe mechanics; it is also charged with the inspection of electrical installations, heating installations, steam, hot-water and hot-air furnaces, boilers registered under the Interprovincial Code, together with the registering of blue prints in connection with the construction of boilers. A special branch of the Department is entrusted with the inspection of public buildings and the approval of the plans of new buildings.

The Department, since the 1934 Session, is charged with the enforcement of the Collective Labour Agreements Extension Act; however, it has not the duty of leading employers and employees into the preparation of agreements. When a Collective Labour Agreement has been passed and adopted by the Lieutenant Governor in Council, a Joint Committee is formed to supervise the enforcement of the Order in Council; the Joint Committee, under the authority of the Act, may adopt regulations for its own administration, render obligatory the certificate of competency in a given trade in cities of more than 10,000 souls and collect an assessment not exceeding one-half of one p.c. on the payrolls of employers and on the wages of employees for the purposes of the putting into force of the Order in Council. During the fiscal year 1934-35, 43 collective labour agreements were enforced in the province in various industries.

The Department has jurisdiction over the limitation of hours of work; since the coming into force of the Act giving it such authority, hours of labour, in the building trades, have been limited to forty per week throughout the province.

The Department also issues qualification certificates to workmen charged with the use and handling of explosives, and is responsible for the enforcement of the Scaffolding Inspection Act in towns where there is no municipal service providing for such duties.

The Department of Labour of Ontario.—The Department of Labour of Ontario was established in 1919 and placed under the direction of a Minister and a Deputy Minister of Labour. This Department had its origin in the Bureau of Industries formed in 1882 under the Department of Agriculture, to collect and publish statistics relating to the industries of the province and (later) to administer the first Factory Act of 1886. In 1900 a Bureau of Labour, attached to the Department of Public Works, was authorized to collect and publish information relating to employment, wages and hours, strikes, labour organizations and general conditions of labour. Several investigations were made regarding such matters and the first free employment offices were opened by the Bureau of Labour. In 1916 this Bureau was in turn superseded by the Trades and Labour Branch, also under the Ministry of Public Works but administered by a Superintendent. The establishment of the Branch had been recommended by the Ontario Commission on Unemployment and the expansion of the work undertaken by the Branch, and the increase in the demands made upon its resources led to the creation of a special Department of the Government by the Department of Labour Act, 1919.

The Department of Labour administers the following Acts: the Department of Labour Act; the Factory, Shop and Office Building Act; the Steam Boiler Act; the Operating Engineers Act; the Building Trades Protection Act; the Employment Agencies Act; the Apprenticeship Act; the Regulations respecting the Protection of Persons working in Compressed Air; the Regulations respecting the Protection of Persons working in Tunnels and Open Caissons; the Minimum Wage Act; the Industrial Standards Act. Under the Industrial Standards Act standard wages and hours of labour are being established through agreements between employers and employees. These agreements, when approved by Order in Council, become binding upon all persons engaged or employed in the industry and in the zone to which the agreement applies. The Department is required to maintain employment offices, to collect information respecting employment, sanitary and other conditions in work places, wages and hours of work, and to study labour legislation in other parts of the British Empire and in foreign countries, as well as any suggested changes in the labour laws of Ontario. The representatives

of the Department of Labour have right of access to offices, factories and other work places at any reasonable hour, and may be authorized to hold inquiries under the Public Inquiries Act. The Department publishes annual reports which cover the work of the officers employed in the administration of the various Acts assigned to it.

Manitoba Department of Labour.—The Act of 1915, establishing the Manitoba Bureau of Labour, provided that it be attached to the Department of Public Works; an amendment of 1922, however, provided for its attachment to any other Department as the Lieutenant-Governor in Council may determine. The Bureau was created a separate Department by c. 28 of the Statutes of Manitoba, 1931, but the Act was not proclaimed until July 6, 1934.

The Department is charged with the administration of the following Acts: the Bureau of Labour Act; the Manitoba Factories Act; the Bake Shop Act; the Shops Regulation Act; the Minimum Wage Act; the Elevator and Hoist Act; the Steam Boiler Act; the Building Trades Protection Act; the Public Buildings Act; the Fair Wage Act; the Electricians' Licence Act; the Amusements Act (Sets. 11 to 15); the One Day's Rest in Seven Act; the Employment Bureau Act.

Saskatchewan Bureau of Labour and Public Welfare.—This Bureau was created by an Act of 1934 to replace the Department of Railways, Labour and Industries. It is administered by the Minister of Municipal Affairs, assisted by a permanent Commissioner. The function of the Bureau is to administer matters relating to the relief of distress in addition to the following Acts: the Factories Act; the Building Trades Protection Act; the Employment Agencies Act; the One Day Rest in Seven Act; the Weekly Half-Holiday Act; the Minimum Wage Act, and Workmen's Wage Act. It is also charged with the operation of public free employment offices; the collection and publication of information and statistics relating to employment; wages and hours of labour throughout the province; strikes and other labour difficulties; trade unions and labour organizations; the relations between capital and labour, and other subjects connected with industrial problems; the commercial, industrial and sanitary conditions of employment.

Alberta Bureau of Labour.—The Act of 1922, creating the Alberta Bureau of Labour, provided that the Bureau be in charge of a Minister having under him a Commissioner of Labour. The latter is empowered to collect and publish information and statistics affecting labour, and to administer such Acts as may be assigned to the Bureau by Order in Council. Important among these Acts are: the Alberta Government Employment Bureau Act; the Minimum Wage Act; the Boilers Act; the Factories Act; the Theatres Act; the Trade Schools Act; the Industrial Standards Act.

The British Columbia Department of Labour.—This Department was instituted by an Act of 1917, under a Minister and Deputy Minister of Labour. It administers the laws of British Columbia affecting labour, and is empowered to collect information respecting industries, wages, employment, prices, labour organizations and other data pertaining to labour problems. Prominent among the Acts administered by the Department are: the Male Minimum Wage Act 1934; the Female Minimum Wage Act 1934; the Hours of Work Act 1934; these are administered by the Board of Industrial Relations, the Deputy Minister of Labour being Chairman of the Board. Other activities of the Department include the administration of: the Semi-monthly Payment of Wages Act; the Factories Act; the Apprenticeship Act and the operation of employment bureaus within the province.

Section 4.—Canada and the International Labour Organization.*

The International Labour Organization of the League of Nations was set up in 1919 in accordance with Part XIII of the Treaties of Peace, to promote the improvement of industrial conditions by legislative action and international agreement.

The Organization comprises: the International Labour Conference, which meets annually and is composed of four representatives of each Member State, two of whom are government delegates, while two represent employers and workers respectively; and the International Labour Office in Geneva, which functions as a secretariat of the annual conference and also collects and publishes information on subjects relating to industrial life and labour. The Office is under the control of a Governing Body, consisting of 32 persons, appointed by the International Labour Conference, of whom 16 represent governments, 8 represent employers and 8 represent workers. In addition to its control of the Labour Office, the Governing Body is charged with the preparation of the agenda of the annual conference.

Under the terms of the Peace Treaties, eight of the government seats on the Governing Body are held by the countries of "chief industrial importance". Canada was designated by the Council of the League of Nations in 1922 as one of these eight States of "chief industrial importance". Sixty-two countries are members of the International Labour Organization, including the United States and Russia, which became members during the past year. In January, 1935, the list of eight states was revised by the Governing Body in order to permit of the inclusion of the United States and Russia. Canada and Belgium were called on to surrender their permanent seats at this time but were temporarily accorded the status of Deputy Members until the Governing Body should be reconstituted in 1937. In the month of October, 1935, however, Canada regained her permanent seat on the Governing Body through the resignation of Germany from the League of Nations and the International Labour Organization. Dr. W. A. Riddell, Canadian Advisory Officer to the League of Nations, was at the same time honoured by being elected chairman of the Governing Body for the ensuing year. At the triennial election of the Governing Body of the International Labour Office in 1934, Mr. Tom Moore, then President of the Trades and Labour Congress of Canada, was elected as one of the eight workers' representatives on this Body.

The conclusions of the International Labour Conference are cast in the form of draft conventions or recommendations, addressed to the national governments which comprise the membership of the International Labour Organization. A two-thirds majority of the Conference is required for the adoption of either a draft convention or recommendation. Under the Treaties of Peace, the Member States are bound to bring the draft convention or recommendations before the authority or authorities within whose competence the subject matter lies, for the enactment of legislation or other action. Thus the findings of the Conference only become binding in the various countries concerned if and when action regarding them is taken by the latter.

The Dominion Department of Labour is entrusted with the duties arising out of the relations of Canada with the International Labour Organization. These have entailed much correspondence, not only with the International Labour Organ-

* On this subject see also the 1921 Year Book, pp. 607-609; 1922-23 Year Book, pp. 704-707; 1924 Year Book, pp. 666-670; 1925 Year Book, pp. 676-678; 1926 Year Book, pp. 679-681; 1927-28 Year Book, pp. 735-737; 1929 Year Book, pp. 725-727; 1930 Year Book, pp. 710-712; 1931 Year Book, pp. 753-755; 1932 Year Book, pp. 633-634; 1933 Year Book, pp. 750-752; and 1934-35 Year Book, pp. 809-810.

ization, but also with the different departments of the Dominion Government, with the provinces, and with employers' and workers' organizations. Replies have also been prepared in the Department of Labour to various questionnaires issued by the International Labour Office. Performance of these duties has necessitated a close study of the different technical questions which have figured on the agenda of the various conferences and at the meetings of the Governing Body. A bulletin entitled "Canada and the International Labour Conference" has been issued by the Department of Labour, furnishing information respecting the International Labour Organization. Comprehensive articles dealing with the proceedings of the annual sessions of the International Conference have been published from year to year in the *Labour Gazette*. These articles contain the text of the various draft conventions and recommendations of the Conference.

Nineteen sessions of the International Labour Conference have been held. Forty-nine draft conventions and 49 recommendations have been adopted at these annual gatherings. The draft conventions and recommendations of the Conference have, among other subjects, related to the following: hours of labour, measures for the avoidance of unemployment, employment conditions of women and children, employment conditions of seamen, employment in agriculture, weekly rest, statistics of immigration and emigration, principles of factory inspection, inspection of emigrants on board ship, workmen's compensation for accidents and occupational diseases, social insurance, minimum wages, prevention of accidents to dockers, forced labour, and regulation of hours of work of salaried employees and of workers in coal mines.

Up to Dec. 31, 1935, 679 ratifications of these conventions had been registered with the League of Nations, of which 11 were conditional or with delayed application; 50 had been approved by the competent national authority, and 82 had been recommended to the competent national authority for approval.

Canadian Action on Draft Conventions and Recommendations.—Seven draft conventions in all have been ratified by the Dominion Government, namely: (1) minimum age for employment of children at sea; (2) unemployment indemnity for seamen in case of the loss or foundering of a ship; (3) minimum age for employment as trimmers and stokers; (4) medical examination of children and young persons employed at sea; (5) limiting hours of work in industrial undertakings to eight in the day and forty-eight in the week; (6) weekly rest in industrial undertakings; and (7) creation of minimum-wage-fixing machinery. The first four of these conventions were ratified in March, 1926, and the last three in the early part of 1935. At the 1935 session of Parliament resolutions were also adopted approving of three other draft conventions of the International Labour Conference with a view to their subsequent ratification, namely: seamen's articles of agreement; safety of workers engaged in loading and unloading ships; and the marking of weights on heavy packages transported by vessel.

Section 5.—Organized Labour in Canada.

The Dominion Department of Labour publishes an annual report on labour organization; this sets out the various branches of unionism in existence, the principles on which they are founded, their chief activities, and statistics of the different groups comprised in the trade unions of the Dominion. Reference is also made in this annual report to the principal international labour organizations with which the organized workers of Canada are affiliated.

The usual *résumé* of the origin and growth of the trade union movement in Canada has been omitted in this edition, owing to considerations of space. The interested reader is referred to pp. 712-714 of the 1930 edition of the Year Book, and to "Labour Organization in Canada, 1931", published by the Dominion Department of Labour. This latter publication presents the history and present organization of trade unionism in the Dominion in a very comprehensive manner.

Total Reported Membership of Organized Labour in Canada.—The numerical strength of organized labour in Canada at the close of 1934 was given by the Department of Labour as follows: international organizations, 1,809 local branches with an aggregate membership of 161,404; Canadian central labour bodies, 662 branches and 55,486 members; independent units, 42 with 10,452 members; National Catholic unions, 122 with 30,346 members; Workers' Unity League, 105 with 24,086 members; grand total, 2,740 local branches and 281,774 members. As compared with 1933, this represents an increase of 33 branches, but a decrease of 4,446 members. Table 4 shows by years the membership of trade unions in Canada since 1911.

¹ Revised since the publication of the 1934-35 Year Book.

Main Groups.—The following paragraphs outline the present organization of the main groups into which Canadian labour organizations now fall.

Trades and Labour Congress of Canada.—The Trades and Labour Congress is representative of international trade unionism in the Dominion, the bulk of its membership being drawn from the international organizations which have local branches in Canada. According to reports for 1935, the Congress received payment of per capita tax on the Canadian membership of 60 international bodies and also from two national organizations which had their entire membership in the Dominion; the combined membership was 105,998, comprised in 1,534 local branches.

All-Canadian Congress of Labour.—The All-Canadian Congress of Labour was organized in Montreal, Mar. 16, 1927, by representatives of national and independent organizations. At the close of 1934, the All-Canadian Congress of Labour had eleven central bodies in affiliation, with a combined membership of 51,154, as well as 48 directly chartered local unions with a membership of 4,491, making a total combined reported membership of 55,645.

Federation of Catholic Workers of Canada.—In 1918, a conference of National Catholic Unions, which were first established in 1901, was held in Quebec city,

followed by other meetings in Three Rivers in 1919 and Chicoutimi in 1920. The delegates at the latter conference, numbering 225 from 120 unions, decided to establish a permanent central body to co-ordinate the work of the scattered units. Accordingly, at the 1921 conference held in Hull, at which approximately 200 delegates representing 89 unions were present, a constitution to govern the new body was approved. The name selected was "Federation of Catholic Workers of Canada", and permanent officers were elected, the constitution and by-laws becoming effective on Jan. 1, 1922. From information at hand, there were at the close of the year 122 National Catholic Unions, with a combined membership of 30,346.

One Big Union.—At a conference held at Calgary, Alberta, Mar. 13, 1919, by representatives of local trade unions, principally from the four western provinces, the One Big Union was established as an industrial organization. According to information supplied by the general secretary, the O.B.U., at the close of 1934, had 49 units under charter, one of which was located in the United States, as well as two central labour councils (bodies similar to trades and labour councils), the combined reported membership being 23,865.

Workers' Unity League of Canada.—This organization was established in 1930, and, according to the figures supplied by the general secretary, the membership at the close of 1934 was 24,086, comprised in 105 local branches.

International Trade Unions Operating in Canada.—Table 5 gives the names of the 79 international craft labour organizations and the two industrial unions which now carry on operations in Canada, and shows: (1) the number of branches which were in existence in the Dominion at the close of 1934, and (2) the reported membership.

Section 6.—Fatal Industrial Accidents.

Statistics of fatal industrial accidents have been compiled by the Dominion Department of Labour since 1903, the data being obtained from provincial Workmen's Compensation Boards, the Board of Railway Commissioners for Canada and various other governmental authorities, from departmental correspondents and from press clippings. Table 7 shows the number of fatal industrial accidents reported to the Department during each year from 1931 to 1935 inclusive. The number of fatalities in each of the different industries is also shown as a percentage of the total number. Preliminary figures show 972 fatal industrial accidents in 1935.

¹ Figures subject to revision.

Causes of Fatal Accidents.—The classification of fatal accidents in 1935, by causes, shows that the largest number, 254, came under the category "by moving trains, vehicles, etc.". This includes all accidents due to cars or engines, including

mine and quarry cars, and to automobiles and other power vehicles and horse-drawn vehicles, as well as accidents caused by moving implements, by moving watercraft and by aircraft. "Dangerous substances", including electric current, explosives, hot and inflammable substances, gas fumes, boiler explosions, etc., caused 162 fatalities. Next in order as a cause came "falls of persons", 148 in number, including those who fell from some elevation and those who fell into pits, shafts, holds of vessels, harbours, rivers, etc. Fatalities numbering 141 were caused by falling objects. Animals caused 42 fatalities, including 29 caused by horses. Twenty-seven fatalities were caused by working machines, 27 by striking against, or being struck by, objects, 24 by prime movers, 22 by handling of heavy or sharp objects, 17 by hoisting apparatus and 10 by tools. The heading "other causes" includes four fatalities caused by infection, 28 due to industrial diseases, 16 caused by shooting and violence, 26 by cave-ins, etc., and 23 by lightning, frost, storms and sunstroke.

Numbers of industrial accidents, fatal and non-fatal, dealt with by the various provincial Workmen's Compensation Boards are included in the following section on Workmen's Compensation.

Section 7.—Workmen's Compensation in Canada.

An account of the development of workmen's compensation legislation in Canada from employers' liability legislation was given at pp. 744-746 of the 1927-28 Year Book, while a summary of the legislation with regard to workmen's compensation appears in the general sketch of labour legislation in Canada at pp. 784-789 of the current edition. Details regarding the operation of the various Workmen's Compensation Boards of the provinces are given below.

Operations of the Workmen's Compensation Boards.—Nova Scotia.—The Workmen's Compensation Act was passed in 1915 but only became effective on Jan. 1, 1917. During the nineteen years between that date and Dec. 31, 1935, 137,650 accidents were reported to the Board, of which 121,634 were compensated as per Table 8. Prior to Jan. 1, 1920, medical aid was only furnished in special cases.

New Brunswick.—The Workmen's Compensation Act of New Brunswick was passed in 1918. It extends to a wide range of industries, and is administered by a Board of three persons, levying assessments and paying benefits. For the sums paid out annually from 1920 to 1935 as compensation and for medical aid, see Table 9.

Quebec.—The Quebec Workmen's Compensation Commission was established in 1928 by authority of cc. 79 and 80 of the Statutes of that year. The Act was brought into force by proclamation on Mar. 22, 1928, operations of the Commission commencing as of Sept. 1, 1928. Under this Act, the Quebec Commission did not insure employers against their liability. On April 4, 1931, a new Act was enacted by the Quebec Legislature (21 Geo. V, c. 100), effective Sept. 1, 1931, providing for state insurance, practically along the same lines as the Workmen's Compensation Act of Ontario. This new Act was amended by 23 Geo. V, c. 98, enacted on April 13, 1933, and by 25-26 Geo. V, c. 80, enacted on April 11, 1935. Table 10 shows the operations of the Quebec Commission from Sept. 1, 1928, to Dec. 31, 1935.

Ontario.—Under the system operated by the Ontario Workmen's Compensation Board in Schedule 1, where the liability is collective, 24 classes of industries pay various percentages of their payrolls annually to the Board and escape individual civil liability for accidents and certain specified industrial diseases. The percentage of payroll collected by the Board is graded according to the degree of hazard in the occupation and ranged in 1935 from 10 cents per \$100 of payroll in blue-printing, multigraphing or mimeographing to \$15.00 per \$100 in wrecking of buildings or window cleaning. The average for all classes was \$1.35 per \$100 of payrolls which amounted to \$373,112,000. Certain other industries under Schedule 2, including municipal undertakings, railways, car shops, telegraphs, telephones, etc., are made individually liable to pay the rates of compensation fixed under the Act. Employees of the Dominion or of the province, killed or injured in the discharge of their duty, are by special legislation placed on the same footing as those of private employers of the second class.

Statistics of the benefits awarded and the accidents to workers reported during the first 21 years of the operation of the Act appear in Table 11; 54,298 accidents were paid for during the year 1935, including: 231 cases of death, 14 of permanent total disability, 1,291 of permanent partial disability, 25,856 of temporary disability and 26,906 in which medical aid only was provided. These latter are all under Schedule 1, as medical aid in Schedule 2 cases and Crown cases is furnished directly by the employer.

¹ No provision for medical aid.

² Half year only.

Manitoba.—Under the Workmen's Compensation Act, effective Mar. 1, 1917, Part 1 of the Act, dealing with workmen in hazardous occupations, is administered by the Workmen's Compensation Board, which charges insurance rates according to the hazard of the industry, the sums received by the workman being in lieu of the rights of action previously existing. The province, the city of Winnipeg, and certain corporations operating public utilities are permitted by the law to practise self-insurance.

From the date of the coming into force of the Act to Dec. 31, 1934, the Board dealt with 96,535 compensable accidents and paid out \$12,866,751 for compensation and medical aid. Of the accidents in 1934, 3,205 involved medical aid costs only, 3,168 involved temporary and 190 permanent disability, while 15 resulted in death (Table 12).

Saskatchewan.—The Workmen's Compensation (Accident Fund) Act became fully effective July 1, 1930, and covers practically all employees in the province except railway employees engaged in the running trades, casual workers, farm and ranch labourers, domestic and menial servants, janitors, retail store employees, and persons who cannot be classed as workmen.

The Act is administered by a Board of three and imposes compulsory collective liability on the employers covered. The schedule of benefits is similar to that provided by other compensation Acts. Table 13 shows the number of accidents and benefits paid to the end of 1934.

Alberta.—The Workmen's Compensation Act of 1918 became effective Aug. 1, 1918, as regards mining, and Jan. 1, 1919, in respect of almost all industries except agriculture, railroading and the operation of retail stores and offices. Railroading (except for the running trades) was brought within the scope of the Act in 1919, and a further amendment in 1928 left only conductors and trainmen exempt from the operations of the Act.

Table 14 shows the operations of the Board for the calendar years 1921 to 1934. Of the 9,608 accidents reported in 1934, 35 were fatal and 77 resulted in some permanent injury. The amounts shown below do not include sums transferred to the pension fund, which had assets amounting to \$2,942,020 on Dec. 31, 1934, nor do they include administration expenses nor sums set aside to cover estimated liabilities.

British Columbia.—The Workmen's Compensation Act, effective Jan. 1, 1917, provides compulsory accident insurance in almost every industrial occupation carried on in the province, protecting in 1934 approximately 125,000 employers with a payroll of almost \$110,000,000. Insurance rates levied against employers are graded according to the hazard of the industry. All employers under the Act are required, in addition, to deduct one cent per day or part thereof from the wages of employees and to remit this money to the Board to the credit of the medical aid fund, which provides all necessary medical, surgical and hospital expenses for injured employees. For figures see Table 15.

Section 8.—Strikes and Lockouts.

Statistics of strikes and lockouts in Canada have been collected by the Dominion Department of Labour since its establishment in 1900. Table 16 shows the numbers of disputes, of employees involved in disputes, and the time loss in working days for each year from 1921 to 1935 and the totals for the period beginning 1901. The items in the columns headed "time loss in man-working days" in the tables following are calculated by multiplying the number of persons directly involved in strikes and lockouts by the number of working days they are so affected during the time the disputes are in existence. Tables 17 and 18 give detailed analyses, by provinces and by industries, for 1934 and 1935.

Summary tables of the figures with details as to strikes and lockouts during 1935 will be found in the *Labour Gazette* for February, 1936, pp. 111-131.

Industrial Disputes in Recent Years.—From 1930 to 1935 the figures as to numbers of strikes and lockouts, numbers of employees involved and time loss were substantially greater than during the period 1926 to 1930, but were still much lower than during the years prior to 1926 when coal-mining strikes involved large numbers of employees and resulted in great time loss. In the latest five years most of the important disputes have been in clothing manufacturing, logging, saw-milling and woodworking industries, with a substantial number in coal mining. In 1935 there was an important dispute at Vancouver, B.C., involving longshoremen, and a sympathetic strike of longshoremen and other water transportation workers in the other Pacific ports. The figures for 1935, however, were much lower than for 1934. The number of disputes in 1935 was 120 as compared with 191 in 1934, while the number of workers involved was 33,269 as compared with 45,800 in 1934 the time loss being 288,703 man-working days as compared with 574,519 in 1934. Table 16 includes figures regarding coal mining, industries other than coal mining and all industries.

16.—Strikes and Lockouts in the Coal Mining, Other and All Industries in Canada, calendar years 1921-35.

NOTE.—For the years 1901-20, see the 1933 Year Book, p. 763.

¹ Figures for disputes extending over the end of a year are here counted more than once. ² The totals are for the whole period of record, 1901-34. ³ No classification of All Industries totals made for the earlier years.

Table 17 is a record of industrial disputes by provinces for the years 1934 and 1935. In 1934, important disputes occurred in Ontario in clothing factories, also in fur, shoe and furniture factories, in British Columbia in logging, in Quebec in clothing factories, in Manitoba in metal mining and in clothing factories, and in Nova Scotia in coal mining. In 1935, the outstanding strikes, by industries, were located in the provinces as follows: in Ontario in the logging, furniture, sawmilling, metal, shoe and clothing industries; in British Columbia in coal and gold mining, water transportation, fishing and agriculture; in Nova Scotia in coal mining; in Quebec in clothing (including a millinery strike), cotton manufacturing and water transportation; in Manitoba and Alberta in printing.

Causes and Results of Industrial Disputes.—During 1934 and 1935, as in previous years, most of the disputes (139 and 74 respectively) were in regard to wages, or wages and working conditions. In 1935, only three strikes against a reduction in wages occurred as compared with 10 in 1934 and 20 in 1933. A substantial number of disputes were in regard to trade unionism, there being 28 in 1935 as compared with 35 in 1934, 21 in 1933 and 26 in both 1932 and 1931. In both years about one-half of the disputes were terminated by direct negotiation

between the parties and approximately one-quarter by the return of workers or their replacement.

In 1935, there was a marked gain in the proportion of strikes settled by conciliation, there being roughly one-quarter as compared with about one-eighth in recent years.

Section 9.—Employment and Unemployment.

Subsection 1.—Operations of the Employment Service of Canada.

Employment Service of Canada.—Under Sec. 3 of The Employment Offices Co-ordination Act (c. 57, R.S.C., 1927), an Act passed by the Dominion Parliament in May, 1918, the Minister of Labour is empowered:—

"(a) to aid and encourage the organization and co-ordination of employment offices and to promote uniformity of methods among them;

"(b) to establish one or more clearing houses for the interchange of information between employment offices concerning the transfer of labour and other matters;

"(c) to compile and distribute information received from employment offices and from other sources regarding prevailing conditions of employment."

The Act further provides that certain sums of money are to be appropriated annually and paid to the provinces on a basis proportionate to the amount that each expends on the maintenance of employment offices.

The desired uniformity and co-ordination of employment office activities throughout the various provinces are obtained by having the Dominion's payments contingent upon an agreement ensuring that the provinces, in the conduct of their employment offices, shall endeavour to fill situations in all trades and occupations for both men and women, and that no charge shall be made to employers or employees for this service. Each province agrees to maintain a provincial clearance system in co-operation with the interprovincial clearance system established by the Dominion Government, in order to secure the necessary mobility of labour as between localities in the same province or in different provinces. For the fiscal year 1935-36, agreements were concluded with all of the provinces except Prince Edward Island. Thus is formed the Employment Service of Canada—a chain of employment offices reaching from Halifax to Vancouver. At the time the Act came into force only 12 provincial employment offices were operated in Canada. This number was steadily increased until, at the close of 1919, due to the impetus given by the Employment Offices Co-ordination Act together with the requirements of the demobilization period, offices were functioning at 84 different centres. Subsequent contractions have reduced the Service to offices permanently located at 64 centres (on Dec. 31, 1935), distributed by provinces as follows: Nova Scotia, 3; New Brunswick, 4; Quebec, 7; Ontario, 26; Manitoba, 2; Saskatchewan, 9; Alberta, 5; and British Columbia, 8.

Employment Service Council of Canada.—An Order in Council, issued in 1918 in pursuance of the Act, provided for the formation of a body to be advisory to the Minister of Labour in the administration of the Act. This body, known as the Employment Service Council of Canada, is composed of representatives of the Dominion Departments of Labour and of Pensions and National Health, the Provincial Governments, the Canadian Manufacturers' Association, the Canadian Construction Association, the Trades and Labour Congress of Canada, the Railway Association of Canada, the Railway Brotherhoods, the Canadian Lumbermen's Association, the Canadian Council of Agriculture and the returned soldiers. At the eleven meetings of the Council, the most recent of which was held on Aug. 21-22, 1930, various recommendations and suggestions relative to employment office administration were brought forward and presented to the Minister.

Operations of Employment Offices.—Statistics covering the work of the local offices are collected and tabulated by the Employment Service Branch of the Department of Labour. Table 19 shows the positions available, applications for work and placements effected by the Service in each year since 1920 for the Dominion, and for the years 1934 and 1935 by provinces. During 1935 there were 656,421 applications for employment, 376,574 vacancies and 353,802 placements recorded, as compared with 724,365 applications, 427,792 vacancies and 406,091 placements in 1934. About 36 p.c. of the total placements were of a casual nature, many of these being the result of work given on a rotation basis by municipalities and Provincial Governments on various relief schemes throughout the year to persons who, otherwise, would have been unemployed.

Reduced Railway Fares.—In order to facilitate the movement of labour in cases where there were not enough workers in any one locality to fill the available vacancies, the Employment Service, by special arrangement with nearly all the members of the Canadian Passenger Association, has been granted the privilege of issuing certificates which entitle the bearers to purchase railway tickets at the reduced rate of 2.7 cents per mile. This rate is for a second-class ticket and is applicable only to fares of not less than \$4. During 1934, 7,961 certificates were issued, 5,972 to persons proceeding to points within the same province as the dispatching office and 1,989 to workers going to points in other provinces. During 1935, 7,999 certificates for special rates were granted, 7,171 to persons travelling to employment within the same province as the dispatching office and 828 to persons for whom employment had been secured in other provinces.

19.—Applications for Employment, Positions Offered and Placements Effected by the Employment Service of Canada, 1920-35, and by Provinces, 1934 and 1935.

NOTE.—Figures by provinces for the years 1920-25 will be found at p. 703 of the 1926 Year Book, for 1926-28 at p. 731 of the 1930 Year Book, for 1929-30 at p. 773 of the 1931 Year Book, for 1931-32 at p. 768 of the 1933 Year Book and for 1933 at p. 826 of the 1934-35 Year Book.

Subsection 2.—Unemployment as Reported by Trade Unions.

Monthly statistics on unemployment are compiled and published by the Employment Service Branch of the Dominion Department of Labour, based on returns received from 1,750 local trade unions having an aggregate membership of nearly 165,000 workers. "Unemployment" as here used means involuntary idleness, due to economic causes. Persons engaged in work other than their own trades, or idle because of illness, are not considered as unemployed, while unions involved in industrial disputes are excluded from the tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentages of unemployment are based, it should be understood that the figures for each month have reference only to the reporting organizations. Table 20 is a record of unemployment in trade unions, for the past 10 years, by provinces. The maximum of unemployment in 1935 was in February, when the percentage stood at 18·2; the 1935 low was 13·0 p.c. recorded in September. In 1934 the January figure of 21·2 p.c. constituted the maximum and the minimum of 16·2 p.c. was reached in October. Employment among organized workers, as indicated by these statistics, was more active on the average in 1935 than in 1934, the average of the monthly figures of unemployment for 1935 being 15·4 p.c., while for 1934 the corresponding figure was 18·2 p.c.

20.—Percentages of Unemployment in Trade Unions, by Provinces, half-yearly, 1926-34, and by months, 1935.

NOTE.—For percentages of unemployment at June 30 and Dec. 31 from December, 1915, to December, 1925, see p. 827 of the 1934-35 edition of the Year Book. For data by months from 1921, see successive issues of the Year Book commencing with the 1922-23 edition.

Subsection 3.—Employment as Reported by Employers.

The Dominion Bureau of Statistics tabulates monthly reports of the numbers employed by firms having 15 or more persons on their staffs; the returns are representative of practically every industry except agriculture and the more specialized business and professional callings. During 1935, about 9,250 of these employers reported an average working force of 933,085 persons, varying from 874,556 at April 1, to 1,012,103 at the beginning of November.

The generally upward movement that has characterized employment since the first quarter of 1933 continued during 1935. The recovery was not so pronounced as that indicated in 1934 over 1933, in which was recorded the low point of the depression as affecting industrial activity; however, the gains previously made were consolidated and extended, with the result that employment at its 1935 peak (Nov. 1) was in greater volume than in any other month since the end of 1930. It is worthy of note that public employment of one sort or another was a factor of less importance in the general situation during 1935 than it had been in 1934, when substantially larger numbers of persons were provided with work of that nature. The improvement indicated by employers during the year under review may, therefore, be regarded as affording sound evidence of a revival in business resulting from increased public demand for commodities and services rather than from governmental stimulation to industry. The improvement on the whole continued to be quite widely distributed, both geographically and industrially, but the outstanding feature of the year was the recovery in manufacturing, which was both extensive and prolonged; the chief exception to the generally upward movement was construction, employment in the highway division showing a marked decline.

During 1935 the number of man-days worked on a wage basis, on works undertaken for the relief of unemployment, as reported to the Dominion Commissioner of Unemployment Relief by the Dominion and provincial authorities, was 4,388,225 and there were also 6,614,929 man-days relief work afforded in camps operated by the Dominion and Provincial Governments where the unemployed were cared for and given useful work in return for subsistence and a small cash allowance. During 1934, the man-days worked on a wage basis numbered 8,970,721 and the number of man-days relief work afforded on a subsistence basis was 9,557,862.

The fluctuations in employment in the past ten years are illustrated in the chart on p. 770. This shows to October 1935 the generally upward movement that has characterized industrial activity since the low point of employment in the depression was reached at April 1, 1933.

Employment by Economic Areas.—The revival in industrial activity evident during 1934 again extended with a varying intensity to all five economic areas during the year under review. The situation at the end of 1935 was substantially better in each of these districts than it was at the opening of the year, or at the end of 1934, 1933 or 1932, being also more favourable in Quebec, Ontario and British Columbia than at the close of 1931. The greatest proportional gain between the 1935 low and high points occurred in the Prairie Provinces, where the maximum of activity was recorded at Nov. 1; the index then stood at 108.1, being 21.2 points higher than the minimum of 86.9 recorded at April 1. Employment in all five economic areas was greater, on the average, than in the twelve months of 1934, when general activity had been at a more satisfactory level than in the preceding year. Table 21 is a record of employment in the five economic areas, by months, in 1934 and 1935, with averages for preceding years since 1921.

21.—Index Numbers of Employment as Reported by Employers in Economic Areas, as at the First of each Month, January, 1934, to December, 1935, with Yearly Averages since 1921.

Note.—These indexes are calculated upon the average for the calendar year 1926 as 100. The relative weight shows the proportion of employees reported in the indicated economic area to the total reported by all employers making returns in Canada at Dec. 1, 1935.

Relative weights of employment in economic areas, as at Dec. 1, 1935 ²	7.8	29.1	41.6	13.0	8.5	100.0

¹Since the average for the calendar year 1926, including figures up to Dec. 31, 1926, is the base used in computing these indexes, the average index here given for the 12 months Jan. 1-Dec. 1, 1926, generally shows a slight variation from 100.

²Percentages of Dominion total.

Employment by Cities.—Improvement in industrial employment was reported in each of the eight large centres for which statistics are segregated, *viz.*, Montreal, Quebec, Toronto, Ottawa, Hamilton, Windsor, Winnipeg and Vancouver; the gains were relatively greater during 1935 in Windsor, Winnipeg and Hamilton than in the other cities. A significant feature of the situation is that the recovery in these eight cities, which, during 1933 and 1934 was generally at a slower rate than in the Dominion as a whole, was in 1935 rather more pronounced. Thus, in 1934, 46 p.c. of the average number of co-operating firms in Canada were located in these municipal areas, and they had 40.8 p.c. of the average employees covered in the monthly surveys; of the total additions to staffs during the year, however, they reported only 20 p.c. In 1935, firms in the cities and their employees constituted 46.3 p.c. and 41.6 p.c., respectively, of the total employers and total employees, while almost 60 p.c. of the total increase during the year was reported in these eight centres. Their index numbers showed an average advance of 5.6 p.c., as compared with the general increase of 3.5 p.c. in the Dominion. On the one hand, the marked improvement in manufacturing and trade in recent months, and on the other hand, the decreasing importance of highway construction as a factor in the industrial distribution of the workers covered in these surveys, largely accounts for this situation.

The reports showed that employment was maintained at a generally higher level in Ottawa and Windsor than in the other centres named above, while the lowest indexes were again indicated in Montreal and Winnipeg. The greatest percentages of improvement shown by the 1935 index numbers over those for 1934 were in Windsor, Hamilton and Vancouver. Table 22 gives monthly indexes in the cities in 1934 and 1935, with yearly averages since 1922.

22.—Index Numbers of Employment as Reported by Employers in Leading Cities, as at the First of each Month, January, 1934, to December, 1935, with Yearly Averages since 1922.

NOTE.—These indexes are calculated upon the average for the calendar year 1926 as 100. The relative weight shows the proportion of employees reported in the indicated city to the total reported by all employers making returns in Canada at Dec. 1, 1935.

¹ Since the average for the calendar year 1926, including figures up to Dec. 31, 1926, is the base used in computing these indexes, the average index here shown for the 12 months Jan. 1-Dec. 1, 1926, generally shows a slight variation from 100.

² Percentages of Dominion total.

Employment by Industries.—An analysis of the data furnished by employers shows that practically all industries except highway construction shared in the improvement noted during 1935 as compared with 1934, while in most cases the situation was also more satisfactory than in 1933 and 1932. Manufacturing experienced the longest period of expansion on record in the years since 1920; to this recovery, most of the various branches of factory employment contributed to a greater or lesser degree. Logging, on the whole, was unusually active, the average index, at 126.9, being slightly higher than the 1934 mean of 124.7; most of the advance occurred in the early months of the year, employment from September onward having been at a slightly lower level than in the autumn and early winter of 1934. The 1935 average was also slightly higher than the previous maximum of 125.8 reported in 1929. Mining, particularly of metallic ores, advanced during

many months, with the result that employment in that group as a whole was brisker than in any other year of the record. Building construction gained considerably during the busy season, and was generally higher than in 1934, 1933 and 1932, though continuing at a low level as compared with years of normal activity; employment in railway construction was at much the same level as in the preceding year, but highway construction employed a smaller number of men, partly as a result of changes in the unemployment relief policies of the various governments. Services and trade were more active, stimulated to some extent by a better tourist season, as well as by the general improvement in business. Table 23 gives index numbers of employment by main industrial groups.

23.—Index Numbers of Employment as Reported by Employers, by Industrial Groups, as at the First of each Month, January, 1934, to December, 1935, with Yearly Averages since 1921.

NOTE.—These indexes are calculated upon the average for the calendar year 1926 as 100. The relative weight shows the proportion of the employees reported in the indicated industry to the total reported by all employers making returns in Canada at Dec. 1, 1935.

¹ Since the average for the calendar year 1926, including figures up to Dec. 31, 1926, is the base used in computing these indexes, the average index here given for the 12 months Jan. 1-Dec. 1, 1926, generally shows a slight variation from 100.

² Percentages of Dominion total.

³ Except agriculture (see p. 769).

Subsection 4.—Unemployment Relief.

The assistance rendered by the Dominion Government under the Unemployment Relief Act, 1930, the Unemployment and Farm Relief Act, 1931, and the Relief Act, 1932, is fully set out in the Canada Year Books for the years 1931, 1932 and 1933 respectively, while that rendered under the Relief Act, 1933 and the Relief Act, 1934, is set forth in the Canada Year Book for 1934-35. The recapitulation appearing at the end of this statement shows the Dominion's disbursements under those statutes as at Nov. 30, 1935.

The Relief Act, 1935.—At the sixth session of the 17th Parliament, the Relief Act, 1935, which received royal assent on April 4, 1935, was enacted. The administration of the Act was, by order of His Excellency the Governor in Council, vested in the Minister of Labour.

Under this statute the Dominion is continuing to pay to the provinces monthly grants-in-aid to assist the provinces in discharging their responsibilities connected with the relief of necessitous persons within their respective boundaries. The amounts of the monthly grants-in-aid, for the period April to November, 1935, both months inclusive, were as follows: Prince Edward Island, \$1,250; Nova Scotia, \$40,000; New Brunswick, \$25,000; Quebec, \$500,000; Ontario, \$600,000; Manitoba, \$135,000; Saskatchewan, \$200,000; Alberta, \$100,000; British Columbia, \$150,000.

As a result of representations made by the provinces at the Dominion-Provincial Conference held in Ottawa in December, 1935, the amounts of the monthly grants-in-aid for the remaining four months of the fiscal year, *viz.*, December, 1935, January, February and March, 1936, were increased to the following amounts: Prince Edward Island, \$2,187; Nova Scotia, \$70,000; New Brunswick, \$43,750; Quebec, \$875,000; Ontario, \$1,050,000; Manitoba, \$236,250; Saskatchewan, \$350,000; Alberta, \$175,000; British Columbia, \$262,500.

In addition to payment of the monthly grants-in-aid above referred to, agreements entered into under the provisions of the Relief Act, 1935, with the provinces of Prince Edward Island, New Brunswick, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia, provide for Dominion assistance toward the cost of relief measures in the provinces as follows:—

Prince Edward Island.—Trans-Canada Highway and provincial highways.

New Brunswick.—Trans-Canada Highway, provincial highways and aid to colonization settlers on location.

Ontario.—Trans-Canada Highway, completion of certain municipal relief projects commenced under previous relief legislation and completion of certain provincial relief projects commenced under previous relief legislation.

Manitoba.—Trans-Canada Highway, provincial highways, one provincial public works project and the Winnipeg sewage disposal plant. The total estimated cost of the latter to Mar. 31, 1936, is \$2,000,000, of which the Dominion has agreed to contribute 40 p.c.

Saskatchewan.—Trans-Canada Highway.

Alberta.—Trans-Canada Highway.

British Columbia.—Improvements to Stanley Park in the city of Vancouver.

As outlined in the Canada Year Book, 1933, and the Canada Year Book, 1934-35, agreements were completed under the provisions of the Relief Act, 1932, with all the provinces except Prince Edward Island, providing for a non-recoverable expenditure of one-third of an amount not to exceed \$600 per family for the purpose of providing a measure of self-sustaining relief to families who would otherwise be in receipt of direct relief by placing such families on the land. It was provided that the remaining two-thirds of the expenditure should be contributed by the province and the municipality concerned. The agreements covered a period of two years and expired on Mar. 31, 1934.

Under the provisions of the Relief Act, 1934, agreements, effective from April 1, 1934, to Mar. 31, 1936, providing continuity of settlement with the agreements which expired Mar. 31, 1934, were entered into with all the provinces except Prince Edward Island and British Columbia. Provision is made in the 1934 agreements for an additional non-recoverable contribution by the Dominion, on the recommendation of the province and with the approval of the Governor in Council, of one-third of an amount not exceeding \$100 in the case of a settler who may not be self-supporting at the end of the two-year period, and for whom subsistence expenditure during the third year of settlement is deemed necessary. This additional amount for subsistence where necessary during the third year applies both to those settled under the 1932 agreement and those settled under the 1934 agreement.

Under authority of the present legislation (the Relief Act, 1935), an agreement respecting relief settlement has been entered into between the Dominion and the province of British Columbia, leaving Prince Edward Island the only province not participating in the plan.

Reports received from the provinces indicate that as at Nov. 30, 1935, there have been approved and settled under the agreements 4,343 settler families, while the total number of individuals settled under the scheme aggregate 22,800.

In the Prairie Provinces the Dominion has again undertaken to provide for the placement of single homeless unemployed persons on farms on a similar basis to that obtaining under previous relief legislation, namely, payment of \$5 per month to each person so placed, the Dominion contributing 100 p.c. of expenditures incurred in this connection, exclusive of the costs of administration. In the provinces of Manitoba and Alberta the arrangement is effective from Nov. 1, 1935, to Mar. 31, 1936, and in Saskatchewan from Nov. 9, 1935, to Mar. 31, 1936. In addition, the Dominion has agreed, under the 1935 Act, to continue contributing to certain special measures in the dried-out areas of the Prairie Provinces.

Continued operation of the camps established under the provisions of the Relief Act, 1932, at various points throughout Canada, also the special relief works carried out in the National Parks for the care of single homeless unemployed men and unemployed residents of the Parks are other measures being carried out by the Dominion under the provisions of the Relief Act, 1935.

The following table sets forth the Dominion's disbursements under relief legislation from 1930 to Nov. 30, 1935. A summary of the loans outstanding as at the same date is also shown.

Subsection 5.—Employment and Unemployment Statistics of the Census.

In the 1933 edition of the Year Book, pp. 775-780 were devoted to an examination of the preliminary figures of unemployment as reported at June 1, 1931, for that date and for the preceding twelve months. The final results of this inquiry are available in Vol. VI. of the Census Publications, which may be obtained from the King's Printer, Ottawa, at a price of 75 cents for the paper-bound volume.

Tables 24 and 25, on p. 836 of the 1934-35 Year Book, summarize, by industries, the statistics of those actually unemployed at the date of the Census, and of time lost during the twelve months preceding that date.

Section 10.—Old Age Pensions.

The Old Age Pensions Act, 1927.—Legislation respecting Old Age Pensions (R.S.C., 1927, c. 156) was adopted by the Dominion Parliament in 1927. Under the provisions of this statute the Dominion Government reimbursed each province participating in the Dominion scheme to the extent of one-half of the provincial expenditure for old age pensions. An amendment passed at the 1931 session of Parliament (c. 42, Statutes of 1931) provided that the Dominion contribution to the provinces be increased from 50 p.c. to 75 p.c. of the provincial disbursements for old age pensions pursuant to a provincial statute authorizing and providing for the payment of such pensions to the persons and under the conditions specified in the Act and the regulations made thereunder. Following the enactment of the amendment to the Dominion Act, the Dominion Old Age Pensions Regulations were revised and agreements negotiated with the provinces whereby the Dominion contribution of 75 p.c. of provincial disbursements was made effective from Nov. 1, 1931; the provinces have since been reimbursed on this basis.

Sec. 5 of the Act provides that before any such agreement is made with the province, the scheme for the administration of pensions proposed to be adopted by the province shall be approved by the Governor in Council, and that no change in such scheme shall be made without the consent of the Governor in Council.

Sec. 8 reads as follows:—

- (1) Provision shall be made for the payment of a pension to every person who, at the date of the proposed commencement of the pension:—
- (a) is a British subject, or, being a widow, who is not a British subject, was such before her marriage;
 - (b) has attained the age of seventy years;
 - (c) has resided in Canada for the twenty years immediately preceding the date aforesaid;
 - (d) has resided in the province in which the application for pension is made for the five years immediately preceding the said date;
 - (e) is not an Indian as defined by the Indian Act;
 - (f) is not in receipt of an income of as much as three hundred and sixty-five dollars (\$365) a year, and
 - (g) has not made any voluntary assignment or transfer of property for the purpose of qualifying for a pension.
- (2) The receipt of a pension shall not by itself constitute a disqualification from voting at any provincial or municipal election.

Sec. 9 provides that the maximum pension payable shall be \$240 yearly, subject to reduction by the amount of the income of the pensioner in excess of \$125 a year. The pension authority may accept a transfer of the pensioner's interest in a dwelling house in which he resides, in which case the value of the dwelling will not be considered in calculating the amount of pension payable. The pension authority is entitled to recover out of the estate of any deceased pensioner the amount of pension payments with interest at 5 p.c., per annum compounded annually, subject to the limitation that no claims shall be made for such recovery out of any part of the estate which passes by will or on an intestacy to any other pensioner or to any other person who has regularly contributed, since the grant of the pension or for the last three years during which the pension has been paid, to the pensioner's support by the payment of money or otherwise to an extent which, having regard to the means of the person so having contributed, is considered by the pension authority to be reasonable.

Secs. 10, 12, 13 and 14 provide for the distribution of the pension burden among the provinces in which the pensioner has resided during the 20 years immediately preceding the grant of the pension. Sec. 11 provides for a reduction of pension where a pensioner has resided for a portion of the 20 years in a province with which no agreement is in force. Sec. 15 provides for a suspension of the pension where a pensioner has transferred his residence to some place out of Canada. It is provided by Sec. 16 that a pension shall not be subject to alienation or transfer by the pensioner or to seizure in satisfaction of any claim against him.

The Governor in Council was empowered by Sec. 19 of the Act to make regulations pursuant to this section. Existing regulations were revised and approved by an Order in Council dated Feb. 1, 1932.

The Dominion Old Age Pensions Act is operative in seven of the nine provinces, namely—Alberta, British Columbia, Manitoba, Nova Scotia, Ontario, Prince Edward Island and Saskatchewan as well as in the Northwest Territories.

An agreement has been made, between the Governor in Council and the Lieutenant Governor of the province of New Brunswick in Council, whereby old age pensions will be payable in that province as from July 1, 1936. Old Age Pensions legislation was introduced in the Quebec Legislature on April 14, 1936.

The Gold Commissioner of Yukon was given authority, by a Yukon Territorial Council Ordinance passed in 1927, to enter into an agreement with the Dominion Government for the purpose of obtaining the benefit of the Old Age Pensions Act for residents in the territory. No proposed scheme of administration for adoption in Yukon has been submitted for the approval of the Governor in Council.

Table 25 is a financial summary of old age pensions in Canada as at the end of the calendar year 1935.

Section 11.—The Co-operative Movement in Canada.

A general article on "The Co-operative Movement in Canada" appeared at pp. 704-720 of the 1925 edition of the Year Book under the three sub-headings of "Consumers' Co-operation", "Co-operative Credit", and "Producers' Co-operation".* Because of the pressure upon space, this article is not reprinted here, but a digest of the latest available material on each of these three sub-divisions of co-operation follows, the presentation of producers' co-operation being confined to that among agricultural producers.

Subsection 1.—Consumers' Co-operation.

The co-operative store was first introduced into Canada by miners who had had experience of co-operation in the United Kingdom. The first co-operative store was opened at Stellarton, N.S., in 1861, and continued to do business until 1916. Many similar ventures were afterwards commenced, but a considerable number failed through their neglect to build up adequate reserve funds. In 1909 the Co-operative Union of Canada was formed, with six affiliated societies and 1,595 members; since October, 1909, it has published a monthly, *The Canadian Co-operator*, from which the following statistics (Table 26) showing the growth of consumers' co-operation in the societies affiliated with the Co-operative Union have been taken.†

* The article referred to above was prepared for the Year Book by Miss Margaret Mackintosh, M.A., of the Department of Labour, Ottawa.

† For details regarding the Co-operative Union of Canada and its activities, see the 1925 Year Book, pp. 708-709.

26.—Statistics of Co-operative Societies Affiliated with the Co-operative Union of Canada, 1909-34.

¹ The decrease in membership is accounted for by the withdrawal of the United Farmers of Canada, Saskatchewan Section, Ltd., and the United Grain Growers, Ltd., the non-inclusion of the latter society being also mainly responsible for the decreases in the figures shown in the remaining columns.

Comparisons in Table 26 are somewhat vitiated by the fact that some organizations do not report each year, e.g., the share and loan capital in 1934 was apparently lower by over \$48,000, yet one association with a combined share and loan capital of over \$130,000 in 1933 did not report in 1934. The large increase in membership in the latest year was chiefly due to an increase in membership of an elevator society from 150 to over 9,200.

The progress shown by the returns from the societies affiliated with the Co-operative Union does not represent the whole growth of the consumers' co-operative movement in Canada. Although the societies affiliated with the Co-operative Union are among the oldest and best established, there is a larger number of consumers' co-operative societies outside the Union than within it, the great majority of these being in the western provinces. In 1926, the Manitoba Co-operative League was organized to link up the co-operative societies in that province, and a similar organization was formed in Alberta in 1923. In Saskatchewan a conference of representatives of co-operative societies has been held annually since 1923.

Subsection 2.—Co-operative Credit in Quebec.

A form of co-operation which has achieved great success is that which provides short-term credit for small farmers and industrial workers in the province of Quebec. In 1900, what are known as "Les Caisses Populaires", or People's Banks, were begun with the establishment, by the late Alphonse Desjardins, of La Caisse Populaire at Lévis. M. Desjardins adopted the principles of lending money only for approved purposes to carefully selected members in a restricted area, of limited liability, of withdrawable shares of small amount payable by instalments, and of distribution of profits. These banks are for the most part established in agricultural districts. Loans are made to purchase agricultural implements at cash prices, to increase farm live stock, to improve farm buildings, to tide over a period of depression, to pay off a merchant and for various similar purposes. The loans, though comprised within the term "short credit", are for longer periods than are usual in ordinary commercial transactions because agricultural operations necessarily extend over longer periods than those of trade. They may be for 12, 15, or even 24 months, because they must give time for the farmer to realize on his products.

Details of organization may be found in the Statistical Year Book of Quebec, in the 1935 edition of which may be found statistics of the system as a whole. Complete information of the working of each individual bank, including such details as number of members and depositors, rates of interest paid, loans made and profits realized, classification of size of loans, receipts and expenses and a *résumé* of chief operations from 1915 to 1934, are published in the report entitled "Co-operative People's Banks and Co-operative Agricultural Societies".

Table 27 shows the progress of these banks by quinquennial years from 1915 to 1930 and annually since then.

Subsection 3.—Agricultural Co-operation in Canada in 1934.*

Co-operative organization forms an integral part of the economic fabric of Canadian agriculture. The activities of the larger organizations such as the wheat pools, live-stock and fruit co-operatives have reached a high stage of development, and have received world-wide recognition. In addition to these are hundreds of comparatively small organizations which are working quietly and effectively to serve local areas.

Available statistics show 697 co-operative associations actively engaged in business in 1934. The 697 associations have 2,604 branches which, combined, make a total of 3,301 places of business engaged in the marketing of farm products and the purchase of supplies for farmers. The shareholders and members financially interested number 341,020 and patrons reported total 378,730. Combined assets total \$105,183,565 with plant and equipment valued at \$38,850,488. The total actual investment of member shareholders in capital stock amounts to \$8,933,425 and reserves and surplus total \$40,943,469. Sales of farm products for the year under review amounted to \$117,783,560. The sales value of supplies handled totalled \$7,991,755 and other revenue \$289,576, which, combined, means a total business of \$126,064,891.

Available records indicate that the most important early activity of farmers in the field of co-operation in Canada was directed toward the marketing of farm products. In comparing the volume of business, marketing associations transact twenty times the business handled by purchasing agencies. Membership in the co-operative marketing associations is given as 312,519 persons compared with 27,328 members in purchasing organizations.

Within the marketing group the grain and seed co-operatives which include the wheat pools of Western Canada have the largest membership and investment, and exceed all other commodity groups in volume of business, which is estimated

*Statistics contained in this review are based on records received by the Economics Branch, Department of Agriculture, in 1935, covering the business year of 1934.

at \$78,483,629 for the year under review. A membership of 170,081 grain growers contributed to this business through 2,137 co-operative marketing agencies. Mainly through deductions from the selling price of their grain, these members have invested a sum of \$37,114,643 in their business and in addition have paid up \$3,350,952 in share capital. Combined assets total \$88,298,067.

One hundred and fifteen dairy co-operatives with 122 depots in Canada reported a membership of 35,034 with assets valued at \$4,179,513. Paid-up share capital amounts to \$1,828,967 with reserves of \$723,675. Sales of dairy products totalled \$8,479,466 for the year under review.

The records for 53 live-stock shipping and marketing associations show a combined membership of 35,314. Financing of these associations is mainly by membership fees and commissions. Assets are comparatively low with value of plant and equipment amounting to \$616,292. This accommodated a business of \$7,749,583. The live-stock co-operatives undertake very little processing of their product. Their main activity is the assembling of live stock in cars at producing points for shipment to central markets.

A large part of the fruit and vegetable crop is marketed through 104 co-operative agencies with a combined membership of 9,307 fruit growers. Assets for all companies total \$3,860,115; reserves and surplus amount to \$1,009,767. Sales of fruits and vegetables during the year amounted to \$6,382,915 which, together with supplies and other revenue, gave a total business of \$7,809,574.

Poultry producers have organized in each of the provinces to sell their products co-operatively. There were 24 associations with 247 places of business which reported a membership of 32,851 members. Assets amount to \$444,139 with reserves of \$196,792. Sales for the year amounted to \$2,068,402.

Practically all the wool marketed co-operatively in Canada is handled by the Canadian Co-operative Wool Growers, Ltd. The company operates in each province through the medium of 18 sheep-breeders' and wool-growers' associations. The co-operative grades, stores and markets the wool received from its 7,100 patrons. In addition, it carries on advertising and educational work and handles materials and supplies for its members. The quantity of wool handled by the co-operative during the year amounted to 5,076,100 pounds.

In Ontario and Quebec, the honey producers are organized co-operatively with a combined membership of approximately 1,800 members. Two tobacco co-operatives in Ontario, and three in the province of Quebec report a total membership of 842 and sales of approximately one and a quarter million dollars for 1934. The *Producteurs de Sucre et Sirop d'Erable de Quebec*, with a membership of 1,982, is organized on a co-operative basis. During the year under review the sales value of maple products marketed by this association amounted to \$293,322.

Available statistics show 333 associations are organized for the purpose of purchasing farm supplies and merchandise on the co-operative plan. These consumer associations, of which nearly one-half are established in the province of Saskatchewan, have a combined membership of 27,328. The sales value of supplies handled during the year, by associations organized exclusively for the handling of supplies, amounted to \$5,198,825. In five of the provinces co-operative wholesale buying societies purchase goods for their shareholder associations.

For further information see Table. 28.

Section 12.—Labour Legislation in Canada in 1935.

The Canada Year Book for 1929 contains, at pp. 755-762, a summary of the labour legislation in force in Canada at the end of the year 1928, and each subsequent Year Book gives a summary of the labour laws passed during the preceding year. Labour laws enacted during 1935 are published in the Report on Labour Legislation in Canada, 1935, issued by the Department of Labour. The following is a *résumé* of the principal enactments.

Dominion Labour Legislation.—Legislation was enacted to implement certain draft conventions of the International Labour Conference which had been formally ratified by the Government on Mar. 21 and April 25, respectively. These laws included the Draft Conventions on the eight-hour day and weekly rest in industrial undertakings and on minimum wage-fixing machinery. Following the change of government in October, 1935, these three statutes, together with the Employment and Social Insurance Act, were referred to the Supreme Court of Canada for a determination as to whether they are *intra vires* of the Dominion Parliament.

The Employment and Social Insurance Act provides for compulsory insurance against unemployment. The scheme covers persons 16 years of age and upwards employed under contract of service or apprenticeship, with certain exceptions, chief of which are: persons employed in agriculture, horticulture, forestry, fishing, lumbering, logging, transportation, stevedoring, private domestic service, and employment otherwise than by way of manual labour at a remuneration exceeding \$2,000 a year. The Unemployment Insurance Fund is to be made up of contributions from insured persons and their employers, together with a grant from the Dominion Government which also bears the cost of administration. Contributions payable in respect of adult workers are 25c. per week from men and 21c. per week from women, with like amounts from the employer. Lower rates are fixed for persons between the ages of 16 and 21 years. The main qualification for benefit is the payment of 40 weekly contributions during the two years preceding the claim. The weekly benefit is \$6 for men and \$5.10 for women, with proportionately lower rates for young persons between 16 and 21. Benefit in respect of dependants is payable at the rate of \$2.70 per week for adults and 90c. per week for children. Total benefit, including dependants' benefit, may not exceed 80 p.c. of the wages formerly received by the unemployed person. Benefit is payable for not more than an aggregate of 78 days of continuous unemployment in any benefit year. Additional benefit is, however, granted to persons with good employment records on conditions laid down in the Act. The scheme is to be administered by an Employment and Social Insurance Commission of three members, of whom two are required to be appointed after consultation with employers' and workers' organizations respectively. The Commission, which was appointed in July, 1935, is to be assisted by an Advisory Committee of not less than four or more than six members representing equally employers and workers. The Commission is to organize and maintain an Employment Service, and the Employment Offices Co-ordination Act, 1918, may be repealed by Order in Council. The Commission is further required to investigate and report upon schemes of health insurance and medical aid.

The Relief Act, 1935, which is to continue in force for one year, is generally similar to the Relief Act, 1934, and authorizes the Dominion Government to make agreements with the provinces respecting relief measures; to make loans to provinces and to Canadian Co-operative Wheat Producers, Ltd.; to take steps to protect the financial position of the Dominion or of any province; and, when Parliament

is not in session, to do what is necessary to maintain peace, order, and good government. In particular, the Governor in Council may provide for special relief works under the Departments of National Defence and the Interior.

The Supplementary Public Works Construction Act provides that, in addition to the works and undertakings provided for by the Public Works Construction Act, 1934, further projects shall be undertaken for the purpose of accelerating recovery of trade and industry, including work on railways, rivers, harbours and canals, geological surveys, conservation work, camp sites, public buildings, landing fields, etc. Consideration is to be given first to the employment of those most in need in the locality, with preference to unemployed ex-service men and men with dependants. The sum of \$18,000,000 is appropriated to meet such obligations.

The Minimum Wages Act provides for the creation by the Lieutenant-Governor in Council, on the recommendation of the Minister of Labour, of machinery whereby minimum rates of wages may be fixed in trades (in particular, home-working trades) in which wages are exceptionally low and where no arrangements exist for their effective regulation. Employers and workers concerned are to be associated in the operation of such machinery, and the Governor in Council, on recommendation of the Minister of Labour after consultation with employers' and workers' representatives, may make regulations designating the trades to be affected. The Draft Convention of the International Labour Conference on which these sections depend for their constitutional validity, provides that it shall come into effect in any country twelve months after its ratification by that country. The Convention was ratified by Canada on April 25, 1935. Accordingly, these provisions will not come into force until a year from that date and only on proclamation to that effect. Under sections of the Act which came into force when enacted, the Governor in Council, when satisfied that the trade and commerce or the public revenue of Canada is being injured by the lack of uniform minimum wage rates in any trade or that wages throughout Canada are insufficient to maintain a suitable standard of living, may fix uniform minimum wages or fair and suitable rates of wages in the trade concerned and enforce observance of the rates. The Minister, on application from employers or employees, may make inquiry as to the minimum rates required for a suitable standard of living.

The Limitation of Hours of Work Act provides for an eight-hour day and a forty-eight hour week in mining, quarrying, manufacturing, construction and transportation. Transport by hand and industries in which only members of the same family are employed are excluded, and persons in confidential, managerial and supervisory positions are exempt. Where, by law, custom or agreement between employers' and workers' organizations, or, where no organizations exist, between employers' and workers' representatives, working hours on one or more days of the week are less than eight, the limit of eight hours may be exceeded by not more than one hour on the remaining days by sanction of the Governor in Council or by agreement between such organizations or representatives. The eight-hour limit may also be exceeded, on conditions laid down in the Act, in case of accident or emergency, of employment in shifts or continuous processes, and, with the sanction of the Governor in Council, in certain exceptional cases. Where, under any provincial statute, provision is made for higher minimum wages or for shorter hours of work than under the Dominion Acts, the former takes precedence over the latter.

The Weekly Rest in Industrial Undertakings Act, which applies to the same industries as the Hours of Work Act, requires employers to grant a rest period of at least twenty-four hours in every seven days to all employees except those in a confidential capacity or in positions of supervision or management. The rest

period is, whenever possible, to fall upon The Lord's Day as defined in The Lord's Day Act. Regulations may authorize exceptions after consultation has been had with employers' and workers' associations and must provide as far as possible for compensating periods of rest.

The Fair Wages and Hours of Labour Act, 1935, which is to come into force on May 1, 1936, repeals the Fair Wages and Eight-Hour Day Act, 1930. The Act, like its predecessor, provides for fair wages and an eight-hour day on construction work undertaken by the Government of Canada directly or by contract. It also provides for a forty-four hour week on such works, and extends the Dominion Government policy of fair wages and an eight-hour day to works towards which a grant of public money is given by the Government, including works carried out by a provincial or municipal authority. Financial assistance may be given without this stipulation, however, if the exception is made by statutory authority or by agreement with the Government of Canada. The Act does not apply to such contracts or works as are, by Order in Council made before the execution of the contract, declared to be excepted from it.

An amendment to the Criminal Code declares the employment of any person at a wage less than the minimum fixed by any law in Canada or the falsification of an employment record, or the placing of more than one employee's wage in the same envelope with intent to evade the provisions of any law of Canada, or the employment of a child or minor contrary to law, to be an indictable offence punishable by fine or imprisonment.

The Economic Council of Canada Act provides for an honorary advisory council consisting of the Prime Minister as chairman and fifteen members appointed by the Governor in Council. The latter, of whom not more than seven are to be civil servants, must possess special knowledge of social and economic problems.

The Dominion Housing Act appropriates \$10,000,000 for the purposes of the Act and authorizes the Minister of Finance, with the approval of the Governor in Council, to make contracts with approved lending institutions or local authorities for loans to assist in the building of houses under certain conditions. The Economic Council, when required by the Governor in Council, is to make inquiries and give advice on housing problems.

Provincial Labour Legislation.—The Metalliferous Mines Regulation Act of British Columbia, which consolidates and amends the laws relating to metal mines and quarries, raises the minimum age for the employment of boys below ground from 12 to 18 years, and fixes 15 as the minimum in other cases. Hoisting machinery operators must be at least 22 years of age, instead of 18, and hold a certificate of physical fitness. Hours are limited as before to eight a day for persons employed in mines and metallurgical works, but the Lieutenant-Governor in Council, on recommendation of the Minister of Mines, may amend or repeal the provisions as to hours and prescribe hours of employment. The eight-hour day also applies to quarries. The Act lays down rules for safety and health and authorizes the making of additional regulations for that purpose.

Under the Quarries Regulation Act of Alberta, which will come into force on Proclamation, the Lieutenant-Governor in Council may make regulations for the safety of workers and prescribe minimum ages for employees, hours of labour, and matters regarding the payment of wages.

The Saskatchewan Coal Mining Industry Act empowers the Lieutenant-Governor in Council to license all coal operators and to formulate codes and standards after consultation with employers and workpeople. In particular, he may establish minimum prices for coal products and standard hours of labour and minimum wages for workers, provided they do not interfere with any interprovincial business.

An amendment to the Quebec Industrial and Commercial Establishments Act enables the Chief Inspector to authorize the double shift system in factories where women are employed. Previously, women and young persons could not be employed before 6 a.m. or after 9 p.m. The amendment provides that the work-period for the two shifts of eight hours each must fall between 6 a.m. and 11 p.m. In such establishments, an hour in each shift must be given for a meal.

The Limitation of Hours of Work Act of Nova Scotia, which will come into force on proclamation, provides for a Board of Adjustment which, with the approval of the Lieutenant-Governor in Council, may limit hours of labour of persons employed in industrial undertakings, including mining, construction, manufacturing, shipbuilding and electrical works. Exceptions may be made similar to those in the Dominion Limitation of Hours of Work Act and the same provision is made for a weekly rest day.

In British Columbia, the Truck Act was amended to prevent an employer supplying fuel to a workman and deducting the cost from wages. No deductions from wages may be made on account of the purchase or subscription price of any stock or shares, nor may wages be paid to a workman by the allotment or delivery to him of stock or shares.

The application of the Women's Minimum Wage Act of Quebec was extended to hotels, clubs and restaurants in towns having a population of not less than 5,000. Penalties for violation of the Act are increased.

The Male Minimum Wage Act of British Columbia now applies to the wages and conditions of labour of male employees under 18 years of age as well as to adult men. Formerly, the wages of those under 18 were only indirectly affected by the Female Minimum Wage Act and did not come within the scope of the Male Minimum Wage Act.

The Collective Labour Agreements Extension Act of Quebec was amended to stipulate that the workers' associations which may make agreements that may be made generally binding must be associations of *bona fide* employees according to the decision of the Minister of Labour. The terms of an agreement as to apprenticeship as well as those dealing with wages and hours may now be made obligatory. On certain conditions, joint committees for supervising the agreements may levy assessments on the employers concerned, or, if the agreement so provides, on both employers and employees, in order to pay their expenses. A joint committee in a municipality having a population of over 10,000 may require all workmen in the industry and district covered by the agreement to hold certificates of competency from a board of examiners set up by the committee or from the trade union concerned. In the building industry, no building in connection with agriculture may be the subject of an agreement under the Act, and workmen permanently employed in maintenance work in religious or charitable institutions or in manufacturing plants may be paid lower wages than those fixed in the agreement for the district. No collective agreement may fix a lower wage for female employees than that established by the Minimum Wage Commission for the trade. Penalties are provided for violation of the Act or of an agreement made obligatory.

The Industrial Standards Acts of Alberta and Ontario, which are similar in terms, enable the Minister of Labour of the province, on the petition of either employers or employed, to call a conference of employers and workers in any industry for the purpose of negotiating an agreement. The Lieutenant-Governor in Council may declare any written agreement as to wages and hours between employers and employed in any industry to be binding for not more than one year on all persons engaged in the industry in the zone to which it applies if, in the opinion

of the Minister of Labour, the agreement was arrived at by a proper and sufficient representation of employers and employees. The Minimum Wage Board is to enforce the Act and the agreed wages and hours for violation of which penalties are provided. A joint board to hear complaints and assist in enforcing the agreement may be set up by the parties to an agreement in any industry.

The New Brunswick Forest Operations Commission Act was amended to ensure the better enforcement of the purposes of the Act, and to give the Commission power to intervene without application from the employer or employees in a dispute as to the payment of the wage scale established by the Commission.

Changes made in the Quebec Workmen's Compensation Act permit payment of compensation from the first day if disability lasts seven days or longer, and raise the age up to which dependent children or orphans receive compensation from 16 to 18 years. The minimum compensation for total disability is restored to \$12.50 per week, the rate in force prior to 1933 when it was reduced to \$10. The Civil Code of Quebec was amended to prohibit any civil action on account of an industrial accident against an employer within the scope of the Workmen's Compensation Act, but if the workman has recourse under the Code against a third person he may exercise such right or claim from the employer under the Compensation Act. A third person is prohibited from receiving in any way any part of the compensation due to a workman or his representatives.

An amendment to the Workmen's Compensation Act of British Columbia increases the minimum compensation for total disability from \$5 to \$10 per week or average earnings.

Under amendments to the Nova Scotia Workmen's Compensation Act, stricter provision is made for records and reports from employers, including special provision for operators of sawmills.

Changes in the New Brunswick Workmen's Compensation Act extend the period in which claims may be made from six months to a year from the date of the accident, permit the Board to re-open cases and amend decisions and provide for a medical appeal board in case of dispute as to the physical condition of a workman.

The Apprenticeship Act of British Columbia, similar to the Ontario Apprenticeship Act, 1928, provides for an Inspector of Apprenticeship to promote the purposes of the Act and to supervise its execution. Local apprenticeship committees, and a Provincial Committee, are to advise the Minister on apprenticeship matters. The Act applies to certain designated trades: carpentry, painting and decorating, plastering, sheet-metal working, plumbing and steamfitting and electrical work. Other trades may be added on petition of employers or of a collective agreement or on recommendation of the Minister. No minor under 16 years of age may be employed in a designated trade, and no minor over that age may be employed for more than three months except under an approved contract of apprenticeship unless he be a common labourer or has completed his apprenticeship. Regulations may be made dealing with the establishment and duties of committees, the length of apprenticeship, the number, education, training, and working conditions of apprentices and the assessment of employers.

The Alberta Health Insurance Act which will come into force on Proclamation provides for a scheme of health insurance for the residents of any "medical district" who vote for the scheme. A Health Insurance Commission of three members, including one medical practitioner, is to administer the Act, assisted by an advisory board for each district and medical boards of reference. The scheme is to be financed by contributions from the municipality, the province, employers, and residents. The municipality and the province are to pay \$11.28 and \$3.22 per annum, re-

spectively, to the Commission for each resident of the district. Residents who are wage-earners are to pay \$2.01 per month, and casual labourers one cent per month for each hour of employment. The employer will contribute for each employee who is a resident of a medical district 81 cents per month in the case of a salary-or wage-earner, and one-half cent per month for each hour of employment for a casual worker. Income-earners other than wage- or salary-earners are to pay on demand to the municipality in which they reside \$33.83 per annum, or \$2.82 per month. The term "income-earner" does not include a married woman whose income, apart from her husband, does not exceed \$100 per annum, a female domestic servant whose remuneration over and above board and lodging is not more than \$12 per month, or a male person under 18 who is related to, and resides with, an income-earner but receives no remuneration for services other than board and lodging and has no other income. Benefits are provided for all residents as defined in the Act and include medical, surgical and dental treatment and supplies and hospital and nursing services. A resident may consult any medical practitioner or dentist in the district, who is to be paid by the Commission according to the conditions laid down. The doctor is to decide as to the necessity for benefit, but a patient may appeal from his decision to the local advisory board. The Commission may conduct clinics for the promotion of the public health in medical districts and provide any services for the maintenance of health and the prevention of disease. A sum not exceeding ten per cent of all moneys received is to be appropriated to defray expenses of the Commission; two per cent of the moneys received from each medical district is to be kept in a separate contingency fund for that district to be used only for dealing with emergencies; and the balance received from each district is to be used for payment of benefits in that district.

Sections added to the Alberta Town and Village Act enable the municipal council, on the approval of two-thirds of the property-owners, to pass a by-law providing for a contract with a medical practitioner for the medical care of its residents.

In Manitoba, the Pensions for the Blind Act, which will come into force on Proclamation, empowers the Lieutenant-Governor in Council to authorize the payment of pensions to blind persons between 40 and 70 years of age in accordance with the conditions laid down in any Dominion statute that may be enacted.

The Ontario Mothers' Allowances Act provides for an allowance to a widow or the wife of a man who is permanently unemployable through mental or physical disability, or who has deserted her and has not been heard of for at least three years. Formerly the period of desertion was five years and provision for the families of mentally disabled persons was restricted to persons who were inmates of an institution. An allowance in respect of one child may now be granted, whereas formerly it could be paid only where there were two or more children.

Section 13.—Legislation Respecting Combinations in Restraint of Trade.

A general article on Canadian legislation concerning trade combinations and monopolies against the public interest will be found at pp. 765-770 of the 1927-28 Year Book under the heading "Legislation Respecting Combinations in Restraint of Trade". The article outlines the provisions of the Combines Investigation Act and reviews the principal cases dealt with under the Act up to that time. A brief statement of the provisions against combines as contained in the Criminal Code, the Customs Tariff, the Excise Act and the Patent Act is included. A further section of the article summarizes former Canadian legislation for the investigation of combines, including the Combines Investigation Act of 1910 and the Combines and Fair Prices Act of 1919.

The Combines Investigation Act.—The Combines Investigation Act (R.S.C., 1927, c. 26) is designed, as its full title indicates, “to provide for the investigation of combines, monopolies, trusts and mergers”, and declares to be unlawful only such combines as “have operated or are likely to operate to the detriment or against the interest of the public, whether consumers, producers or others”. The penalty section of the statute provides that any person who is a party or privy to, or knowingly assists in, the formation or operation of a combine is guilty of an indictable offence and liable to a penalty not exceeding \$10,000 or to two years imprisonment, or, if a corporation, to a fine not exceeding \$25,000. Provision is also made in the Act for the reduction or removal of the customs duty on any article of commerce, among the manufacturers or dealers in which there exists a combine, the operation of which is facilitated by the tariff. Similarly, the Exchequer Court may revoke a patent if there is evidence to show that the holder of such patent has made use of his exclusive rights to limit production or competition unduly, to enhance prices unreasonably, or to restrain or injure trade.

The constitutional validity of the Combines Investigation Act was given final confirmation by the Judicial Committee of the Privy Council in a decision delivered in January, 1931. This judgment confirmed the unanimous decision of the Supreme Court of Canada, given in April, 1929, after a reference for determination of this question had been made to the Court by the Dominion Government. Both courts upheld also the constitutional validity of Section 498 of the Criminal Code, relating to combinations in restraint of trade.

Combines Legislation in 1935.—Legislation passed in 1935 relating to trade combinations and restraint of trade included The Combines Investigation Act Amendment Act, 1935; The Dominion Trade and Industry Commission Act, 1935; and Section 498A of the Criminal Code. These Acts were designed to carry out certain recommendations of the Royal Commission on Price Spreads, following the report submitted by the Price Spreads Commission to Parliament on April 12, 1934, at the conclusion of its extensive investigations.

The Dominion Trade and Industry Commission Act, 1935, establishing a Dominion Trade Commission with wide powers for investigation and recommendation with respect to trade practices, came into force on Oct. 1, 1935. This Act made provision for its administration by the members of the Tariff Board, who accordingly became also the members of the Dominion Trade and Industry Commission. The duties of the commission include the administration of the Combines Investigation Act and action by way of investigation and recommendation as authorized by the Trade and Industry Commission Act with relation to commodity standards, unfair trade practices, price and production agreements and fair-trade conferences.

Under the Combines Investigation Act Amendment Act, 1935, administration of the Combines Investigation Act was transferred from the jurisdiction of the Minister of Labour to the Dominion Trade and Industry Commission. This Act came into force on Oct. 1, 1935. It also added to the Combines Investigation Act certain provisions dealing with mergers, trusts and monopolies. These provisions were designed to widen or clarify the scope of the Act in the direction of inquiries into alleged injury to the public arising from trade policies or monopolistic tendencies of single firms occupying dominant positions in their respective fields of trade or industry. Such mergers, trusts and monopolies, if found on investigation to have operated to the detriment of the public, are subject to the penalties of the Act as unlawful combines.

Additional provisions relating to restraint of trade were enacted in Chapter 56 of the 1935 Statutes as Section 498A of the Criminal Code. This section, providing against engaging in certain policies of selling goods at low prices for purposes of destroying competition or of eliminating competitors, and against specified types of price discrimination, came into force on Sept. 1, 1935.

Combine Cases in 1934-35.—Court cases arising from an investigation in 1933 into an alleged combine of importers of British anthracite coal were completed in 1935 after being carried to the Judicial Committee of the Privy Council by a group of five coal companies convicted in December, 1933, of operating a combine in violation of the Combines Investigation Act. Ten firms, all located in the province of Quebec, were convicted under the Combines Investigation Act and on charges of conspiring in violation of Section 498 of the Criminal Code to unduly limit facilities for transporting, supplying, storing and dealing in coal and coke and of similar action to unduly prevent or lessen competition in the purchase and sale of these fuels. One company was acquitted on all charges. The accused firms were tried in two groups. The appeal of the first group from their convictions was dismissed in October, 1934, by the Quebec Court of Appeals. Application by this group for leave to appeal to the Privy Council was heard in the spring of 1935 and was refused by judgment of the Privy Council delivered in June, 1935. The second group were tried in the Court of King's Bench at the city of Quebec after the judgment of the Quebec Court of Appeals and were found guilty of similar offences. An appeal from the latter convictions was dismissed by the Quebec Court of Appeals in June, 1935. Fines imposed on the ten convicted members of the combine totalled \$43,500.

Throughout the period under review inquiries into a number of cases which normally would have been investigated under the Combines Investigation Act were made by the Parliamentary Committee on Price Spreads and Mass Buying, appointed in February, 1934, and by the Royal Commission on Price Spreads which succeeded it after the prorogation of Parliament in June, 1934. Investigation under the Combines Investigation Act included an inquiry into an alleged combine of gasoline refiners and distributors and an inquiry into an alleged combine of manufacturers of rubber footwear. Subsequently an investigation into certain aspects of the latter case was made by the Price Spreads Commission.

As in previous years, various less extensive investigations were made in connection with complaints referring to alleged practices in particular manufacturing and distributive industries, including questions of price agreements among manufacturers or dealers, exclusive dealing arrangements, the withholding of supplies for various reasons, resale price maintenance, price discrimination and other trade practices alleged to be unfair to particular individuals or groups or injurious to the public.

Section 14.—Mothers' Allowances.

Six of the nine provinces of Canada provide for the payment of allowances to mothers who are widowed or without adequate means of support. The province of Manitoba was the first to make such provision in 1916, and the example has been followed by the other western provinces and by Ontario and Nova Scotia. The Mothers' Allowances Act, 1930, of New Brunswick has not been proclaimed in effect.

All the Mothers' Allowances Acts stipulate that the mother must be a resident of the province at the time of making application and a widow or, in all provinces but New Brunswick and Nova Scotia, a wife, whose husband is physically or men-

tally incapacitated. The section in the Alberta Act bringing the wife of a physically disabled man within its scope, has, however, not been proclaimed.

In British Columbia, Ontario and Saskatchewan, deserted wives are paid an allowance, and in British Columbia and Saskatchewan, the wives of inmates of penal institutions are eligible. Under all the statutes except those of Alberta and Saskatchewan, the mother must be a British subject or the widow or wife of a British subject. Allowances may be paid to a foster-mother under certain conditions in all the provinces but Alberta, Nova Scotia and New Brunswick.

In New Brunswick and Nova Scotia, allowances are payable in respect of two or more dependent children, but an allowance is payable for one child under 16 if there is an invalid child over 16 years of age. In the other provinces, allowances are payable in respect of one or more dependent children, but in Manitoba, under the regulations, no allowance is payable in respect of an only child, or an only child under 15 years of age unless the mother is temporarily or permanently unable to care for the child. A dependent child is a child under 16 years of age in British Columbia, New Brunswick, Nova Scotia, Ontario and Saskatchewan. In Alberta, a boy under 15 or a girl under 16 is deemed to be dependent. In Manitoba, only children under 15 are regarded as dependent unless they are invalids.

In Alberta, British Columbia, Manitoba and Ontario, the cost of the allowances is divided between the province and the municipalities concerned. In Ontario, however, the Provincial Treasury bears the whole cost of allowances payable to persons resident in the provisional judicial districts (northern Ontario) of the province and not in cities. In Saskatchewan, New Brunswick and Nova Scotia, the whole cost is carried by the province.

Rates of Allowances.—In British Columbia, the Act provides for a maximum monthly allowance of \$42.50 for a mother with one dependent child, and an additional \$7.50 for each other child under 16 years of age. In New Brunswick and Nova Scotia, a maximum allowance of \$60 per month is fixed by statute. In the other provinces, the provincial authority administering the Act has power to fix the rate of the allowance. In Ontario, the maximum for a mother and two children is \$40 in a city, \$35 in a town and \$30 in a rural district, with an additional \$5 for every child above two in each case up to a maximum allowance for a family of \$80 per month. In Saskatchewan, minimum and maximum monthly payments of \$8 and \$30 were established by Order in Council in 1931.

In Manitoba, the maximum allowance for a mother and two children is \$50 with a maximum of \$89 for a family of seven or more children. In Alberta, a mother of a single child is granted not more than \$20 a month and a mother of one child under the stipulated age is given a maximum allowance of \$25. On this basis, adjustments are made for other cases.

Table 29 below shows the expenditure on mothers' allowances in the provincial fiscal years ended 1934.

29.—**Mothers' Allowances in Canada, fiscal year 1933-34.**

Province.	Number Assisted.		Benefits Paid.
	Families.	Children.

Ontario (year ended Oct. 31).....	8,144	20,589	3,030,375
Saskatchewan (year ended April 30).....	2,608	6,794	407,993

PART II.—WAGES AND COST OF LIVING.

Section 1.—Wage Rates.*

Statistics of rates of wages and hours of labour have been collected for recent years by the Dominion Department of Labour, and are published in a series of bulletins supplementary to the *Labour Gazette*. Report No. 1 of this series was issued in March, 1921. The records upon which the statistics are based begin in most cases with the year 1901. Index numbers have been calculated to show the general movement of wage rates; the series covers six groups of occupations back to 1901, and common factory labour, miscellaneous factory trades and lumbering back to 1911. The index numbers are based upon wage rates in 1913 as 100. Average index numbers, weighted according to the average numbers of employees in each group, as shown in the Censuses of 1921 and 1931, are also given. Weighting has not been applied within groups. In groups by occupations or industries such as these, weighting makes comparatively little difference as rates of wages for the various classes of labour tend to rise and fall to the same extent even in different localities. In the three groups, common factory labour, miscellaneous factory trades, and logging and sawmilling, the index numbers being calculated from samples, the averages are automatically weighted by the number of samples which vary according to the number of workers in the various occupations and industries. In 1935 there was an appreciable upward movement in all group indexes.

Rates of wages and hours of labour in 1935 in various trades in the largest cities of the five economic areas of Canada will be found in Table 2. The attention of those specially interested in the subject of wages and hours is directed to the valuable detailed study, "Wages and Hours of Labour in Canada, 1929, 1934 and 1935", published by the Department of Labour as a supplement to the *Labour Gazette*, January, 1936.

*See pp. 774-783 of the 1927-28 Year Book for an article on the "Wages Statistics of the Census of 1921" and pp. 797-799 of the 1933 Year Book for "Earnings in the Census Year 1931".

1.—Index Numbers of Rates of Wages for Various Classes of Labour in Canada, 1913-35.

NOTE.—Rates of wages in 1913 = 100. Index numbers for 1901-12 were given at p. 674 of the 1932 Year Book.

¹Weighted according to average numbers of workers in each group in 1921 and 1931.

is also legislation for the restriction of hours of labour. In Quebec, Ontario, Manitoba, Alberta and British Columbia the minimum rates for female employees are applicable to males in certain respects. Minimum wage legislation for female employees became effective in the various provinces as follows: British Columbia and Manitoba in 1918; Saskatchewan in 1919; Alberta and Ontario in 1920; Quebec in 1926, the statute having been passed in 1919; Nova Scotia in 1930, the statute having been passed in 1920. In New Brunswick a statute was passed in 1930 to come into force on proclamation but it has not yet been proclaimed.

Hours of labour are regulated in some of the provinces by the Minimum Wage Boards and in others under the factory acts, etc.

Minimum wage rates for males separately had been established prior to 1934 to a slight extent only in British Columbia since 1925, and in Manitoba since 1931. During 1934, however, provision was made for this and rates were established for comparatively large numbers of male workers in British Columbia, Manitoba, Quebec and New Brunswick, and in 1935 in Ontario. (See section on Labour Legislation.) A supplement to the *Labour Gazette* for January, 1936, on Wages and Hours of Labour in Canada 1929, 1934, and 1935 contains an appendix giving information as to minimum wages for males as well as for females in some detail.

Information as to minimum wage rates on Dominion Government contracts for the manufacture and supply of equipment, stores, etc., appears in the paragraphs on Fair Wages in the section on the Dominion Department of Labour at pp. 747-748.

Subsection 1.—Minimum Wages for Females.

The accompanying table gives information as to minimum rates of wages and as to hours under the orders of the various boards and commissions in effect at the end of 1935.

The information here given is intended to afford merely a statistical summary of the minimum wages and restricted hours of labour in the provinces and industries affected, and while some of the more significant details have been given in footnotes, it has been found impossible to include the information in such form as to indicate any more than the general conditions under these provisions.

For complete information it is necessary to refer to the orders as issued by the various provincial boards. These have been given in summary form in the *Labour Gazette* from time to time as issued, and in more detailed form in the Wages and Hours Supplement to the *Labour Gazette*, January, 1936. In some provinces these orders include regulations as to employment conditions, sanitary conditions, etc. The boards have power to issue licences for lower rates of pay for handicapped workers and to meet special conditions in the nature of emergencies.

In this table the figures for adult learners and for minors and apprentices are shown in a range covering both classes. There is considerable variation in the rates for such classes in the various industries and the time allowed for such periods varies considerably, from a few weeks to two years and upwards. Probationary periods without pay are allowed in some cases—beauty parlours, millinery, dress-making in shops, etc. The number of learners and apprentices is usually restricted to 25 p.c. of the employees.

The hours of labour shown in Table 3 are those for which the minimum rates are payable, or the maximum hours of work (except under special conditions, provision for overtime pay, etc.) established by the minimum wage boards or provided for under other legislation, such as factory acts.

3.—Minimum Wage Rates for Female Employees in Canada Under

NOTE.—For further details regarding minimum wage rates for females, see pp. 94-104 of *Wages and*

¹³ In Toronto, \$12.50; in Ottawa, Hamilton, London, Windsor, \$12.00; shoeshine parlours in Toronto, \$12.50.¹⁴ Or 25 cents to 30 cents per hour.¹⁵ These rates and hours apply to all elevator operators (under a separate order).¹⁶ Minors, learners, etc., in "Millinery Establishments"—\$5.00-10.00 per week; in "Tailoring Establishments"—\$6.00-11.00 per week; in Paint, Broom and Seed Packing Factories—\$7.00-11.00 per week.¹⁷ Winnipeg and St. Boniface only.¹⁸ Higher rate applies to Winnipeg and Brandon at any time, to summer resorts and Portage la Prairie during June-September, inclusive. Part-time rates: experienced—25 cents; inexperienced—20 cents per hour. Rest of province: all employees—20 cents per hour.¹⁹ Ticket sellers and ushers—30 cents, cleaners—35 cents, per hour, Winnipeg, St. Boniface and St. James only; no minors to be employed.²⁰ Winnipeg, St. Boniface and St. James only.²¹ Mail-order houses—\$13.50; minors, learners, etc.—\$6.00-11.00 per 48-hour week.²² Millinery shops—\$4.00-10.00.²³ For 7-day week: experienced—\$14.50; apprentices—\$10.50-13.00.²⁴ "Personal Services" order: rates also apply to garages and operation of elevators.²⁵ Ushers in theatres, motion picture houses and music halls, cloakroom attendants in cabarets and dance halls if working 28-48 hours per week—\$14.00; hourly rate—50 cents.²⁶ "Public Housekeeping" order: rates also apply to chambermaids in lodging houses and to elevator operators. There is a separate order for janitresses.²⁷ "Personal Services" order: also includes attendants at garages and service stations, drivers of motor cars and other vehicles all of whom (except those under 18 years of age) are to receive \$14.25 per week.²⁸ All ushers in theatres, music halls, lecture halls, etc.—\$14.25 for 36-48 hours per week, \$10.80 for 13-36 hours per week; for legal holidays and special matinees—30 cents per hour with minimum of 75 cents.²⁹ "Telephone and Telegraph" order.

Subsection 2.—Minimum Wages for Male Employees.

In Quebec, Ontario, Manitoba, Alberta and British Columbia, the minimum wage legislation provides that, in certain respects, men and boys may not be employed at rates lower than the minimum rates set for female employees. In Saskatchewan, the Minimum Wage Board may declare any order to apply to male employees in shops and factories. Other provisions for minimum-wage rates for male workers have been made (Wages and Hours of Wages Supplement to *Labour Gazette*, January, 1936, pp. 105-118), a summary of which follows.

In New Brunswick, the Forest Operations Commission during 1935 established for stream-driving a minimum rate of \$1.75 per day and board net, or its equivalent in case of piece work. For booming and sorting a minimum rate of 20 cents an hour was set. For lumbering operations in summer a minimum rate of \$32, and in winter a rate of \$27, per month and board net, or their equivalents in case of piece work were fixed, provided, however, that no employer paying higher rates was to be allowed to reduce such rates without good cause being shown to the Commission.

In Quebec, the Forest Operations Commission requires a report on wages, hours, supplies, etc., from all timber limit holders with cutting licences, or their contractors, and the regulations contain a recommendation for a wage of at least \$30 per month (or its equivalent in case of piece work).

Under the Quebec Collective Labour Agreements Extension Act (section on labour legislation) wages and hours in agreements have been extended and made compulsory for all employers and workers affected, as follows: for the whole province in various manufacturing industries, *viz.*, boots and shoes, men's and boys' clothing (not work clothing), children's clothing, women's cloaks and suits, gloves, furniture, also for granite and stone quarrying; in certain districts throughout the province for building trades and hairdressing trades; in Quebec, Three Rivers, Sherbrooke, Montreal, Hull and the surrounding districts for bakeries; in Montreal and district for the fur industry, for women's and children's millinery, also for longshoremen, etc., engaged in connection with inland navigation; in Quebec and Chicoutimi districts for printing trades; and in Montreal and Quebec for the ornamental iron and bronze industry.

In Ontario, under the Industrial Standards Act, 1935, wages and hours schedules have been made obligatory by Order in Council for the following industries: most of the building trades in Toronto, the principal building trades in Ottawa and Windsor, and certain of these trades in Brantford, London, Port Arthur and Fort William; the baking industry in the counties of Waterloo, Wellington, Perth and Huron; the brewing industry, the women's cloak and suit industry, and the millinery industry throughout the province; also the furniture industry throughout the province except Toronto.

In Manitoba, under the Minimum Wage Act, except for exemptions or regulations of this Act, and except for employment on a farm or market garden or in domestic service, no person over eighteen years of age may be employed for less than \$12 per week of forty-eight hours or 25 cents per hour in any city and certain named municipalities or at any summer resort during the months June to September inclusive; and in the rest of the province for less than \$10 per week of forty-eight hours

or 21 cents per hour. Boys under eighteen working in factories, garages and filling stations and retail stores, in Greater Winnipeg and Brandon, must be paid at least \$8 per week the first six months, \$9 the second six months and \$10 thereafter (except messenger boys in drug stores for whom the minimum is \$8 per week and boys working part time at night who must be paid at least 15 cents per hour). The \$8, \$9 and \$10 rates apply also to laundries, dyeing and cleaning establishments in Winnipeg and St. Boniface, also to boys employed in hotels, restaurants in certain localities, and in any summer resort except bell boys (any age) who are to be paid at least \$8 per week.

An order of the Minimum Wage Board effective Mar. 1, 1935, makes special provision as to wages in classes of work ordinarily performed by boys, for men and boys, also for piece workers, part-time workers, and apprentices.

The Taxicab Act of Manitoba, 1935, applies to taxicabs in Greater Winnipeg and fixes a minimum wage of \$15 per week for those employed by the week or \$1.40 per day, if on duty four hours, and for each additional hour, 30 cents. The Municipal and Public Utility Board may vary the hours under changed conditions provided the minimum wage is not reduced.

The Fair Wage Act of Manitoba provides for minimum wages and maximum hours on "Public Works" under contract, and also on "Private Works" as defined by the Act, under schedules approved by the Minister of Public Works.

In Saskatchewan, the Coal Mining Industry Act, 1935, and an amendment to the Public Services Vehicles Act in 1935 provide for the establishment of minimum wage rates but no action under these provisions has yet been reported.

In Alberta, the Industrial Standards Act, 1935, (*Labour Gazette*, June, 1935, p. 534), is similar to that of Ontario but under this Act only one schedule has been made obligatory up to the end of 1935, *viz.*, for plumbers and steamfitters in Edmonton, 95 cents per hour, eight hours per day and forty per week.

In British Columbia, under the Male Minimum Wage Act, 1934, applying to all occupations except farm labourers and domestic servants, orders have been issued as to the following: logging, sawmilling, shingle and wood-working industries, baking, fruit and vegetable canning, preserving, etc., wood workers in shipbuilding, transportation other than rail, water or air, wholesale and retail establishments, barbering excluding beauty parlours, elevator operators, janitors and stationary steam engineers, and labourers in construction.

Section 3.—Cost of Living of Wage-Earners.

An index number of the cost of living in working-men's families has been computed by the Department of Labour since 1913, and is published monthly in the *Labour Gazette*. This index is specifically designed for the purpose of measuring the trends of the cost of living for certain wage-earning classes with a somewhat lower standard of living than that which is measured by the Bureau of Statistics index number of retail prices, shown on pp. 812-815 of the present volume. The former wage-earners index is used extensively in negotiations as to wage rates and in the settlement of industrial disputes. An abridgment of this index is presented in Table 4.

4.—Changes in the Cost of Living in Canada from 1914 to 1935.¹

¹ The figures for "all items" were calculated by giving the following weights to each group: Food 35 p.c.; Fuel 8 p.c.; Rent 18½ p.c.; Clothing 18½ p.c.; and Sundries 20 p.c.

Section 4.—Earnings in the Census Year, 1931.*

The total number of wage-earners in Canada reporting earnings for the census year ended June 1, 1931, was 2,476,414 or 96.35 p.c. of all wage-earners and the total amount of their earnings was \$2,100,552,700. Of this number 1,947,957 were males and their earnings amounted to \$1,804,942,500 or 85.93 p.c. of the total earnings. Females reporting earnings numbered 528,457 and the total amount of their earnings was \$295,610,200 or 14.07 p.c. of total earnings. The total weeks worked by wage-earners reporting earnings was 104,624,422. The number of weeks worked by the males was 80,003,048 or 76.47 p.c. of the total for both sexes, and the total for the females was 24,621,374 weeks or 23.53 p.c. of the grand total. Table 5 shows total earnings and average earnings by wage-earners in Canada and each province, by sex, for 1931 compared with 1921 and 1911, and Table 6 gives a similar but somewhat more extended analysis for 1931, by industrial groups.

* The figures of this Section have been revised since published in the 1933 and the 1934-35 Year Books.

CHAPTER—XX. PRICES.*

For purposes of statistical analysis, commodity prices are usually divided into two principal groups, wholesale prices and retail prices. The term "wholesale" is not used literally, and included in this group primary producers', factory, and jobbers' quotations are often found, as well as actual wholesale prices. Markets in which this type of price is quoted are usually well organized, and frequently very sensitive. They are responsive to changing business and monetary conditions. Wholesale quotations are accordingly preferred, therefore, for sensitive index numbers of prices designed to reflect price reactions to business factors, and for more general index numbers to furnish a basis of measuring changes in the purchasing power of money. Although possessing admitted defects, general wholesale price index numbers are widely used for this latter purpose.

Retail prices represent more diffused markets, and are less sensitive. There is ordinarily a lag of several months between this type of quotation and its wholesale counterpart. Retail prices are important from a statistical point of view, however, because they indicate changes in living costs, and along with measurements of income, show fluctuations in the economic well-being of the community.

Section I.—Wholesale Prices of Commodities.

Subsection 1.—Historical Review of Canadian Prices.

Until recently the index number of wholesale prices in Canada did not go back beyond 1890. However, it has now been extended backward to 1870 on the 1913 base, the added quarter of a century including a very interesting period to students of price statistics. The average index numbers for every year since

*Revised by Herbert Marshall, B.A., F.S.S., Chief, Internal Trade Branch, Dominion Bureau of Statistics. This Branch compiles and publishes statistics on: Prices (wholesale, retail, securities, bond yields, services, exchange, cost of living), Retail and Wholesale Trade, Foreign Capital Investments in Canada and Canadian Investments Abroad, Balance of International Payments, and other related subjects. For a complete list of the publications of this Branch, the reader is referred to Chapter XXIX, Section I, under "Internal Trade".

Confederation are given in Table 1. In that table will be noted the high prices of 1867, following the close of the American Civil War and the Austro-Prussian War of 1866, and the tendency to declining prices in subsequent years. Prices went up again after the Franco-German War of 1871 and reached a high point in 1872 and 1873, but the crisis of the latter year resulted in a decline. A downward trend persisted fairly steadily throughout the 25 years from 1872 to 1897, when the gold supply of the world did not increase as rapidly as the supply of commodities. This gold shortage was accentuated by the demonetization of silver, which ceased to be legal tender with gold and was reduced to the level of token money by the leading nations. Relief came through the discoveries of gold in the Rand mines and the application of the cyanide process to low-grade ores. The result was a rapidly increasing world production of gold from about 1890 down to the outbreak of the Great War, with consequent rising general prices as the volume of the new gold became an appreciable part of the total stock. Thus prices increased from the low point of 75.6 in 1897 to 100 in 1913 and 102.3 in 1914. Afterwards, the Great War, both through the scarcity of commodities which it occasioned and the inflation of the currency which it produced, drove prices rapidly upward to a maximum of 243.5 in 1920, followed by a rapid drop to 152.0 in 1922. This was succeeded by a slight increase to 160.3 in 1925. The tendency from 1925 to 1929 was downward, although the period was one of increasing prosperity—a condition normally associated with rising prices.

¹Subject to revision.

Commencing in the autumn of 1929, a severe economic depression set in, which was accompanied by a drastic decline in wholesale prices. Its extent may be gauged from the drop of the wholesale price index from 153.7 in August, 1929, to 99.2 in February, 1933. A subsequent irregular rise carried this index upward to 111.6 in March, 1934, and since that time a condition of unusual stability has existed, and a firm underlying tendency has continued. The index for December, 1935 was 113.4.

Subsection 2.—The Index Number on a Post-War Base (1926).

The official Canadian index numbers of wholesale prices, along with the other price indexes computed by the Dominion Bureau of Statistics, were revised in 1928, when the list of commodities was increased from 236 to 502. The weighting system was extended to obtain a fairer distribution of importance among sub-groups, and the base was shifted to the year 1926. By that time most of the leading countries of the world had completed post-war currency reorganization, and a reasonable degree of price stability seemed to have been established. Commodities and weights were again revised at the beginning of 1934, bringing the total number of price series in the index up to 567.

The outstanding development in the field of prices since the base revision to 1926 has been the marked dispersion among various price groups between August, 1929, and the beginning of 1933. From 1926 to the latter part of 1929 a moderate decline occurred, but its effect upon the price structure was not great. Subsequent dislocation, however, was extremely serious, as may be observed from the following percentage declines of group prices between August, 1929, and February, 1933: Canadian farm products, 60.7 p.c.; raw and partly manufactured materials, 50.5 p.c.; fully and chiefly manufactured goods, 29.3 p.c.; and the average of all commodities at wholesale, 35.5 p.c. From March, 1933, to December, 1934, the movement of commodity prices has been broadly upward, and the advance for primary products considerably more rapid than that for manufactured products. The following index numbers show the relationship between the average of all commodities and specified commodity groups for December, 1935: all commodities, 100.0; Canadian farm products, 90.1; raw and partly manufactured materials, 92.7; and fully and chiefly manufactured materials, 100.4. This represents material improvement over conditions existing at the nadir of the depression, although it would appear that equilibrium has not been fully restored.

Section 2.—Retail Prices of Commodities.

Collection of data and calculation of index numbers of retail prices and the cost of living are carried out in co-operation by the Dominion Bureau of Statistics (Department of Trade and Commerce) and the Department of Labour. Resultant series of index numbers are computed from different points of view. The computations of the Labour Department are designed to show changes in the cost of living for workmen in cities. They are constructed from family budgets, principally a weekly family budget of staple foods, fuel and rent published monthly in the *Labour Gazette* since 1915 and annually since 1911; in addition, figures are included for clothing and sundry items and further data for fuel, light and rent. The Labour Department aims, by this method, to have a basis for computation that can be readily applied to the data for any given locality or district at any time, or for any class of labour—for instance, coal miners, who usually do not live in cities. Index

numbers of retail prices and costs of living issued by the Bureau are constructed from a more general point of view, having for their object the measurement of the general movement of such prices and costs in the Dominion as a whole, and being so calculated as to make comparisons possible with other general index numbers constructed on similar principles, for example, the index of wholesale prices. Calculated, as they are on the aggregative principle, *i.e.*, the total consumption of each commodity, the Bureau's index numbers afford an excellent measurement of changes in the average cost of living in the Dominion as distinguished from that of any particular class or section.

In the Bureau's index, 1926 is taken as the base year and is represented by 100 to bring it into conformity with other series of index numbers shown in this chapter. A description of the system of weighting of individual items, sub-groups and groups, and of the method of construction of this index number was given at pp. 812-818 of the 1931 Year Book. The Labour Department uses 1913 as 100 for both cost of living and wages index numbers. As will be seen from Table 7, the general cost of living index moved up from 78.7 in 1934 to 79.3 in 1935, continuing the upward trend apparent after July 1933. Higher prices for foods and rentals were chiefly responsible for the advance. Fuel declined from 87.7 to 86.8. The monthly index for living costs fluctuated during 1935 between 78.6 and 80.6. January and December group indexes were as follows: foods, 68.8 and 73.7; fuel, 88.8 and 87.2; rent, 80.3 and 82.6; clothing, 71.0 and 70.6; sundries, 92.1 and 92.5.

¹ Subject to revision.² Revised since the publication of the 1934-35 Year Book.

Table 9 shows the average prices of items included in the family budget in 1920 and in each of the years from 1926-35. These prices are weighted by the quantities used by the Department of Labour in computing their monthly family budget. Table 10 gives the group indexes by provinces. An examination of the tables reveals the course of the budget, consisting of food, fuel and lighting, and rent, over the period shown.

¹ Subject to revision.² Revised since the publication of the 1934-35 Year Book.**Section 3.—Index Numbers of Security Prices.**

Security prices have long been utilized in statistical measurements related to economic phenomena. They are extremely sensitive to changing business conditions, although this valuable characteristic is sometimes overshadowed by the fact that their movements may be greatly influenced by speculative interest very remotely associated with underlying economic conditions. Thus in 1928 and 1929, common stock prices advanced far beyond levels indicated by business profits and prospects.

The behaviour of Canadian common stock prices has been quite different from that of commodity prices since pre-war years. There was no advance in security markets during the Great War paralleling the pronounced inflation in commodity values. Between 1926 and 1929, however, when commodity prices were declining gradually, common stocks more than doubled in price. Both sets of prices recorded a sharp drop between 1929 and 1933, and both have shown recovery subsequently. This has been much more pronounced in the case of security prices.

11.—Investors Index Numbers of Common Stocks (on the 1926 Base), by Months, 1935.

NOTE.—Figures for 1933 and 1934 were published at pp. 874 and 875 of the 1934-35 Year Book; those for earlier years may be found in the corresponding table of earlier editions.

Investors Index Numbers of Common Stocks.—Monthly figures for the investors index numbers of common stocks, computed by the Dominion Bureau of Statistics on the basis 1926=100, have been carried back to 1913. The index falls into two parts, *viz.*, the period subsequent to 1926 and the earlier period. For the period 1913 to 1926 those stocks were used which were included in the index number previously issued on the 1913 base, *viz.*, 31 industrials, 10 public utilities and 9 banks, or 50 stocks in all. In the subsequent period the list of stocks included in the monthly index numbers was enlarged and now contains 89 industrial, 23 domestic utilities and 9 bank stocks. Despite the difference in the number of stocks included, the trend of stock prices is adequately shown throughout the whole period. The larger number of stocks included in the revised index number, though adding little to the accuracy of the general index, gives more complete information regarding various groups of stocks traded on Canadian exchanges.

After an uncertain start in the first quarter of 1935, common stock prices moved forward sharply to levels not hitherto touched during the current recovery movement. The first stage of this advance ended in the latter part of May, and was followed by over four months of rather aimless fluctuation, during which time price ranges generally were narrow. Early in October a second rise commenced which carried markets precipitately upward in a sustained movement, which did not lose momentum until the close of the year. The magnitude of these advances may be judged from the following price index numbers, based upon 87 industrial issues: December, 1934, 125.6; May, 1935, 144.4; and December, 1935, 178.2. Utilities failed to share in this rise, the December, 1934, index being 47.5 and that for the following December, 50.1. The behaviour of various groups has differed widely. Transportation and pulp and paper issues, for example, are still at low levels, the former group index being 28.6 for December, and the latter 15.9, despite some improvement during the year. Textiles, at 70.4 for December, averaged lower than the preceding December index of 74.3. Other groups, however, recorded substantial advances, as indicated by the following December, 1934-December, 1935, comparisons: Foods and Allied Products, 130.3 and 148.5; Beverages, 93.6 and 161.0; Iron and Steel, 119.8 and 125.0; Milling, 71.0 and 76.7; and miscellaneous issues, including International Nickel, 166.2 and 294.5. A general index for industrial and utility common stocks mounted from 86.2 in December, 1934, to 107.4 in December, 1935.

Weighted Index Numbers of Mining Stocks.—A weighted index number of mining stocks is computed by the Dominion Bureau of Statistics on the basis 1926=100. Mines of a semi-industrial nature, such as International Nickel and Consolidated Mining and Smelting Company, do not appear here, but are included in the Bureau's investors index of common industrial and public utility stocks.

In the mining section, gold stocks and base metals behaved quite differently during 1935. The gold group remained comparatively inactive for the first four months of the year, and from then until August lost ground. Subsequent recovery was spasmodic and an index for the group was 116.9 in December, materially below the preceding December level of 124.7. Base metals broke away in March from the inertia which characterized all security markets in the early months of the year. Their advance was interrupted in June and July, but gathered momentum again in the fall months. The December index was 201.7 as compared with 159.2 in May and 129.6 in December, 1934. A composite price index of mining stocks showed a moderate increase for the year, being 124.9 in December, 1934, and 133.6 in December, 1935.

Section 4.—Prices of Services.

A study of the prices of services sheds considerable light on the cost of living, as such services are a considerable item in the average family budget. Information with regard to the trend of street-car fares, of rates for manufactured and natural fuel-gas, of domestic electric light rates and of telephone charges was published at pp. 801–804 of the 1927–28 Year Book. Later information shows that the prices of manufactured fuel-gas have shown a downward tendency, the Dominion index number for 1934 being 94·2, as compared with 100·0 in 1926. The index number of the price of natural fuel-gas also declined from 100·0 in 1926 to 92·5 in 1930, rose again to 94·3 in 1932, then declined to 93·4 in 1934.

On the other hand, telephone rates have shown a distinct increase, the Dominion index number of domestic telephone rates having risen from 100·0 in 1926 to 107·4 in 1933 and 1934. Again, the business telephone rate has risen from 100·0 in 1926 to 118·5 in 1933 and 1934.

Additional information and details by provinces regarding the prices of services will be found at pp. 134–144 of the Annual Report on Prices and Price Indexes, 1913–34, issued by the Dominion Bureau of Statistics.

Hospital Charges.—In view of discussions of the increased cost entailed by illness and hospital treatment, special investigations on hospital charges are now made annually and the results are given as Dominion averages in the following table. In general, this shows that hospital charges in 1930 were 94 p.c. above the 1913 level. From 1930 to 1934 rates gradually declined to less than 89 p.c. above those in 1913. Operating room charges have not increased at the same rate as room charges, being only 55 p.c. above those in 1913, while the latter averaged 93 p.c. higher. The cost of maintaining patients in hospitals declined more than 11 p.c. between 1930 and 1934.

The detailed results of this investigation, including the statistics by provinces, are to be found at pp. 135–138 of the Annual Report on Prices and Price Indexes 1913–34, issued by the Dominion Bureau of Statistics.

Section 5.—Index Numbers of Bond Yields.*

Few economic statistics are of more significance than the net rates of return received on absolutely the safest securities, such as government bonds maturing on a fixed date. Interest rates naturally grade upward from the rates which the safest of possible borrowers has to pay, and from the fluctuations of that price an idea may be obtained as to the relation between the supply of, and the demand for, funds for investment.

The exceptional requirements of the war years turned the Dominion authorities to a field which had hitherto served mainly the needs of the provinces and municipalities. To the latter, therefore, it is necessary to go for earlier historical records of long-term bond yields in the internal market. Province of Ontario issues covering the years from 1900 to date are available in this field, and, as noted above, have been utilized in the construction of the Bureau's second long-term bond yield index. The relatively long period for which these records have been preserved make this series of considerable value. Since the War, however, the growing importance of Dominion financing in the domestic market has made it advisable to supplement the Ontario series with the Dominion index of bond yields shown in Table 14. The following remarks pertain to the Ontario bond yield movements since 1900.

The gradual rise in yields during the years prior to 1913 reflected the demand for capital and the upward tendency in interest rates which prevailed throughout the Dominion during this period. The only serious disturbance affecting the Ontario index in these years was the financial crisis of 1907-8. Following its termination, the rise in yields continued and accelerated rapidly in the early war years.

* The index of Ontario long-term bond yields formerly shown may be found in the Bureau's monthly bulletin "Prices and Price Indexes", obtainable from the Dominion Statistician.

A temporary reaction in the latter part of 1916 and the winter of 1917 was attributed to a marked reduction in offerings of municipal bonds which coincided with greater demand from the United States for Canadian securities. With the entry of the United States into the War in April, 1917, however, the American market was occupied with its own financial requirements, and Canadian yields again rose abruptly until the latter part of 1918. Then, with the pressure of war financing removed, and a plentiful supply of funds available for the purchase of the limited number of new issues, prices of bonds rose for a time, and, correspondingly, yields declined. This situation was quickly changed by an abrupt fall in the sterling rate at Montreal during the latter half of 1919, causing British holders of Canadian bonds to offer them on the Canadian market in large quantities, and for a time a state approaching demoralization existed. The severity of this condition is indicated by the Ontario yield index, which reached an all-time high of 134.7 in December, 1920. This compared with the war-time high of 126.3 in June, 1918, when the burden of war financing reached its peak. The "thawing" of commercial loans and lower call money rates paved the way for a broader bond market in 1921, and yields fell steadily until 1928, when they were on approximately the same levels as in 1913. The speculative boom of 1929 carried money rates and bond yields upward again until the fall months of that year. A subsequent recession was interrupted by the financial crisis of 1931 and 1932, but after June, 1932, yields declined until, in January, 1935, they were almost on a par with those at the beginning of the century. In the autumn months a short advance occurred, but yields were again declining as the year ended.

Section 6.—Wholesale Price Index Numbers of Principal Imports and Exports.

For a country such as Canada, whose economy is vitally affected by foreign trade, the importance of statistics relating to all phases of international commerce is readily apparent. Prices of imports and exports, although of less general concern than aggregate values, are nevertheless significant, and the examination of price fluctuations must form a part of any complete analysis of trade statistics. If trade value figures decline, it is important to know whether this represents a contraction of markets or simply a reduction in prices with volume maintained at former levels. Indexes of both volume and price are necessary for a complete knowledge of such facts. They are also useful to determine the influence of tariff policy upon trade movements. It is likewise of considerable importance that repercussions of international price fluctuations upon domestic price levels may be observed, and measurements made of their effect.

The calendar year import and export valuation indexes formerly published have been replaced by a new and more comprehensive series of wholesale price index numbers for principal imports and exports. These are available from 1913 to the present time on the base 1926 = 100. They compare closely with the corresponding valuation indexes and have been constructed so as to be directly comparable with other wholesale price index numbers which the Bureau publishes. From 1934 onward, the new series is available upon a monthly basis.

CHAPTER XXI.—PUBLIC FINANCE.

The following treatment of public finance includes an outline of Dominion, provincial and municipal finance in Canada, supported by the necessary detailed statistics, and closes with a brief discussion of the national wealth and national income of the Dominion as the basis of all public finance.

The great increase in Dominion expenditure since 1913 has, of course, been mainly due to the Great War and the burden of interest, pension charges, soldiers' civil re-establishment, etc., resulting from the War. Similar increases have also taken place during the same period in provincial and municipal expenditures. Thus, in their fiscal years ended 1934, the total ordinary expenditure of the nine Provincial Governments was \$217,701,776 as compared with \$53,826,219 in 1916, only 18 years before—an increase of almost 304 p.c. (The aggregate interest payments of Provincial Governments rose from \$7,817,844 in 1916 to \$67,184,943 in 1934.) Again, in recent years, between 1924 and 1933, the aggregate tax receipts of the municipalities of Ontario have increased from \$94,526,271 to \$116,920,000 (comparable figures are not available for earlier years)—an increase of nearly 24 p.c. In Quebec the ordinary receipts of municipalities increased from \$33,288,115 in 1915 to \$79,471,242 in 1933—an increase of 139 p.c. While taxation receipts in the Prairie Provinces and the Maritime Provinces, for those years for which comparable figures are available (see Table 26, pp. 858-859), do not show an upward trend, except in the case of Nova Scotia, it must be pointed out that the figures cover relatively recent years in the majority of cases, and in the Prairie Provinces a larger proportion of tax levies has remained uncollected. In British Columbia the taxes collected by the municipalities totalled \$9,382,099 in 1917 and \$17,521,554 in 1933.

Section 1.—Dominion Public Finance.*

Historical Sketch.—Both under the French *régime* and in the earlier part of the British, the territorial or casual revenues of Canada, consisting of certain seigniorial dues and the proceeds of the sale of government timber and land, were reserved to the Crown, while the right of levying taxes and of regulating the trade and commerce of the colony was, after 1763, deemed to be vested in the British Parliament.

By the Quebec Act of 1774, certain duties on spirits and molasses were imposed, to be expended by the Crown in order to provide a revenue "towards defraying the expenses of the administration of justice and the support of the civil government of the province". A little later, in 1778, the British Government, by the Declaratory Act (18 Geo. III, c. 12), renounced forever the right of taxing the colonies to provide Imperial revenue, but maintained its claim to impose duties considered necessary for the regulation of trade, the proceeds to go towards defraying the expenditures of the colonial administration. After the Constitutional Act of 1791, the customs duties remained under the control of the Imperial Government, their revenue, as well as the territorial revenue above mentioned, coming in to the Executive Administration independently of the Legislative Assembly and thus making the Executive power largely independent of the Legislature. In case these revenues proved insufficient, recourse could generally be had to the grant made by the Imperial Government for the support of the army. As time went on, however, the Crown

* This section has been revised under the direction of Dr. W. C. Clark, Deputy Minister, Department of Finance, with the exception of those parts dealing with war tax revenue and inland revenue on pp. 836 to 842, which were revised by the Department of National Revenue.

revenues became more and more inadequate to meet the increasing expenditure, while the wave of economy in the United Kingdom after 1815 made it impossible any longer to supplement these revenues from military sources. On the other hand, the purely provincial revenues collected under the authorization of the Provincial Legislature showed an increasing surplus. The power of the purse thus began to pass into the hands of the Legislatures; further, in 1831 the British Parliament passed an Act placing the customs duties at the disposal of the Legislatures.

Under the Act of Union, a consolidated revenue fund was established. All appropriation bills were required to originate in the Legislative Assembly, which was forbidden to pass any vote, resolution or bill involving the expenditure of public money unless the same had first been recommended by a written message of the Governor General. The British Government surrendered all control of the hereditary or casual revenues, which were thenceforth paid into the treasury of the province to be disposed of as its Legislature should direct.

At the interprovincial conference which took place prior to Confederation, it was decided that the new Dominion Government, which was to take over permanently, as its chief source of revenue, the customs and excise duties that had yielded the greater part of the revenues of the separate provinces (direct taxation being as unpopular in British North America as in other new countries), was also to assume the provincial debts and to provide out of Dominion revenues definite cash subsidies for the support of the Provincial Governments. (See Tables 15 and 16.) Until the Great War, which made other taxes necessary, the customs and excise revenue constituted the chief resource of the Dominion Government for general purposes—the Post Office revenue and the Government railway receipts, which are not taxes at all, being mainly or entirely absorbed by the expenses of administering these services. Indeed, for many years preceding the War, customs and excise duties, together with the revenue from the head tax on Chinese immigrants, were the only items of receipts which were classified as taxes by the Department of Finance. In the last pre-war fiscal year these two items aggregated \$126,143,275 out of total receipts on consolidated fund account amounting to \$163,174,395, the Post Office and Government railways furnishing between them \$26,348,847 of the remainder, offset, however, by expenditures on these two services amounting to \$27,757,196. Miscellaneous revenue, largely fees, amounted in that year to \$10,682,273—a comparatively small fraction of the total. As both customs and excise taxes were indirect, the average Canadian felt but little the pressure of taxation for Dominion purposes.

The War enormously increased the expenditure, and this increase had in the main to be met by loans. It is, however, a cardinal maxim of public finance that, where loans are contracted, sufficient new taxation should be imposed to meet the interest charge upon the loans and to provide a sinking fund for their ultimate extinction. This war taxation was begun in Canada within the first weeks of the War when, in the short war session of August, 1914, increases were made in the customs and excise duties on various commodities, including coffee, sugar, spirituous liquors and tobacco. In 1915 special additional duties of 5 p.c. *ad valorem* were imposed on commodities imported under the British preferential tariff and 7½ p.c. *ad valorem* on commodities imported under the intermediate and general tariffs, certain commodities being excepted. New internal taxes were also imposed on bank circulation, on the income of trust and loan companies, on insurance in other than life and marine companies, on telegrams and cablegrams, railway tickets, sleeping-car berths, etc., also on cheques, postal notes, money orders, letters and

post cards. In the following year, the business profits war tax (dropped in 1921)* was introduced, and in 1917 an income tax was imposed. In 1918 both of these taxes were increased and their application widened, and in 1919 the income tax was again increased, and still further augmented in 1920 by a surtax of 5 p.c. of the tax on incomes of \$5,000 and over; the sales tax was also introduced in that year. The cumulative result of these war taxes was that, in the fiscal year ended Mar. 31, 1921, customs duties were for the first time displaced from their position as the chief factor in Canadian revenue, the war taxes yielding \$168,385,327, as against the customs yield of \$163,266,804. This situation has remained true down to 1935 with the exception of the period between 1928 and 1931, when customs duties temporarily assumed their former position.

A more detailed sketch of the changes made in taxation from 1914 to 1926 will be found at pp. 755-759 of the 1926 Year Book, while similar information re tax changes in 1927 to 1929 was given at pp. 791-792 of the 1930 Year Book.

Recent Modifications in the System of Taxation.—In 1930, the general rate of the sales tax was reduced from 2 to 1 p.c. *Bona fide* co-operative organizations, government or like annuities (to the extent of \$5,000), and donations to churches, schools and hospitals (to a maximum of 10 p.c. of the net income of the taxpayer) were exempted from income tax, and the \$500 exemption for children was extended to cover certain dependent relatives suffering from mental or physical infirmity. In the customs tariff, the iron and steel schedules were completely revised, seasonal tariffs were adopted in respect of fruits and vegetables, duties were reduced under certain tariffs on tea, porcelain and chinaware, and meats, and increased on beans and butter, and so-called countervailing duties were imposed in respect of 16 commodities. The year was unusual in that it saw a second tariff revision, namely, that of the special session of September, when the anti-dumping clauses of the tariff were re-written and very many changes were made in rates of duty in the schedules. Increases were made *inter alia* on most agricultural products, on printed matter and manufactures of paper, on numerous commodities in the iron and steel group, on a wide range of textile items and on boots and shoes. Power was granted to the Governor in Council to prohibit the importation into Canada of goods exported to the Dominion from any country not a contracting party to the Treaty of Versailles.

In 1931, the general rate of the sales tax was increased from 1 to 4 p.c. Tax-free limit for cheques, receipts for money paid by banks, money orders, travellers cheques and Post Office money orders was reduced from \$10 to \$5 and postage stamps could be used on such documents in lieu of excise tax stamps. A special excise tax of 1 p.c. was imposed on importations. As regards the customs tariff, the 1931 session saw several further amendments of the administrative clauses of the tariff, the powers of the Governor in Council in the matter of the making of tariffs being widened to include the granting and withdrawing of rates more favourable than those of the British preferential tariff. Provision was made for penalty in the case of any person guilty of using the tariff to increase prices to consumers. Rates were altered on many items, the countervailing duties having been rescinded in entirety at the special session in September, 1930. Increases were made on fresh and canned meats, tea, field and garden seeds, prepared foods, containers, wall-boards, spray mixtures, building stone and granite, steel plate, motor vehicles, wood veneers, various textiles, coal and coke, leather and leather goods, and numerous

* Belated revenue from this tax has been collected in subsequent fiscal years down to 1933 (see Table 8, p. 837).

other commodities. The importation of second-hand motor vehicles, except under specified exceptional circumstances, was prohibited.

In April, 1932, the income tax was raised to 11 p.c. on corporations and joint-stock companies. In the case of personal incomes, the deduction of 20 p.c. formerly allowed from the tax payable under the established schedule of rates was repealed; a surcharge of 5 p.c. was made on net incomes of over \$5,000 and the exemptions were reduced from \$3,000 to \$2,400 for married persons, and from \$1,500 to \$1,200 for single persons. These changes applied to 1931 incomes. The sales tax was increased by 2 p.c. to 6 p.c., and the special excise tax on goods imported into Canada was raised from 1 p.c. to 3 p.c. The stamp tax on cheques, promissory notes, money orders, etc., was increased from 2 cents for each instrument over \$5, to 3 cents on amounts between \$5 and \$100, and 6 cents over \$100. Sleeping-car tickets were taxed 10 p.c. (minimum 25 cents) and parlour-car tickets 10 cents flat; there were also changes in the tax rates of cable and telegraphic messages and in the stock and bond transfer tax. No important tariff changes were made in view of arrangements for the then pending Imperial Economic Conference. (The tariff changes resulting from the Imperial Economic Conference and enacted at the fourth session of the 17th Parliament, which opened on Oct. 6, 1932, were briefly dealt with on pp. 485-486 of the 1933 Year Book.)

In 1933, the tax on corporation incomes was raised to 12½ p.c. and the \$2,000 exemption was removed. Where a consolidated statement of a company and its subsidiaries was compiled, the tax rate was set at 13½ p.c. On personal incomes the exemption was reduced from \$2,400 to \$2,000 for married and from \$1,200 to \$1,000 for single persons, and the exemption for dependent children was lowered from \$500 to \$400. The rate of taxation was increased according to a new schedule, the tax on the first \$1,000 of taxable income being 3 p.c. In certain cases, new taxes of 5 p.c. were imposed at the source on interest or dividends paid by Canadian debtors to non-residents (Dominion Government bonds were exempt from this tax), or to residents where such interest or dividend is paid in funds which are at a premium in relation to Canadian exchange. The sales tax remained at 6 p.c., though with a view to additional revenue an adjustment of the exempt and the partly exempt lists was made. Special excise taxes were levied as follows: 10 p.c. on cosmetics and toilet preparations; 5 p.c. on automobile tires and tubes; 2 cents per lb. on refined sugar; 25 cents per gallon on unfermented wort; and 50 cents per lb. on malt syrup and malt products. The provision of the Special War Revenue Act exempting from the stamp tax cheques, receipts to banks, money orders, travellers cheques, etc., not exceeding \$5 in value was repealed (except as regards creamery tickets or cheques). The stamp tax on postal notes was raised from 1 to 3 cents. Cigarette papers and tubes were taxed 2 cents per hundred leaves and 5 cents for 50 tubes, respectively. The excise duty on distilled spirits used in the manufacture of proprietary medicines, extracts, perfumes, etc., was made \$2.50 per proof gallon and an excise duty of \$1 per proof gallon was imposed on spirits distilled from juices of native fruits used by wine manufacturers in fortifying native wines.

In 1934, the tax changes proposed were of limited character. The chief changes were the reduction of the excise tax on sugar by 1 cent per lb. and the proposed imposition of a tax of 10 p.c. on gold, to be deducted from the proceeds of all gold deposited at the Mint for sale and to replace the revenue lost by the partial remission of the tax on sugar. It was pointed out that the recent prosperity of the gold-mining industry was due largely to circumstances entirely external to the industry, *viz.*, an increase in the selling price of gold by about 70 p.c. as a result of the chaotic condition of world currencies, the depreciation of our dollar in foreign exchanges and

the revaluation of gold in certain countries. As finally approved, the legislation provided for a levy of 25 p.c. on the premium value of gold in place of 10 p.c. on the total value, and it was further provided that the tax should not reduce the amount received by the depositor below \$30 per oz. Further, only those mines which had paid dividends continuously since 1933 were made liable to the premium tax on gold, thus relieving from taxation newly developed or low-grade properties which have not, until recently, been operating profitably. Placer gold was also exempted. Producers paying the tax were allowed some compensation in income tax adjustment and in exemption from the usual handling charge at the Mint. Excise duties were changed principally by consolidating the duty of 3 cents per lb. on malt and the gallonage tax of $12\frac{1}{2}$ cents on beer into a single excise duty of $7\frac{1}{2}$ cents per lb. on malt, the net result being a slight reduction in the rate of taxation to which beer was directly or indirectly subject, calculated on a gallonage basis. Reductions under the British preferential customs tariff were made in the case of certain items of major commercial importance, including jute yarns, wide steel plates, salt cake, crude oil not in its natural state, impregnated canvas, and yarns of artificial silk. Numerous chemical commodities of a less important nature were returned to the free list. Duties were imposed under the intermediate or general tariff schedules on peanut oil and were increased on certain ferro-alloys. Duties on jute twines were increased under all tariffs. On all imports under the British preferential tariff, the special excise tax was reduced from 3 to $1\frac{1}{2}$ p.c.

In 1935, several important changes were made in taxes. A surtax ranging from 2 p.c. to 10 p.c. was levied on investment income included in any income over \$5,000, all income in excess of \$14,000 being deemed for tax purposes as investment income. A tax on gifts was added to the income tax structure, with rates ranging from 2 p.c. on amounts up to \$25,000 to 10 p.c. on gifts exceeding one million dollars. An annual exemption of \$4,000 was provided for with specific exemptions applying to gifts to charitable or educational organizations or to governments. The corporation tax rate was raised by one p.c. to $13\frac{1}{2}$ p.c., and on consolidated returns to 15 p.c. Other numerous amendments to the income tax were made but chiefly of a technical nature. In view of expiry of the 25 p.c. tax on the premium value of gold on May 31, 1935, changes in regulations governing depletion allowances for income tax purposes were made, reducing such allowances to precious metal mines from 50 p.c. to 33 $\frac{1}{3}$ p.c. and to dividend recipients from 50 p.c. to 20 p.c. Under the Excise War Tax Act the only change was a reduction in duty from \$7 to \$4 per gallon on spirits. This was accompanied by a similar \$3 reduction in customs duty. Amendments to the Special War Revenue Act imposed a 20 p.c. tax on lighters, when combined with pencils, cigarette cases, etc., 10 p.c. with a 10 cent minimum. Additions to the sales tax exemption list included: advertising samples; seed cleaning machines; pit props and packwood for use in mines; casein, wood shavings and sawdust; peat-moss for agricultural use; and collections of coins, medals or stamps. Articles manufactured by the deaf and dumb were placed on the half-rate list. Tariff changes under British preference included the following additions to the free-list: aircraft; diesels and semi-diesel engines; chassis for electric and motor railway cars; mining locomotives; fire brick; chequered steel plates; melton cloth; unbound and paperbound books; brass band instruments; etc. Reductions under the same tariff were made and some of the more important of these apply to certain woollen and worsted fabrics, fire engines and linen fire hose, pressed steel railway wheels, leather belting, certain rugs and carpets, etc. Some reductions were made applying under all tariffs, e.g., on certain films, several gauges of wire fence, and various parts of motor trucks. The articles to which the limited number of increases in rates applied are of small importance.

Subsection 1.—The Current Balance Sheet of the Dominion.

A summary review of the current financial situation of the Dominion as at Mar. 31, 1934 and 1935, is given in the balance sheets shown as Table 1. This shows the figures for gross debt on the above dates to have been \$3,141,042,097 and \$3,205,956,369 respectively, partly offset by active assets aggregating \$411,063,956 and \$359,845,411, leaving the figures for net debt at \$2,729,978,141 and \$2,846,110,958 respectively.* Non-active assets, including such public works as canals and railways, also loans to railways, amounted in the aggregate to \$1,794,558,865 and \$1,803,304,906, leaving debit balances on Consolidated Fund Account on Mar. 31 of \$935,419,276 and \$1,042,806,052 respectively. The details of the various assets and liabilities are contained in the schedules accompanying the balance sheet and printed in the Public Accounts.

* The net debt on Mar. 31, 1925, was \$2,417,437,686; on Mar. 31, 1926, \$2,389,731,099; on Mar. 31, 1927, \$2,347,834,370; on Mar. 31, 1928, \$2,296,850,233; on Mar. 31, 1929, \$2,225,504,705; on Mar. 31, 1930, \$2,177,763,959; on Mar. 31, 1931, \$2,261,611,936; on Mar. 31, 1932, \$2,375,846,172; and on Mar. 31, 1933, \$2,596,480,826. See Table 19, p. 847.

¹ Indirect Liabilities—Guarantees given by the Dominion of Canada are listed on pp. 853-855.

Subsection 2.—Receipts and Disbursements.

The receipts of the Dominion Government on Consolidated Fund Account for the fiscal year ended Mar. 31, 1935, were \$358,474,760, an increase of \$34,412,760 as compared with the preceding year; besides these, special receipts amounted to \$3,397,169—a total of \$361,871,929 (Table 2). The regular expenditure on Consolidated Fund Account was \$354,368,220, while special expenditure, including net income deficit of the Canadian National Railways for 1934, amounted to \$114,869,211. There were also a net expenditure on capital account of \$7,027,008 and other net expenditures of \$1,740,308, including advances to Harbour Commissioners (non-active) \$1,241,733. Thus, the total disbursements, inclusive of these and other advances, amounted to \$478,004,747. There was an increase of \$116,132,818 in the net debt (gross debt less active assets) during the year. (See Table 23 for interest-bearing debt.)

Detailed statistics of receipts and disbursements are contained in Tables 2 and 3. Tables 4 and 5 are historical tables giving the figures of the main items of Dominion receipts and expenditure since Confederation, while Table 6 shows the per capita receipts and expenditure for these years, calculated on census and estimated populations. Per capita receipts and expenditures are given by principal items in Table 7.

The classifications of items in Tables 2, 3 and 7 have, in the past, followed those of earlier editions of the Year Book in order to preserve comparability, and no recognition has been made of the adjustment in classification made over the years in the Public Accounts. It is felt that the time has come to readjust those items which in the course of time have lost their importance and to show separately, and in their proper perspective, the several new and important items which have appeared in late years. The classification given below is in accordance with the Public Accounts, the figures being comparable for the five years shown. The regroupings effected do not constitute major changes and have not affected the comparability of totals or of significant items.

2.—Details of Revenue Receipts, fiscal years ended Mar. 31, 1931-35.

NOTE.—See text above *re* adjustment of 'stub' classification as compared with former editions of the Year Book.

¹ Certain charges of management shown separately in former Year Books are not now separable and are included with "General Expenditures". ² See footnote 1 to Table 2. ³ Included in Ordinary Expenditures—Maritime Freight Rates Act, 1931, \$6,712,239; 1932, \$6,631,856; 1933, \$8,716,751.

⁴ Corresponding figures for operations in the years 1930 and 1931 were \$28,425,000 and \$52,256,000 respectively. The losses in 1930 and 1931 were financed by loans and/or guarantee of securities. Government loans of \$41,121,000 in respect of 1931 operations appear in the above statement under Loans and Advances, Non-active, for the year 1933. ⁵ Canadian National Railways—Loans of 1931-32, \$41,121,216; sundry Harbour Commissions—Advances prior to 1932-33, \$21,817,023.

4.—Principal Items of Dominion Expenditure, 1868-1935 (continued on pages 832-833).

NOTE.—From 1868 to 1906, inclusive, the fiscal years ended on June 30; after 1906, on Mar. 31.

¹ Expenditure (Collection of Revenue). After 1919 railway receipts were applied directly to railway expenditure; this accounts for the great decline in the figures in 1920 and subsequent years. ² The expenditures shown do not include moneys spent for Civil Government account and miscellaneous expenditures and to this extent do not correspond with the Post Office figures shown in Table 3 for the years 1931-35. ³ Includes various non-enumerated items. ⁴ Nine months. ⁵ See footnote 1, to Table 2, p. 829.

4.—Principal Items of Dominion

Fiscal Year.	Capital Expenditures.								
	Canals.	Canadian Pacific Railway.	Debts Allowed to Provinces.	Dominion Lands.	Inter-colonial and Connected Railways, Miscellaneous.	Public Works, Miscellaneous.	Hudson Bay Railway.	National Transcontinental Railway, Including Quebec Bridge.	Prince Edward Island Railway. ⁶

¹ For detailed statements see Table 8, p. 837.
 for most earlier years and special receipts since 1921.
 publication of the 1934-35 Year Book.

² Includes various smaller items of revenue receipts

³ Nine months.

⁴ Revised since the

6.—Per Capita Figures of Taxation, Total Revenue Receipts, Expenditure on Consolidated Fund Account and Total Expenditure, 1868-1935.

NOTE.—The years marked with an asterisk (*) are those of the censuses, April 2, 1871; April 4, 1881; April 6, 1891; April 1, 1901; June 1, 1911, 1921 and 1931. For the intercensal years the populations are estimated as at June 1 (see p. 141 for estimates of population). The fiscal period of 1907 is nine months ended Mar. 31. See the tables on pp. 831-834 for the figures of revenue and expenditure on which this table is based.

Fiscal Year.	Per Capita Revenue from Taxation.	Per Capita Total Revenue Receipts.	Per Capita Expenditure on Consolidated Fund Acct.	Per Capita Total Disbursements.	Fiscal Year.	Per Capita Revenue from Taxation.	Per Capita Total Revenue Receipts.	Per Capita Expenditure on Consolidated Fund Acct.	Per Capita Total Disbursements.

Subsection 3.—War Tax Revenue.

An account of the various war taxes, imposed in 1915 and subsequently, has already been given on pp. 823-824 in the introduction to this section. For convenience of reference, the amounts received from these taxes since the beginning are segregated and the totals paid into the Receiver General are given in Table 8. The taxes imposed on banks, trust and loan companies and insurance companies are collected by the Department of Finance. The excise war taxes, the business profits war tax and the income war tax are collected by the Department of National Revenue, formerly the Customs and Excise Department. The amounts of excise

war taxes collected from different sources in the past six fiscal years are given in Table 9, while Table 10 contains the details by provinces for the latest year. (See also Tables 41 to 46 of this chapter.)

8.—War Tax Revenue Received by the Receiver General, fiscal years ended Mar. 31, 1915-35.

Subsection 4.—Inland Revenue.

Under the Inland Revenue Act (R.S.C., 1903, c. 5), the Department of Inland Revenue had the control and management of standard weights and measures and of the collection of excise duties, of stamp duties, internal taxes, bridge and ferry tolls and rents until 1918. It administered the statutes which dealt with the

adulteration of food and other articles, electricity and gas inspection, patent medicines, petroleum, naphtha and the analysis of fertilizers and feeding stuffs. This Department also established the food standards which were put into force by Orders in Council under the authority of Section 26 of the Adulteration Act. Later the administration of the Adulteration of Food and the Proprietary and Patent Medicine Acts was transferred to the Department of Health, that of the Commercial Feeding Stuff and Fertilizers Acts to the Department of Agriculture, and that of the Acts relating to weights and measures and the inspection of gas, electric light and water meters to the Department of Trade and Commerce. By Order in Council of May 18, 1918, the Departments of Customs and of Inland Revenue were combined as the Department of Customs and Inland Revenue, under one Minister of the Crown. On June 4, 1921, the Department of Customs and Inland Revenue was consolidated as the Department of Customs and Excise (11-12 George V, c. 26). As from April 1, 1927, the name of this Department, which collects the great bulk of the revenue of the Dominion, was changed to Department of National Revenue by authority of 17 Geo. V, c. 34. This Act provides for three chief departmental officers—the Commissioner of Customs, the Commissioner of Excise and the Commissioner of Income Tax, while an Assistant Commissioner of Customs may also be appointed.

In the fiscal year ended Mar. 31, 1935, the gross amount of customs duties collected by the Department was \$84,627,473, as compared with \$73,154,472 in 1934, \$77,271,965 in 1933, \$113,997,851 in 1932 and \$149,250,992 in 1931. The total of excise duties and excise war taxes collected in the fiscal year ended Mar. 31, 1935 was \$158,576,297, as compared with \$145,176,663 in 1934, \$123,478,841 in 1933, \$109,586,366 in 1932, and \$93,986,975 in 1931.* The total of income tax collected in the fiscal year ended Mar. 31, 1935, was \$66,808,066, as compared with \$61,399,172 in 1934. While the income tax and the business profits war tax (see Table 8) are collected by the Commissioner of Income Tax, the other main branches of inland revenue—the excise duties and excise war taxes—are collected by the Commissioner of Excise.

Canadian Excise Tariff.—The following is a statement of the Canadian excise tariff, as existing at Jan. 1, 1936:—

1. Spirits distilled in Canada, per proof gal. . . \$ 4.00	3. Beer or Malt Liquor— <i>concluded</i> .
Except Spirits as follows:—	(b) Imported (in addition to any of the duties otherwise imposed), per gal. 0.07
(a) Used in a bonded manufactory for medicines, extracts, etc., per proof gal. . . 2.50	4. Malt:—
(b) Used in a bonded manufactory for perfumes, per proof gal. 1.50	(a) Produced in Canada and screened, per lb. 0.08
(c) Used in a bonded manufactory for vinegar, per proof gal. 0.27	(b) Imported, per lb. 0.08
(d) Used for chemical compositions approved by Governor in Council, per proof gal. 0.15	(c) Imported, crushed or ground, per lb. . . 0.08
(e) Sold to licensed druggists for pharmaceutical preparations, per proof gal. . . 2.50	5. Malt Syrup:—
(f) Distilled from native fruits and used by a licensed wine manufacturer for fortification of native wines, per proof gal. 1.00	(a) Produced in Canada, per lb. 0.10
2. Spirits imported (in addition to any of the duties otherwise imposed), per proof gal. 0.30	(b) Imported, per lb. 0.16
3. Beer or Malt Liquor:—	6. Tobacco, Cigars and Cigarettes:—
(a) Brewed in whole or part from any substance other than malt, per gal. 0.22	(a) Manufactured tobacco, per lb. 0.20
	(b) Cigarettes weighing not more than 3 lb. per M, per M. 4.00
	(c) Cigarettes, weighing more than 3 lb. per M, per M. 11.00
	(d) Imported leaf tobacco, unstemmed, per lb. 0.40
	(e) Imported leaf tobacco, stemmed, per lb. 0.60
	(f) Cigars, per M. 3.00

*Table 9, p. 837, gives the details of the revenues from individual taxes for the years 1930-35 and Table 10, p. 838, gives the revenues from individual taxes by provinces for 1935.

A drawback of 99 p.c. of the duty may be granted when domestic spirits, testing not less than 50 p.c. over proof, are delivered in limited quantities to universities, scientific or research laboratories, or to any *bona fide* public hospital for medicinal purposes only.

Revenue from Excise Duties.—The inland revenue collected from excise duties, other than war taxes, is shown by items for the past six fiscal years in Table 11. Tobacco, including cigarettes, is shown by the figures to have supplied about 63 p.c. of the revenue from excise duties in the fiscal year 1935.

11.—Details of Excise Duties Collected, fiscal years ended Mar. 31, 1930-35.

(As shown in the Report of the Commissioner of Excise.)

¹ Revised since the publication of the 1934-35 Year Book.

It will be seen from Table 13 that the quantity of spirits manufactured has dropped from 16,813,433 proof gallons in 1930 to 4,321,457 proof gallons in 1935 and the duties collected ex-manufactory on deficiencies etc., plus licence fees has fallen from \$10,563 to \$5,559.

Alcohol and Tobacco Taken out of Bond.—In Table 14 are shown the quantities of spirits, malt liquor, malt, cigars, cigarettes and tobacco taken out of bond for consumption in the fiscal years ended 1911 to 1935.

Between 1920 and 1935 the number of cigars taken out of bond fell from 270,089,761 to 125,519,841 and the quantity of tobacco, which was 23,049,012 lb. in 1920, had fallen to 20,870,651 lb. by 1925, since when there was a steady increase to 22,891,129 lb. in 1935. The consumption of cigarettes increased from 2,440,982,912 in 1920 to 5,082,314,590 in 1931 but declined to 4,401,628,765 in 1932, and 3,728,832,089 in 1933, rising again to 4,342,728,835 in 1934 and 4,958,250,855 in 1935.

Between 1923 and 1929 spirits taken out of bond (exclusive of imported spirits) rose from 729,678 gal. to 2,016,802 gal., but there was a decided and steady drop to 769,527 gal. for 1933. Since 1933 fairly substantial increases have been shown. Malt liquor shows an increase from 36,789,195 gal. in 1923 to 65,719,129 gal. in 1929 and a decrease to 51,703,781 in 1935.

14.—Quantities of Spirits, Malt Liquor, Malt and Tobacco Taken out of Bond for Consumption, fiscal years ended Mar. 31, 1911-35.

(For years prior to 1900 see 1916-17 Year Book, p. 528, and for 1901-10 see 1933 Year Book, p. 840.)

¹ Exclusive of imported spirits but inclusive of non-potable spirits down to 1921.

² Including snuff.

Subsection 5.—Subsidies and Loans to Provinces.

Subsidies.—Tables 15 and 16 show the subsidies and other payments made by the Dominion to each of the Provincial Governments for the individual fiscal years ended from 1930 to 1935 (Table 15), and the totals paid from Confederation to 1935 (Table 16). The provincial subsidies payable by the Dominion Government were originally settled by the British North America Act, 1867 (30 and 31 Vict., c.3, s.118), but were revised by the British North America Act, 1907 (7 Edw. VII. c.11). Under the revised settlement each Provincial Government receives: (a) a fixed grant according to population and (b) a grant at the rate of 80 cents per head of the population up to 2,500,000, and at the rate of 60 cents per head of so much of the population as exceeds that number. The province of British Columbia received an additional grant of \$100,000 per annum for a period of 10 years from 1907.* An additional grant of \$100,000 per annum is payable to Prince Edward Island under an Act of 1912 (2 Geo. V, c.42), and the payments to Manitoba were revised by the Extension of Boundaries (Manitoba) Act, 1912 (2 Geo. V, c.32); in 1931 an amount of \$4,822,843 was paid as a readjustment in lieu of public lands from 1870 to 1908 as provided for in the Manitoba Natural Resources Act, 1930. Other payments to the Provincial Governments by the Dominion Government consist of special grants, such as compensation for lands, allowances for buildings, allowances in lieu of debt, allowances pending reconsideration of subsidies, etc.

*See Canada Year Book, 1907, pp. xxxiii-iv.

¹ Compensation for lands and allowances for buildings. ² Allowances in lieu of debt. ³ Does not include special grants paid to Maritime Provinces pending reconsideration of provincial subsidies.

Loans to Provinces.—All of the provincial loans recently advanced by the Dominion have been made to the western provinces under the authority of relief legislation beginning with the Unemployment and Farm Relief Act, 1931, and these have been secured by treasury bills of the respective provinces, bearing interest since July 1, 1934, at 4½ p.c. The sum total of such loans outstanding as at Mar. 31, 1935, was \$74,223,015.

In addition to these, however, there were also outstanding at that date \$9,771,188 of housing loans, being the balance of loans made to the provinces in the years following the Great War, on the authority of Orders in Council passed in 1918 and 1919, and of the Appropriation Acts of 1920 and 1921. Upon these loans the province of Ontario repaid the whole of the advances in 1928 and the other provinces concerned have in most cases reduced their indebtedness from year to year.

Table 17 gives details of the loans made by the Dominion Government to the provinces concerned on account of relief expenditures, and Table 18 shows the amounts outstanding as at Mar. 31 of each of the years 1920-35, on account of loans made for housing.

Subsection 6.—National Debt.

The gross national debt of Canada on Mar. 31, 1914, was \$544,391,369, as against assets of \$208,394,519, leaving a net debt of \$335,996,850. Comparatively small as was this debt, it was a debt incurred almost altogether either for public works of general utility which, like the Intercolonial and transcontinental railways and the canal system, remained assets, though perhaps not realizable assets of the nation, or was expended as subsidies to enterprises, which, like the Canadian Pacific Railway, though not government-owned, assisted greatly in extending the area of settlement as well as the productive and, therefore, the taxable capacity of the country. Broadly speaking, it was a debt incurred for productive purposes. Also, it was mainly held outside the country, the principal of the Dominion funded debt payable in London being \$302,842,485 on Mar. 31, 1914, as against only \$717,453 payable in Canada.

The great changes brought about in our national debt during the 20 years from 1914 to 1935 have been: (1) the enormous increase in net debt from \$335,996,850 to \$2,846,110,958; (2) the gross debt, having been largely incurred for war purposes, is not represented by corresponding assets; (3) the debt is now mainly held in Canada, \$2,268,700,965 being payable in Canada at Mar. 31, 1935.

Recent Funded Debt Operations.—Conversions and other national debt operations carried out between 1931 and 1934 are dealt with at pp. 906–907 of the 1934–35 Year Book and those between 1914 and 1930 at pp. 842–843 of the 1933 Year Book. The following review carries the summary down to Mar. 31, 1936.

On Mar. 1, 1935, 3 p.c. 5-year bonds were issued in the amount of \$115,013,637 and these were transferred to the Bank of Canada on Mar. 11, 1935, the date the Bank commenced business, in accordance with Section 25 (3) of the Bank of Canada Act, which provided for transfer to the Bank of Dominion securities equal to the amount of Dominion notes outstanding at that date which were not covered by gold and silver held by the Bank for that purpose.

An issue of \$35,000,000 of treasury bills was also sold to the Bank of Canada on Mar. 11, 1935, maturing in 3 months, at a cost of $1\frac{1}{4}$ p.c. The proceeds were used to retire an equal amount of treasury bills held by the banks in connection with advances under the Finance Act, which was repealed on the date the Bank of Canada commenced business.

On June 1, 1935, a \$60,000,000 domestic issue was sold in two maturities as follows: maturing June 1, 1943, bearing $2\frac{1}{2}$ p.c. interest, \$20,000,000; maturing June 1, 1955, bearing 3 p.c. interest, \$40,000,000. The 20-year maturity is callable on or after June 1, 1950, and was sold at a price of 98.50 and interest, to yield 3.10 p.c., while the 8-year bonds were priced at 99.50 and interest to yield 2.57 p.c. There was no conversion privilege in connection with this issue.

On July 1, 1935, the maturing issue of 5 p.c. School Lands debenture stock amounting to \$33,293,471 was renewed at the same interest rate for a period of one year, with the provinces of Manitoba, Saskatchewan and Alberta.

On Aug. 15, 1935, an issue of \$76,000,000 10-year $2\frac{1}{2}$ p.c. bonds was sold to the public, through the New York market, at a price of 97.75 and interest. The proceeds of this issue were used to retire maturing issues, both direct and guaranteed. This was the first public offering in the United States by the Dominion Government since the United States Securities Act of 1933 came into effect.

In September and October, 1935, an issue of \$135,000,000 of bonds was sold direct to the Canadian banks in two maturities as follows: $1\frac{1}{2}$ p.c. issue of Sept. 15, 1935, maturing Sept. 15, 1936, \$45,000,000; 2 p.c. issue of Oct. 15, 1935, maturing

Oct. 15, 1938, \$90,000,000. The price for the 1-year issue was 99·61 and interest to yield 1·90 p.c. and for the 3-year issue 99·2175 and interest to yield 2·275 p.c. This issue was largely used to retire maturing obligations.

On Nov. 15, 1935, a further internal loan for \$75,000,000 was floated, also in two maturities. \$20,000,000 of 4-year 2 p.c. bonds maturing Nov. 15, 1939, were sold at a price of 99·43 and interest to yield 2·15 p.c., while \$55,000,000 of 3 p.c. bonds, maturing June 1, 1955, were sold at a price of 98·75 and interest to yield 3·08 p.c. The bonds sold readily, the loan being oversubscribed by more than 100 p.c. on the offering date.

During the latter part of 1935 there were two short-term issues, of promissory notes sold to banking groups in New York. Each banking credit was for \$20,000,000, the first dated Sept. 1, 1935, the second dated Dec. 1, 1935, and both maturing Feb. 1, 1936. Each bore the same interest rate of $\frac{3}{4}$ of 1 p.c. per annum.

On Jan. 1, 1936, a \$40,000,000 3-year 2 p.c. note issue was sold in New York, the proceeds of which were used to repay the promissory notes referred to in the previous paragraph.

Again, on Jan. 15, 1936, the New York market took up a \$48,000,000 25-year $3\frac{1}{4}$ p.c. bond issue, which is callable on and after Jan. 15, 1956, five years before its maturity date. The proceeds of this loan were used entirely to repay maturing loans, principally \$40,000,000 of $4\frac{1}{2}$ p.c. bonds issued in 1926.

In the past two years a market for short-term treasury bills has been built up in Canada which has proven highly satisfactory. Each issue has, with two exceptions (where the bills were sold direct to the Bank of Canada), been offered for public tender. Starting with the first issue of Mar. 1, 1934, when 3-months bills were sold at an average interest cost of 2·85 p.c., the price has gradually risen till the last issue of Feb. 15, 1936, which showed an average interest cost of only 1·055 p.c. Following is a complete list of treasury bills sold by this method:

TREASURY BILLS SOLD IN CANADA, MAR. 1, 1934, TO FEB. 15, 1936.

Statistics of National Debt.—Summary statistics of the national debt of Canada as at Confederation and at the end of each fiscal year thereafter down to 1935 are given in Table 19, while details of the active assets and of the gross liabilities as at the end of the past twelve fiscal years are given in Tables 20 and 21 respectively. Further, details of the funded debt, showing the various issues of bonds, the annual interest charges and the place at which principal and interest are payable, are given as at Mar. 31, 1935, in Table 22. From this it appears that the total payable in London at that date was \$409,867,597, in New York \$292,737,987, in Canada \$2,268,700,965 and in Canada and New York \$90,661,100. Thus three-quarters of the funded debt of the Dominion was payable within the Dominion itself, and as a consequence the interest payable outside of Canada was a comparatively small item.

The Interest-Bearing Debt of Canada.—Something of the extent of the burden of national debt being carried by the Canadian people may be realized from the fact that, for the fiscal year ended Mar. 31, 1934, the interest charges on the total interest-bearing debt amounted to about 54 p.c. of the total receipts from taxation and over 44 p.c. of the receipts from all sources, although the situation in this respect was somewhat improved in 1935.

Before the Great War, interest rates were comparatively moderate, but the unprecedented expenditure of the world's capital in that gigantic struggle led, in all the participating countries, to the raising of enormous loans at comparatively high rates of interest, which in many cases still have to be paid until refunding becomes possible under the terms of the contracts made between the nations and their creditors. Thus, in Canada, the average rate of interest paid upon the direct interest-bearing obligations of the nation, which was only 3.368 p.c. at Mar. 31, 1913, rose to 5.164 p.c. at Mar. 31, 1922, and fell gradually to 4.136 p.c. at Mar. 31, 1935. Details of the interest-bearing debt of Canada, and the interest charges thereon, as at Mar. 31 of the years from 1913 to 1935, are given in Table 23.

¹ The total of interest-bearing debt, as here given, includes bonds purchased and held by the Treasury for sinking funds.

² Revised since the publication of the 1934-35 Year Book.

Guaranteed Debt of the Dominion.—Besides the direct debt of the Dominion, already dealt with, there are also large indirect obligations, arising mainly out of the guarantee of securities, by the Dominion, of the railway lines which now form the Canadian National Railways, and the subsequent extensions thereof. Together with these are other smaller indirect obligations, originating in the Government's guarantees of the bonds of the Canadian National Steamship services and of the bonds of its Harbour Commissions, issued in the main for harbour improvements. Since 1932 guarantees of certain bank loans have been made under the various Relief Acts. With the commencement of business of the Bank of Canada on Mar. 11, 1935, the guarantee authorized, by Section 27 (6) of the Bank of Canada Act, of the

deposit required to be maintained by every chartered bank in the Bank of Canada, came into force. This guarantee will require to be implemented "in the event of the property and assets of the Bank being insufficient to pay its liabilities, and if the Bank suspends payment of any of its liabilities". Statistics showing the growth of these indirect obligations since 1914 are given in Table 24, while Table 25 shows the obligations as they existed on Mar. 31, 1935.

Section 2.—Provincial Public Finance.*

Provincial Governments in Canada are in the position, under Section 118 of the British North America Act, 1867 (30 and 31 Vict., c. 3), and the British North America Act, 1907 (7 Edw. VII, c. 11), of having a considerable assured income in subsidies from the Dominion Treasury. Details of these payments are given for recent years in Tables 15 and 16 of this chapter. In addition, through their retention of ownership of their lands, minerals and other natural resources, the provinces which, by the voluntary action of their previously existing Governments entered Confederation, raise considerable revenues through land sales, sales of timber, mining royalties, leases of water powers, etc., while the Prairie Provinces formerly received from the Dominion special grants in lieu of land revenues. However, under legislation of 1930 whereby the Prairie Provinces were given control of their natural resources, all the provinces were placed on an equal footing in the administration of natural resources within their boundaries and as regards revenues accruing therefrom. Further, under Section 92 of the British North America Act, Provincial Legislatures are given authority to impose direct taxation within the province for provincial purposes and to borrow money on the sole credit of the province.

Prior to the opening of the present century, provincial receipts and expenditures were generally moderate, as may be seen, both for individual provinces and for the provinces collectively, from Tables 28 and 29. The demand, more especially in Ontario and the West, for increased services from Governments, particularly in respect of education, sanitation, and public ownership and operation of public utilities, and the performance of these functions, necessitated increased revenues, which had in the main to be raised by taxation. Among the chief methods of taxation to be employed has been the taxation of corporations and estates, succession duties showing a considerably increased yield even within the comparatively short period of eighteen years from 1916 to 1934 covered by the statements compiled by the Finance Branch of the Bureau of Statistics.† The fact that provincial govern-

*Revised by Col. J. R. Munro, Chief of the Finance Branch of the Dominion Bureau of Statistics. This Branch issues detailed statements on Provincial Finance which may be obtained from the Dominion Statistician. For a list of these publications see Section I of Chapter XXIX.

†The succession duties collected by the provinces in 1934 amounted in the aggregate to \$11,019,033, as compared with \$1,020,972 as recently as 1904, or an increase of more than 12-fold in 29 years. The aggregate revenue raised by taxation of corporations, land, income and miscellaneous (exclusive of gasoline taxes, succession duties and amusement taxes), increased from \$7,217,548 in 1916 to \$33,618,772 in 1934, an increase of 365 p.c. in 18 years.

ment is cheaper per head in the eastern provinces is evident from Table 29, which gives the per capita ordinary revenue and expenditure for various fiscal years from 1871 to 1934. This, however, is not to be taken as evidence that the larger services rendered to the public in the provinces west of the Ottawa river, are not worth what is being paid for them.

For the half-century subsequent to Confederation, the provincial accounts, published by each Government according to its own system of accounting, were quite incomparable as among the provinces, a fact much regretted by students of provincial public finance. Upon the creation of the Dominion Bureau of Statistics in 1918, its Finance Branch undertook the work of placing the various provincial public accounts on a comparable basis, correlating, for example, the revenue derived from succession duties, taxation of corporations, sales of public lands, royalties on forest, mineral and fisheries products, as well as the expenditures on such services as agriculture, civil government, education and public works. As the result of the Bureau's exhaustive analysis of the provincial public accounts, a summary statement of the ordinary receipts and expenditures of the Provincial Governments appeared for the first time in the 1919 Year Book. The various items of receipts and expenditures were classified under appropriate headings and a uniform terminology was adopted. From these statements it is possible to ascertain the amounts received and expended in each year under the respective headings for each province, as well as for the provinces collectively. The figures for the years 1916 to 1920 will be found on pp. 680-685 of the 1921 Year Book, those for 1921 on pp. 786-791 of the 1922-23 Year Book and those for 1922 to 1926 on pp. 836-841 of the 1927-28 Year Book.

The Bureau now makes more extensive analyses of the finances of the provinces, including capital and trust accounts as well as ordinary revenue and expenditure. These analyses are based on a uniform classification adopted at a conference held in 1933 between provincial treasury officials and the Dominion Bureau of Statistics.

The following data, in so far as 1934 is concerned, are given on the new uniform basis. It is to be regretted that detailed statements for revenues and expenditures for New Brunswick, 1934, had not been furnished by the Comptroller General's office up to the time of going to press.

Subsection 1.—Provincial Revenues and Expenditures.

Ordinary Revenues and Expenditures.—The total ordinary revenues and expenditures of the provinces for their individual fiscal years are shown in Table 28, pp. 862-863, for the census years 1871-1911 and for each year from 1916-33. Table 26, shows detailed ordinary revenues and Table 27, detailed ordinary expenditures for the latest year, 1934. While revenues have grown very rapidly over the period covered in Table 28, expenditures have more than kept pace. Since 1916, *i.e.*, in the short space of 18 years, while total revenues of all provinces show an increase of 251 p.c., ordinary expenditures have increased by 304 p.c.

Considering individual provinces, the largest revenue for 1934 is that of Ontario, \$61,426,934, Quebec being next with \$31,018,344, and British Columbia third with \$22,618,367. As regards total expenditure for the same year, that of Ontario was highest with \$92,026,185, Quebec second with \$36,612,816, and British Columbia third with \$22,992,344. In 1934 British Columbia raised the largest revenue per head of population, *viz.*, \$31.20, while Quebec has the lowest, \$10.26.

The Growth of Provincial Taxation.—Whereas in earlier years the Dominion subsidies, together with the revenues arising out of the natural resources of the provinces and from fees for specific services rendered to the citizens, nearly sufficed to cover the whole expenses of government and rendered a resort to taxation for provincial purposes practically unnecessary in most of the provinces, the great increase in the functions of government since the commencement of the present century has put an end to this state of affairs. The aggregate amount of taxation for provincial purposes in the fiscal years prior to 1916 is unfortunately not available. Since that time provincial taxation has increased, according to the recently amended classification made in the Dominion Bureau of Statistics, from \$12,521,816 in 1916 to \$73,553,567 in 1934, exclusive of motor vehicle licences, liquor traffic profits, and other licences and permits, etc., an almost six-fold increase in 18 years.

The increase in the use of automobiles, both for commercial purposes and pleasure, is clearly demonstrated by the growing revenues from licences and permits issued by the Provincial Governments. In 1921 the total revenue of all provinces from automobile licensing amounted to \$7,857,751. It has since fluctuated considerably, reaching \$21,735,827 in 1929 but declining to \$19,952,575 in 1931. The revenue from this source in 1934 was \$20,840,513.

The growth of revenue from the gasoline tax still further demonstrates the increasing use of motor vehicles. In 1923 Manitoba and Alberta were the only provinces showing a gasoline-tax revenue, the total being \$280,404. In 1924 the five provinces of Prince Edward Island, Quebec, Manitoba, Alberta and British Columbia collected gasoline-tax revenue to the amount of \$559,543, while in 1925 the same provinces, with Ontario added, collected \$3,521,388. In 1926 all provinces, except Saskatchewan, collected gasoline taxes to the amount of \$6,104,716, in 1927 to \$7,615,907 and in 1928 to \$9,151,735; thereafter, gasoline taxes were collected in all provinces and amounted to \$17,237,017 in 1929, \$20,956,590 in 1930, \$23,859,067 in 1931, \$24,987,273 in 1932, \$25,931,480 in 1933, and in 1934 to \$26,812,275. The higher yields in recent years, however, were partly due to higher rates of taxation.

The provincial revenues from the liquor traffic increased considerably between 1925 and 1930, but subsequently declined until 1934. The adoption of government control of the sale of liquor in one province after another, until now it exists in all but Prince Edward Island, where prohibition is still in force, has resulted in trading profits, licensing revenues, and permit fees, all of which have swelled the provincial revenues. Prior to the adoption of government control such revenues were not available to the provinces. In 1925 the total revenue collected by all provinces from the liquor traffic was \$8,964,824; in 1926 it was \$11,609,392, increasing to \$16,793,656 in 1927. In 1928, it amounted to \$22,755,212, in 1929 to \$27,599,687, in 1930 to \$33,248,056, in 1931 to \$32,128,693, in 1932 to \$24,832,427, in 1933 to \$16,160,980 and in 1934 to \$12,814,120. The method of control varies somewhat as between the provinces. In the majority of cases there are independent commissions or boards to administer the provincial Liquor Traffic Acts, but the accounting and trading profits are shown somewhat differently in the various provincial public accounts reports.*

Fiscal Years of the Provinces.—The fiscal years of the provinces end as follows: P.E.I., Dec. 31; N.S., Sept. 30; N.B., Oct. 31; Que., June 30; Ont., Oct. 31; Man. and Sask., April 30; Alta. and B.C., Mar. 31.

*See Chapter XXVIII, Sec. 13, and also the report of the Dominion Bureau of Statistics on "The Control and Sale of Liquor in Canada".

¹Includes capital revenue for lands which cannot be separated.

²Includes capital expenditure which cannot be separated.

³For eight months.

⁴Certain minor items, amounting to about \$600,000, shown in previous years as ordinary receipts and expenditures have been transferred to the extraordinary classification in the 1930 provincial accounts report.

⁵Exclusive of interest paid by Hydro and other commissions.

⁶Subject to revision. This figure is taken from the Public Accounts of Ontario.

⁷Subject to revision. Calculated, from available data, by the Dominion Bureau of Statistics.

⁸Includes expenditure on capital account, except for 1901.

28.—Ordinary Revenues and Expenditures of the Provincial Governments for their respective fiscal years ended in the census years 1871-1911 and in each year from 1916 to 1934—concluded.

NOTE.—For provincial ordinary revenues and expenditures in all other provincial fiscal years since Confederation, see 1932 Year Book, pp. 734-736.

Subsection 2.—Provincial Debts and Assets.

In former issues of the Year Book statements were given showing the total direct liabilities of Provincial Governments and a detailed statement of the provincial assets. In accordance with decisions reached at the Conference mentioned on page 856, a uniform balance sheet for the provincial fiscal years ended in 1933 was presented at pp. 926-929 of the 1934-35 Year Book. Figures for 1934 are given in Table 30. In accordance with up-to-date accounting practice, the balance sheet is divided into three distinct categories, capital, income or current, and trust fund account assets and liabilities.

In addition to this the total indirect or contingent liabilities of each province are shown, though they do not in any way affect the balance sheet transactions.

For Prince Edward Island, the total capital assets are not balanced with the total capital liabilities, largely owing to the exclusion of any detail showing non-revenue earning assets such as roads, bridges, public buildings, etc.

As some of the items may be vague in meaning the following notes will be of assistance in studying the balance sheets presented:—

Capital Assets.—

General Assets, Non-revenue Bearing: In New Brunswick "public buildings" excluding Parliament Buildings upon which no valuation has been set up, are included in "Other Miscellaneous General Assets". In Ontario and Saskatchewan bridges are included in "roads". "Universities and Colleges"—The Public Accounts of the provinces of Nova Scotia, New Brunswick, Quebec and Ontario do not show any valuations of universities and colleges as capital assets, though government aid for maintenance may be found in the annual statements of educational expenditure. Manitoba's valuations are inclusive of educational properties, other than universities and colleges controlled by the Government. In Saskatchewan, the university is included in public buildings. In Alberta the valuation shown includes advances and redemption of debentures. The British Columbia university valuation is included in capital losses, representing \$3,678,278 written off in 1929-30.

Capital Liabilities.—

"Dominion Government Debt Allowance" represents housing loan only for Nova Scotia.

"Reserves of Surpluses" are not applicable against any specific assets.

30.—Balance Sheets of the Provincial Governments

NOTE.—For dates on which the fiscal years of

⁴Due to Trust Account.

Bonded Indebtedness of the Provinces.—Of the total liabilities of the provinces the major part is represented by bonded debt owing to the public in Canada and abroad. The total gross bonded debt amounted to \$1,329,684,651 in 1934 as compared with only \$218,875,927 in 1916, an increase of over \$1,100,000,000 in the 18 years. In addition to this bonded debt there were treasury bills outstanding on provincial accounts amounting to \$122,919,963 for 1934. Figures of bonded debt for this and previous years to 1916 are given in Table 31. The rapid rise in the bonded debt of the provinces from \$218,875,927 in 1916 is accounted for largely by the development of public ownership of utilities (such as the "Hydro" in Ontario), the extension of the highways and surfaced roads systems in all provinces (highway debentures outstanding in 1934 accounting for \$462,000,000 of the provincial debt), and the requirements for the promotion of industrial activities and public and social welfare. These demanded heavy expenditures which could not easily be met out of current revenue. The borrowings, while increasing the public debt, are in the main considered justifiable, as the public utilities are in most cases meeting from their revenues the interest on indebtedness incurred in their construction, and the provincial assets generally are sound enough to take care of capital investment for other services which are necessary to develop the country.

¹Liabilities statement is for April 30; this amount includes \$500,000 due May 1.

Interest Payments and Receipts of the Provinces.—The current burden of a debt in the case of a continuing organization is represented by interest payments, which may be offset in whole or in part by interest received on loans either to provincially-owned public utilities or to corporations or individual citizens. In a country where provincial public policy varies widely with regard to public ownership, it appears desirable to include a statement showing, for each province, the gross interest payments, the interest receipts and the net interest payments. This information is given for the provincial fiscal years ended in 1934 below:—

Province.	Gross Interest Paid.	Interest Received.	Net Interest Paid.	Net Interest Paid per Capita.
	\$	\$	\$	\$
Prince Edward Island.....	229,606	—	229,606	2.58

Section 3.—Municipal Public Finance.*

The existence of local self-governing units has always been characteristic of democratic societies, and nowhere more so than in Canada. The struggle for responsible government was naturally accompanied by an agitation for local self-government in the cities and towns of Canada and, after responsible government had been conceded, a complete system of municipalities was established throughout the old Province of Canada by the Municipal Act of 1849.† Under the division of powers made by the British North America Act between the Dominion and the Provincial Governments, legislation regarding municipal government, being a local matter, was naturally assigned to the provinces, which differ considerably with regard to their types of municipal organization. Thus in Prince Edward Island the only incorporated municipalities are the city of Charlottetown and seven incorporated towns. In British Columbia seven of the 33 cities have fewer than 1,000 people, while there are no towns at all and only 17 villages; again, in the same province the rural districts are mainly administered from the provincial capital, there being only 28 rural municipalities. Finally, in Saskatchewan and Alberta there exist local improvement districts, areas which have not as yet been organized

* Revised by Col. J. R. Munro, Chief of the Finance Branch of the Dominion Bureau of Statistics. This Branch issues statements on "Financial Statistics of Urban Municipalities of 10,000 Population and Over", on "Bonded Indebtedness of Municipalities" and on "Assessment Valuations of Municipalities". For a list of publications see Chapter XXIX, Section 1, under "Finance".

† For a brief outline of the rise of the municipal system of Ontario, see 1922-23 Year Book, p. 108.

into rural municipalities, and where the taxes are levied, collected and expended by the Provincial Governments. Such districts, however, may be regarded as on the way to becoming self-governing rural municipalities and their statistics are therefore included in Table 32, which gives statistics of the numbers and types of municipalities in 1933.

¹ Nova Scotia has 18 counties, some of which are "municipalities", while others are divided into "municipalities".
² There are 44 counties in all, geographically, but a number are united for municipal purposes.
³ Officially known as "townships".
⁴ Includes Flinflon Municipal District.

Municipal Revenue from Taxation.—As a result of accumulated borrowings to meet conditions peculiar to the depression, the relentless advance of interest charges against realizable taxation has brought about a condition in many municipalities where expenditures are out of all proportion to receipts, in spite of the fact that the trend of interest rates has been definitely downwards. It is natural under such conditions that the general subject of taxation should receive the increasing attention of the public and, of all forms of taxation, the imposition of municipal taxes—where the tax is applied broadly to assessed valuations placed on homes and other real property and on incomes and business—hits the ratepayer's pocket most directly.

In view of the wide public interest in municipal taxation, the Dominion Bureau of Statistics has recently issued a bulletin giving as complete a picture as is possible of tax levies and taxation receipts of municipalities, classified into cities, towns and rural municipalities, by provinces, for the years 1913-33.* The following summary table, taken therefrom gives figures of tax receipts for these years so far as they are available. Unfortunately, there are certain inconsistencies and omissions, as between provinces, which the footnotes to the table attempt to explain.

* See the bulletin "Municipal Tax Levies and Receipts, by Provinces", obtainable from the Dominion Statistician.

33.—Tax Receipts of Municipalities in Canada, by Provinces, 1913-33.

¹ Comparable figures not available.² Statistics are for Charlottetown only.³ Cities of

Saint John, Moncton and Fredericton only.

⁴ The figure shown is for all municipalities except cities, whereas, cities are included for 1932 and 1933. A comparable figure is not obtainable but receipts for Winnipeg were \$10,874,891, and the total tax imposition for the cities of Brandon, Portage la Prairie and St. Boniface was \$1,652,241.⁵ B.C. has no municipal organization of towns, and provision was first made for villages in 1922. Statistics of tax receipts for cities and rural districts are shown from 1917-21, and those for cities villages and rural districts from 1922.

Municipal Assessments.—The chief basis of municipal tax revenue is the real estate within the limits of the municipalities; though, as indicated above, in certain provinces personal property, income, and business carried on are also taxed. General taxes are normally assessed at the rate of so many mills on the dollar of the assessed valuations. In the Prairie Provinces, the values of improvements made to real property are often rated at a very low figure, e.g., in Saskatchewan, where the taxable valuations of buildings are about 12 p.c. of the taxable valuations of lands, and in Alberta, where they are about 27 p.c. of the taxable valuations of lands, as shown in Table 34.

There are various reasons for fluctuations in assessment valuations, due to differences in laws and varying practices with regard to assessment as among provinces, as among classes of municipalities and as among municipalities of the same class from year to year. Such matters are more fully dealt with in the special report of the Dominion Bureau of Statistics on "Assessment Valuations by Provinces", obtainable on request.

Land valuations in the West, which in earlier years were somewhat inflated, have of late been assessed on a sounder basis, and in some provinces the Equalization Boards have placed a more equitable valuation on lands as among the various rural municipalities.

34.—Summary Statement Showing Total Assessment Valuations of Municipalities, by Provinces, 1929-33.

¹ Less land for the Maritime Provinces, Quebec and Manitoba. ² In N.S. personal property and income assessments for cities are for Sydney only. ³ Includes exemptions for municipality of Cumberland, Nova Scotia. ⁴ Local Improvement Districts not included in 1929, 1931, 1932, or 1933, in Alta.

⁵ These amounts include property temporarily exempted. ⁶ In addition, assessments for schools only in Ontario were: townships \$2,730,538, towns and villages \$23,719,597 and cities \$92,401,140 in 1929; townships \$3,125,660, towns and villages \$22,347,193 and cities \$86,780,452 in 1930; townships \$4,486,690, towns and villages \$20,499,195 and cities \$93,816,472 in 1931; townships \$4,976,492, towns and villages \$18,249,670 and cities \$86,803,023 in 1932; and townships \$3,495,026, towns and villages \$12,884,022 and cities \$86,638,946 in 1933. ⁷ \$256,400 is by special franchise. ⁸ \$484,736 is by special franchise. ⁹ \$441,660 is by special franchise. ¹⁰ Includes special franchise (amount not stated). ¹¹ Includes certain other taxable valuations. ¹² Revised since the publication of the 1934-35 Year Book.

Bonded Indebtedness.—Like other Canadian governing bodies the municipalities of the greater part of Canada borrowed rather freely during the boom period of 1900-12, and again during the nineteen-twenties. The bonded indebtedness of Ontario municipalities rose from \$153,568,409 in 1913 to \$494,433,956 in 1933, while that of Quebec municipalities increased from \$173,720,141 in 1915 to \$479,608,472 in 1933, and a proportionate increase took place in other provinces. The recent growth in the bonded indebtedness of all classes of municipalities is shown by provinces in Table 35. The figures show that there was an increase in 1933 over 1932 in the provinces of Prince Edward Island, Nova Scotia, Quebec and Manitoba. The others showed a decrease. In Saskatchewan, net debenture debt is shown for all municipalities in 1919, while from 1920 the statistics represent gross debenture debt. In Alberta in the earlier years, figures represent principally net debenture debt but from 1929 gross debenture debt is shown. All other provinces give gross total debenture debt throughout.

35.—Total Bonded Indebtedness of All Classes of Municipalities, by Provinces, 1919-33.

NOTE.—Figures are for gross debenture debt unless otherwise indicated.

¹Municipalities included cannot be enumerated for the years 1919-23; figures represent Charlottetown and Kensington 1924-33; Montague for 1925-33; Summerside, Souris, Georgetown and Alberton 1926-33 and Borden 1932-33. For the latest year the figures include all eight incorporated municipalities of the province.

²Municipalities included cannot be enumerated for the years 1919-23; figures are for 3 cities, 18 towns, 2 villages and 15 counties in 1924; 2 cities, 13 towns, 2 villages and 15 counties in 1925; 3 cities, 18 towns, 1 village and 15 counties in 1926; 3 cities, 23 towns, 4 villages and 15 counties in 1927, 1928 and 1929; 3 cities, 19 towns, 2 villages and 15 counties in 1930; and 3 cities, 20 towns, 2 villages and 15 counties in 1931, 1932 and 1933.

³Figures for this year are for net debenture debt.

⁴Footnotes 1, 2 and 3 should be noted in interpreting these totals.

¹ Census of 1931.² Real Property and Public Utility Assets not included.
Section 4.—National Wealth and Income.
Subsection 1.—National Wealth.

The economic concept of national wealth is concrete and purely material, since economics is not able to take cognizance of the immense field of intangible wealth created by churches, schools and other institutions, nor of such things as climate, location, health, etc., which promote individual and national welfare and are often referred to as wealth, but in a different sense from that meant here. Our national wealth, as here understood, is the sum total of our physical assets. It includes all farms, factories, equipment, merchandise in stock and the thousand and one material things which Canada as a nation possesses. It does not include such things as stocks, bonds, mortgages, etc., which an individual regards as wealth but which, in reality, are mere evidences of ownership. From the point of view of the nation as a whole, all such claims and counter claims must be ruled out. There is, too, a large field of intangible wealth such as that represented by organization for doing business of all kinds, the reputation of business firms, managerial experience, etc., of which no account can be taken in a statistical determination of wealth. Further, a distinction must be made between "present" and "potential" wealth. Canada has an immense potential wealth in forests, mines, etc., the present value of which it is impossible to estimate.

Notwithstanding the enormous statistical and economic difficulties inherent in any evaluation of the national wealth, the justification for such attempts lies in the importance of such information for an analysis of a nation's social and economic

position. A general idea of the size and composition of the national wealth is essential for the intelligent consideration of many problems, both national and international, and although, in view of the numerous elements of uncertainty in a calculation of this nature, the statistics must be regarded as indicative rather than strictly accurate, when carefully prepared they hold a very important place in a national statistical system.

There are several methods of computing national wealth, *i.e.*, the aggregate value of the public and private property within the nation apart from undeveloped natural resources. Perhaps the most familiar of these methods is that of working back to capital values through income tax returns, but this can be applied only in countries where small as well as large incomes are assessed for income tax. A second method is that of estimation from probate returns, the value of the estates of deceased persons being regarded as representative. A third is that of a complete census, based upon a canvass of the individual. A fourth method, namely, the so-called "inventory" method, is often employed.* The estimate of Canada's wealth herein presented is based on the "inventory" principle, *i.e.*, an attempt is made to secure for the nation an approximation of the business man's inventory of his possessions. This method consists in totalling the amounts known from various sources to be invested in agriculture, manufacturing, dwellings, etc. It does not include the value of undeveloped natural resources but only natural wealth which has been appropriated. For instance, it includes the value of the machinery and other capital equipment used in coal mining but not the unmined coal; the boats used in fishing but not the fish in the sea; the power plants and equipment used in developing water power but not the waterfalls themselves. In the case of forest wealth partial exception is made by the inclusion of accessible raw materials. When making comparison between the different provinces it should be remembered that this method tends to understate the wealth of any section of the country which is rich in mines, fisheries or water power.

Whatever method is used, difficulty arises when we try to reduce all the things which go to make up wealth (things which once created are not themselves subject to violent change) to a common denominator. Estimates of national wealth must always be expressed in terms of the national currency. Yet the purchasing power of the currency unit is always fluctuating and since 1929 had increased at one point (February, 1933) by more than 50 p.c. in terms of wholesale prices. Even in 1930, the average index number of wholesale prices was down by nearly 10 p.c. from 1929, while in December of that year the average index number of wholesale prices was 19 p.c. lower than in the same month of 1929.

The effect of such drastic reductions in values is first felt by the commodities which are being currently produced and, through these commodities, the dollar value of production is diminished and consequently the national income of a country where most people are producers. Ultimately, a persistent decline of this character affects the capital values of real estate, buildings, machinery, etc., and its influence is then felt in a reduction in the national wealth as stated in dollars.

The first official estimate issued by the Dominion Bureau of Statistics was for 1921, being based on the census data collected in that year. It placed the national wealth at \$22,195,000,000. Later estimates were \$25,673,000,000 for 1925 and \$27,668,000,000 for 1927. The figures for 1929 as published at pp. 938-939 of the

*An explanation of method and of the background of early estimates of national wealth as applied to Canada will be found in the article "The Wealth of Canada and Other Nations" by R. H. Coats, Dominion Statistician, published in the Journal of the Canadian Bankers' Association, October, 1919.

1934-35 Year Book have now been revised in view of certain improvements introduced into the 1933 estimate. The above estimates for 1921, 1925 and 1927 are, therefore, not exactly comparable but are sufficiently so for most purposes. The revised estimate for 1929 is \$31,276,000,000, and the 1933 estimate \$25,768,000,000. The former presents a picture at the peak of domestic prosperity, whereas, that of 1933 reflects the writing down of values resulting from the depression.

Wealth of Canada by Items, 1929 and 1933.—In the items showing the composition of the national wealth, as set out in Table 37, care has been taken to exclude duplication. In any consideration of the individual items it should be remembered that each item covers only the portion of wealth which is stated in the description attached thereto. For instance, the item "Fisheries" includes only capital invested in primary operations. Capital invested in fish-canning and -curing establishments is included with "Manufactures", though this also might be considered as part of the wealth connected with "Fisheries". Similarly, the items for "Manufactures" do not include lands and buildings in urban centres which are shown under the heading "Urban Real Property".*

*A fuller explanation of the composition of the separate items is contained in the bulletin "Canada's National Wealth", obtainable from the Dominion Statistician on application.

37.—Estimate of the National Wealth of Canada, with Percentage and Per Capita Distributions of Component Items, 1929 and 1933.

NOTE.—For discussion of these items, see p. 871 of the 1933 Year Book and the bulletin referred to above.

Classification of Wealth.	Aggregate Amount.	Percentage of Total.	Average Amount per Head of Population.

Grand Totals.....	25,768,236,000	100.00	2,412.53

Aggregate and Per Capita Wealth by Provinces, 1929 and 1933.—As regards the provincial distribution of wealth in 1933 Ontario ranked first with an estimated aggregate wealth of \$8,796,000,000 or 34.14 p. c. of the total; Quebec second with \$6,738,000,000 or 26.15 p.c.; Saskatchewan third with \$2,527,000,000 or 9.81 p.c.; and British Columbia fourth with \$2,431,000,000 or 9.43 p.c. of the whole.

While Ontario and Quebec led in absolute wealth, the western provinces came first in per capita wealth. British Columbia held first rank with a per capita wealth of \$3,414, Alberta second with \$2,689 and Saskatchewan third with \$2,657. Ontario with a per capita wealth of \$2,496 was fourth, Quebec was fifth with \$2,269 and Manitoba sixth with \$2,164. The per capita wealth for the whole Dominion was estimated at \$2,413.

Further details, including revised figures for 1929, are shown in Table 38. In 1929 the provinces held the same relative places, both as regards aggregate and per capita wealth.

38.—Provincial Distribution of the National Wealth of Canada, with Percentage and Per Capita Analyses, 1929 and 1933.

NOTE.—Figures for 1921 and 1925 are given on pp. 849-850 of the 1927-28 Year Book, and for 1927 on p. 870 of the 1931 Year Book.

¹Includes the population of the Northwest Territories: 9,000 in 1929 and 10,000 in 1933, 0.09 p.c. in both cases.

²As the statistics for Yukon are uncertain the per capita estimate of wealth is open to question and has not been shown.

³Per capita figures are worked out on the basis of revised populations, see p. 141.

Analyses of Itemized Wealth, by Provinces, 1929 and 1933.—In Table 39 will be found detailed statistics of the wealth of each province by leading items. As previously emphasized, the suggestive character rather than the strict accuracy of such data should be kept in mind. For example, specie holdings are distributed among the provinces according to their population since they are an asset of Canada as a whole rather than of the particular locality in which they happen to be deposited.

39.—Estimate of the National Wealth of

Subsection 2.—National Income* and Income Tax Statistics.

Definition of National Income.—"The annual labour of every nation is the fund which originally supplies it with all the necessities and conveniences of life which it annually consumes, and which consist always either in the immediate produce of that labour, or in what is purchased with that produce from other nations." —ADAM SMITH. This is perhaps the earliest modern definition of *national income*, and is still among the best, when it is interpreted in accordance with modern knowledge regarding the balance of international payments and the necessity of keeping productive equipment in running order. It must also be remembered that while the national income consists in goods and services of the most varied kinds, its total amount can be stated only in terms of money.

Following is a statement of the nature of national income from the standpoint of the statistical technique used in its compilation, the description also being in line with present-day economic theory.

"Year in, year out, the people of this country, assisted by the stock of goods in their possession, render a vast volume of work toward the satisfaction of their wants. Some of this work eventuates in commodities, such as coal, steel, clothing, furniture, automobiles; other takes the form of direct personal services, such as are rendered by physicians, lawyers, government officials, domestic servants, and the like. Both types of activity involve an effort on the part of an individual and an expenditure of some part of the country's stock of goods. If all commodities produced and all personal services rendered during the year are added at their market value, and from the resulting total we subtract the value of that part of the nation's stock of goods which was expended (both as raw materials and as capital equipment) in producing this total, then the remainder constitutes the net product of the national economy during the year. It is referred to as national income produced, and may be defined briefly as that part of the economy's end-product which is attributable to the efforts of the individuals who comprise a nation."†

The Difficulty of Measuring National Income.—The precise statistical measurement of the national income is a matter of insurmountable difficulty, and the most indefatigable research into all the relevant statistics, in order to establish a figure of national income, must always leave an appreciable margin of error. Indeed, it is no easy matter even for an individual to establish an accurate money figure as representing his *total* income, especially where he has to include in that total income, besides his cash income, an allowance for the rental value of his (owned) house and his durable belongings therein, together with an allowance for the money value of the commodities produced and consumed within the family, (such as eggs and garden produce) and of the services, ordinarily bought and sold, but rendered gratis within the family circle. Yet this is the only way of obtaining the total income of the family. While such income, not received directly in money, but in commodities produced and services rendered, is not, except for house and furniture rent, an important percentage of the family income in most urban families, it constitutes a very important part of the income of most rural families, who to a much larger extent consume the commodities which they themselves produce. For this reason, indeed, comparisons between the incomes of urban families and rural families are often misleading, through not allowing for the non-money income of the latter. Certainly most people never think of their non-money income as income at all, and would never dream of putting the rental value of their owned homes into

* The estimate of national income has been revised by Sydney B. Smith, M.A., Dominion Bureau of Statistics.

† See National Income 1929-32, U.S. Department of Commerce.

their income tax returns. Indeed, the income tax authorities of Canada do not expect them to do so.

Any difficulties experienced in expressing the total income of an individual as a single figure are multiplied a million-fold in any attempt to express the total of the national income as a single figure. The individual and corporate incomes which are to be combined into this grand total *without duplication*, are of such a heterogeneous character that any figure which may be given as the grand total of the national income must include some margin of error.

The Influence of Changes in the Price Level on National Income.—

Fluctuations in the general level of prices, which have been so great in the post-war period (see p. 878), have necessarily affected the money value of the national income. In these circumstances, it is absolutely essential that any estimate of the national income should be definitely stated as for a particular year, so that the national income for each year may be related to the price levels prevailing in that year and corrected by the price levels of that year. Thus, when the official index number of wholesale prices is taken to correct the estimate of the money value of the national income for the decline of prices, it is found that \$66.70 bought on the average as much in commodities in 1932 as \$95.60 bought in 1929. Then, if the money value of the national income had declined by one-half in these three years, the correction for the drop in prices would reduce the decline in the *real* national income of all commodities and services to 28.3 p.c., on the assumption that the prices of services rendered declined proportionately with the prices of commodities included in the index number of wholesale prices. Thus on the assumption that the money value of the national income in 1932 was only one-half of that of 1929, the *real* national income would be nearly 72 p.c. of the total of 1929. Much might be said here on the effect of falling prices in discouraging the actual production of commodities and the rendering of services, thus reducing the *real* national income, and conversely on the effect of rising prices in stimulating the actual production of commodities and rendering of services and thus increasing the *real* national income.

Estimate of National Income as Based upon the Survey of Production.—

The industries concerned with the production of *form* utilities employed, in 1931, approximately five-eighths of all gainfully occupied Canadians and produced commodities to the net value of about \$2,062,000,000 in 1933, as shown in the Survey of Production at pp. 203-211 of this volume. Then, on the assumption that the remaining three-eighths of the gainfully occupied Canadians who are engaged in the transportation and communications industries, in wholesale and retail trade, in finance and in personal and professional service, are proportionately as productive on the average as those who engage in the production of *form* utilities, we attain a total figure of what labour, assisted by capital, has presumably been able to produce in the course of a calendar year. This figure has, for the latest thirteen years, been published in the Dominion Bureau of Statistics' Annual Survey of Production, and in the Canada Year Book.

On the basis of the annual Census of Industry and the occupational distribution of the population as ascertained at the Decennial Censuses of 1921 and 1931, the grand total value of the national production of commodities and services in each year from 1920 to 1933 inclusive, has been approximately estimated as follows: 1920, \$5,523,000,000; 1921, \$4,215,000,000; 1922, \$4,520,000,000; 1923, \$4,696,000,000; 1924, \$4,643,000,000; 1925, \$5,178,000,000; 1926, \$5,600,000,000; 1927, \$6,101,000,000; 1928, \$6,342,000,000; 1929, \$6,072,000,000; 1930, \$5,100,000,000; 1931, \$4,100,000,000; 1932, \$3,370,000,000; 1933, \$3,340,000,000. The totals for 1930-32 were recently revised in accordance with the findings of the decennial census.

40.—Total and Per Capita Production of the Gainfully Occupied Population in 1933, Based upon the Survey of Production, 1933, and the Percentage of Persons Occupied in the Production of Farm Utilities as Found at the Census of 1931.

¹ Dominion average used.

The above table has the defect of making no deduction for the cost of the fuel and the power required for the carrying on of the productive process in the manufacturing industries; these two items amounted to \$69,400,000 in 1933. On the other hand, it makes no allowance for unrecorded production in such sidelines as the raising of garden produce, poultry, etc., by persons not deriving their main livelihood from such activities. (The value of farm produce raised elsewhere than on farms was secured at the Census of 1931 and was found to total nearly \$19,000,000 in 1930.) Again, the table makes no allowance for the difference between the producer's price of farm commodities and the price actually received by the farmer who brings in his produce to a farmers' market or peddles it along city streets or sells it to a peddler with no fixed store who undertakes to do the marketing for him. Finally, the table makes no allowance for the money value of the production of persons not ordinarily considered as gainfully occupied, such as the production of school-boys outside of school hours and of college students in their vacations. On the whole, it is felt that the omission of the value of such activities fully makes up for the inclusion of the figures referred to above. This leaves us with the figure of approximately \$3,340,000,000 to represent the grand total value of the productive activities of the Canadian people in 1933.

However, Canada is on balance a debtor country, and in order to ascertain her net national income, deduction must be made from her national production of the amount required to meet the *net* interest payments due to outsiders. Such *net* interest and dividend payments are estimated for 1933 in our "Balance of International Payments" at \$192,000,000, payments on this score reaching \$279,000,000 as against receipts amounting to \$88,000,000. When this outward balance of interest and dividend payments is deducted from the \$3,340,000,000 of the above table, the remainder is \$3,148,000,000, which may be considered as the national income of the Canadian people in 1933. It is subject to certain deductions required to maintain the national productive equipment in an efficient state.

Incomes Assessed for Income Tax in Canada.*—In those countries of the world where an income tax has been established for a considerable time the figures of the assessed income have been generally accepted as furnishing a guide both to the amount and to the distribution of the total national income by classes.

*This material has been revised by the Income Tax Branch of the Department of National Revenue.

Estimates of the national income, based upon income tax statistics, have been published, for example, in the United Kingdom and in the United States.

The War introduced the income tax into Canada in 1917. Under the Income War Tax Act, the returns of the incomes of individuals and corporations are filed in the year following the earning of the incomes. Further, since the fiscal year ends on Mar. 31, the bulk of the receipts from the income tax usually comes in during the first two or three months of the next following fiscal year. Thus the income tax received in the fiscal year ended Mar. 31, 1935, represents, in the main, income tax collected on 1933 income and the income tax collected in the fiscal year ended 1934 represents, in the main, 1932 income. It is important that these facts should be kept in mind when considering income assessed in different years. Further, the particular provisions of the income tax existing at any particular time and the amendments extending or contracting the scope of the income tax by raising or lowering the limit of taxable income, or increasing or lowering the allowances for children, etc., should also be borne in mind in the consideration of the following tables. Among these, Table 41 gives the grand total income of individuals and corporations assessed for the purpose of income war tax for the past fifteen years, while Table 42 gives this income by provinces for the past five years and Table 43 shows the amount of income tax collected by provinces in the past five years. Tables 44 and 45 analyse the payments of income tax in the past four years by size of income class and by occupation of the taxpayer, respectively.

Subsection 3.—Outside Capital Invested in Canada and Canadian Capital Invested Elsewhere.*

An estimate of the outside capital invested in Canada and the Canadian capital invested outside of the Dominion is prepared by the Internal Trade Branch of the Dominion Bureau of Statistics. Any estimate of this character is liable to a margin of error, but the utmost care has been taken in the computation and it is believed that the figures approximate to actual conditions. More complete information is being obtained from year to year, and a comprehensive revision and extension of the statistics on this subject is now in progress. In the meantime, the figures given are of the latest available date, *viz.*, Jan. 1, 1934; figures for previous years will be found on pp. 879-880 of the 1933 Year Book and p. 947 of the 1934-35 Year Book.

It is estimated that the total investment of British and foreign capital in Canada on Jan. 1, 1934, was \$6,813,361,255. Of this sum, \$2,734,197,116 was British capital, \$3,983,231,015 was from the United States and \$95,933,124 from other countries.

It must be borne in mind that Canadians have invested large amounts of capital abroad. The Bureau estimates that Canadian investments in other countries amounted to \$2,028,787,000 at the beginning of 1934, or nearly 30 p.c. of the amount of outside investments in Canada. Of this \$1,254,246,000 was placed in the United States, \$109,997,000 in the United Kingdom and \$664,544,000 in other countries. (Table 48.)

*Revised by Herbert Marshall, B.A., F.S.S., Chief, Internal Trade Branch, Dominion Bureau of Statistics. For a list of the publications of this Branch, see Chapter XXIX.

It is estimated that the amount of capital invested in Canada is \$18,000,000,000. This sum includes the bonded indebtedness of Dominion, Provincial and municipal governments, investments in railways, all manufacturing concerns, mines and metal industries, public utilities, trading establishments, finance, insurance, land and mortgages. It does not include private capital in domestic enterprises such as farms, homes, etc. Of this sum it is estimated that 62½ p.c. or \$11,200,000,000 is owned in Canada; 22 p.c. or \$4,000,000,000 in United States; 15 p.c. or \$2,700,000,000 in the United Kingdom; ½ p.c. or \$95,000,000 in other countries.

If the basis of comparison is total national wealth, British and foreign investments decrease in significance. Canada's national wealth in 1933 was estimated at \$25,768,000,000 (see pp. 877-883); net British and foreign investments in Canada were about \$4,785,000,000, or 18.5 p.c. of the total.

CHAPTER XXII.—CURRENCY AND BANKING; LOAN AND TRUST COMPANIES.

Section 1.—Canada's Monetary System.

Historical.—Early trade in Canada was carried on by barter, which at times resulted (e.g., in transactions between Indians and fur traders) in the adoption of beads, blankets, etc., as recognized media of exchange. Later, during the French period in Canada, while barter still formed perhaps the most important means of exchange between individuals and merchants, a more or less satisfactory currency system developed. Beaver and other furs, tobacco and wheat were at times used as substitutes for currency, the last named being at one time a legal tender. A makeshift currency system was also developed during the French *régime* when playing cards, stamped with a value and redeemable yearly on the receipt of bills of exchange on Paris, came into circulation. Other paper money was also issued, and the total amount outstanding at the time of the cession was estimated at 80,000,000 livres, which was nearly all lost to its holders.

The British Government next sought to establish a uniform standard of colonial currency, but since at this time French coinage again began to come into circulation and the Spanish dollar also rivalled the English shilling as the most common medium of exchange, this was not universally possible. English sovereigns were overrated in terms of dollars in an endeavour to encourage their circulation. A rate of 5s. to the dollar was set in Halifax and was in use in government accounting systems, while in Montreal, York currency (the rates prevalent in New York), giving the dollar an exchange value of 7s. 6d. or 8s., was in common use.

Canadians again became more or less familiar with the characteristics of paper money as a result of the experiences of the various neighbouring Northern States during the first half of the nineteenth century. During the War of 1812 this familiarity was increased by the establishment of an army bill office, issuing bills of various denominations, redeemable on presentation. The growing volume of trade between Canada and the United States also resulted in a tendency toward a decimal coinage, and in 1853 a measure was passed providing for the adoption of a decimal currency, with a dollar equivalent to the United States dollar; the British sovereign was made legal tender at \$4.86 $\frac{2}{3}$. An Act of 1857 requiring all government accounts to be kept in dollars and cents came into force on Jan. 1, 1858; the formal adoption of decimal currency in the Province of Canada dates from that time.

By the Uniform Currency Act of 1871 (34 Vict., c. 4), the decimal currency was extended throughout the Dominion, the British sovereign was made legal tender for \$4.86 $\frac{2}{3}$ and the United States eagle legal tender for \$10, while authority was given to coin a Canadian \$5 gold piece. No Canadian gold coinage was issued, however, prior to the establishment of the Canadian branch of the Royal Mint in 1908, the first coins struck being sovereigns similar to those of the United Kingdom, but with a small "C" identifying them as having been coined in Canada. In May, 1912, the first Canadian \$10 and \$5 gold pieces were struck, but the Canadian gold coinage has so far been limited in amount, since Canadians have generally preferred Dominion notes to gold for use within the country, and, when gold is needed for export, bullion or British and United States gold coin serve the purpose equally well.

The Royal Canadian Mint.—The Ottawa Mint, established as a branch of the Royal Mint under the (Imperial) Coinage Act, 1870, and opened on Jan. 2, 1908, was by 21-22 Geo. V, c. 48, constituted a branch of the Department of Finance, and by the Proclamation of Nov. 14, 1931, issued under Section 3 of that Act, it has since Dec. 1, 1931, operated as the Royal Canadian Mint. At first the British North American provinces, and later the Dominion of Canada, obtained their coins from the Royal Mint in London or from The Mint, Birmingham, Ltd., and in its earlier years the operations of the Mint in Canada were confined to the production of gold, silver and bronze coins for domestic circulation, of British sovereigns, and of small coins struck under contract for Newfoundland and Jamaica. Previous to 1914 small quantities of gold bullion were refined, but during the War the Mint came to the assistance of the British Government by establishing a refinery in which nearly twenty million ounces of South African gold were treated on account of the Bank of England, and the subsequent great development of the gold-mining industry in Canada has resulted in gold-refining becoming one of the principal activities of the Mint. Gold coins have never been a popular medium of exchange in Canada and have not been struck since 1919, most of the fine gold produced from the rough shipments from the mines being delivered to the Department of Finance in the form of bars worth approximately \$8,300 each, the rest being sold in a convenient form to manufacturers. The fine silver extracted from the rough gold, when not required for coinage, is sold in New York or disposed of to local manufacturing firms.

The domestic currency of Canada, as at present authorized by the Currency Act, consists of: \$20, \$10, \$5 and \$2½ gold pieces, 900 millesimal fineness (only \$10 and \$5 pieces have been issued); of \$1, 50-cent, 25-cent and 10-cent silver pieces, 800 millesimal fineness; of 5-cent pieces of pure nickel (from metal produced in Canada); and of 1-cent pieces in bronze. The silver 5-cent piece is still legal tender but its coinage was discontinued in 1921; the silver dollar was never coined until 1935, when, by Royal Proclamation of April 12, the design of the new Jubilee Silver Dollar was set out. The proclamation went into operation on May 1, 1935.

Gold.—Gold is used only to an insignificant extent as a circulating medium in Canada, its monetary use being practically confined to reserves, but \$5 and \$10 gold pieces weighing respectively 129 and 258 grains, 9-10ths pure gold by weight, have been coined, the Canadian gold dollar thus containing 23·22 grains of pure gold. These coins were first issued in 1912, authority to issue them having been conferred in 1910. By the Currency Act, 1910 (9-10 Edw. VII, c. 14), British sovereigns, which are legal tender for \$4.86½, and other gold coins, and the \$5, \$10 and \$20 gold coins of the United States, which contain exactly the same weight of gold as Canadian gold coins of these denominations, are also legal tender. These, however, were almost entirely divided between the Dominion Government and the banks as reserves, and the chief circulating medium of the country is provided by paper and token currency. On the establishment of the Bank of Canada, the chartered banks transferred their holdings of gold in Canada to this institution.

Table 1, compiled by the Master of the Royal Canadian Mint, shows the value of the gold bullion received for treatment at the Ottawa Mint since its foundation, together with the gold coin and bullion issued. A statement of the gold, silver, nickel and bronze coinages issued to the separate provinces and to the Dominion of Canada since 1858 is published as Table 2. Table 3, compiled by the Bank of Canada, gives the form in which the gold has been held by the Government in recent years.

1.—Value of Gold Bullion Received for Treatment and Value of Gold Coin and Bullion Issued from the Ottawa Mint, 1908-16 and, by years, 1917-35.

NOTE.—Gold valued at the standard price of \$20-671834 per fine oz.

¹ The statistical series given in this table has been terminated by the establishment of the Bank of Canada. Since Bank of Canada reserves are held at market value comparability for years subsequent to 1934 is vitiated. A new series will be commenced as soon as possible.

² Revised since the publication of the 1934-35 Year Book.

Token Currency.—Canadian silver dollars weighing 360 grains, 37-40ths fine, provided for by the Currency Act of 1910, were placed in circulation for the first time in 1935 (see p. 893). Fifty-, 25-, 10-, and 5-cent pieces of weight proportionate to their respective fractions of the dollar, and of the same fineness, are in circulation, but, by c. 9 of the Statutes of 1920, the standard of fineness was reduced to 8-10ths. In 1921 the coinage of a nickel 5-cent piece weighing 70 grains was authorized. Silver coins are legal tender only up to ten dollars, nickel coins to five dollars, and bronze coins to twenty-five cents. Table 4 shows the *net* issue of silver and bronze coins (that is, the value issued less the value withdrawn), by years from 1901.

¹ These figures of *net* amounts of coin issued show the values issued less the values withdrawn and to this extent do not correspond with the figures shown in Table 2.

Bank of Canada Notes.—Prior to the taking over of the Dominion note issue by the Bank of Canada when it opened on Mar. 11, 1935, Dominion notes were issued under any one of three statutory authorities: (1) the Dominion Notes Act (Statutes of 1934, c. 34), which required a gold reserve of 25 p.c. to be held against the first \$120,000,000 of notes issued and full gold coverage against any issue in excess of \$120,000,000; (2) the Finance Act (R.S.C., 1927, c. 70), Part II of which authorized the Minister of Finance to advance to any chartered bank or to the savings banks of Quebec, Dominion notes to any amount on the pledge of approved securities deposited with the Minister. These advances bore interest and no gold coverage was required to be held on Dominion notes so advanced; (3) Chap. 4 of the Statutes of 1915, authorizing the Government to issue Dominion notes to the amount of \$26,000,000 without gold coverage, but partly covered by the deposit of \$16,000,000 of railway securities guaranteed by the Dominion Government.*

*An outline of Canadian legislation respecting the issue of notes was given on p. 952 of the 1934-35 edition of the Year Book.

Dominion notes were of two types, those in general circulation and those used only in inter-bank transactions, the latter being described as "special" notes. Notes in general circulation were of the denominations 25 cents, \$1, \$2, \$4, \$5, \$50, \$500, \$1,000, but for a considerable time no notes of \$4 and \$50 denominations have been issued. "Special" notes were mainly of \$5,000 and \$50,000 denominations, \$1,000 "specials" being no longer issued. The amounts of each denomination of both types of notes in circulation are given, as at Mar. 31, of each recent year, in Table 7, while Tables 5 and 6 are concerned with gold reserves.

5.—Dominion Notes Outstanding and Reserves as at June 30, 1900-31.⁶

NOTE.—Corresponding figures for 1890-99 inclusive are given at p. 886 of the 1933 Year Book.

¹Includes Dominion notes in the Central Gold Reserves as security for bank note circulation.

²Includes provincial notes amounting to \$32,857 in 1890, reduced to \$27,589 on June 30, 1933, and to \$27,555 on June 30, 1934.

³Includes issue of \$50,000 notes, 1919-35.

⁴Per capita circulation in

1900 is taken as 100. ⁵The circulation uncovered by specie reserve was to a considerable extent covered, between 1890 and 1910, by the holdings of guaranteed debentures amounting to \$1,946,666. Since 1914 a part of the issue of Dominion notes outstanding has been covered by the holding of securities approved under the Finance Act, 1914, and the Finance Act (R.S.C., 1927, c. 70).

Table 3, p. 895.

Chartered Bank Notes.—Bank notes form the chief circulating medium used in Canada. Under the Bank Act, the banks are authorized to issue notes of the denominations of \$5 and multiples thereof. These notes are not in normal times legal tender. See pp. 962-963 of the 1934-35 Year Book for the 1934 revision of the Bank Act, outlining gradual reduction in note issue of chartered banks.

In case of insolvency the notes of a bank are a first lien upon its assets. Notes are further secured, in case of insolvency, by the Bank Note Circulation Redemption Fund, to which all banks contribute 5 p.c. of their average circulation. The sum thus secured is available for the redemption of the notes of failed banks.

The figures of bank note circulation are given in Table 8. Table 9 brings together the statistics of the amount of circulating media in the hands of the general public, yearly averages being used where possible. "In the hands of the general public" here includes coin and small Dominion notes or Bank of Canada notes in the tills of the banks used for making change as well as those in the hands of the general public, but does not include Dominion notes of denominations larger than five dollars which were used for inter-bank transactions and reserves.* In both Tables 8 and 9 "bank notes in circulation" includes notes of other banks held by the banks, averaging about \$7,100,000 in 1935. As for the silver, nickel and bronze coinage in Table 9, the figures are the total amounts issued by the Mint since 1858 less amounts withdrawn from circulation and therefore include amounts held by the banks as well as coins lost by the public, which over such a period would probably amount to a considerable sum.

*As a result of the organization of the Bank of Canada in March, 1935, practically all Dominion notes have been withdrawn from circulation and replaced by Bank of Canada notes.

8.—Statistics of Chartered Bank Note Circulation, calendar years 1900-35.

NOTE.—The statistics in this table are averages computed from the twelve monthly returns in each year. Figures for 1892-99 will be found at p. 861 of the 1927-28 Year Book.

¹Figures supplied by the Mint as at Dec. 31 of each year, are the net issues of coinage since 1858 (see Table 4, p. 896).

²Yearly averages.

³Dominion notes of larger denominations in hands of banks are not included, but provincial notes, amounting to \$27,584 in 1935, are included.

⁴Per capita circulation in 1900=100.

⁵Revised since the publication of the 1934-35 Year Book.

⁶Total

circulation less notes held by chartered banks. Average for ten months.

Section 2.—Banking in Canada.

Historical.—In the early days of banking, one of the chief functions of banks was to issue promissory notes payable to the bearer on demand; where the banks' credit was good these notes passed freely from hand to hand, and were the chief circulating medium in the Canadas. In some cases in the Maritime Provinces bank notes were preferred to those issued by the Provincial Governments.

The need of a uniform circulating medium in Canada was felt by the merchants of Montreal toward the end of the eighteenth century, and the prospectus of a proposed bank of issue to be known as the Canada Banking Company was issued in 1792. This scheme, however, depended chiefly on the co-operation of British capital and was frustrated by the outbreak of war with France. A second project in 1808 for the incorporation of a Bank of Canada failed to secure the assent of the Legislature of Lower Canada.

At the close of the War of 1812 the army bill currency was withdrawn, and public attention once more turned to the expediency of securing a currency through the establishment of banks. The Bank of Montreal began business toward the end of 1817 as a private institution, under articles of association based on the first charter of the Bank of the United States. In the following year, under similar articles of association, the Quebec Bank was established, as well as the Bank of Canada at Montreal and the Bank of Upper Canada at Kingston. The three Lower Canadian institutions obtained their provincial charters in 1822, while the Bank of Upper Canada was superseded by a second Bank of Upper Canada established at York (Toronto) as a chartered bank in 1821. Meanwhile the Bank of New Brunswick had been incorporated in 1820, while in Nova Scotia the Halifax Banking Co. (private) commenced business in 1825, and the Bank of Nova Scotia received a regular charter in 1832. With all of these earlier banks note issue was an important part of their business.

The Bank of British North America, previously incorporated in the United Kingdom, commenced business in Canada in 1836, while Molson's Bank was established in 1853, the Bank of Toronto in 1855, the Banque Nationale in 1860 and the Banque Jacques-Cartier (later the Banque Provinciale du Canada) in 1862. The Union Bank was established in 1866, the Canadian Bank of Commerce in 1867. There were no fewer than 28 banks in existence at Confederation. These were as follows:—

Ontario and Quebec.

Bank of Montreal.
Quebec Bank.
Commercial Bank of Canada.
City Bank.
Gore Bank.
Bank of British North America.
Banque du Peuple.
Niagara District Bank.
Molson's Bank.
Bank of Toronto.
Ontario Bank.
Eastern Townships Bank.
Banque Nationale.
Banque Jacques-Cartier.
Merchants' Bank of Canada.
Royal Canadian Bank.

Union Bank of Lower Canada.
Mechanics' Bank.
Canadian Bank of Commerce.

Nova Scotia.

Bank of Yarmouth.
Merchants' Bank of Halifax.
People's Bank of Halifax.
Union Bank of Halifax.
Bank of Nova Scotia.

New Brunswick.

Bank of New Brunswick.
Commercial Bank of New Brunswick.
St. Stephen's Bank.
People's Bank of New Brunswick.

Subsection 1.—The Canadian Banking System in General.

The Bank of Canada.—Chapter 43 of the Statutes of 1934, "An Act to incorporate the Bank of Canada", provided for the establishment of a central bank in Canada. The capital of the Bank is \$5,000,000, divided into shares of \$50 par value. These shares were offered for public subscription by the Minister of Finance on Sept. 17, 1934, and were largely oversubscribed. The maximum allotment to any one individual or corporation was 15 shares.

Shares of the Bank may be held only by British subjects ordinarily resident in Canada, or by corporations controlled by British subjects ordinarily resident in Canada. The maximum holding permitted one person is 50 shares. Directors, officers or employees of the chartered banks may not hold shares of the Bank.

The Bank is authorized to pay cumulative dividends of $4\frac{1}{2}$ p.c. per annum from its profits after making such provision as the board thinks proper for bad and doubtful debts, depreciation in assets, pension funds and all such matters as are properly provided for by banks. The remaining surplus will be paid into the Consolidated Revenue Fund of Canada, and to the rest fund of the Bank, in specified proportions.

The Bank may buy and sell securities of the Dominion, the provinces, the United Kingdom and the United States of America, without restriction if of a maturity not exceeding two years, and in limited amounts if of longer maturity. It may also buy and sell securities of British Dominions and France without restriction, if maturing within six months. Short-term securities of the Dominion or provinces may be rediscounted. The Bank may buy and sell certain classes of commercial paper of limited currency, and if endorsed by a chartered bank may rediscount such commercial paper. Advances for six-month periods may be made to chartered banks, Quebec savings banks, the Dominion or any province against certain classes of collateral, and advances of specified duration may be made to the Dominion or any province in amounts not exceeding a fixed proportion of such government's revenue. The Bank may buy and sell gold, silver, nickel and bronze coin and gold and silver bullion, and may deal in foreign exchange.

The Bank has assumed the liability for Dominion notes outstanding and is replacing them with its own notes in denominations of \$1, \$2, \$5, \$10, \$20, \$25, \$50, \$100, \$500, and \$1,000. The chartered banks are required (under the Bank Act of 1934) to reduce the issue of their own bank notes in Canada to 25 p.c. of their paid-up capital as at Mar. 11, 1935, during the next 10 years.

The Bank of Canada must maintain a reserve of gold equal to not less than 25 p.c. of its total note and deposit liabilities in Canada. The reserve,* in addition to gold, may include silver bullion, balances with the Bank of England, the Bank for International Settlements, the Federal Reserve Bank of New York and central banks in gold standard countries, treasury bills of the United States of America or the United Kingdom having a maturity not exceeding 3 months, and bills of exchange having a maturity not exceeding 90 days, payable in London, New York, or in a gold standard country, less any liabilities of the Bank payable in the currency of the United Kingdom, the United States of America, or a gold standard country.

*In the statement on p. 903, the net reserve is described as Item 1 of Assets less Item 5 of Liabilities (i.e., sundry liabilities payable in sterling, U.S.A. or other foreign gold currencies).

The Bank has an obligation to sell gold in the form of bars on demand, but this may be suspended, and is at present suspended until Mar. 11, 1937.

The chartered banks are required to maintain a reserve of not less than 5 p.c. of their deposit liabilities within Canada in the form of deposits with, and notes of, the Bank.

The Bank acts as the fiscal agent of the Dominion of Canada and may by agreement act as banker or fiscal agent of any province. The Bank must not accept deposits from individuals and thus cannot compete with the chartered banks in commercial banking fields.

The Bank commenced business on Mar. 11, 1935. A statement is required of the assets and liabilities of the Bank as at the close of business on each Wednesday, while monthly statements are also issued. The statement of the Bank as at Dec. 31, 1935, follows:—

BANK OF CANADA

Statement of Assets and Liabilities as at Dec. 31, 1935.

The head office of the Bank is at Ottawa, and it has an agency in each province, namely, at Montreal, Toronto, Winnipeg, Regina, Calgary, Vancouver, Saint John, Halifax and Charlottetown.

The Governor of the Bank is its chief executive officer, and he is assisted by a Deputy Governor and an Assistant Deputy Governor. The first appointments were made by the Government. Subsequent appointments are to be made by the Board of Directors subject to the approval of the Governor in Council.

At the first meeting of the shareholders on Jan. 23, 1935, seven directors were elected for terms to run as follows: one until the 3rd annual general meeting, two until the 4th, two until the 5th, and two until the 6th annual general meeting. In future the directors will be elected by the shareholders for terms of 5 years. Directors must hold at least 10 shares of capital stock of the Bank, must be British subjects ordinarily resident in Canada, must not receive remuneration out of public funds in any capacity, and must have no connection with a chartered bank.

There is also an Executive Committee of the Board of Directors consisting of the Governor, Deputy Governor, and one member of the board, which must meet once a week. This committee has the same powers as the board, but every decision is submitted to the Board of Directors at its next meeting. The board must meet at least four times a year. The Deputy Minister of Finance is an *ex officio* member of the Board of Directors and of the Executive Committee, but is without a vote.

The Chartered Banks.—A brief résumé of the Canadian banking system must emphasize: (1) its growth, from the beginning closely related to the Montreal produce and export trade and to the commerce of Halifax and Saint John; (2) its development of the branch bank system in order to meet the demands of a rapidly moving frontier of settlement; (3) its adaptation to the requirements of the grain and cattle trade of the west; and (4) the consolidation during later years of the features which tended towards its early success. The development of a stable system has been accompanied by failures, particularly marked about the middle of the 19th century, but progress has nevertheless been steady, based on sound principles, and adapted as closely as could be to the particular needs of the country.

The branch bank is perhaps the most distinctive feature of the Canadian system as it exists to-day, and for a country such as Canada, vast in area and with a small population, the plan has proved a good one. A result of the growth of branch banks has been the partially centralized system that now obtains—centralized as to banks, of which there are now 10, rather than as to districts as in the partially centralized system of the United States.

A second peculiarity of the system is the existence and operation of the Canadian Bankers' Association. Through this body, which was incorporated in 1900 and acts under the authority of the Dominion Treasury Board, co-operation of individual banks is facilitated and encouraged. The association supervises clearing-house transactions, and oversees the printing and issue of notes to its members. Adherence to similar principles and a linking together of the credit of the system result from the co-operation secured through the association.

The elimination of weaker banks or their amalgamation with more stable institutions has been a progressive move towards greater efficiency. Co-operation between

the banks and the Dominion Government has been made permanent through the medium of periodic returns and the regulation of note issues and reserves.

Apart from the many detailed services rendered to its clients, the Canadian banking system may be said to perform three main functions as follows:—

1. To put into circulation the paper currency which forms the circulating medium for small exchanges.
2. To provide a mechanism of exchange by the issue of bills of exchange, etc.
3. To form a means by which the credit of the banks and their unused deposits may be put to immediate productive use.

Legislation Regarding Chartered Banks.—An account of this subject was given at pp. 958-963 of the 1934-35 edition of the Year Book, to which the interested reader is referred, as considerations of space preclude its repetition here.

Statistics of Chartered Banks.—In Table 10 is given a historical summary of Canadian banking business since Confederation. In order to afford a clear view of the nature of banking transactions in Canada, bank liabilities have been classified in two main groups, liabilities to shareholders and liabilities to the public, only the latter group being ordinarily considered when determining the financial position of any such institution. Assets are divided into four groups, other assets being included in the total. As of interest to students of banking practice, the relative rates of increase of capital and reserve funds may be noted, also the great increase in the proportion of liabilities to the public to total liabilities, and the gradually increasing percentage of liabilities to the public to total assets. The declining proportion of notes in circulation to total liabilities to the public is also characteristic of the evolution of banking in recent times. Holdings of Dominion and Provincial Government and municipal securities were relatively insignificant prior to the Great War.

10.—Historical Summary showing Development of the Canadian

NOTE.—The statistics in this table are yearly averages

LIABILITIES.

Deposits, Loans and Discounts.—As an index of the course of banking business, of the nature of many transactions undertaken and of the general security of bank assets, loans and discounts are of great value. They illustrate clearly the channels into which a large proportion of the potential earning power of the banks is directed, and, by providing a comparison between investments made in lending operations inside and outside of Canada, afford essential information regarding the conduct by a bank of one of its most important activities.

Bank deposits (the demand deposits being to a large extent the product of lending operations, by which credit is advanced on security followed by the deposit of the proceeds of a loan) are also of considerable importance, and, on account of their derivation, are one of the most valuable records of the volume of business done at any time.

Tables 13 and 14, following, give the deposits and loans of Canadian chartered banks for the years 1931 to 1935.

13.—Deposits in Chartered Banks in Canada and Elsewhere, for the calendar years 1931-35.

NOTE.—The statistics in this table are averages computed from the twelve monthly returns in each year.

Totals.....		\$1,149,708,830		\$1,067,609,025

Bank Reserves.—An important change has been made in the regulations governing bank reserves since the Bank of Canada commenced operations. Prior to the establishment of the Bank of Canada, the chartered banks were not required by law to maintain any specific amount of cash reserves against their liabilities. The cash reserve they did maintain was in the form of Dominion notes, specie and foreign currencies. The Bank Act required that 40 p.c. of whatever cash reserves a bank found it expedient to carry should be in the form of Dominion notes. Since the Bank of Canada commenced operations, the chartered banks are required to maintain a reserve of at least 5 p.c. of their deposit liabilities in Canada in deposits with and notes of the Bank of Canada. They are also required to maintain adequate reserves against external liabilities. In addition to these cash reserves, Canadian banks carry three other kinds of assets which are regarded as secondary reserves, being funds more or less immediately available for the liquidation of liabilities. These are: (1) cash balances in banks outside of Canada; (2) call and short loans in New York (the favourite call loan market); and (3) readily marketable securities. These are shown, together with net liabilities, in Table 15. In Table 16, the ratio to net liabilities of each element of the reserves is shown.

15.—Reserves of the Chartered Banks in

NOTE.—The statistics in this table are averages computed from the twelve monthly returns in each year. Figures for 1892-1900 were given on pp. 872-873 of the 1927-28 Year Book. The comparability

¹Net liabilities are obtained by deducting from total liabilities to the public, as shown in Table 10, the items "Notes of other banks", "Cheques on other banks", and "Loans to other banks in Canada, secured, including bills rediscounted", which represent indebtedness within the system and are counter-balanced by credits within the system.

²Revised since the publication of the 1934-35 Year Book.

16.—Ratios of Chartered Bank Reserves to Net Liabilities,¹ calendar years 1901-35.

NOTE.—The statistics in this table are based upon the averages given in the preceding table of the twelve monthly returns in each year. Figures for 1892-1900 will be found at p. 874 of the 1927-28 Year Book. The figures for 1935 below the rules are not comparable with those of previous years, owing to the establishment of the Bank of Canada.

Subsection 2.—The Individual Chartered Banks of Canada.*

During the period from 1881 to 1901, the number of chartered banks doing business in Canada under the Bank Act remained almost the same, 36 in 1881 and 1891, and 34 in 1901, but during the present century there has been in banking, as in industry, an era of amalgamations, the number of banks having dropped to

*Revised by A. W. Rogers, Secretary, The Canadian Bankers' Association.

25 in 1913 and to 10 in 1931. That this has been far from involving a curtailment of banking facilities is seen in Table 10, which shows the development of the banking business since 1867, and in Table 17, which compares the number of branch banks existing in Canada at different periods, and shows a growth from 123 at Confederation to 4,083 inclusive of sub-agencies at Dec. 31, 1930. Since then, owing to the shrinkage in commercial activities as a result of the depression, some unprofitable branches have been closed and the total has declined to 3,431, exclusive of 149 branches and agencies in other countries, as at Dec. 31, 1935.

Table 18 gives the numbers of branches of the various banks, by provinces, as at Dec. 31, 1935, while Table 19 contains the statistics of branches of Canadian banks doing business outside of Canada, an extension of Canadian banking (more especially to Newfoundland and the West Indies) which proceeded very rapidly in the war and early post-war period, rising to a total of 206 in 1921. Since then this number has gradually declined to 149 branches and sub-agencies in 1935.

² Exclusive of two sub-agencies.

Earnings of Canadian Banks.—The chartered banks of Canada are for the most part Dominion-wide institutions, doing business in all parts of the country. Their earnings, therefore, reflect with very considerable faithfulness the fluctuations of general business. So far as individual banks are concerned, the changes resulting

from amalgamations are apt to render the figures incomparable over a period of years. During the six years covered by Table 20, however, only one bank, the Imperial Bank of Canada, has absorbed another bank, *viz.*, The Weyburn Security Bank, on May 1, 1931.

Bank Amalgamations and Insolvencies.—Two tables follow which may be of interest to students of Canadian banking history. The first, showing bank insolvencies since 1867, gives the capital paid up, reserves, assets and liabilities of insolvent banks, and shows also the payments to noteholders and depositors. In the majority of cases, both these classes of creditors have received payment in full. The table of bank absorptions gives the dates of absorption of the 36 banks which have been incorporated with other institutions since 1867.

23.—Bank Insolvencies

NOTE.—No bank that has failed since 1895 has paid anything to shareholders in respect of their capital investment. There is no reliable information as to earlier dates. Information is not available from which to compute losses with respect to liabilities other than deposits and circulation. In some instances these liabilities would include liabilities to Governments (having preference) and to banks and others. Noteholders have experienced no losses whatever since the inauguration of the Bank Circulation Redemption Fund in 1890 or, in fact, since the failure of the Bank of Prince Edward Island in 1881. The amount of double liability actually collected from shareholders of the banks which latterly became insolvent was as follows:—

Name of Bank and Place of Chief Office.	Number of Branches when Operations Ceased.	Date of Charter.	Date of Suspension or Cessation of Normal Operations.	Capital Stock at Date of Suspension.		
				Auth- orized.	Sub- scribed.	Paid- up.

¹ The purchasing banks named in the latter part of the table are no longer in business.

² Dates given since 1900 are those of the Orders in Council authorizing the absorptions.

³ The Banque d'Hochelega after absorbing the Banque Nationale adopted the name Banque Canadienne Nationale.

(Footnotes to Table 23 concluded.)—

⁴ This bank did not suspend payment, but when difficulties were encountered an arrangement was made whereby all liabilities were taken over by the Bank of Montreal which, with certain other banks, assumed responsibility for any loss which might result after realization of assets and double liability of shareholders. Depositors and other creditors accordingly experienced neither loss nor delay. By winding-up order of Sept. 29, 1908, the bank was placed in liquidation and shareholders proceeded against for double liability, in respect of which \$1,232,510 was collected but \$601,534 of that amount subsequently returned. Winding-up proceedings terminated in January, 1918.

⁵ This bank did not suspend payment. By agreement, certain other banks took over its various branches and assumed all of its liabilities; accordingly depositors and other creditors experienced neither loss nor delay. In 1911, when the assisting banks threatened to place the bank in liquidation for the purpose of enforcing payment of double liability of shareholders, a corporation named International Assets Limited, was formed, which assumed all liabilities to the assisting banks and took over the assets of the Sovereign Bank, upon which bonds were issued to the assisting banks for the amount owing them. Numerous shareholders of the Sovereign Bank subscribed to preference shares in the corporation and to the extent that they did so were released from their double liability on shares of the Sovereign Bank; as a result, in excess of \$2,000,000 was collected and paid over to the assisting banks. On Jan. 27, 1914, after it became apparent that a number of shareholders would not subscribe, or pay their double liability voluntarily, the Sovereign Bank (at a time when International Assets Limited was its sole creditor) was placed in liquidation.

⁶ In addition to realization of general assets, the President of this bank advanced sufficient to permit of all liabilities being paid in full without resort to the double liability of the shareholders.

⁷ A Royal Commission inquired into the failure of this bank in 1912 and its report, together with the evidence adduced at the inquiry, are matters of public record.

⁸ As indicated, the liability to noteholders has been fully provided for. A preferred claim of the Province of British Columbia for approximately \$103,000 was settled for \$65,000, subject to the proviso that the province might rank with ordinary creditors for the balance if or when such creditors had received a dividend of 25 p.c. The assets, however, realized only sufficient to pay a first and final dividend to depositors and other ordinary creditors of 7½ p.c. and after allowing for set-offs, etc., the liquidator estimated the loss to such creditors at \$279,000 plus the loss to the province of British Columbia of \$38,000, or a total of \$317,000.

⁹ Interim dividend of 25 p.c. paid by the liquidator in December, 1923, and he anticipated that by conserving the assets a further distribution of possibly 10 to 12 p.c. might be made eventually. Depressed conditions naturally affected the process of liquidation and the amount of the further dividend, if any, will depend entirely on future developments. The Government of Canada, pursuant to investigation by a Royal Commission into the responsibility for and causes of the failure, granted relief to the extent of 35 p.c. of the claims of certain classes of creditors, namely, all those individuals with claims of less than \$500 as well as those with larger claims who were found upon due inquiry to be in special need or straitened circumstances as a result of the failure. This involved a total outlay of approximately \$3,460,000.

Subsection 3.—The Volume of Business Transacted through the Banks.

In advanced industrial societies money is only "the small change of commerce." The great bulk of monetary transfers, particularly in the case of the larger transactions, is made through the banks. Thus it has been estimated that in the United States in 1917 about 6 p.c. of the business transactions of the country were financed by the use of money and the remaining 94 p.c. by the use of cheques. Accordingly, if we knew the aggregate amount of the cheques paid through the banks and charged to accounts, we should have an almost complete record of the volume of business transacted, and thus of the business activity of the country.

Statistics of this character were at first secured through the operation of the clearing houses—places where the representatives of all the banks met daily in the leading cities and presented for payment the notes of other banks and the cheques drawn upon other banks that had been paid in to their institutions in the regular course of business. In Canada, the first clearing houses to be established were those of Halifax (1887), Montreal (1889), Toronto (1891), Hamilton (1891) and Winnipeg (1893), and the number has subsequently increased to 32. In recent years, owing to the reduction in the number of the banks through amalgamations, the proportion of the inter-bank transactions recorded by the clearing houses to the grand total of banking transactions has declined, and the place of total bank clearings as a measure of business has been taken by total bank debits—*i.e.*, the totals of cheques charged to accounts at all banks. The total bank debits at all branch banks situated in the clearing-house cities of Canada have been compiled for 1924 and subsequent years by the Canadian Bankers' Association for the Dominion Bureau of Statistics, which has published the figures monthly and annually with interpretative analyses. Further, in order that an estimate might be made of the proportion of banking transactions outside the clearing-house cities to the total, the Canadian Bankers' Association secured for the month of January, 1935, the grand total of all cheques charged to accounts at all branch banks throughout the Dominion. The results were published in the Bureau's Monthly Review of Bank Debits for February, 1935, and showed that the aggregate of transactions outside the clearing-house cities was in January, 1935, 12½ p.c. of the grand total in the clearing-house cities. The corresponding figures in the five economic areas were as follows: Maritime Provinces 104.2 p.c., Quebec 6.9 p.c., Ontario 13.5 p.c., Prairie Provinces 8.4 p.c., British Columbia 16.7 p.c. Only in the Maritime Provinces does the total of bank debits in clearing-house cities appear to represent inadequately the grand total of business transactions throughout the whole area.

Clearing-House Transactions.—The following table shows for the years 1931-35 the total volume of clearings in the clearing houses of Canada. These figures, it may be added, represent not only actual city clearings but exchanges between numerous rural branches of the banks in each district.

The following is a description of the operation of the Central Clearing Settlement: From the beginning of 1927 until Mar. 9, 1935, balances due to or by each member of the Montreal, Toronto, Winnipeg and Vancouver clearing houses, after having been settled and declared by the clearing-house manager, were communicated daily (in the case of the three latter clearing houses by telegraph) to a trustee—The Royal Trust Company—in Montreal. Each bank lodged with the trustee a substantial sum in Dominion notes. The trustee on receipt of the daily advice, made the appropriate credit or debit entry in each account kept for each bank. In the usual course the trustee made the entries and balanced the accounts

for the day by twelve o'clock noon, and each bank was immediately notified of the state of its account; if the debits of the day on balance exceeded the amount of Dominion notes held for any bank by the trustee, the bank concerned delivered, within an hour of notification thereof, an amount in Dominion notes sufficient to give it a credit balance.

On Mar. 11, 1935, the Bank of Canada and its Agents took over the functions of The Royal Trust Company in this connection. It was arranged that the clearing house at Ottawa should participate directly in the Central Clearing Settlement. Each bank maintains in its account with the Bank of Canada, Ottawa, a balance (in excess of whatever deposit is maintained as part of the 5 p.c. reserve against deposit liabilities in Canada required by statute) deemed sufficient to settle its clearing obligations. The debit or credit balances of the banks at the specified points are daily communicated by the clearing-house manager, and confirmed by the respective bank, to the local Agent of the Bank of Canada (to the Bank of Canada in the case of Ottawa) for transmission to the Bank of Canada at Ottawa by telephone or telegraph, which bank on the same day debits or credits, as the case may be, the account of the respective bank maintained with the Bank of Canada.

Inasmuch as Montreal, Ottawa, Toronto, Winnipeg and Vancouver are the settlement points for the clearing houses in their respective zones, practically all the banking transactions of the country are adjusted daily in Ottawa in the accounts maintained by the banks with the Bank of Canada.

Bank clearings, though generally regarded as a leading barometer of business conditions, are defective in that they record only inter-bank transactions—transactions through which one bank becomes either the debtor or the creditor of another. They do not record the numerous transactions in which the transfer of value is made within a single bank, as, for example, where the purchaser and the seller of values that are paid for by cheque carry their accounts in the same bank. As the number of separate banks has in recent years been steadily diminishing through amalgamations, there being only 10 in December, 1934, as compared with 18 in 1923, inter-bank transactions are bearing a steadily decreasing proportion to the total of business transacted, a fact which goes far to explain the relative smallness of the increase in bank clearings from 1926 to 1929.

Bank Debits.—Since bank clearings have ceased to be a satisfactory measure of general business, the Bureau of Statistics in 1923 took up with the Canadian Bankers' Association the question of securing a record of bank debits, *i.e.*, of all cheques charged against accounts at all banks. The Bankers' Association agreed to secure from January, 1924, the monthly aggregate figures of the amount of cheques charged to accounts at all banking offices situated in the clearing-house centres of Canada, and the figures of cheques charged to accounts (bank debits) are given for the years 1931-35 in Table 26.

It will be noted, as establishing the need of the newer record, that bank debits for 1932 decreased 40·6 p.c. as compared with those of 1928, while bank clearings in the later year show a decrease of 47·4 p.c. The bank debits are a comparable record for the five years; the bank clearings, owing to the reduction in the number of banks, are not a comparable record.

¹Three months only, the Weyburn Security Bank having been absorbed by the Imperial Bank of Canada.

The records of bank debits are also valuable as a contribution to Canada's "equation of exchange." Tables showing the terms of this equation for the post-war period were given in a bulletin published in May 1936; copies may be obtained on application to the Dominion Statistician.

Subsection 4.—Government and other Savings Banks.

In a comparatively new country where capital is relatively scarce, it is a natural thing that the banks which finance the business institutions should also absorb the bulk of the people's savings for use in promoting the business of the country. Thus in Canada the great bulk of the current savings of the people is found in the savings or notice deposits of the Canadian chartered banks, the annual average figures of which are given for recent years in Table 10 of this chapter, the 1935 average being \$1,445,281,247. Further, the current savings of the Canadian people are going very largely into the purchase of life insurance, the total premiums paid in the single year 1934 aggregating \$210,170,891. In comparison with the enormous figures of notice deposits in chartered banks and with total insurance in force, the deposits in the special savings banks are comparatively small, but are none the less significant.

There are three distinct types of savings banks in Canada at the present time, in addition to the savings departments of the chartered banks and of trust and loan companies. First, there is the Post Office Savings Bank, the deposits in which are a direct obligation of the Dominion Government. Secondly, there are Provincial Government savings banking institutions in Ontario and in Alberta, where the depositor becomes a direct creditor of the province. Thirdly, there are in the province of Quebec two important savings banks, the Montreal City and District Savings Bank and the Caisse d'Economie de Notre-Dame de Québec, established under Dominion legislation and making monthly reports to the Department of Finance.

Dominion Government Savings Banks.—Prior to 1929 there were two classes of Dominion Government savings banks in Canada, the Post Office Savings

Bank, under the Post Office Department, and the Dominion Government Savings Bank, attached to the Department of Finance. The former was established under the Post Office Act of 1867 (31 Vict., c. 10) in order to "enlarge the facilities now available for the deposit of small savings, to make the Post Office available for that purpose, and to give the direct security of the Dominion to every depositor for repayment of all money deposited by him together with the interest due thereon". Branches of the Government Savings Bank proper, under the authority of the Finance Department, were established in the leading cities of Canada under the management of the Assistant Receivers-General and in other places, in the provinces of Nova Scotia and New Brunswick, under managers appointed by the Governor in Council. The Dominion Government Savings Bank was amalgamated with the Post Office Savings Bank in 1929. Historical statistics for both systems will be found in Table 27 and more detailed figures covering the last six years in Table 28.

27.—Deposits with Dominion Government Savings Banks,¹ June 30, 1868-1906, and Mar. 31, 1907-35.

NOTE.—Figures for all intermediate years will be found on p. 833 of the 1926 Year Book.

Provincial Government Savings Banks.—Institutions for the deposit of savings are operated by the Provincial Governments of Ontario and Alberta, while a similar institution was in operation in Manitoba from 1924 to 1932 when the depositors' accounts were taken over by the chartered banks.

Ontario.—In the session of 1921, the Legislature of Ontario authorized the establishment of the Province of Ontario Savings Office, and in March, 1922, the first branches were opened. The funds received from this source are used almost exclusively to finance farm loans under the Agricultural Development Act. Interest

at the rate of $2\frac{1}{2}$ p.c. per annum compounded half-yearly is paid on all accounts. The deposits are all repayable on demand. Total deposits on Mar. 31, 1936, were over \$32,000,000 and the number of depositors at that date was over 106,000. Twenty-four branches are in operation throughout the province.

Alberta.—In Alberta the Provincial Treasury receives savings deposits and issues demand savings certificates bearing interest at 3 p.c., or term certificates for one, two or three years, in denominations of \$25 and upwards, bearing interest at $3\frac{1}{2}$ p.c. for one year and $4\frac{1}{2}$ p.c. for two or three years. The total amount in savings certificates on Dec. 31, 1935, was \$9,359,777, made up of \$4,878,634 in demand certificates and \$4,481,143 in term certificates.

Other Savings Banks.—The Montreal City and District Savings Bank, founded in 1846 and now operating under a charter of 1871, had on Dec. 31, 1935, a paid-up capital and reserve of \$4,500,000, savings deposits of \$54,921,401 and total liabilities of \$56,112,670. Total assets amounted to \$60,962,790, including over \$46,000,000 of Dominion, provincial and municipal securities. The Caisse d'Economie de Notre-Dame de Québec, founded in 1848 under the auspices of the St. Vincent de Paul Society, incorporated by Act of the Canadian Legislature in 1855 and given a Dominion charter by 34 Victoria, c. 7, had on Dec. 31, 1935, savings deposits of \$12,818,350, a paid-up capital and reserve of \$2,500,000 and total assets of \$15,958,824.

The co-operative people's banks of Quebec (184 reported to the Provincial Government in 1934) are also an important element in promoting thrift and assisting business in that province. Thus on Dec. 31, 1934, savings deposits in these banks amounted to \$6,089,713, while the amount on loan was \$7,934,002. Loans granted in 1934 numbered 11,295 amounting to \$2,141,801. Profits realized amounted to \$441,876. (See also pp. 780-781 of this volume.)

29.—Deposits in the Montreal City and District Bank and the Caisse d'Economie de Notre-Dame de Québec, as at June 30, 1868-1906, and Mar. 31, 1907-35.

Section 3.—Loan and Trust Companies.

The Canada Year Book, 1934-35, presented at p. 993 an outline of the development of loan and trust companies in Canada from 1844 to 1913.

The laws relating to trust and loan companies were revised by the Loan and Trust Companies Acts of 1914 (4-5 Geo. V, cc. 40 and 55), with the result that the statistics of provincially incorporated loan and trust companies ceased to be collected. The statistics of Tables 31 and 32 refer only to those companies operating under Dominion charter, except that, beginning in 1925, the statistics of loan companies and trust companies incorporated by the province of Nova Scotia, and brought

by the laws of that province under the examination of the Dominion Department of Insurance, have been included. Also, since 1922 provincially incorporated loan and trust companies have made voluntary returns of their statistics to the Dominion Department of Insurance, so that all-Canadian totals are again available for recent years. As indicating the progress of the aggregate of loan company business in Canada, it may be stated that the book value of the assets of all loan companies rose from \$188,637,298 in 1922 to \$213,649,794 in 1931, although declining slightly to \$206,950,770 in 1934. The total assets in the hands of the trust companies increased from \$805,689,070 in 1922 to \$2,664,448,085 in 1934. The latter figure included \$2,436,101,468 of "estates, trust and agency funds". (Table 30.)

Functions of Loan Companies.—The principal function of loan companies is the lending of funds on first mortgage security, the money thus made available for development purposes being secured mainly by the sale of debentures to the investing public and by savings department deposits. Of the loan companies operating under provincial charters, the majority conduct loan, savings and mortgage business, generally in the more prosperous farming communities.

Functions of Trust Companies.—Trust companies act as executors, trustees and administrators under wills or by appointment, as trustees under marriage or other settlements, as agents or attorneys in the management of the estates of the living, as guardians of minor or incapable persons, as financial agents for municipalities and companies and, where so appointed, as authorized trustees in bankruptcy. Some companies receive deposits, but the lending of actual trust funds is restricted by law. The figures of Table 30 are of particular interest in the case of trust companies, which, on account of the nature of their functions, are mainly provincial institutions, since their chief duties are intimately connected with the matter of probate, which lies within the sole jurisdiction of the provinces.

30.—Summary Statistics of the Operations of Dominion and Provincial Loan and Trust Companies in Canada, as at Dec. 31, 1934.

¹ Includes statistics of trust companies chartered by the Government of Nova Scotia but inspected by the Dominion Department of Insurance. ² Includes money in trust for investment amounting to \$2,562,455 in 1914, \$3,113,170 in 1915, \$3,799,149 in 1916, \$3,443,682 in 1917, and \$5,170,463 in 1918; corresponding amounts are included under the heading "Estate, trust and agency funds" for the years 1920 to 1934. The figures for 1919 are not available. ³ Revised since the publication of the 1934-35 Year Book.

Section 4.—Sales of Canadian Bonds.

Interesting aspects of public financing and of the investment of capital in Canadian development since 1911 are illustrated by the sales of Canadian bonds by classes, shown in Table 33. (The figures are reproduced from the *Monetary Times Annual*, 1936.) In the first part of this table, the bonds sold in each year are divided according to whether the financing was for Dominion or Provincial Governments, or for municipalities, railways or other corporations, while in the second part of the table the sales in each year are distributed according to sales in Canada, the United States and the United Kingdom.

The total sales of Canadian bonds naturally reached a very high mark toward the close of the War owing to the Dominion Government financing required to cover the war expenditures. However, the total sales were greater in 1931 than in any other year, owing largely to the Dominion Government's conversion loans.

Dominion Government financing through bond sales since 1907 may be divided into three periods: the first from 1908 to 1914, when the money was required largely for internal development of the country, public works and Government railways; the second from 1915 to 1919, when war expenditures required very large borrowings; and the third since the War, when the issues have been largely required for refunding former loans at lower interest rates and for expenditures in connection with public works and railways.

Provincial bond issues have been on a much larger scale since the War than formerly, probably due to the development of provincially-owned public utilities

and of improved highways. Sales of the bonds of Canadian municipalities, on the other hand, were greater in 1913, toward the end of the "land boom", than they have been in any other year, although sales in 1930 almost reached the record. However, allowing for the increased population in cities and towns, there has not been the same marked increase in the average annual sales of municipal bonds in the period since the War, as compared with the period before the War, that is noticeable in the case of provincial bonds.

Sales of corporation bonds, which from 1926 to 1930 had averaged over \$257,000,000 per year, dropped to \$10,550,000 in 1932, and to \$4,385,000 in 1933, this being largely due to the uncertainty of the industrial outlook. Railway bonds also showed a precipitate decline to \$12,500,000 in 1932, and fell to \$1,000,000 in 1933. In 1934 and 1935 substantial recoveries were shown in both classes.

A very striking change has taken place during the present century in the market in which Canadian bond issues are principally sold. Prior to the War, a great part of the capital required for Canadian development came from the United Kingdom, and the major portion of Canadian bond issues was sold there. The outbreak of war temporarily eliminated that market, and Canadians turned largely to the United States for outside capital. However, the great increase in wealth during and since the War has enabled a much greater proportion of public and industrial financing to be done at home, and beginning with the Victory Loan campaigns, Canadians not only learned how to invest their money in bonds, but had the necessary funds to invest on a large scale in bond issues. These facts are reflected in the latter part of Table 33 showing that since 1915 a greatly increased proportion of the total issues of Canadian bonds has been sold within Canada. Thus, in 1935, 84.0 p.c. of all bonds issued were sold in Canada, 15.9 p.c. in the United States and 0.1 p.c. in the United Kingdom.

33.—Sales of Canadian Bonds, by Class of Bond and Country of Sale, calendar years 1911-35.

(From the *Monetary Times Annual*. Figures for 1904-10 inclusive will be found at p. 921 of the 1933 Year Book.)

Section 5.—Corporation Dividends.

(From the *Financial Post Business Year Book*.)

The 1935 improvement in Canadian business, as indicated by higher corporate earnings, was reflected in the total annual dividend payments of \$213,014,633, compared with \$185,769,736 in 1934, or a gain of 14·7 p.c. As compared with the low year of 1933, the increase represents a gain of nearly 60 p.c. Of the total disbursements for the year, mining companies account for \$57 millions, or 26 p.c. In Table 34 below there is given a six-year record of aggregate monthly dollar payments and yearly totals for all companies paying dividends in Canada:—

34.—Dividend Payments by Canadian Companies, 1930-35.

Section 6.—Foreign Exchange.

The Canadian dollar, adopted as our currency in 1857, was equivalent to 15/73 of the pound sterling; in other words, the pound was equal to \$4.866 in Canadian currency at par, and remained so, with minor variations between the import and export gold points representing the cost of shipping gold in either direction, until the outbreak of the Great War. During the first eleven years after Confederation, the Canadian dollar was at a premium in the United States, as the United States dollar was not, after the Civil War, redeemable in gold until 1878. From the latter date, the dollar in the two countries was equivalent at par, and variation was only between the import and export gold points or under \$2 per \$1,000.

At the outbreak of the Great War, both the pound sterling and the Canadian dollar were made inconvertible into gold and fell to a discount in New York, though this discount was "pegged" or kept at a moderate percentage by sales of United States securities previously held in the United Kingdom, borrowing in the United States, and, after the United States entered the War, by arrangements with the United States Government. After the War, when the exchanges were "unpegged" about November, 1920, the British pound went as low as \$3.18 and the Canadian dollar as low as 82 cents in New York. In the course of the next year or two, exchange was brought practically back to par, and the United Kingdom resumed gold payments in 1925 and Canada on July 1, 1926. From then until 1928 the exchanges were within the gold points, but in 1929 the Canadian dollar again fell to a moderate discount in New York. With the exception of a few months in the latter half of 1930, this discount caused the persistence of the dislocation of exchange in 1931. Dollar rates were below the gold export points, however, only for a few scattered intervals.

Recent Movements in Canadian Exchange.*—Because of Canada's close financial and commercial relationships with the United Kingdom and the United States, Canadian exchange rates are influenced to a large extent by the London and New York markets. The United Kingdom buys much more from Canada than Canada buys from her, but the reverse is the case as regards the trade between Canada and the United States. The result is that there is a supply of bills on London in excess of the amount needed to meet current obligations in the United Kingdom. By offering these for sale for United States funds in London or New York, a triangular balance is approximated by book transactions and the amount of gold transfers is thereby greatly reduced. The volume of sterling exchange on Canadian account thus passed to the New York market does not greatly influence New York rates of sterling exchange under normal conditions; on the contrary, the volume of the New York-London transactions is sufficient to carry the Canadian rates along with them.

In September, 1931, the equilibrium of international exchange was seriously disturbed. This unfortunate turn of events followed a period of over six years during which the nations of the world had worked steadily towards the stabilization of their currency systems upon a gold basis. Within two months of the time when the United Kingdom found it necessary to suspend free gold shipments, however, only a very small number of countries, including the United States and France were left with currencies unshaken by preceding abnormal gold movements. The decision of the United Kingdom to go off the gold standard (Sept. 21, 1931) resulted in a sharp depreciation of sterling in New York. Canadian rates depreciated also,

*Revised by Herbert Marshall, B.A., F.S.S., Chief, Internal Trade Branch, Dominion Bureau of Statistics.

and fluctuated broadly with sterling until the United States dollar dropped from the ranks of gold standard currencies on April 19, 1933.*

During the balance of that year, the premium on United States dollars at Montreal gradually diminished from approximately 20 p.c. until in November it was replaced by a small discount of about 1 p.c. The pound sterling meanwhile advanced from \$4.234 in April to \$5.082 in November. The course of foreign exchanges throughout 1934 was more stable than it had been since 1931. Sterling reacted gradually until it reached its former parity of \$4.866 in September, and subsequent fluctuations centered around that level. This movement was accompanied by minor irregular changes in the United States dollar, which regained a fractional premium early in 1935. The Montreal premium on gold currencies has risen until it stood in the early part of 1935 at approximately 65 p.c. No further major fluctuations occurred in leading exchanges during the remainder of the year. The Belgian belga was devalued, however, in March by approximately 28 p.c., and in November the China (Shanghai) dollar was stabilized at a value equal to roughly 30 cents in Canadian funds.

*The U.S. dollar was subsequently replaced on a gold basis on Jan. 31, 1934, but the gold content of that dollar was reduced from 23.22 grains to 13 $\frac{1}{4}$ grains, or $\frac{1}{10}$ of an ounce. The new U.S. gold dollar, therefore, has a gold content equal to 59.06 p.c. of that of the former gold dollar.

35.—Monthly Averages of Exchange Quotations at Montreal, 1934 and 1935.

NOTE.—The nominal closing quotations in Canadian funds upon which these averages are based, have been supplied by the Bank of Canada.

CHAPTER XXIII.—INSURANCE.*

Insurance business is transacted in Canada by companies of the following classes, *viz.*, (1) companies incorporated under the laws of the Dominion of Canada or of the former "Province of Canada", (2) companies incorporated under the laws of the provinces of Canada, and (3) companies incorporated or formed under the laws of British and foreign countries. The word "companies" as here used, includes fraternal benefit societies, associations and exchanges which transact the business of insurance. The Dominion Insurance Acts provide that companies of classes (1) and (3) above may not transact business anywhere in Canada unless registered† by the Dominion, but these Acts also provide that fire insurance on property in Canada may be effected in companies of class (3) even though not registered, if the insurance is effected without solicitation, advertising or the use of the mails, and if an office is not maintained in Canada, though property to be insured may be inspected and losses may be adjusted. Insurance so effected is generally known as "unlicensed insurance". Companies of class (2) above may transact business in the province of incorporation, subject to compliance with the laws thereof, or in any other province subject to compliance with the laws thereof, or, on compliance with the Dominion laws, may be granted Dominion registration. Most of these companies limit their business to the province of incorporation or to one or more other provinces; a few only have been granted Dominion registration.

What has been said above implies that jurisdiction concerning insurance companies and insurance business is divided between the Dominion and the provinces. There have been many references to the courts and appeals to the Privy Council with a view to determining the respective legislative domains, both in respect of insurance legislation specifically and in respect of legislation affecting companies generally, including insurance companies. The latest Privy Council decision was handed down in 1931. It may now be taken as established that the Parliament of Canada may require companies formed or incorporated outside of Canada to obtain Dominion registration and to continue to be so registered as a condition of transacting business in Canada, and these companies may be required to make returns from time to time of their business and doings in Canada and to furnish evidence of their solvency. The powers of the Dominion go much further in reference to companies incorporated by the Parliament of Canada, but include all of the powers which may be exercised over companies formed or incorporated outside of Canada and registered by the Dominion. The Acts passed in 1932‡, as since amended, implement the powers of the Dominion as determined by the Privy Council decisions.

The Dominion Acts under which companies are registered are administered by the Department of Insurance under the Minister of Finance. The chief officer of the Department of Insurance is the Superintendent of Insurance. The first Super-

*The statistics of Fire, Life and Miscellaneous Insurance have been revised by G. D. Finlayson, Superintendent of Insurance, and those pertaining to Government Annuities (Section 4) by W. M. Dickson, Deputy Minister of Labour.

†Prior to 1932, the Dominion Insurance Acts provided for the "licensing" of companies; the Acts passed in 1932 provide for "registration". The change in terminology does not indicate any change in substance.

‡The Canadian and British Insurance Companies Act, 1932 (22-3 Geo. V, c. 46). The Foreign Insurance Companies Act, 1932 (22-3 George V, c. 47).

intendent was appointed in 1875 as head of a newly created Insurance Branch of the Department of Finance. In 1910 the Insurance Branch was constituted into a separate Department, the Department of Insurance, under the Minister of Finance.

Precedent to obtaining first registration, in addition to filing certain documents, including a full and complete financial statement, a company must satisfy the Minister that it is sound and solvent and must make the required initial deposit of securities, varying from \$10,000 to \$100,000, depending on the class of business to be undertaken. Annual returns are required of all registered companies and the Acts require an examination to be made, by the Superintendent or on his behalf, of the books and records of companies with a view to substantiating the accuracy of the statements filed and the soundness of the companies. Should any company show an unsatisfactory financial condition, the Acts require remedial measures to be taken. British and foreign companies are required to maintain in Canada assets sufficient to cover all of their liabilities in Canada, while Canadian companies are required to maintain in Canada all of their assets, except such as it may be necessary to deposit outside of Canada as security for "out of Canada" business.

The statistics herein given for companies registered by the Dominion are divided into three classes relating to: (1) insurance against fire, (2) life insurance, and (3) miscellaneous insurance, *viz.*, accident, automobile, aviation, burglary, credit, earthquake, explosion, forgery, guarantee, hail, leakage, live-stock, sickness, steam boiler, title, tornado and weather insurance. These statistics are compiled from the reports of the Department of Insurance; throughout they apply to calendar years.

Since 1915, the Department of Insurance has collected statistics, included herein, of business transacted by provincial companies licensed by the provinces, classified as to: (1) business transacted within the province of incorporation, and (2) business transacted in other provinces.

Returns for "unlicensed insurance", above referred to, were required under Section 16 of the Special War Revenue Act for taxation purposes, and statistics compiled from these returns were published in the Canada Year Book, prior to the 1933 edition, as Table 8. This section of the Act having been held unconstitutional by the Privy Council decision, Oct. 22, 1931, on an appeal from the Court of the King's Bench of the province of Quebec, the returns for 1930 were incomplete and were not published in the 1933 Year Book. By an amendment to the Act at the 1932 session of Parliament, a section analogous to Section 16 was enacted, applicable to unlicensed insurance and the information was, therefore, revived in the 1934-35 edition. This information is, however, no longer required from such companies and has been again dropped.

Statistics of Dominion Government annuities are given at the end of this chapter. The Department of Labour administers the Acts under which these annuities are sold.

Section 1.—Fire Insurance.

Fire insurance in Canada began with the establishment by British fire insurance companies of agencies, usually situated in the sea ports and operated by local merchants. The oldest existing agency of a British company is that of the Phoenix Fire Office of London, now the Phoenix Assurance Company, Ltd., which commenced

business in Montreal in 1804. On account of the growth of the insurance business of these early British companies, branch offices were established and local managers were appointed, charged with directing the companies' affairs in Canada.

The Halifax Fire Insurance Co. is the first purely Canadian company of which any record is available. Founded in 1809 as the Nova Scotia Fire Association, it was chartered in 1819 and operated in the province of Nova Scotia until 1919, when it was granted a Dominion licence. Among the other pioneer fire insurance companies still in operation, mention may be made of the following: the Quebec Fire Assurance Co., which commenced business in 1818 and was largely confined in ownership and operations to Quebec province; the British America Assurance Co., incorporated in 1833, the oldest company in Ontario; the Western Assurance Co., organized in 1851, and now, after a rapid and steady growth, one of the largest companies of its kind on the continent; two United States companies, the Aetna Insurance Co., Hartford, Conn., and the Hartford Fire Insurance Co., which commenced business in Canada in 1821 and 1836 respectively.

The report of the Superintendent of Insurance for the year ended Dec. 31, 1934, shows that at that date there were 235 fire insurance companies doing business in Canada under Dominion registration; of these 50 were Canadian, 67 were British and 118 were foreign companies. In 1875, the first year for which authentic records were collected by the Department of Insurance, 27 companies operated in Canada—11 Canadian, 13 British and 3 American. The proportionate increase in the number of British and foreign companies from 59 p.c. to almost 79 p.c. of the total number is a very marked point of difference between the fire and life insurance businesses in Canada, the latter being carried on very largely by Canadian companies.

Although in its early days the Dominion did not prove a very lucrative field for fire insurance companies, the great advance in building construction and the wide use of improved fire appliances and safety devices have materially reduced the danger of serious conflagrations and have placed the risks assumed by companies in Canada on an equality with those of other countries.

A feature of the fire insurance business, besides the large percentage of British and foreign companies, is the continued increase in the number of companies which are operating on the mutual or reciprocal plan. These companies, in which all profits or losses are directly received or paid by the policyholders, are making themselves felt as competitive factors in the fire insurance business.

Statistics of Fire Insurance.—Statistical tables of fire insurance in Canada follow, illustrative of the progress of total business since 1869 and of the operations of individual companies for the year 1934. The net amount of fire insurance in force on Dec. 31, 1934, with companies holding Dominion licences, was \$8,804,840,676, while the net amount in force with provincial companies on the same date was \$1,240,396,613. Thus the grand total fire insurance in force on Dec. 31, 1934, with Dominion and provincial companies was \$10,045,237,289.*

Table 1 shows figures of the growth since 1869 of companies registered by the Dominion, the relationship between losses paid and net premiums written, and the variation in the cost per \$100 of insurance. It will be observed that the cost of insurance reached a maximum in 1904 and 1905; there has since been a steady decrease with the exception of the years 1921, 1922 and 1924, when temporary reversals of the downward swing were in evidence. It is noteworthy that the cost

*According to preliminary figures fire insurance in force in companies registered by the Dominion decreased by \$35,652,689 in 1935.

of fire insurance has decreased by 53.75 p.c. since 1905. Table 2 shows the business done in Canada by individual companies during the year 1934, while in Tables 3, 4 and 5 are given figures of the assets, liabilities, incomes and expenditures during the years 1930 to 1934, classified by nationality of companies. A further summary of business is given by provinces in Table 6 for the years 1933 and 1934, showing premiums and losses classified by provinces and by nationality of companies. Further, a summary of the business transacted by both Dominion and provincial licensees is given in Table 7.

Summary of Fire Insurance in Canada, 1934.—Of the total amount of fire insurance effected in Canada during each year, a part is sold by companies holding provincial licences and permits. Such companies generally confine their operations to the province of incorporation, but may be allowed to sell insurance in other provinces. The bulk of fire insurance business, however, is transacted by companies registered by the Dominion. Operations in 1934 are summarized in Table 7.

Section 2.—Life Insurance.

An article descriptive of the growth and development of life insurance in Canada, contributed by A. D. Watson, of the Department of Insurance, Ottawa, appeared on pp. 937-944 of the Canada Year Book, 1933.

Life Insurance Statistics.—Life insurance business was transacted in Canada in 1934 by 41 companies registered by the Dominion, including 27 Canadian, 6 British and 8 foreign companies. There were also 6 British and 6 foreign companies registered to write insurance but which had practically ceased to write new insurance, while 2 other British and 3 other foreign companies were authorized under the Act to transact business in connection with policies written prior to Mar. 31, 1878. One British company which retired as a writer of new insurance in 1878 has ceased all operations and has withdrawn from Canada. One foreign company was licensed to transact business in 1931, but has not yet written any life insurance business in Canada, except by way of re-insurance. Another foreign company was registered in 1934 but did not issue any life insurance in Canada during the year.

As shown by the historical statistics of Table 8, life insurance business in Canada has expanded from very small beginnings, the total net life insurance in force in all companies licensed by the Dominion in 1869 being only \$35,680,082, while in 1934 it was \$6,220,725,929,* the amount per head of the estimated population of Canada having more than doubled since 1919—an evidence of the general recognition of the value of life insurance for the adequate protection of dependants against misfortune. Notable also from these historical statistics is the fact that in this field British companies, which were the leaders in 1869, have fallen far behind

*This total does not include \$167,355,701 of fraternal insurance. Preliminary figures for 1935 indicate \$6,259,732,426 of life insurance in force in Dominion companies not including \$157,524,445 of fraternal insurance.

the Canadian and the foreign companies. The total net amount of new insurance effected during the year 1934 was \$595,194,820,* as compared with \$578,585,659 in 1933, \$653,249,366 in 1932, \$782,716,064 in 1931, \$884,749,748 in 1930 and \$978,141,485 in 1929, while the premiums paid were \$202,583,536, as compared with \$206,954,224 in 1933, \$216,132,957 in 1932, \$225,100,571 in 1931, \$220,523,727 in 1930 and \$210,728,479 in 1929.

The following diagram shows the rapid increase of life insurance in force in companies licensed by the Dominion between 1870 and 1931, and the slight decline between the latter year and 1934.

LIFE INSURANCE IN FORCE IN CANADA

1870-1934

DOMINION COMPANIES

In Table 9 detailed statistics are given of the business of Canadian, British and foreign companies, respectively, by companies, in 1934, while Table 10 is a summary showing the business of Canadian, British and foreign companies for the past 5 years. Table 11 shows the ordinary and industrial policies in force and effected during the year ended Dec. 31, 1934. Table 12 gives the insurance death-rates by classes of companies, and Tables 13, 14 and 15 show, respectively, the assets, liabilities, cash income and expenditure of Canadian and other life insurance companies for the years 1930-34. Statistics of Dominion fraternal insurance are given in Table 16 and of Dominion and provincial insurance combined in Table 17, which shows that on Dec. 31, 1934, the total life insurance in force in Canada was \$6,552,160,364.

*The net amount of new insurance effected in 1935 was \$588,348,611 according to preliminary figures.

¹ Figures do not include insurance in force and effectuated by Fraternal Societies operating under Dominion charters. The amount of insurance in force in such societies amounted to \$157,524,445 in 1935, according to preliminary figures. Corresponding figures for the years 1930-34 are given in Table 16, pp. 959-960.

² For estimates of populations upon which these figures are based see p. 141.

³ Subject to revision.

⁴ Revised since the publication of the 1934-35 Year Book.

9.—Life Insurance in Force and Effectuated in Canada by Companies Operating under Dominion Registration, 1934.

NOTE.—The statistics of this table do not include the business of Canadian companies outside of Canada.

¹ Includes expenditure on business outside of Canada. ² Expenditure in Canada.

Life Insurance Effected through Fraternal Benefit Societies.—In addition to life insurance, some fraternal benefit societies grant other insurance benefits to members, notably sickness benefits, but these are relatively unimportant. Table 16 gives statistics of life insurance effected with fraternal benefit societies by Canadian members, together with statistics of assets, liabilities, income and expenditure relating to the whole business of Canadian societies and to the business in Canada of foreign societies. The rates charged by these societies are computed to be sufficient to provide the benefits granted, having regard for actuarial principles. Each benefit fund of every society must be valued annually by a qualified actuary (Fellow, by examination, of the Institute of Actuaries, London; of the Faculty of Actuaries in Scotland; of the Actuarial Society of America; or of the American Institute of Actuaries), and unless the actuary certifies to the solvency of each fund a readjustment of rates or benefits must be made. The statistics in the first part of this table relate to the Canadian societies reporting to the Insurance Department of the Dominion Government. These numbered 9 in 1934, *viz.*, Alliance Nationale, Ancient Order of Foresters, Artisans Canadiens-Français, Canadian Woodmen of the World, Catholic Mutual Benefit Association, Commercial Travellers' Association of Canada, Independent Order of Foresters, Grand Orange Lodge of British America and the Ukrainian Mutual Benefit Association of St. Nicholas of Canada.

Under an amendment to the Insurance Act, effective Jan. 1, 1920, all foreign fraternal benefit societies were required to obtain Dominion authority precedent to transacting business in Canada, but any such societies which at that date were transacting business under provincial licences, while forbidden to accept new members, were permitted to continue all necessary transactions in respect of the insurance of their then members. Most of these societies have since obtained Dominion authority to transact business, also some foreign societies which had not previously been licensed by the provinces. Of both classes of societies, 24 transacted business

in Canada in 1934, *viz.*, Aid Association for Lutherans, Association Canado-Américaine, Catholic Order of Foresters, Commercial Travelers' Mutual Accident Association of America (accident business only), Expressmen's Mutual Benefit Association, First Catholic Slovak Union, First Catholic Slovak Ladies' Union, Jewish National Workers' Alliance, Knights of Columbus, Ladies' Catholic Benevolent Association, Lutheran Brotherhood, Lutheran Mutual Aid Society, Maccabees, Modern Woodmen of America, National Fraternal Society of the Deaf, National Slovak Society of U.S.A., Royal Arcanum, Slovene National Benefit Society, Sons of Norway, United Commercial Travelers of America (accident business only), Woman's Benefit Association, Women's Catholic Order of Foresters, Workmen's Circle and Yeomen Mutual Life Insurance Company which is continuing the business issued by the Brotherhood of American Yeomen.

Summary of Life Insurance in Canada, 1934.—In addition to the business transacted by life insurance companies registered by the Dominion, a considerable volume of business is also transacted by companies licensed by the provinces. Statistics of these provincial companies have been collected since 1915 by the Department of Insurance. Table 17, showing policies effected and in force, premiums received and losses paid, in Canada in 1934, summarizes the volume of business done by both life companies and fraternal societies, whether registered by the Dominion or licensed by the provinces.

Section 3.—Miscellaneous Insurance.

Since 1875 the growth of insurance business other than fire and life has been steady. The report of the Superintendent of Insurance for the calendar year 1880 shows that the number of companies licensed for the transaction of accident, guarantee, plate glass and steam boiler insurance—the only four classes of miscellaneous insurance then transacted—was 5, 3, 1 and 1 respectively. The report for the year 1934 shows that miscellaneous insurance in Canada now includes: accident, automobile, aviation, burglary, credit, earthquake, explosion, forgery, guarantee, hail, leakage, live-stock, steam boiler, title, tornado, weather insurance, etc. In 1880, 10 companies transacted business of the miscellaneous kind but in 1934 such insurance was issued by 240 companies, of which 51 were Canadian, 64 British and 125 foreign; 183 of these 240 companies also transacted fire insurance. In addition, 15 fraternal orders or societies carried on accident and sickness insurance as well as life insurance business and 2 fraternal orders or societies carried on accident insurance only.

Accident Insurance.—The first licence of this kind was issued to the Travelers' Co., of Hartford, Conn., in 1868. The first licence to a Canadian company was issued to the Accident Insurance Co. of Canada, which was organized in 1872 and commenced business in 1874. In 1927 life companies were empowered to include in life insurance policies additional insurance, payable only in event of death from accident, up to an amount not exceeding the amount payable in event of death from other causes, commonly known as "the double indemnity benefit". A large proportion of life insurance policies issued in recent years includes this benefit. Seventy-seven companies transacted accident insurance in 1934.

Automobile Insurance.—This is now one of the most important branches of the miscellaneous class of insurance. Premiums increased from \$80,446 in 1910 to \$573,604 in 1915 and to \$18,260,176 in 1930; for 1934 they were \$11,925,811, showing a very slight decrease as compared with 1933 and 34.7 p.c. decrease, compared with 1930. There has been an increase in the number of companies from 7 to 157 during the 24-year period.

Plate Glass Insurance.—Policies were first sold in Canada by the Metropolitan Plate Glass Insurance Co., a United States concern, which withdrew from Canada during 1882. The 77 companies operating in Canada in 1934 received

premiums of \$508,960 and incurred losses of \$264,625. compared with premiums of \$468,120 and losses of \$243,627 for 1933.

Burglary Insurance.—In 1893 only one company issued burglary policies. A second followed in 1905 and in 1910 five companies were operating, while 73 companies sold this type of insurance during 1934. The premium income of these companies amounted in 1934 to \$1,278,593, and the losses incurred amounted to \$588,837.

Hail Insurance.—Insurance against hailstorms is a class of business of comparatively recent development in Canada. During the year 1934, 38 companies undertook this class of risk, the premiums written amounting to \$494,216, and the losses incurred to \$473,346. The total premiums for the 25 years during which this business had been carried on in Canada amounted to \$66,932,408 and the total losses paid to \$46,169,147.

Section 4.—Government Annuities.

In the early years of the 20th century, there arose throughout the civilized world a distinct movement in favour of ameliorating the living conditions of the less well-off members of society. One form which this movement took in the United Kingdom was that of old age pensions, granted by the State as a gift to its poorer citizens, whose earnings were very generally insufficient to permit of a margin of saving. In Canada, where wages were higher and a margin of saving was possible, the movement at first took the form of providing, by establishing Government annuities, an absolutely safe investment for such savings, which had only too often been lost through the inexperience of their owners, leaving the latter a burden upon the charity of relatives or of the public.* The cost of administering these annuities is borne by the Dominion Government.

Under the Government Annuities Act (c. 7, R.S.C., 1927, amended by c. 33, R.S.C., 1931), His Majesty the King, represented by the Minister (at present the Minister of Labour), may sell to persons over the age of 5 years, domiciled or resident in Canada, immediate or deferred annuities of not less than \$10 nor more than \$1,200 (1) for the life of the annuitant, (2) for a term of years certain, not exceeding 20 years, or for the life of the annuitant, whichever period shall be the longer, or (3) to any two persons domiciled in Canada during their joint lives, and with or without continuation to the survivor. The property and interest of any annuitant in any contract for an annuity is neither transferable nor attachable. The purchaser may contract that, in the event of the death of the annuitant before the date fixed for the annuity to begin, all money paid shall be refunded to the purchaser or his legal representatives with interest at the rate of 4 p.c., compounded yearly.

From Sept. 1, 1908, the date of the inception of the Annuities Branch, up to and inclusive of Mar. 31, 1935, the total number of annuity contracts issued was 22,736. Of these contracts, 2,510 have been cancelled, leaving in force on Mar. 31, 1935, 20,226 contracts. The total amount of purchase money received during the same period was \$56,661,889. Table 22 gives the details of annuities contracted for and purchase money received from 1909 to 1935, by years.

*A Dominion-Provincial non-contributory scheme of old age pensions, providing for the payment, to persons 70 years and over, of pensions not exceeding \$20 per month, contributed by the Dominion and the provinces which become parties to the scheme, was enacted by Chapter 35 of the Dominion Statutes of 1927. The system is now in effect in British Columbia, Alberta, Saskatchewan, Manitoba, Ontario, Nova Scotia, Prince Edward Island, and the Northwest Territories. For further particulars, see pp. 777-778.

¹Seven months.

Statistics of the Annuities Fund and value of all contracts issued are given in Tables 23 and 24. From Sept. 1, 1908, to Mar. 31, 1935, 22,736 annuities had been issued. On Mar. 31, 1935, 8,834 immediate annuities and 11,392 deferred annuities were in force. The total value of these annuities on that date was \$47,178,019 and the amount of annuity under vested contracts in force on that date was \$3,675,398.

¹Amount of immediate annuities.

It will be seen from the statements above that government annuities have grown steadily in favour, especially since 1921, the fund reaching a total of \$46,906,192 on Mar. 31, 1935.

CHAPTER XXIV.—COMMERCIAL FAILURES.

According to Section 91 of the British North America Act, "the exclusive legislative authority of the Parliament of Canada" extends to bankruptcy and insolvency legislation, and an Insolvency Act (32-33 Vict., c. 16) was actually passed by the Dominion Parliament in 1869, applying to the four original provinces. This Act was in force for four years and was renewed by c. 46 of the Statutes of 1874, while in 1875 a new Insolvency Act (38 Vict., c. 16) applicable to the whole Dominion was passed, but was repealed in 1880. After this there was no Dominion legislation on the subject of bankruptcy until 1919. During the interval of nearly 40 years commercial failures were handled under provincial legislation, and the statistics relating to such failures during this period were compiled and published by Dun's and Bradstreet's commercial agencies. In 1919 a general Dominion Bankruptcy Act was passed (9-10 Geo. V, c. 36). Statistics of commercial failures dealt with under this Act since it came into force in 1920 have been compiled and published by the Dominion Bureau of Statistics. (See pp. 970-971.)

The history of commercial failures in Canada is traced by years from 1915 in Table 3.

Failures, by Divisions of Industry.—In every year the great majority of the commercial failures of the country are found among the trading establishments which are so much more numerous than the manufacturing. Thus, according to Dun and Bradstreet's records, out of a total of 1,402 commercial failures in Canada in 1935, 839 were among the retail trading establishments, including 329 in food, 173 in textiles and clothes and 139 in the "all other" classification which includes general stores.

Out of the 355 manufacturers who failed, 87 were in the textiles and clothes business 54 in foods and 49 among manufacturers of forest products. The larger scale on which manufacturers operate is evident from the fact that the defaulted liabilities of the 355 manufacturers were greater than those of the 839 retail traders. The figures of commercial failures are analysed in detail for the years 1934 and 1935 in Table 1, while the totals are given by provinces for the same years in Table 2.

¹ Canada only. ² Revised since the publication of the 1934-35 Year Book.

Assignments under the Bankruptcy and Winding Up Acts.—Under the Bankruptcy and Winding Up Acts (R.S.C., 1927, cc. 11 and 213) certain documents relating to assignments have, since 1920, been forwarded to the Dominion Statistician for statistical analysis. Table 4 gives the resulting figures of failures, by provinces, in 1922 and subsequent years, while Table 5 classifies them by branches of business. Table 6 gives the assets and liabilities of the assignors. A detailed analysis of the 1935 failures, by provinces and branches of business, is made in Table 7.

Administration of Bankrupt Estates.—The administration of bankrupt estates is now carried on by the Superintendent of Bankruptcy, appointed in 1932, with the object of conserving as far as possible the assets of bankrupt estates for the benefit of the creditors. Figures from the first report were given at p. 1039 of the 1934-35 Year Book, while those for 1935 are shown in Table 8.

8.—Totals of Assets, Liabilities, Assets Realized and Costs of Administration in Bankrupt Estates Closed in the calendar year, 1935.

(From the Annual Report of the Superintendent of Bankruptcy. Figures for 1933 and 1934 are given at p. 1039 of the 1934-35 Year Book.)

CHAPTER XXV.—EDUCATION.

Section 1.—Schools, Colleges and Universities.*

Throughout the Dominion of Canada public education, except for instruction of the native Indian population, is a matter of provincial concern. Before Confederation, the maritime colonies were separated from Ontario by French-speaking Quebec, and in each colony an educational system specially adapted to the local conditions had come into existence. When Confederation was under consideration, the protection of existing vested rights was the predominant consideration. As a result, Section 93 of the British North America Act, which embodies the Canadian constitution in so far as that constitution is a written one, provides that in and for each province the Legislature may exclusively make laws in respect of education, except that "nothing in any such law shall prejudicially affect any right or privilege with respect to denominational schools which any class of persons have by law in the province at the union".

Inasmuch as the administration of public education is one of the chief functions of Provincial Governments, in each of the provinces except Quebec there is a Department of Education administered either by a member of the Provincial Executive Council or Cabinet or by the Executive Council or Cabinet as a whole. In practice, however, the routine administration is in the hands of the permanent officials of the Department of Education, who are members of the permanent civil service. In Quebec the Superintendent of Education, appointed by the Government, is *ex officio* President of the Council of Public Instruction. The link between the Department of Public Instruction and the Government is the Provincial Secretary; there are also two deputy heads, called the French and English Secretaries of the Department.

Since the Departments of Education are permanent authorities, controlled as to details of administration by permanent officials, educational policy is relatively permanent; further, the control of the governments over education throughout the provinces is relatively stronger than in the United States. A capable Deputy Minister or Superintendent of Education impresses his personality and his views upon the whole system of his province, especially as in practice he controls the payment of government grants, which constitute, on the average, about 14 p.c. of the total expenditure applied to educational purposes.

The Department of Education in each province naturally has its headquarters at the capital of the province. Its local representatives are the school inspectors, who are appointed and paid by the Provincial Governments, except for the "public" and "separate" schools in Ontario, where they are appointed (in all but unorganized districts) by the county or city municipality from a list approved by the province.

Education in Quebec.—In Quebec there are two distinct systems of education—the Roman Catholic and the Protestant systems—in each of which the teaching of religion takes a prominent position. In the latter, which is under the control of the Protestant Committee of the Council of Public Instruction, with an English Secretary, the curriculum and the general system of education are similar to those in the other provinces, except that the highest grade is Grade XI, from which students are matriculated to McGill University and Bishop's University, the two Protestant English-speaking universities of the province.

* Revised by M. C. MacLean, M.A., F.S.S., Chief, Education Statistics Branch, Dominion Bureau of Statistics. This Branch is concerned with compiling and publishing comparable data relating to educational institutions throughout Canada, and to this end co-operates with the Provincial Departments of Education. A list of the publications of this Branch will be found in Chapter XXIX, Section 1, under "Education".

In the Roman Catholic schools, which are mainly French-speaking, as the Protestant schools are English-speaking, the administration is in the hands of the Catholic Committee of the Council of Public Instruction, with a French Secretary. General elementary and continuation or "complementary" training is given by means of a curriculum, extending over one preparatory "year", six "years" of an elementary course, and two "years" of a complementary course. Some of these "years" require more than a year to complete, the completion of the "sixth year" corresponding in a general way to the end of the elementary grades, or high school entrance, in other provinces. Beginning in the school year 1929-30, a new superior course of three "years" beyond the complementary course was provided for. These are called the ninth, tenth and eleventh "years". Over 5,200 students were enrolled in the third year of introduction of the change.

Trends in Expenditure on Education.—The general economic improvement of 1934 was not reflected in school support. This, however, was to have been expected by reason of school expenditures being made largely out of public funds, budgeted in advance, with the result that school support in any year reflects the general economic conditions of the previous rather than the current year. The highest point of school expenditures was in 1930-31, a year or more later than the peak of business activity; and since the lowest level of general business was in 1933, it was to be expected that school support would show little improvement before 1934-35.

The total expenditures on universities, colleges, and schools of all kinds was about \$139 million in 1934, and the sum came from different sources in approximately the following proportions: Dominion Government, 1.8 p.c.; Provincial Governments, 20.8 p.c.; counties (3 provinces), 2.1 p.c.; school administrative units, 61.8 p.c.; pupils' fees, 8.0 p.c.; endowments, 1.7 p.c.; other sources, 3.8 p.c. The amounts represented by the last three constituent percentages went mainly to universities, colleges and private schools.

The summary hereunder indicates the trend of finances in the provincially-supported school systems (not including universities and private schools) for the latest few years. It is not possible to show for all of the provincial systems how much money was spent yearly, but it can be shown approximately how much was available from current revenue. This is the figure in the first column of the summary. The second column indicates the amount of their long-term debt, from the annual increase of which a conception of the annual amount spent that did not come from current revenue may be gained.

The recorded current revenue of 1934 was about \$3 million higher than in 1926, but it should also be noted that in the earlier year the debenture debt had been increased by more than \$4 million, whereas in the later year it was reduced by nearly \$6 million. Thus the expenditure for schools in 1934 must have been considerably less than in 1926, although, as may be seen in the last column of the table, the number of pupils for whom they had to provide daily accommodation increased about 20 p.c., and this increase was to a disproportionate degree in the more advanced and more costly end of the schools. The real drop in financial support per pupil must have been between one-fourth and one-third.

There is no doubt that the item of expenditure which has suffered relatively the greatest reduction has been "new or improved school properties and equipment". In some quarters, however—notably in rural schools, especially in the western provinces—the reductions in teachers' salaries have been heavy. In the extreme case of Saskatchewan rural teachers they have exceeded 50 p.c. Table 6 shows the trend of salaries among teachers in various categories for all provinces.

The Problem of the Small Financial Unit.—From what has been said on p. 974, the high proportion of all education costs borne by the local administrative units independently of one another, may be deduced. This amounted to over 60 p.c. of the cost for all formal institutions of learning, and about 80 p.c. of the cost for the general provincially-controlled schools. In other words, on the average each school district (called school section in Nova Scotia and Ontario, school municipality in Quebec) is individually responsible for the payment of more than 60 p.c. of all the institutional education that its children receive, and for the cost of about 80 p.c. of all the schooling they receive in the public elementary and secondary schools. As there are over 23,000 independent local administrative units, or school districts, this means that on the average each community of 450 people (or 100 families) is obliged to rely on its own resources for the greater part of the cost of its children's education. Actually, there are a few larger cities where there is pooling of responsibility among a relatively large population, and a great many small school communities where the pooling is limited to a small fraction of 100 families, making the median size of school districts very much smaller than the mean. Above the mean there are approximately 1,000 school areas (there are 859 centres, each with a population of 500 or more), about half of which have two school boards due to denominational differences. Their population is more than half of the Dominion total, leaving the remaining 5,000,000, or thereabouts, with more than 21,000 school areas, each with a population of fewer than 250 persons on the average.

Among such small communities there is naturally great divergence in ability to pay for schools, and in consequence great variation in the quality of schooling available to children in different localities, although some of the smaller and poorer communities assess themselves very much more heavily for school support than do the larger and more wealthy. This, in brief, is the problem of the small unit of school support, a problem which, in the recent difficult years for school financing, has been actively exercising the attention of educationists from coast to coast. In most of the provinces, government-appointed commissions, or legislative committees, have studied the problem quite recently, and have considered the feasibility of equalizing a greater proportion of school costs over a whole province, or substantial sections of a province, such as counties.

Subsection 1.—The Provincially-Controlled Schools.

General elementary and secondary education throughout the Dominion, in so far as it is provincially-controlled, is carried on, except in Quebec, in free schools supported by general taxation. These schools may be divided into 12 grades, 8 of which are normally considered to be elementary and 4 secondary. The twelfth grade is in most provinces a postgraduate year, corresponding to the first year of a university course. The average pupil takes one school year to complete each grade, so that entering school at 6 years of age, he would matriculate to the university at 17 or 18.

A historical summary of the enrolment and average attendance in provincially-controlled schools from 1911 to 1934 is given by provinces in Table 2. The enrolment and average attendance, in cities of 10,000 population and over, are given in Table 3.

2.—Historical Summary of Enrolment and Average Attendance in Schools in Canada, by Provinces, 1911-34.

TOTAL NUMBERS ENROLLED.

NOTE.—Figures of enrolment and average attendance in various years prior to 1911 are given on pp. 839-840 of the 1932 Year Book.

¹Figures revised since publication of the 1934-35 Year Book. ²Half-year only. ³Figures for Quebec and Ontario for 1934 not available at time of going to press.

3.—Number of Pupils Enrolled and in Average Attendance in All General Schools, and in High School Grades, in Cities of 10,000 or over, by Sex, 1934, or Latest Year Reported.

NOTE.—The high school enrolment in Quebec cities is not given because it would not be complete without including the high school pupils of the classical colleges and independent classical schools and of the normal schools. The figures for secondary grades for Ontario cities represent high schools, vocational schools, and collegiate institutes only; they do not include pupils in fifth classes.

¹ Includes 300 pupils not classified by sex.

Secondary Education.—In the past quarter of a century the number of pupils of both sexes doing work of secondary grade has shown a very great absolute increase as well as a large increase relative to the number in elementary grades.

The available statistics are given by years in Table 4, and show that in each of the provinces and in every year, except in the case of B.C. for 1920, the number of girls in the secondary grades has exceeded the number of boys. Another characteristic is the much greater number of urban than of rural children. The Census of 1931 indicated that only 25.4 p.c. of rural children in the age-group 15-19 were in school, as compared with 41.2 p.c. of urban children of the same age-group.

4.—Provincially-Controlled Schools in Canada: Comparative Numbers of Boys and Girls Doing Work of Secondary Grade in each of Seven Provinces, 1911-34.¹

NOTE.—For corresponding figures for 1901-10, see p. 974 of the 1933 Year Book. B=boys; G=girls.

² Figures revised since the publication of the 1934-35 Year Book; in the case of Ontario, from 1923 to 1934; British Columbia, from 1927 to 1934.

Subjects of Instruction in Secondary Grades.—The subjects taken in the elementary grades of the provincially-controlled schools are settled by the curricula, but in the secondary grades there are usually options appealing to different types of pupils, wishing to follow different callings. Statistics of the subjects taken by pupils in secondary grades in 1930, available for six provinces, were presented

in the Canada Year Book, 1932, p. 843, showing, among other things, the small number of pupils taking Greek and German and the high proportion studying French and Latin. The "Annual Survey of Education in Canada, 1934" shows in detail the changes in the subjects chosen in recent years by secondary grade pupils in the different provinces.

Vocational and Technical Education.—The introduction of technical and vocational courses into the high school curricula has been stimulated in recent years by the Technical Education Acts of 1919, 1929 and 1931, under the terms of which the Dominion Government undertook to provide subsidies to the provinces to encourage the growth of technical instruction. From the outset evening classes during the winter months have been an important part of the work of the technical schools. The numbers of students in institutions for technical education coming within the scope of the Technical Education Act of 1919 (9-10 Geo. V, c. 73) in the academic years ended June 30, were as follows: 1921, 56,744; 1922, 61,961; 1923, 70,300; 1924, 79,829; 1925, 88,024; 1926, 88,961; 1927, 96,682; 1928, 109,008; 1929, 121,252. In the years since 1929 not all provinces have been receiving grants, but Table 5 provides a record of pupils receiving instruction of a technical character in the provincially-controlled schools in 1934.

5.—Enrolment in Provincially-Controlled Vocational Schools in Canada, by Provinces, school year ended June 30, 1934.

¹ This table does not include students in commercial courses in Quebec who, it will be noted, constitute a numerous group in other provinces. In Quebec statistics they are included with the high schools, classical colleges, etc. Moreover, this table comes far short of demonstrating the full importance of technical or vocational training in Quebec for another reason. All the work in the Catholic schools in advance of the elementary years (i.e., in the five complementary and superior years, including about 30,000 pupils) has a highly vocational character. Apart from certain compulsory general subjects in these years, optional subjects are grouped in four vocational sections, in one of which each pupil studies.

² Enrolment in Ontario

schools is not for the full year but for the month of May.

Teaching Staffs.—As shown in Table 1, the teaching staffs of ordinary day schools under provincial control in Canada consisted in 1934 of 73,039 teachers, 16,839 males and 56,200 females. The "Annual Survey of Education in Canada, 1934" deals in detail with the classification of these teachers, the rates of salary paid and the teaching experience. Table 6 summarizes statistics regarding rates of salary, as far as these are available.

Teachers in Training.—Detailed information regarding male and female teachers in training in 1933-34 is given in the Bureau of Statistics' "Annual Survey of Education in Canada, 1934". A summary of the number of teachers in training in each year from 1911 to 1934 is furnished by provinces in Table 7.

7.—Provincially-Controlled Schools in Canada: Number of Teachers in Training in Normal Schools and Colleges, by Provinces, 1911-34.

NOTE.—In recent years several universities have added teacher-training departments, in most cases for university graduates who are trained for teaching positions in the secondary schools. These are included in the figures since 1930. The large increase in Quebec in 1932 is due to the recognition of teaching brothers' scholasticates as normal schools for the first time; that in Ontario in 1933 is due to a second year of training being inaugurated. For corresponding figures for 1902-10, see p. 976 of the 1933 Year Book.

Financial Statistics.—Financial records of the provincial schools in Canada are neither equally complete nor entirely comparable in any two provinces. Hence it is quite impossible to construct a uniform set of tables for all provinces. A record of assets and liabilities is available only for four provinces, a record of expenditures only in five.

The closest approach to a comparable statement is in the case of receipts, and the accompanying Table 8 has been compiled, covering the years 1914-34, in response to continued requests for data that will permit of a reasonably accurate comparison of school costs as between provinces. Table 2, showing the enrolment and average daily attendance for each year, may be used to calculate the approximate costs per pupil, or per "pupil-year of attendance".

The columns of Table 8 show the following: (1) Provincial Government grants to the school boards, also their contributions to teachers' salaries where these are paid directly to the teachers, and do not pass through the hands of the board; (2) school taxes raised within the school administrative units, which are variously called districts, sections, or municipalities; (3) school board revenue from counties, affecting three provinces only; (4) total current revenue recorded, including tuition fees, which in the school administrative units of most provinces are collected only from non-resident pupils. Though there should be entries under this head in all provinces, they are on record only in four. There are other small amounts, such as receipts from rental of school property, that are not shown in the table for any of the provinces. The aim of this total column is to indicate the approximate amount of money that the school boards have had at their disposal to spend, from current sources, each year (plus teachers' salaries paid directly by the province). The fifth column shows the debenture indebtedness against schools in each year, for the provinces for which a record is available. The annual increase in the sum shown in this column indicates the net amount that was spent each year by school boards over and above the current revenue that is shown in the preceding column. By the inclusion of this column, a conception of each year's total expenditure may be gained. The whole is not as satisfactory a statement as a full record of receipts and expenditures would be, but in the absence of complete accounts it is the best substitute obtainable. Table 9 provides as complete a statement of expenditures as is possible for the school boards of the five provinces in which a record is available.

8.—Financial Support of the Provincially-Controlled Schools in Canada, by Provinces, 1914-34.

NOTE.—The receipts shown in the following table do not include any amounts raised by loans, or the sale of bonds or debentures, as all revenue of this nature must be repaid ultimately with money raised by local taxation. With the exception of the Maritime Provinces, for which the information is not available, the total debenture indebtedness of the schools of each province is given annually, thus showing the net increase or decrease per year.

¹ Includes contributions to teachers' salaries in the Maritime Provinces; and in New Brunswick, grants made to schools by the Vocational Education Board, 1921-33. ² Includes tuition fees where these are recorded. ³ Record not available. ⁴ The Ontario figures include the township grant towards the salaries of rural public school teachers. In the rural municipalities of Manitoba about three-fifths of the school support is equalized by a uniform rate levied over the whole municipality.

⁵ Amount of taxes raised by High School and Collegiate Institute boards from 1914 to 1917 is not available. Estimate of amount (3 p.c. of total taxes raised) included in Saskatchewan for these years. ⁶ In Saskatchewan the debenture indebtedness of the secondary schools is not included until 1922.

9.—Expenditures on Teachers' Salaries, Buildings, etc., Interest, and Maintenance of Boards of Provincially-Controlled Schools, by Provinces, 1914-34.

NOTE.—All amounts in even thousands are estimates.

Fiscal Year.	Teachers' Salaries.	Buildings, Grounds and Permanent Improvements.	Interest on Debentures and Other Loans.	Equipment, Repairs, Fuel and all Other Expenses. ³	Total. ³

¹ Not available.² In Manitoba, interest on debentures only.³ Excluding all payments on

principal of debentures and other loans.

⁴ In Alberta "repairs" are included under this heading.

Subsection 2.—Private Schools.

Private Elementary and Secondary Schools.—There are numerous schools in each province doing work similar to that of the ordinary provincially-controlled schools but which are not publicly financed or administered and hence are not included in Subsection 1 (except in Quebec). Excepting Quebec, the private schools have from about two to four p.c. of elementary and secondary pupils in the different provinces. In Quebec the proportion is about ten p.c., but most of them are subsidized by the province and provincial reports include a record of them similar to, and in some cases (as of average daily attendance) inseparable from, the records of publicly-controlled schools. Thus their statistics are of necessity included in Subsection 1. Table 10, however, shows their annual enrolment since 1921, the year in which the Education Branch of the Dominion Bureau of Statistics commenced the collection of reports from private schools. A directory of the schools was published in the "Annual Survey of Education, 1931".

Business Colleges.—There are private schools in fields of education other than elementary and secondary, the most numerous group working in the field of business and commercial education. A record of enrolment from this group also has been collected by the Education Branch of the Dominion Bureau of Statistics since 1921; a summary of this information is presented in Table 11.

Subsection 3.—Higher Education.

The tables of this subsection are intended to include all institutions in the Dominion offering instruction in courses that are the equivalent of at least two years in advance of matriculation. In the table on enrolment the name of each institution is given in the language (French or English) used therein as the main language of instruction. Table 12 gives a summary of the degrees and diplomas granted by the different universities and colleges of Canada, and Table 13 shows the full-time students attending the faculties and courses of instruction offered in each institution. In addition a considerable number of part-time students attended university courses.

Students of University Grade.—The aggregate number of students in attendance was reported as 89,960. Of these 41,372 were of university grade (*i.e.*, following courses for which matriculation was prerequisite) and 34,275 were in attendance at the regular sessions. They were enrolled in about 160 different colleges or universities. Of those attending the full sessions 32,517 were undergraduates, while 1,758 were graduate students, *i.e.*, working toward a higher degree in a subject in which they already held a bachelor degree. Many of the large numbers classed as undergraduates actually held degrees, but not in the subject or faculty in which they were studying during the session under consideration.

More than half of all undergraduate students, or 17,522, are in arts and pure science or what are termed "academic" courses as distinguished from "professional" courses. One or two years of arts is prerequisite to many of the professional courses—in French-language Quebec the full four years. Next to arts and science come engineering and applied science with 3,474 students; medicine, 2,985; theology, 2,253; agriculture, 1,033; law, 961; education, 841; household science, 760; commerce and accounting, 757; pharmacy, 449; dentistry, 370; public health and nursing, 302; veterinary science, 181; music, 145; forestry, 100; architecture, 93; social service, 68; etc.

As shown in Table 12, there were 4,417 bachelor degrees granted to men and 1,504 to women, 709 diplomas to men and 765 to women. Some of the latter represent completion of courses similar to those for bachelor degrees; after making due allowance for these and for duplication in cases where the same person may be receiving a second bachelor degree in a different branch of study, it may be concluded that there are, each year, about 4,000 new male and 1,400 new female university graduates with a bachelor degree or higher. The graduate degrees granted included 472 master degrees or licences to men and 91 to women, the term "licentiate" being used by the universities of Laval and Montreal in place of the term "master". Those completing the doctorate were 72 men and 9 women; while honorary doctor degrees were conferred on 83 men.

¹ All degrees except those in theology granted by Dalhousie.

² All degrees except those in the-
ology entered opposite Toronto.

³ Medical, dental and veterinary doctors included in "bachelor" column.

⁴ The licence in the French-speaking universities is the next degree in advance of bachelor, as the master degree is in the English-speaking.

⁵ Eighty-three of the doctor degrees were honorary.

Students not of University Grade.—The 41,372 students of post-matriculation standard represent little more than half of the total enrolment in universities and colleges. Many of the arts colleges, especially in the classical colleges of Quebec, offer preparatory courses in which instruction is given in the high school grades, or even elementary grades. These accounted for 23,298 students, practically all of whom were in regular attendance at the full session.

The remaining 25,340 of the enrolment, 13,565 men and 11,775 women, were not following high school courses, but could not be classed as university-grade students as they had not necessarily matriculated. A minority of them attended the full session, generally studying music, household science or agriculture. The remainder were the students of summer courses in teaching methods, series of evening extension lectures, correspondence and other extra-mural courses, agricultural and other short courses.

Apart from the reported enrolment many thousands of people were reached by extension lectures that were not grouped in series and reported as courses, and still larger numbers reached by university radio broadcasts, travelling libraries, agricultural assistance, and various other forms of extension service.

Teaching Staff.—At pp. 858 to 861 of the 1932 Year Book there was published an analysis of the teaching staffs of universities and colleges as in 1929-30, by sex and by full time or part time. A corresponding table for 1933-34 will be found in the "Annual Survey of Education in Canada, 1934".

¹ Includes the arts students of Victoria, Trinity, St. Michael's, and students of the College of Pharmacy.

² The complete full-time enrolment in agriculture, including diploma and degree courses, is 591, household science, 220.

³ Includes students of Manitoba Law School, and 747 students in arts also registered in affiliated arts colleges.

⁴ Included in Arts.

⁵ To this figure should be added 50 students in the architecture section of the Ecoles des beaux Arts in Montreal and Quebec.

Financial Statistics.—Current expenditures were reported at \$17,151,000 in 1934, as compared with \$20,079,000 in 1931. Capital expenditure, which had averaged nearly \$4,000,000 per year in the preceding three years was less than \$1,000,000 in 1933 and again in 1934.

From the standpoint of financial support, there are at least three classes of institutions. First, there are those that rely on grants from provincial treasuries for their upkeep; six of the provinces have such universities and the remaining three have colleges in this class. Secondly, there are the institutions such as Dalhousie, McGill and McMaster Universities, to cite a few, that rely for their support on

⁶ Excluding 3,339 duplicates in undergraduate arts.⁷ Included with Engineering.⁸ These

students were reported by Dalhousie with which university the Maritime College of Pharmacy is affiliated.

⁹ No reports received, although the main statistics are included with the university to which the college is affiliated.¹⁰ In addition to these "Other" full-time students there were 31,250 part-time students of the regular session including short course, evening, extra-mural and extension students.

endowments, and do not receive provincial grants. Thirdly, there are colleges either operated or controlled by religious denominations and not receiving provincial assistance; these may not have a financial endowment sufficient to carry them. They may have another type of endowment—in men, so to speak, like the University of Ottawa and other Roman Catholic colleges conducted by religious orders. Since salaries are commonly only nominal in these schools, expenses are comparatively low per pupil accommodated. The other section of the third group—mainly Protestant theological and arts colleges—commonly rely on church contributions where their financial endowments are inadequate.

At pp. 1060-1063 of the 1934-35 Year Book, financial statistics of individual universities and colleges, classifying assets, receipts and expenditures in some detail were given. In some respects these statistics were incomplete and a thorough reorganization of the data has been undertaken. It is expected that a presentation of them, on the improved basis, in the 1937 Year Book will be possible.

Section 2.—Scientific and Industrial Research in Canada.

This section has, in past years, dealt with the history of scientific and industrial research in Canada and has included subsections outlining the organization and work of the National Research Council and of those provincial councils and private institutions which are primarily interested in research work. During the past year, the operations of these organizations continued to be conducted along the lines described in previous issues of the Year Book, and to conserve space the section is not reprinted in this edition. The reader is referred in this connection to pp. 866 to 872 of the 1932 Year Book.

Section 3.—The Libraries of Canada.

The Dominion Bureau of Statistics takes a biennial survey of libraries in Canada, the latest complete survey being for 1933. Under this heading, at pp. 1064-1065 of the 1934-35 Year Book, statistics of the 1933 Survey were given. Figures for the 1935 Survey will not be available until June or July, 1936.

Section 4.—Art in Canada.

An article entitled "The Development of the Fine Arts in Canada", contributed by Newton MacTavish, M.A., D. Litt., appeared at pp. 995-1009 of the 1931 Year Book and a shorter article, dealing more particularly with the National Art Gallery, at pp. 886-888 of the 1924 Year Book.

CHAPTER XXVI.—PUBLIC HEALTH AND BENEVOLENCE.

The subject matter of this chapter is treated under the following sectional headings: Section 1.—Administration of Public Health Activities in Canada by the Dominion and Provincial Governments; Section 2.—Institutional Statistics of Public Health and Benevolence where, besides health and hospitalization records, social statistics also receive some attention. The latter are becoming more and more necessary to the proper drafting of social legislation and the study of social problems.

The rapid increase in the numbers committed to our various institutions, such as mental hospitals for the insane, feeble-minded and epileptic; the alleged increase in juvenile crime and the extension of social work in this field; the increasing number of institutions caring for the aged and incurable, as well as for dependent, neglected and handicapped children, have been marked features of the twentieth century.

Section 1.—Administration.

In Canada public health is administered by the Dominion and Provincial Governments through their respective health departments.

The Dominion Government deals only with such public health matters as are exclusively national, or such interprovincial public health matters as cannot be controlled effectively by the provinces.

In addition, the Dominion Government makes grants to voluntary organizations which are engaged in public health work, notably:—

Canadian Welfare Council; Canadian National Institute for the Blind; Canadian Tuberculosis Association; Canadian National Committee for Mental Hygiene; Victorian Order of Nurses; Canadian Branch of St. John Ambulance Association; Canadian Red Cross Society; Canadian Social Hygiene Council; Canadian Mental Hygiene Council.

With the object of obtaining uniform legislation and procedure in the various provinces the Dominion Council of Health was created. This body consists of the Deputy Minister of the Dominion Department of Pensions and National Health as Chairman, the chief executive officer of the provincial department or board of health of each province, together with such other persons, not exceeding five, as may be appointed by the Governor in Council to hold office for three years. Of these appointed members, four represent agriculture, labour, rural women's work and social service, and child welfare, while the fifth member is a scientific adviser on public health matters. The Council meets twice a year at Ottawa, when public health problems are discussed and uniform standards and legislation adopted.

Speaking generally, the administration of local public health activities and the establishment and maintenance of institutions is in the hands of the Provincial Governments, under Sec. 92 of the British North America Act, 1867. Under their control, municipalities, societies and individuals generally initiate charitable and humane efforts, depending on the Government to some extent for financial aid and for competent uniform inspection of methods and standards. Important, and reflecting most clearly the benefits accruing from such work, are the provisions for medical inspection of school children. These are carried out in

some cases by the district or sub-district medical health officers, and in others by public health nurses whose activities are confined to this work alone. In addition, expert advice and assistance are supplied freely to children, teachers and parents. In many cases dental inspection is provided for. While this work has been carried on upon a considerable scale for only a few years, great benefits have already resulted from it, notably general improvement in health and sanitary conditions and in the control and prevention of epidemics.

Public hospitals are the most numerous among health institutions. They are usually erected and supported by the municipalities, their actual administration being in the hands of boards of trustees; their revenue, in addition to that provided by the municipality, is derived from grants from the Provincial Governments, from donations of individuals and societies, and from patients' fees. Admission and treatment are free to all deserving persons who apply for them and whose resources are so limited as to prevent their otherwise receiving proper medical attention, while it is generally expected of others that payments for services shall be made in proportion to costs and their ability to defray them. Such public hospitals include isolation and maternity hospitals, tuberculosis sanatoria, etc. The two lazarettos for lepers are under Dominion administration, as are also veterans' hospitals and certain marine and immigrant hospitals.

Private hospitals do not receive public grants. There are also hospitals, more common in the province of Quebec, which are conducted by various religious orders; Red Cross hospitals and out-posts; and special hospitals which may be privately administered or maintained by the provinces.

Mental institutions, homes for the feeble-minded and the epileptic are in most cases under provincial administration, although in Nova Scotia the insane of each county are cared for in county institutions.

Among charitable and benevolent institutions, orphanages, refuges and homes for the aged are usually supported by the larger centres and by county municipalities. Homes or schools for the deaf and dumb and the blind are largely under provincial administration.

In the case of penal and reformatory institutions, penitentiaries are administered by the Dominion Government, while reformatories, industrial schools, prison farms and similar corrective institutions are administered by the Provincial Governments.

Subsection 1.—Public Health Activities of the Dominion Government.*

The Act of Parliament (18-19 Geo. V, c. 39, An Act respecting the Department of Pensions and National Health) creating the Dominion Department of Pensions and National Health, clearly defined the functions of that Department, which is divided into two divisions, those of Pensions and National Health. The chief functions of the National Health Section (which from 1919 to 1929 was the Department of Health) are: to protect the country against the entrance of infectious disease; to exclude immigrants who might become a charge upon the country; to treat sick and injured mariners; to see that men employed on public construction work are provided with proper medical care; to set the standards and control the quality of food and drugs, except export meat and canned goods, which are under

*Revised by Dr. R. E. Wodehouse, O.B.E., Deputy Minister, Department of Pensions and National Health, Ottawa.

the Department of Agriculture; to control proprietary medicines and the importation and exportation of habit-forming drugs such as morphine, cocaine, etc.; to care for lepers and to co-operate with the provinces with a view to preserving and improving the public health. The following various Divisions of the Department of Health, existing prior to the merger, are still maintained.

Quarantine Division.—This Division of the Department has for its object the prevention of the entry into the country of major infectious diseases from ocean-going ships. Quarantine stations are therefore in operation at the several maritime ports. Every vessel coming from abroad is inspected and passengers or crews who are found to be suffering from infectious disease, together with contacts, are removed to the quarantine station after the principles laid down in the Convention of Paris, 1926.

Immigration Medical Division.—This Division is charged with the medical examination and care of immigrants. With this end in view there has been placed in Great Britain, Ireland, and on the continent of Europe a staff of Canadian doctors, whose duty is to examine all intending emigrants to Canada prior to their embarkation. This arrangement obviates the expense, discomfort, disappointment and hardship occurring hitherto whenever it becomes necessary to deport, on account of physical or mental disability, immigrants who have made the journey across the ocean to Canada.

Leprosy.—For many years there have been in operation in Canada two lazarettos for the treatment of leprosy, one at Tracadie, N.B., and the other at Bentinck island, B.C. These are under the direction of the Department.

Marine Hospitals' Division.—This Division provides medical and surgical attendance and such other treatment as may be required to all sick and injured mariners arriving at Canadian ports and belonging to vessels that pay sick mariners' dues, in conformity with Part V of the Canada Shipping Act.

Division of Sanitary Engineering.—The activities normally handled under Public Health Engineering include the administration of the Public Works Health Act, which is concerned with the health of men on construction works, canals, railways and other forms of public works.

By agreement with the U.S. Public Health Service, this Branch investigates and reports on sources of water supplies for use aboard common carriers in international and interprovincial traffic between Canada and the United States. Special investigations and reports are made regarding pollution of the International Boundary waters in conjunction with representatives of the U.S. Public Health Service. Supervision of water supplies of common carriers on the inland waters of Canada and in international and interprovincial traffic is another function. This Branch co-operates with other Dominion Departments *re* sanitation in National Parks and summer camps on Dominion lands and allied matters; with the American Railway Association regarding regulations on sanitation; with the Provincial Health Departments and the U.S. Public Health Service for the certification of water supplies of common carriers in interprovincial and international traffic.

Proprietary or Patent Medicine Division.—This Division operates to give the public a reasonably safe and truthfully labelled proprietary medicine supply. Registration of all secret formula non-pharmacopœial medicines for human use is

required, and control is exercised over the potent drugs employed in the manufacture of such medicines and the representations made regarding their use.

Laboratory of Hygiene.—The Laboratory of Hygiene is chiefly concerned with the control of biologic products used in treatment of human diseases, particularly with reference to the potency of certain toxins, antitoxins, and other serological preparations. Sera and vaccines are scrutinized for purity, sterility and potency. Such drugs as digitalis, strophanthus, ergot, pituitrin and the salvarsans are examined for potency, and standards for them, based upon those of the League of Nations' Health Committee, are prepared by the Laboratory and furnished to all manufacturers desiring to use them in making their products. Disinfectants are investigated as to manufacturers' claims for germicidal qualities. Special and general aid is rendered to other departments of government, and research problems are undertaken.

Food and Drugs Division.—In this Division, inspection and laboratory services are maintained primarily for the purposes of the Food and Drugs Act, which is regulatory in character, designed to prevent the importation and sale of adulterated or misbranded foods and drugs. Laboratories in Halifax, Montreal, Ottawa, Toronto, Winnipeg and Vancouver normally examine about 12,000 samples annually, taken from suspected stocks. Corrective measures are applied whenever adulteration or misbranding is found. Standards of quality have been established for many products, and the informative, truthful label is a special objective. Laboratory services are provided for other Divisions, and co-operation with other departments of government is effectively carried on.

Narcotic Drug Division.—Since the introduction of opium smoking in Canada forty or more years ago the use of habit-forming drugs, such as morphine, heroin and cocaine, has increased. One of the first steps taken by the Department of Health was the creation of a Narcotic Branch. Through this Branch, the importation and sale of such drugs are controlled in accordance with the principles laid down by the Hague and Geneva Conventions. Wholesale agents and druggists are obliged to keep records of importation or sale and to forward their records periodically to the Department. The legitimate use of these habit-forming drugs is thus controlled.

Subsection 2.—Public Health Activities of the Provincial Governments.*

Prince Edward Island.—The supervision of public health matters in Prince Edward Island was placed, on July 1, 1931, under a specially created Department of Public Health, presided over by a Minister and his Deputy. Two part-time physicians, five full-time public health nurses and two sanitary and food inspectors are employed. Under the direction of the Deputy Minister, the province is divided into five public health districts and each nurse is assigned a territory in which she is responsible for the inspection of school children, home visits, home nursing classes, immunizing and vaccinating clinics, etc. The sanitary and food inspectors make regular surveys of the food-manufacturing plants, school premises, hotels, boarding houses, restaurants, etc., throughout the province. The Government also operates the Falconwood Hospital for the Insane and a Provincial Infirmary.

Nova Scotia.—In Nova Scotia the Department of Public Health is under a Minister of Health. The Provincial Department, either directly or in conjunction

*The material under this heading has been revised by the respective provincial authorities.

with Municipal Boards of Health, offers certain services which are mainly concerned with control of communicable diseases, milk and water supplies, sewage disposal, pre-natal, post-natal and school hygiene, public health nursing, mental hygiene, distribution of sera and vaccines, vital statistics, health education and supervision of public hospitals, humane institutions and public charities. The Department of Public Health has the administration of mothers' allowances, old age pensions, care of delinquent children and a training school for the mentally deficient.

New Brunswick.—The New Brunswick Department of Health includes in its activities general sanitation, including supervision of water supply and drainage, the abatement of communicable diseases, medical inspection of schools, collection of vital statistics, public health nursing service, the administration of the Provincial Pathological and Public Health Laboratory, and the general supervision of the 16 health sub-districts into which the province is divided.

The Department is administered by the Minister of Health, and is under the immediate direction of a Chief Medical Officer. The staff of the Department consists of a chief of laboratories, five district medical health officers, who are also tuberculosis diagnosticians for their respective districts, six medical inspectors of schools, a director of public health nursing service, all being full-time officials. There is also a part-time director of venereal disease clinics. The 16 sub-district Boards of Health into which the province is divided have their own individual staffs all operating under the Provincial Health Act and Regulations. The Chief Medical Officer in his 18th annual report summarizes the chief activities of the Department during the year ended Oct. 31, 1935, under the headings already given.

Quebec.—The Provincial Bureau of Health, in charge of the Provincial Secretary, administers the Public Health Act. The province of Quebec inaugurated, in 1926, a new system known as the "county health units" consisting of a full-time health service for a county or a group of two or three adjoining counties. At present, thirty health units covering thirty-nine counties have been organized, while the former district health officers, reduced to twelve, are in charge of all the territories not yet organized as county health units.

The services of all these officers and their staffs of nurses, sanitary inspectors, etc., are given in the form of consultations, public lectures, school medical inspections, baby and travelling tuberculosis clinics and investigations of all kinds, immunization, sanitation, etc.

In addition, the Bureau of Public Health maintains an Administrative Division, a Laboratory Division, together with Divisions of Sanitary Engineering and Venereal Diseases, Vital Statistics, Epidemiology, Tuberculosis and Child Welfare, including the Gransher system of foster homes, and a Division of County Health Units.

The energies of the Bureau of Health are also directed towards the prevention of epidemics, more particularly tuberculosis and the more important causes of infant mortality. To this end, the Bureau of Health has established twenty-one anti-tuberculosis dispensaries and seventy baby clinics, including those receiving government grants. During the year 1934-5, in the anti-tuberculosis dispensaries and the travelling tuberculosis clinics, more than 52,000 people were examined. The various county health units have provided for the immunization of 28,607 children against diphtheria, making a total of 201,052 with those already immunized.

Divisions of Industrial Hygiene and Hygiene of Nutrition are being organized.

Ontario.—The Department of Health of Ontario is under a Minister of the Government. In the direction of the Department's program, he is assisted by a Deputy Minister. These activities are appropriately divided into the following Divisions, namely: Hospitals; Sanitary Engineering; Laboratories; Preventable Diseases; Maternal and Child Hygiene, and Public Health Nursing; Oral Hygiene; Tuberculosis Prevention; Industrial Hygiene; Public Health Education; and Inspection of Training Schools for Nurses.

The local health work is carried on by a Board of Health and a Medical Officer of Health in each of the 900 or more municipalities. Ten cities have whole-time health officers.

The Department assumes the responsibility for the free distribution of biological products used in the prevention and cure of preventable diseases. Insulin is gratuitously distributed, on the recommendation of the local authorities, to those in need of such treatment.

The maximum in the way of bacteriological service, including the examination of pathological tissue, is offered through the central laboratory and the six branch laboratories, which are situated at appropriate centres throughout the province.

Consultative service in the field of mental hygiene is made available through the efforts of clinics which operate out of the mental hospitals. A regular schedule is maintained by these clinics and social agencies and the profession are urged to discuss problem cases with the clinic staff.

The service offered through the travelling diagnostic chest clinic has been materially extended during 1935, with the purpose of bringing about the more prompt diagnoses of minimal tuberculosis and more satisfactory supervision of both patients and contacts.

The Department has continued its program of attempting to make both diagnosis and treatment of cancer possible for all. Seven cancer clinics are operating in well-chosen centres in the province; each of these is substantially subsidized. In addition, sound educational work is being constantly carried on.

Manitoba.—Manitoba has an organized Department of Health and Public Welfare. The Health and Public Welfare Act states that the Minister shall preside over and have the management and direction of the Department, and the Department shall have administrative jurisdiction over all matters in the province which relate to health and public welfare. The various Divisions of the Department include those of: Disease Prevention (food and dairy inspection, public health nursing, sanitation, venereal disease prevention, communicable diseases); Provincial Laboratories; Vital Statistics; Hospitalization; Psychiatry (Selkirk and Brandon Hospitals for Mental Diseases—Manitoba School for Mentally Defective Persons, Portage la Prairie—Psychopathic Hospital, Winnipeg); Child Welfare; Estates of Insane Persons and Indigency in Unorganized Territory; Supervision of Aged and Infirm Persons (being supported by public funds); Supervision of Medical Service (supplied by the province).

The previously established Board of Health and the Welfare Supervision Board have assumed an advisory capacity to the Minister of Health and Public Welfare; and the Child Welfare Board is both advisory and administrative, being responsible for the administration of the Child Welfare Act.

Saskatchewan.—The Department of Public Health has been organized since 1923 under a Minister and a Deputy Minister. The Public Health Act of Saskat-

chewan also provides for a Public Health Council, consisting of the Deputy Minister as Chairman, three medical practitioners, a veterinary surgeon and a civil engineer. This council acts in an advisory capacity to consider new health regulations and allied problems.

The Department is organized into seven Divisions. In the Division of Administration, besides the clerical staff, there is a medical officer directly responsible to the Deputy Minister. This Division co-ordinates the activities of the Departments as a whole, and formulates general policy regarding health matters. The Division of Maternal and Child Welfare is linked with the Administrative Division and supervises maternity grants. The Division of Public Health Nursing carries out inspection of school children and home visits, organizes pre-school and preventive clinics in co-operation with local physicians and conducts a generalized public health nursing service throughout the province. The Division of Communicable Disease deals with epidemiology in all its phases and also the care of the dead. Supervision of trachoma, venereal diseases, and tuberculosis (where not conflicting with the Anti-Tuberculosis League) comes under this Division. The Division of Sanitation supervises food, water, milk and ice supplies, sewerage systems, urban and rural sanitation, and the organization of union hospital districts. The Division of Laboratories includes in its program bacteriology, serology, pathology, chemical analyses and medico-legal work. The Division of Vital Statistics administers the Vital Statistics Act and the Marriage Act. The system used in classifying vital statistics has been decided upon in co-operation with other provinces and the Dominion Bureau of Statistics.

The Deputy Minister is Chairman of the Cancer Commission, which was created by an Act of the Legislature in 1930. This Commission is in close touch with the most recent advances in the diagnosis, prevention and treatment of cancer and operates three emanation plants, two at Saskatoon and one at Regina.

The mental hygiene work of the Department comes under the direct supervision of the Commissioner for Mental Services.

Union Hospitals.—In Saskatchewan, in addition to the general hospitals, there exists a system known as the union hospital scheme, designed to furnish hospital accommodation in rural districts. Under the provisions of this plan two or more rural municipalities may co-operate with any number of urban municipalities in arranging to build, equip and maintain a hospital. The Hospital Board may, if it so desires, institute what is known as free treatment, that is, the individual patient does not pay his hospital account but the total maintenance cost of the hospital is taxed against the district as a whole.

Alberta.—The Department of Public Health was established by an Act of the Provincial Legislature in 1919. The Department includes the following Divisions: Communicable Diseases; Sanitary Engineering and Sanitation; Public Health Education; Laboratory; Public Health Nursing; Hospitals, Municipal Hospitals; Hospital Inspection; Social Hygiene; Vital Statistics; Mental Hygiene; Dental Hygiene; and the following institutions: the Central Alberta Sanatorium and four mental institutions.

Free clinics for venereal diseases are maintained in the principal cities and in the two provincial gaols. Educational work on social hygiene is carried on by means of lectures, moving pictures, bulletins and radio talks.

British Columbia.—The Provincial Board of Health, responsible to the Provincial Secretary, administers the laws relating to public health in British Columbia. Its Branches comprise the following: Sanitation, Venereal Clinics, Laboratories, Tuberculosis, Infectious Diseases and Public Health Nursing, and Vital Statistics. The Sanitation Branch has directed numerous recent efforts to the prevention of the spread of communicable diseases by touring motorists, and to the control of campers and squatters along the coast. The Laboratories Branch, in addition to the analysis of specimens, distributes annually various vaccines and antitoxin. The Tuberculosis Branch has been very much enlarged, the province being organized into districts under the direction of a medical officer and specially trained public health nurses. The educational part of the work is accentuated, and home visits are emphasized in order to educate the people to the dangers of infection.

Section 2.—Institutional Statistics.*

Under authority granted by the Dominion Government in 1930, the Dominion Bureau of Statistics now co-operates with the provincial authorities through its newly created branch of the Census of Institutions, and collects annual statistics for all hospitals in Canada, including mental institutions and homes for incurables.

The institutions covered in the statistics which follow include: (1) *hospitals*—institutions primarily engaged in the prevention and cure of physical sickness and disease, such as hospitals for the sick, sanatoria and institutions for incurables; (2) *mental and neurological institutions*—for the treatment and care of mental ailments, such as asylums for the insane, institutions for the feeble-minded, epileptic, etc.; (3) *charitable and benevolent institutions*—caring for the poor of both sexes and of all ages, such as homes for the aged, county refuges, orphanages, etc.; and (4) *penal and corrective institutions* which have for their purpose the reclamation of the criminal and the reformation and training of delinquent boys and girls. Institutional statistics, as summarized in Table 1, may, therefore, be regarded as dealing with the four main types of social pathology, *viz.*, physical, mental, economic and moral. They provide a body of statistical data which affords to students of social problems a fairly comprehensive view of institutional life in Canada.

Historical.—A brief historical sketch of the origin and growth of the several classes of institutions in Canada is given below. Their present-day development is given in detail in the tables which follow this historical sketch.

Hospitals.—The foundation of hospitals in Canada dates back to the French régime. The first hospital in New France was the Hôtel-Dieu de Québec, founded in 1639 under the auspices of Les Hospitalières de la Misericorde de Jésus. Other hospitals founded during this period were: Hôtel-Dieu, Montreal, 1644; L'Hôpital Général, Quebec, 1693; L'Hôpital Général, Montreal, 1694; and Hôtel-Dieu, Three Rivers, 1697. Montreal General was opened in 1818 and the Marine Hospital, Quebec, in 1830. In Upper Canada, the earliest hospital recorded was one founded in 1790 at Sault Ste. Marie for the care of the Indians. Toronto General was founded in 1819, Kingston General in 1833, Ottawa General in 1844, Hôtel-Dieu at Kingston in 1848 and Hamilton General in 1850. With the expanding population of Canada, the increase in hospitals was very marked during the last half of the nine-

*This section has been revised by J. C. Brady, Official in Charge of Census of Institutions, Dominion Bureau of Statistics.

teenth century. St. Boniface General in Manitoba was erected in 1844, Saint John General in New Brunswick in 1860, Halifax City Hospital in 1859, Winnipeg General in 1872, Vancouver General in 1886, Royal Jubilee in Victoria in 1887, Calgary General in 1890 and Regina General in 1907. As a result of this growth, at the present time hospitals are to be found not only in every city and town of any size throughout the Dominion, but also at strategic points in many rural districts, and even in the sparsely settled northern areas.

Mental and Neurological Institutions.—The first reference to institutions for the care of the insane in Canada was in connection with L'Hôpital Général, Quebec, founded in 1693. About 1714 a small dwelling was built in connection with this hospital for the reception and treatment of those suffering from mental diseases. In 1753, L'Hôpital Général, Montreal, erected several small buildings for the care of the insane. In 1824, a special committee of the Legislative Council of Lower Canada was appointed to inquire into the establishments for the reception and care of the insane and to report their findings with a view to improved methods of treating insane patients. By 1845 the number of insane had increased to such an extent that provision was made for large and commodious buildings for the proper care and treatment of mental cases by the erection of such institutions as Quebec Asylum and that at Baie St-Paul.

About the same time the movement for the provision of proper care of the insane was developing in other provinces. In Prince Edward Island, after the passing of an Act, authorizing the erection of an asylum near Charlottetown, a building was begun in 1844 which was replaced in 1879 by the Falconwood Asylum. In New Brunswick, in 1847, the old cholera hospital was abolished and the first of the group of buildings which now comprise the Provincial Hospital of Saint John was built and occupied. In 1856 the cornerstone of the first mental hospital in Nova Scotia was laid in Halifax. In Upper Canada an Act was passed in 1830 making provision for the relief of destitute lunatics. In 1841 the first building was opened in Toronto for the care of the insane. Rockwood Asylum at Kingston was opened in 1856, followed by the London Mental Hospital in 1859. The construction of the first mental institution in Manitoba was begun at Selkirk in 1884, and was followed by Brandon Asylum in 1890. In Saskatchewan the first provincial mental hospital was built at Battleford in 1911, and soon afterwards the large mental hospital at Weyburn. The mental hospital at Ponoka, in Alberta, was completed in 1911 and the Provincial Mental Hospital at Edmonton in 1912. In the early days of British Columbia, mental cases were not specially provided for. Later a certain amount of care was furnished in a building in Victoria known as the Pandora Street Institution. In 1875 the Insane Asylums Act was passed. The first mental hospital in British Columbia was erected in 1878 at New Westminster. Census statistics regarding the number of insane and feeble-minded in Canada were first made in connection with the Decennial Census of 1871, and general data were collected under the heading: "people of unsound mind". The Census of 1911 gave the number of insane and feeble-minded persons in Canada as 13,355, and a report for that year showed 9,671 patients in mental institutions. In 1921 figures concerning the number of patients in mental hospitals gave the number of insane as 21,516. Very little reliance can be placed on the figures before 1921, as the information was collected for patients in provincial mental hospitals only and did not include a large number of insane and feeble-minded in other institutions.

Charitable and Benevolent Institutions.—In Upper Canada an Act was passed in 1799 to provide for the education and support of orphan children. In the different colonies before Confederation, under various Acts of the Legislatures, there were provided houses of refuge, homes for the aged, orphanages and other charitable institutions. The most serious welfare problems, particularly in Upper and Lower Canada, were those connected with immigration. Many immigrants were destitute on their arrival and were dependent on charity. In 1824, an immigrant hospital was opened at Quebec for the care of the indigent sick. Throughout the colonies before Confederation, an interest in child welfare found expression in the incorporation of numerous institutions for friendless orphans and children physically incapacitated. These orphanages were largely supported by the philanthropy of societies or individuals, and, if grants of public money were received, the management was subject to government supervision. During this period, the orphanage and the industrial school were all that were available to the child who lacked normal home care.

Since Confederation, the principal has become generally recognized that the indigent, aged and infirm, orphans, dependent and neglected children, the deaf and dumb and the blind should be the wards of the State. Numerous Acts of the Provincial Legislatures have recognized municipal and provincial responsibility for these classes of the population by establishing institutions for their care. In every province of Canada, public welfare organizations now exist to look after their protection and well-being. Child-welfare work as it is known to-day was not recognized as a special field for case work until toward the close of the nineteenth century. Now, noteworthy contributions are being made in child-welfare work by the Provincial Government Departments of Child Welfare, the Children's Aid Societies, Juvenile Immigration Societies and Day Nurseries.

Penal and Corrective Institutions.—From 1792 to 1810, various Acts were passed by the legislatures of Upper and Lower Canada to provide for gaols and houses of correction. An institution was opened at Kingston in 1835 and included in its plant various shops in which inmates were employed during their periods of imprisonment. A reformatory existed at St.-Vincent de Paul, which was destroyed by fire in 1864. In 1854, a two-storey granite structure containing eighty cells was erected at Halifax, Nova Scotia. New Brunswick at the time of Confederation had an institution near Saint John with accommodation for eighty inmates and surrounded by twenty-five acres of land. There has been a progressive development in penal administration from the year 1867, when the Dominion Government took over certain major penal institutions that were formerly under colonial control. These institutions formed the nucleus of the present penitentiary system which, under the Dominion Department of Justice, has been developed into the present chain of seven penitentiaries, having a total capacity of approximately 3,500 inmates and located in the following places: Dorchester, New Brunswick; St.-Vincent de Paul, Quebec; Kingston and Collins' Bay, Ontario; Stoney Mountain, Manitoba; Prince Albert, Saskatchewan; and New Westminster, British Columbia. These institutions have been improved and modernized so that they supply modern sanitary accommodation, medical care, training in various trades, education facilities, libraries, etc., all tending to improve the social standard of the inmates, with the aim that they shall become useful citizens upon release. (For statistics of crime and delinquency, see Chapter XXVII, Section 6 of which deals particularly with inmates of penitentiaries.)

The provincial reformatory and corrective institutions, industrial schools and farms may be considered to have a common origin with the penitentiaries. During the period after 1867, when the penitentiaries passed under Dominion jurisdiction, the Provincial Governments laid the basis of the present reformatory system. These institutions are intermediate between the common gaols and the penitentiaries, and are provided with facilities for the education and improvement of the morals of the inmates. Some of the early institutions of this type were: St.-Vincent de Paul Reformatory for boys in Quebec, which existed prior to 1864; the Andrew Mercer Reformatory for women and girls at Toronto, Ontario, opened in 1879 and the Boys' Industrial Home at East Saint John, New Brunswick, established in 1873. Such reformatory and corrective institutions are maintained either directly by the Provincial Governments or religious and other organizations subsidized from the provincial treasuries. They care primarily for juvenile delinquents and adults who are not hardened criminals, while recidivists beyond reform or those guilty of major crimes and sentenced to a long period of imprisonment are sent to penitentiaries.

¹ Includes 4 annexes to general hospitals.² Includes 3 annexes to general hospitals.

Subsection 1.—Statistics of Hospitals, other than Mental.

The total number of various general hospitals in operation in Canada during 1934 is given in the first part of Table 1. It is seen from that table that in addition to 628 public general hospitals there were 257 private general hospitals and 32 hospitals operated by the Dominion Government were made up of: 8 for war veterans, 1 quarantine and immigration, 1 marine and 2 leper hospitals under the direction of the Department of Pensions and National Health; 9 military hospitals under the Department of National Defence; and 7 hospitals for Indians under the Department of Indian Affairs.*

Summary statistics of reporting hospitals, which included 98.6 p.c. of all hospitals in 1934, are presented for the years 1931 to 1934 in Table 2, and detailed statistics of staff, facilities and movement of patients are shown by provinces in Table 3. It will be observed that the majority of hospitals not reporting are general hospitals in Yukon. These were naturally small hospitals and the non-inclusion of their statistics does not materially affect the value of the figures given for Canada and the provinces.

* A complete list of all hospitals in Canada, giving name, location, type, bed accommodation, etc., will be found in the new Hospital Directory for Canada, 1934, issued by the Dominion Bureau of Statistics.

¹ These institutions are classified in Table 1.

Out-Patient Departments.—Out-patient departments, or clinics, are operated independently or in connection with hospitals, medical colleges, universities or other institutions. The dispensary or clinic in connection with a hospital is

generally the out-patient department treating patients who do not occupy beds in the hospital. Sometimes, however, the out-patient department is distinct from the hospital proper and is a separate institution with its own staff, etc. The extension of out-patient services to patients of modest means has far-reaching and beneficial effects. It may replace admission to a hospital, or may serve to secure necessary and beneficial hospitalization. As a general rule, out-patient departments are subsidized from the funds of the general hospital and separate records are not kept. Until a uniform system of accounting is adopted, it will not be possible to give the average cost per patient.

Table 4 gives the hospitals of each class operating public out-patient departments in Canada, by provinces, 1934.

¹Two hospitals are reported under two headings.

²One hospital is reported under two

³Includes 154 patients taking series of treatments.

Subsection 2.—Statistics of Mental Hospitals.

The Census of Mental Institutions of Canada for June 1, 1931, gave the number of patients in all mental institutions as 31,686, of whom 24,198 were insane, 7,006 mentally deficient and 492 epileptic. The number of patients in mental institutions per 100,000 of the general population was 305.4 on June 1, 1931, 316.5 on Dec. 31, 1932, and 324.9 on Dec. 31, 1933.

At Dec. 31, 1934, there were 36,571 patients in mental institutions in Canada, and 2,535 on parole, making a total of 39,106, whereas the normal bed capacity was only 34,866, showing a seriously overcrowded situation over a period when the patient population on Jan. 1, 1934, and the admissions and separations during the year are considered. This overcrowded condition is specially marked in British Columbia, Manitoba, Saskatchewan, Ontario and Quebec, as is seen from Table 6. Of the 36,571 resident patients in 1934, 29,154 were insane, 6,915 were mentally deficient and 502 were epileptic. The patients per 100,000 of population at end of the year were 335.6. Table 5 gives general statistics of mental institutions for 1934.

CHAPTER XXVII.—JUDICIAL AND PENITENTIARY STATISTICS.*

Canadian Criminal Law and Procedure.—An account of the development of the Criminal Code in Canada was given at pp. 1085-1087 of the 1934-35 edition of the Year Book. In this article a *résumé* of procedure and of the extent and jurisdiction of the various classes of judges and magistrates was given.

The statistics presented in the tables that follow, which are summarized from the Annual Report of Statistics of Criminal and Other Offences, are collected directly from the criminal courts in the different judicial districts throughout the Dominion. There are 154 judicial districts, including 4 sub-districts, divided as to provinces as follows: Prince Edward Island 3, Nova Scotia 18, New Brunswick 15, Quebec 23, Ontario 47, Manitoba 6, Saskatchewan 19, Alberta 14, British Columbia 8 and Yukon 1. The figures for the Northwest Territories are obtained from the reports of the Royal Canadian Mounted Police.

Section 1.—General Tables.

The statistics relate to years ended Sept. 30, the latest report being for 1934. Beginning with the report for 1922, an enlargement of the classification of offences has been adopted, by which offences of juvenile offenders are compiled separately from those of adults.

According to the provisions of the Criminal Code, offences are classified as indictable and non-indictable. Broadly speaking, indictable offences are triable by jury, although in certain classes the accused is accorded the right of election as to whether he be tried by jury or before a judge without the intervention of a jury, and in other cases the jurisdiction of the magistrate as to trial is absolute and does not depend upon the consent of the accused. Non-indictable offences are usually dealt with summarily by police magistrates under the Summary Convictions Act and comprise breaches of municipal regulations and other minor offences. The term "indictable" applies to offences of adults only, similar offences committed by juveniles being termed "major" offences; similarly, "non-indictable" offences of adults are termed "minor" offences when attributed to juveniles. Previous to 1922, however, the classification into criminal and minor offences was followed in classifying statistics; the historical Table 1 and the more detailed short-term statistics of Table 2 continue the classification on a comparable basis, giving the totals for all offences, *i.e.*, different classes of criminal offences and minor offences, *including those of juvenile delinquents*. In connection with Table 1, it should be remembered that, while the Criminal Code undergoes little change over periods of time, the figures of summary convictions are influenced very much by the changing customs of the people, and are apt to increase with the increasing urbanization of the population. The most significant column of this table is the figure of criminal offences per 100,000 of population. Attention may be drawn to the increase in the proportion of both criminal offences and minor offences to population in recent years, convictions for criminal offences having risen from 284 per 100,000 population in 1921 to 425 in 1931 and 404 in 1934, and convictions for minor offences from 1,732 per 100,000 in 1921 to 3,113 in 1931 and 3,145 in 1934.

It should be understood that the classification of offences in these general tables is irrespective of the mode of procedure. That is to say, the "criminal"

* Revised by H. M. Boyd, Chief, Judicial Statistics Branch, Dominion Bureau of Statistics. The fifty-ninth Annual Report of Statistics of Criminal and Other Offences, for the year ended Sept. 30, 1934, is obtainable on application from the Dominion Bureau of Statistics.

cases include many indictable offences disposed of summarily under the Summary Trials Act. Hence any addition of indictable and major and minor offences, as shown in other tables, will not agree with the figures given in Tables 1 and 2. The object here is to show a broad historical record of criminal and minor offences respectively.

1.—Convictions for Criminal Offences, by Classes, and Total Convictions for Minor Offences, with Proportions to Population, years ended Sept. 30, 1911-34.

NOTE.—For figures for the years 1876-1910, see p. 993 of the 1930 Year Book.

The recent trend of total convictions, including those of juveniles, and of sentences imposed, is shown by provinces for the years 1928 to 1934 in Table 3. Death sentences, which numbered 28 in 1919 and 26 in 1920, dropped to 19 in 1928, rose again to 26 in 1929, then dropped to 17 in 1930 and rose again to 25, 23 and 24 in 1931-33, with a decline to 19 in 1934.

3.—Convictions and Sentences for All Offences, by Provinces, years ended Sept. 30, 1928-34.

Section 2.—Indictable Offences of Adults.

The progress of a community, from the moral point of view, is often judged by the number of convictions for indictable offences, as these are less affected than non-indictable offences by extraneous circumstances and the varying methods of law enforcement in different areas and in different years. However, in the

study of such statistics it is important to have comparable figures over a period of years, and these are set out by provinces for each year since 1911 in Table 4. Again, in Table 5 are shown the numbers of charges and convictions and the percentages of acquittals for the three years ended Sept. 30, 1932-34.

It may be stated that during the thirty-three-year period from 1900 to 1934 crimes increased from 4,853 to 31,684, or 553 p.c. The increase in the population during the same period was but 104.4 p.c., revealing that the increase in the crime rate was between five and six times that of the population.

4.—Convictions of Persons 16 years of Age and Over for Indictable Offences, by Provinces, years ended Sept. 30, 1911-34.

NOTE.—For figures for 1900-10, see p. 1016 of the 1933 Year Book.

Classes of Indictable Offences.—Indictable offences are divided under the Canadian system into six main classes, as follows: offences against the person, offences against property with violence, offences against property without violence, malicious offences against property, forgery and other offences against the currency, and other indictable offences. Details by offences are given in Table 6 and the details of the disposition of the charges in Table 7, which shows, with other information, that convictions of females numbered 3,145 in 1934 as against 3,477 in 1933 and 3,202 in 1932; as recently as 1924 the figure was only 1,826. Details as to occupation, conjugal condition, educational status, age, use of liquors, birthplace, religion and residence of those convicted of indictable offences are given in Table 8.

6.—Indictable Offences, by Classes, years ended Sept. 30, 1932-34.

NOTE.—The figures of this table do not include charges or convictions of juvenile delinquents.

¹ Notwithstanding the fact that the United Church of Canada was completely organized in 1926, these persons still reported themselves as Methodists.

Section 3.—Summary Convictions of Adults.

The following statistics relate to “non-indictable” offences committed by adults (persons 16 years of age and over) and disposed of by police magistrates or other justices of the peace, under authority of the Summary Convictions Act. Such convictions numbered 328,744 during the year ended Sept. 30, 1934, as compared with 292,673 in 1933, 297,909 in 1932, 327,778 in 1931, and 193,240 in 1927.

This marked increase in the past seven years has been due almost entirely to breaches of traffic regulations, which have risen from 78,027 in 1926 to 217,827 in 1934, or from 46 p.c. to nearly 66 p.c. of the total of summary convictions. By sexes, the summary convictions appear as follows: in 1926, males 159,528, females 10,385; in 1930, males 292,557, females 16,202; in 1931, males 312,111, females 15,667; in 1932, males 281,318, females 16,591; in 1933, males 275,229; females 17,444; and in 1934, 311,542 males, 17,202 females.

Summary convictions are given by provinces from 1911 to 1934 in Table 9, and details of these offences are given for the four latest years in Table 10.

9.—Summary Convictions, by Provinces, years ended Sept. 30, 1911-34.

NOTE.—For figures for 1900-10, see p. 1020 of the 1933 Year Book.

Convictions for Drunkenness.—The number of summary convictions for drunkenness in Canada in 1934 was 20,764 as compared with 38,826 as recently as 1929. Maximum figures were attained in the years 1913 and 1914; during the War there was an appreciable reduction and since the War, while figures have fluctuated, they have not approximated former high levels. The decline in the latest few years would appear to be at least partly due to the depression. Table 11 shows the number of convictions by provinces and years from 1911 to 1934.

11.—Convictions for Drunkenness, by Provinces, years ended Sept. 30, 1911-34.

NOTE.—For figures for 1900-10, see p. 1021 of the 1933 Year Book.

¹ Revised since publication of the 1934-35 Year Book.

Offences against the Liquor Acts.—Until the Great War, alcoholic liquors were generally sold under specified conditions by licensed hotels or licensed shops. Offences against the Liquor Acts usually represented a breach of the conditions of sale. During the War, prohibition was generally established but in more recent years the tendency has been for the Provincial Governments to take over the sale of liquor through commissions and derive a revenue therefrom (see pp. 1073-1077). Eight of the nine provinces now have their liquor commissions, Prince Edward Island being the only province in which prohibition prevails. In these circumstances, the convictions for offences against the Liquor Acts in 1929 reached the highest figure on record, *viz.*, 19,327, but have since fallen off to 10,754 in 1934. The number of such convictions in each year since 1911 is given by provinces in Table 12.

12.—Convictions for Offences against the Liquor Acts, by Provinces, years ended Sept. 30, 1911-34.

NOTE.—For figures for the years 1900-10, see p. 1022 of the 1933 Year Book.

Breaches of Traffic Regulations.—Convictions for breaches of traffic regulations (Table 13), which at the beginning of the century numbered only 185 in all Canada have, as a result of the growing density and increasing use of motor vehicles, become the largest element in the non-indictable offences. Such convictions reached a record total of 217,827 in 1934, when they represented 66 p.c. of the total of 328,744 (see Table 9) summary convictions.

13.—Convictions for Breaches of Traffic Regulations, by Provinces, years ended Sept. 30, 1911-34.

NOTE.—For figures for the years 1900-10, see p. 1023 of the 1933 Year Book.

For the year 1933, Ontario, which had 48 p.c. of the registrations of motor vehicles in Canada (see p. 690), had 59 p.c. of the total convictions; Quebec in the same year had 15 p.c. of the motor vehicles and 30 p.c. of the convictions; and Manitoba 6.4 p.c. of the motor vehicles and 5.8 p.c. of the convictions. In interpreting the figures in this way, however, it should be pointed out that traffic regulations are by no means uniform throughout Canada and no account is taken of the differences in the degrees of urbanization in the provinces. Thus, the above three provinces contain large centres of population, while in the Maritime Provinces, Saskatchewan and Alberta, with a lower degree of urbanization, convictions were low in proportion to the number of motor vehicles registered.

Section 4.—Juvenile Delinquency.

Juveniles under 16 years of age to the number of 7,806 were found guilty of various offences in the year ended Sept. 30, 1934, as compared with 7,453 in 1933, 7,363 in 1932, 7,768 in 1931, 8,425 in 1930, 7,826 in 1929, 7,699 in 1928, 8,185 in 1927 and 7,831 in 1926. Of the 1934 total, 5,353 were convicted of "major" offences and 2,453 of "minor" offences, terms which correspond very nearly to "indictable" and "non-indictable" offences, as applied to adults. The offences proven against juveniles in 1933 and 1934 are shown by provinces in Table 14.

Major Offences.—In Table 15 are shown the various major offences for which juvenile delinquents were convicted in 1928 to 1934. It will be observed that theft, house- and shop-breaking with theft, and other wilful damage to property account for the great bulk of the offences; in 1934, 93 p.c. of the major offences were of this character.

15.—Juvenile Delinquents Convicted of Major Offences, by Offences, years ended Sept. 30, 1928-34.

Minor Offences.—Of the 2,453 juvenile delinquents found guilty of minor offences in 1934, 406 were convicted of breaches of municipal by-laws, 567 of disorderly conduct and disturbing the peace, 574 of disobedience or incorrigibility, 194 of trespass, 268 of truancy, 91 of vagrancy and indecent language and 353 of other minor offences.

Section 5.—Police Statistics.

In 1934, 164 cities and towns, with populations of 4,000 or over, supplied police statistics to the Dominion Bureau of Statistics. These cities and towns, with an aggregate population of 4,432,750, had 5,157 policemen, who made 303,288 arrests and summonses. The total number of offences committed during the

year and made known to the police was 388,585, and the number of prosecutions was 296,321 or 76.2 p.c. of the known offences. Convictions secured in respect of these offences numbered 247,242, being 63.6 p.c. of the known offences and 83.4 p.c. of the prosecutions.

The number of automobiles reported stolen was 7,936, of which 7,895 were recovered. Of 13,218 bicycles stolen, 6,669 were recovered. The value of other lost articles reported to the police was \$2,105,934, of which \$1,001,765 or 48 p.c. was recovered.

¹ Revised since the publication of the 1934-35 Year Book.

Section 6.—Penitentiary Statistics.*

The Penitentiaries Branch of the Department of Justice is charged with the administration of the various penitentiaries of Canada. Seven institutions are included in the system, the two largest of which are at Portsmouth, Ont., and St. Vincent de Paul, Que., while the other five are at Dorchester, N.B.; Prince Albert, Sask.; Stony Mountain, Man.; New Westminster (including Piers Island), B.C. and Collins Bay, Ont. During the fiscal year ended Mar. 31, 1935, the average daily population of these institutions was 3,895 and the total net expenditure for the year was \$2,569,945 or \$659.80 per capita, compared with 4,358 average daily population and \$2,554,890 total net expenditure or \$586.25 per capita for the year 1934.

The Piers Island Penitentiary, which is administered by the warden of the New Westminster institution, was provided in 1932 for the custody of members of the Doukhobor colony who were given three-year sentences. Those in custody at Piers Island Penitentiary on Mar. 31, 1933, numbered 570 and on Mar. 31, 1934, 531. This special institution was closed on Mar. 28, 1935, the remaining 39 prisoners (all males) being transferred to the British Columbia Penitentiary at New Westminster. As the inclusion of this population in the general penitentiary statistics affects the comparability of the statistics of these years with those of former and

* Penitentiary statistics are also summarized from the institutional side at p. 1010. A historical sketch of penitentiaries is given on p. 1008.

succeeding years, details regarding the inmates at Piers Island are given here, in order that, by deduction from the totals given in Tables 19 and 20, particulars comparable with those of former years may be obtained regarding the population of ordinary penitentiaries. The ages of those in custody at Piers Island were:

Fiscal Year.	Under 20.	20-30.	30-40.	40-50.	50-60.	Over 60.	Total.
1933.....	31	168	97	92	66	116	570
1934.....	29	153	90	88	63	108	531

These people were of Caucasian race and of the 570 inmates in 1933, 231 were born in Canada and the remaining 339 in Russia; in 1934, of 531 inmates, 231 were born in Canada and 300 in Russia. Particulars regarding their conjugal state and sex were as follows:

Fiscal Year.	Single.	Married.	Widowed.	Divorced.	Total.	Male.	Female.
1933.....	88	435	43	4	570	292	278
1934.....	78	409	40	4	531	264	267

They were all total abstainers and adherents of the Doukhobor creed.

With the exception of the large number of women among the Doukhobors formerly confined at Piers Island, all female convicts are kept in the penitentiary at Portsmouth, a suburb of Kingston, where special quarters and staff are maintained for their detention and supervision. A new building for this purpose was completed and occupied during 1934. Female convicts in custody there on Mar. 31, 1935, numbered 40 compared with 46 in 1934 and 27 in 1925.

Tables 18-20 give the more important penitentiary statistics as reported by the Superintendent. The number of convicts in penitentiaries was 1,865 in 1910, rose to 2,118 in 1916 and declined to 1,468 in 1918. After demobilization and the depression of 1921, the number of convicts rose to 2,640 in 1922, declined to 2,225 in 1924 and then increased to 4,164 in 1932. The increase was particularly rapid after 1929, amounting to 1,395 or 44 p.c. in three years. Excluding the 39 Doukhobors at New Westminster, the number of convicts in 1935, at 3,513, was lower than in any of the four preceding years. The number of paroles, as shown in Table 18, numbered 554 in 1935, as compared with 731 in 1934 and 488 in 1933.

Table 19 shows the ages of convicts by groups. In 1935, of the total of 3,552, 9.1 p.c. were under 20 years of age and 47.2 p.c. between 20 and 30 years of age; thus 56.3 p.c. were under 30. In 1914 there were 2,003 convicts of whom 9.3 p.c. were under 20 and 44.4 p.c. between 20 and 30, a total of 53.7 p.c. under 30. In 1923 there were 2,486 convicts and 11.3 p.c. were under 20, 46.6 p.c. between 20 and 30, or 57.9 p.c. under 30 years of age. The average age of convicts appears to be slightly younger since the War, but no definite trend is shown in the past decade, although there is a good deal of variation from year to year. Detailed statistics of the race, nationality by place of birth, conjugal state, sex and religion of convicts are presented in Table 20.

Movement of Population of Penal Institutions.—Penal institutions may be classified under four heads: (1) penitentiaries, with slow turnover, since prisoners have long sentences; (2) reformatories for boys and (3) reformatories for girls, also with rather slow turnovers, but more rapid in the case of boys than in that of girls; and (4) common gaols, where the turnover is extremely rapid. If the average population for the year be the average of the inmates at the beginning and end

of the year, and the number discharged be the turnover, the turnover in 1934 was: in penitentiaries, 47 p.c.; in reformatories for boys, 212 p.c.; in reformatories for girls, 73 p.c.; in gaols, no less than 1,244 p.c. Thus, the average time spent in gaol was about four weeks. In dealing with these figures it must be borne in mind that the common gaol population changes from day to day and is partly made up of accused persons awaiting trial who may be liberated to-day or sent to a penitentiary or reformatory to-morrow.

17.—Population of Penal Institutions, 1932-34.

NOTE.—Penitentiary statistics until 1919 were supplied directly by each penitentiary and were for the calendar year. For 1920 and subsequent years they have been supplied by the Superintendent of Penitentiaries and are for the fiscal years ended Mar. 31. For other institutions, the figures are for the years ended Sept. 30.

Totals.....	2,560	2,769	3,187	3,714	4,164	4,587	4,220	3,552

¹ All "coloured".² The unusually high figures for many items and the totals in 1933 and 1934 are due to the confinement of Doukhorobors in the special penitentiary on Piers Island, B.C. See pp. 1034-1035.³ These persons returned themselves as "Methodists" in spite of the union with Presbyterians and Congregationalists to form the United Church of Canada in 1925.

CHAPTER XXVIII.—MISCELLANEOUS ADMINISTRATION.

Section 1.—Public Lands.

Table 1, pp. 1108-1110 of the 1934-35 Year Book summarized the land area of Canada by character and tenure. The figures given were the closest estimates available at that time. Several of them, however, were based upon census data which cannot be revised until the 1941 census is taken, but which, from now until 1941, will become less and less representative of existing conditions. Under the circumstances, it is considered advisable to limit Table 1, below, to the summary classification by tenure which can be brought up to date from year to year, and refer the reader to the quoted pages of the 1934-35 Year Book for the classification by surface resources, which will not be revised for several years to come.

1.—Summary of Classification of Lands in Canada, by Tenure.

¹This item includes lands in process of alienation where such are not reported under Item 2. ²Figures are obtained from provincial sources. ³No estimate available. ⁴In Yukon and N.W.T. areas aggregating 338,916,000 acres have been set apart by Order in Council as game preserves and sanctuaries in which only native Indians and Eskimos may hunt, but have not been permanently dedicated to this purpose by Parliament and are not, therefore, regarded as parks. ⁵For the provinces indicated only. ⁶Including the Wood-Buffalo Park (which, though reserved by the Dominion, is not administered by the National Parks Branch) and the Tar Sands Reserve. ⁷That portion of the Wood-Buffalo Park in the Northwest Territories. ⁸Estimated by the Topographical Survey, Department of the Interior. ⁹This total is not the addition of the column items because the figures, being obtained from the various sources shown, do not exactly tie-in with one another.

Subsection 1.—Dominion Public Lands.*

As stated on p. 1019 of the 1931 Year Book, the lands and natural resources lying within the boundaries of the provinces of Manitoba, Saskatchewan, Alberta and British Columbia, which had formerly been administered by the Dominion Government, were transferred to the administration of the provinces concerned at various dates in 1930.

Actual Dominion lands, therefore, now comprise: the Northwest Territories, including the Arctic Archipelago and the islands in Hudson strait and bay; Yukon; the National Park areas (see pp. 45-48), Indian reserves (see p. 1053), and historic sites in the different provinces throughout Canada; certain small and widely scattered parcels of Ordnance and Admiralty lands which have been held by the Dominion Government since Confederation and are rented, disposed of, or otherwise administered with a view to bringing as many properties as possible to a state of revenue production; and, finally, public lands, at one time alienated, but which have been re-vested in the Crown in the right of the Dominion for various reasons, and upon which public moneys have been spent.

The great bulk of the land areas under Dominion administration are those of Yukon and the Northwest Territories, amounting to about 936,680,000 acres or 42 p.c. of the land surface of Canada. The southern border of both Yukon and the Northwest Territories is 60°N. latitude. In Europe, Oslo, Stockholm and Leningrad are near this line, while about three-fourths of Norway, two-thirds of Sweden, all of Finland and a large proportion of Russia are north of it. Interest in this northern part of the national domain has increased in the past decade and the administration of these lands was placed under a separate branch of the Dominion Government, the Northwest Territories and Yukon Branch of the Department of the Interior, until 1931, when, on the transfer of the natural resources of Manitoba, Saskatchewan, Alberta and of the Railway Belt and Peace River Block of British Columbia to the respective provincial administrations, it was vested in the Dominion Lands Administration, now the Lands, Northwest Territories and Yukon Branch of the Department of the Interior. The Royal Canadian Mounted Police maintain law and order throughout the Northwest Territories and Yukon. More detailed particulars of the administration of each territory follow:—

The Northwest Territories.—The government of the Northwest Territories is vested in a Commissioner, a Deputy Commissioner, and a Council of five members with Ottawa as the seat of Government. The administration is carried on by the Department of the Interior through the Lands, Northwest Territories and Yukon Branch. The Territories are subdivided for administrative purposes into the provisional districts of Mackenzie, Keewatin and Franklin. The district of Mackenzie is, as yet, the most widely known and developed, trading posts and settlements being located all along the great stretch of inland waterways known as the Mackenzie system. Fort Smith, the headquarters of the Mackenzie district, is located on the Slave river north of the rapids. From this point there is uninterrupted navigation to the Arctic ocean, a distance of 1,369 miles and along the Arctic coast as far east as King William island.

The Administration has provided for a medical and nursing service, grants to the Anglican and Roman Catholic missions for education and hospitals, an excellent mail service in which river steamboats and aeroplanes co-operate, motor

*Revised by J. Lorne Turner, Director, Lands, Northwest Territories and Yukon Branch, Department of the Interior.

roads, and a system of radio stations linking up Fort Smith, Resolution, Simpson, Norman and Aklavik with Edmonton, Alberta, and with Dawson and Mayo, Yukon. Direction-finding and meteorological stations are located at Coppermine and Chesterfield while the transportation and mining concerns operate a number of private radio stations.

The Department of the Interior has set aside certain areas, totalling over 338,916,000 acres, as preserves wherein only the Indian and the Eskimo may hunt. Officers in the field have made investigations into the conditions affecting musk-oxen, caribou, and other forms of wild life. The Wood-Buffalo Park in the vicinity of Fort Smith covers an area of 17,300 sq. miles; it has been specially preserved for the protection of the buffalo. The Thelon Game Sanctuary to the east of Great Slave lake is, in its turn, the home of musk-oxen and caribou.

Included in the Northwest Territories are the Arctic Prairies, which are capable of supplying pasturage to large numbers of reindeer and caribou. Following investigation, 2,370 head of reindeer were imported from Alaska and established at a Government reindeer reserve in the vicinity of Kittigazuit east of the Mackenzie River delta containing an area of approximately 6,000 square miles. The natural increase in the herd brought it up to over 3,100 and already a distribution of meat and hides has been made to the hospitals and schools in the Mackenzie delta. Indications are that the experiment is proving successful and will result in the plentiful supply of meat and hides in the future.

The introduction of wireless communication and the development of reception has been a great boon to the isolated posts in the Northwest Territories. It enables traders and trappers to keep in touch with outside markets, and furnishes the inhabitants generally with news of current events.

In view of the great increase in the use of aircraft for mail and general transportation, the Administration is undertaking the development of landing facilities throughout the Mackenzie district. A winter landing field has been conditioned at Fort Smith and for the convenience of the travelling public, portable huts, floating docks, etc., have been erected at the more important points.

Exploratory work has been carried on throughout the Territories and local surveys made in all districts. Mineral prospectors are following in the tracks of the explorers, the aeroplane being used as the chief means of transportation. The Laurentian Shield, which has proved so rich in valuable minerals in Eastern Canada is continued into the eastern half of the Territories—that portion lying between Great Slave and Great Bear lakes and Hudson bay—and valuable discoveries have been made in this area. The rich native silver and high-grade pitchblende ores discovered, during the past few years, east and south-east of Great Bear lake are now under development. The oil wells near Norman on the Mackenzie river have been in active operation since 1932, the bulk of the oil produced being used by river craft and shipped to mining interests operating at the eastern end of Great Bear lake. The agricultural land of the Territories lies almost entirely in the extension of the central plain defined by the Mackenzie valley.

It is known that there are many possible water-power sites throughout the Territories; these will no doubt be developed as a consequence of mining enterprises. Much of the upper Mackenzie valley carries a forest cover, which furnishes timber and fuel for local needs. Fishing, agriculture, mining and lumbering are engaged in to some extent, but the principal industry of the Territories is still the taking and export of furs. Many trading posts operate throughout the regions tributary to the Arctic coast, Hudson bay, and the great inland systems of waterways.

Yukon.—The Yukon Territory is administered by the Lands, Northwest Territories and Yukon Branch of the Department of the Interior as in the case of the Northwest Territories. The Comptroller, resident at Dawson, is the executive head of a local elective government of three members termed the Yukon Council, with jurisdiction over local matters. The Comptroller acts on instructions from the Governor in Council or the Minister of the Interior. Hospitals, schools, motor roads, and other amenities of modern life have been provided and, in addition to the overland telegraph line, wireless stations at Dawson and Mayo link up with the outside world through the Northwest Territories and Edmonton.

The route ordinarily taken to enter Yukon is from Skagway, Alaska, on the south, thence by the White Pass and Yukon Railway to Whitehorse, and by river boat to Dawson.

The use of aircraft for transportation purposes is increasing and during 1934 landing fields were conditioned at Whitehorse, Dawson and Mayo, a temporary licence being issued for the first-mentioned field. In 1935 the Whitehorse and Dawson fields were further developed, while considerable work was done on fields at Selkirk and Carcross.

Yukon has produced over \$200,000,000 worth of gold since the Klondike rush, but the old placer claims, operated with cradle, pick and shovel, have given place to consolidated holdings worked with hydraulic dredges and other modern machinery. Silver, lead, copper, tungsten and coal are known to exist in paying quantities, and of late years the development of the silver-lead ores of the Mayo district has been one of the major factors in the growth of lode-mining enterprises. There is a hydro-electric installation of 13,200 h.p. in Yukon, but this is only a small proportion of the possible installation which will be developed as required.

Although fishing, agriculture (including fur-farming), and some lumbering are carried on as auxiliary industries, the future of Yukon is inevitably bound up with mining development.

Subsection 2.—Provincial Public Lands.

In the Maritime Provinces, in Quebec, Ontario and British Columbia (except the Railway Belt and the Peace River Block) the public lands have been administered by the Provincial Governments since Confederation. Owing to the transfer of the natural resources to the Prairie Provinces and British Columbia, as outlined in Chapter XXVII, p. 1019 of the 1931 Year Book, public lands in all provinces are now under provincial administration. In Prince Edward Island, all the land is alienated and there are no provincial public lands.

Those interested in securing information regarding provincial public lands are referred to the following officials of the respective provinces: Minister of Lands and Forests, Halifax, N.S.; Deputy Minister of Lands and Mines, Fredericton, N.B.; Deputy Minister of Lands and Forests, Quebec, Que.; Deputy Minister of Lands and Forests, Toronto, Ont.; Director of Lands, Department of Mines and Natural Resources, Winnipeg, Man.; Director of Lands, Department of Natural Resources, Regina, Sask.; Director of Lands, Department of Lands and Mines, Edmonton, Alta.; Deputy Minister of Lands, Victoria, B.C.

Section 2.—National Defence.*

Before the outbreak of the Great War, the Canadian Militia consisted of a Permanent Force, which on Mar. 31, 1914, numbered 3,000 officers, non-commissioned officers and men, and an Active Militia, which at the same date numbered

*Revised by H. W. Brown, Asst. Deputy Minister, Department of National Defence.

5,615 officers and 68,991 non-commissioned officers and men. After the outbreak of war on Aug. 4, 1914, successive contingents of troops of all arms were recruited, equipped, trained and dispatched by the Dominion Government to England for active service. When hostilities ceased on Nov. 11, 1918, there had been sent overseas, for active service in the Canadian Expeditionary Force, about 418,000 officers, non-commissioned officers and men.* In addition to these, several thousand Canadians served with the Royal Air Force.

Organization.—Prior to 1922, three departments of the Canadian Government were concerned with the defence of Canada, *viz.*, the Department of Militia and Defence, the Department of the Naval Service, and the Air Board.

During the Session of 1922, the National Defence Act was passed, consolidating the Department of Militia and Defence, the Department of the Naval Service and the Air Board into the Department of National Defence. This Act became effective by proclamation on Jan. 1, 1923. Under it, there is a Minister of National Defence and a Deputy Minister of National Defence. To advise the Minister, a Defence Council has been constituted by Order in Council, consisting of a President (the Minister), a Vice-President (the Deputy Minister), and the following members: the Chief of the General Staff and the Chief of the Naval Staff. The Adjutant-General, the Quartermaster-General and the Senior Air Officer, Royal Canadian Air Force, are associate members. There is also a Secretary of the Council.

Subsection 1.—The Naval Service.

The Naval Service of Canada was established by the Naval Service Act, 1910 (9-10 Edw. VII, c. 43), the main provisions of which were described in the 1910 Year Book, pp. xxvi-xxix.

The Royal Canadian Navy and its Reserve Forces are under the direction of the Chief of the Naval Staff, who is a member of the Defence Council. The Service consists of:—

1. Royal Canadian Navy (permanent).
2. Royal Canadian Naval Reserve (non-permanent).
3. Royal Canadian Naval Volunteer Reserve (non-permanent).

Administrative and operational staff for all three Forces is provided from the Royal Canadian Navy.

The Royal Canadian Navy.—The Royal Canadian Navy has an authorized complement of 117 officers and 862 ratings. A large majority of the men of the R.C.N. are serving under 7-year engagements. A small proportion consists of specialist gunnery, torpedo, and engine-room ratings, lent from the Royal Navy. (On Dec. 31, 1935, there were 4 Royal Navy officers and 11 Royal Navy ratings on loan to the Royal Canadian Navy.

A proportion of the officers of the Royal Canadian Navy serves periodically in ships of the Royal Navy, to acquire experience in capital ships, cruisers, etc., and training courses are arranged for selected officers at the instructional schools of the Royal Navy to qualify in war staff, gunnery, torpedo, wireless and other duties. Courses for selected men in the gunnery, torpedo, wireless telegraphy and mechanical training schools of the Royal Navy are similarly arranged.

The ships of the Royal Canadian Navy are:—

- H.M.C.S. *Saguenay* (destroyer—in commission).
- H.M.C.S. *Skeena* (destroyer—in commission).
- H.M.C.S. *Champlain* (destroyer—in commission).
- H.M.C.S. *Vancouver* (destroyer—in commission).
- H.M.C.S. *Armistieres* (minesweeper—in commission).

*For the detailed expenditures of the Dominion Government on account of war appropriations in the fiscal years 1915-21, see the Canada Year Book, 1921, p. 798.

Naval training establishments comprising: naval barracks; gunnery drill sheds, with all modern appliances for teaching gun-laying, sight-setting, etc.; torpedo and electrical schools; parade grounds; and other equipment are maintained at Halifax and Esquimalt. Naval dockyards, with work shops, etc., for refitting and supplying necessary stores to H.M.C. ships, are also maintained at Halifax and Esquimalt.

Royal Canadian Naval Reserve.—The establishment of the Royal Canadian Naval Reserve is 70 officers and 430 men recruited from among sea-faring personnel. Officers have been appointed to act as registrars at Halifax, Charlottetown, Quebec, Montreal, Vancouver.

Officers and men of the Royal Canadian Naval Reserve attend naval training at Halifax and Esquimalt for 42 days for the first year of enrolment and for 14 days annually or biennially thereafter. They are permitted to volunteer for service afloat up to a maximum of six months during each period of enrolment. The period of enrolment in the Royal Canadian Naval Reserve is five years.

Royal Canadian Naval Volunteer Reserve.—The establishment of the Royal Canadian Naval Volunteer Reserve is 70 officers and 930 men, distributed as follows: Halifax; Saint John; Charlottetown; Quebec; Montreal; Ottawa; Toronto; Hamilton; Winnipeg; Saskatoon; Regina; Edmonton; Calgary; Vancouver; Prince Rupert.

Each Division is under the immediate command of an officer of the R.C.N.V.R., appointed as commanding officer. The commanding officer is assisted by other commissioned officers of the Force.

A petty officer instructor (a highly qualified ex-petty officer of the Royal Navy or of the Royal Canadian Navy) is employed at each Division to give instruction to men of the Division in gunnery, torpedo practice, seamanship and other naval subjects.

Each officer and man of the R.C.N.V.R. performs annually a minimum of 30 drills, of a duration of not less than one hour each, at Division headquarters. In actual practice 40 to 50 drills have been performed annually by each member of the R.C.N.V.R. Officers and men also attend from two to three weeks naval training annually at the naval bases at Halifax or Esquimalt, or at sea in H.M.C. or H.M. ships.

Officers and men who can obtain the necessary leave of absence are permitted to perform a maximum of four months voluntary service during each period of enrolment, and a large number have availed themselves of this opportunity of gaining extended naval experience under sea-going conditions. The period of enrolment and of re-enrolment in the R.C.N.V.R. is three years.

Subsection 2.—Military Forces.

The Militia of Canada is constituted by the Militia Act. The Active Militia is divided into the Permanent and the Non-Permanent Militia.

Permanent Militia.—The Permanent Force consists of the following units:—

Cavalry.—The Royal Canadian Dragoons; Lord Strathcona's Horse (Royal Canadians).
Artillery.—The Royal Canadian Horse Artillery Brigade ("A", "B" and "C" Batteries); Royal Canadian Artillery (Nos. 1, 2 and 5 Heavy Batteries and No. 3 Medium Battery).
Engineers.—Royal Canadian Engineers (13 detachments and 1 field company).
Signals.—The Royal Canadian Corps of Signals.
Infantry.—The Royal Canadian Regiment; Princess Patricia's Canadian Light Infantry; The Royal 22e Regiment (a French-Canadian regiment).
Army Service Corps.—The Royal Canadian Army Service Corps (12 detachments).
Medical Corps.—The Royal Canadian Army Medical Corps (12 detachments).
Veterinary Corps.—The Royal Canadian Army Veterinary Corps (8 detachments).
Ordnance Corps.—The Royal Canadian Ordnance Corps (12 detachments).
Pay Corps.—The Royal Canadian Army Pay Corps (12 detachments).
Military Clerks.—The Corps of Military Staff Clerks (12 detachments).

The strength of the Permanent Active Militia is limited by the Amending Act of 1919 to 10,000, but at present the limited establishment is less than 3,800.

Schools of Instruction.—The Canadian Small Arms School is the only school which is an independent unit of the Permanent Force, but at all stations of the Permanent Force in Canada Royal Schools of Instruction are conducted.

Non-Permanent Militia.—The Non-Permanent Militia consists of:—

- 34 Regiments of Cavalry and Mounted Rifles.
- 70 Field Batteries, Canadian Artillery.
- 16 Medium Batteries, Canadian Artillery.
- 11 Heavy Batteries, Canadian Artillery.
- 3 Anti-Aircraft Sections, Canadian Artillery.
- 15 Field Companies of Engineers.
- 2 Fortress Companies of Engineers.
- 7 Field Troops of Engineers.
- 10 Divisional Signals.
- 2 Fortress Signal Companies.
- 7 Signal Troops.
- 22 Contingents, Canadian Officers' Training Corps.
- 123 Battalions of Infantry.
- 15 Machine Gun Units.
- 12 Divisional Canadian Army Service Corps.
- 51 Units of the Canadian Army Medical Corps.
- Canadian Army Dental Corps, General List.
- 11 Detachments of the Canadian Army Veterinary Corps.
- 11 Detachments of the Canadian Ordnance Corps.
- 12 Detachments and 1 Base Post Office of the Canadian Postal Corps.

The total establishment of the Non-Permanent Militia is 9,010 officers and 124,925 other ranks, a total of 133,935, distributed as shown in the following table:—

2.—Permanent and Non-Permanent Active Militia in Canada, 1935.

Arm of Service.	Permanent Active Militia.		Non-Permanent Active Militia.	
	Personnel.	Horses.	Personnel.	Horses.

Non-Combatants.....	374	—	5,103	688
Totals.....	3,781	524	133,935	19,267

Reserve Militia.—In addition to the Active Militia, there is also the Reserve Militia, a framework designed to serve as a basis for contingent military organization. Drill and training are voluntary and entail no expense to the public.

The reserve formations of the Active Militia, as distinguished from the Reserve Militia mentioned above, comprise:—

- The Reserve of Officers (general list).
- Reserve unit for each active unit.
- Reserve Regimental Depots (Cavalry and Infantry).

The reserve units of the Active Militia are intended for the purpose of providing for the organization of the officers and men who have completed their service in the Active Militia or who have otherwise received a military training. On completion of service in the Active Militia men are not posted automatically to reserve units. These units are recruited by specific enlistment.

Military Districts.—For the command, training and administration of the Canadian Militia, Canada is divided into 11 military districts, each under a commander assisted by a district staff.

Militia Appropriations.—The Militia appropriations for the six fiscal years ended Mar. 31, 1932-37, are shown in Table 3.

3.—Money Voted by Parliament for the Militia, fiscal years ended Mar. 31, 1932-37.

Subsection 3.—Air Service.

The Royal Canadian Air Force is composed of the Permanent Active Air Force, the Non-Permanent Active Air Force, and a Reserve of Officers. The Royal Canadian Air Force administers and controls all military air operations and air operations for civil government departments. The duties of the Royal Canadian Air Force are as follows:—

- (a) To organize, train and maintain an air force for the defence of Canada.
- (b) To assist in the development of civil aviation by—
 - (i) Providing advanced flying training to civilian pilots, instructors and commercial pilots.
 - (ii) Initial development of air routes.
 - (iii) Technical supervision of airworthiness and inspection of aircraft belonging to private and commercial operators, and aircraft constructed or overhauled by aircraft manufacturing firms, and acting as consultant in matters pertaining to civil aviation generally.
- (c) The conduct of flying required to assist the several departments of the Dominion Government in the development and conservation of the country's natural resources, and other related services.

Permanent Active Air Force stations and units are located as follows:—

Location.	Duty.
R.C.A.F. Headquarters, Ottawa, Ont.	
No. 1 Aircraft Depot, R.C.A.F., Ottawa, Ont.....	Stores and repair depot.
R.C.A.F. Station, Ottawa, Ont.....	} Test and experimental work and civil government air operations.
Station Headquarters; No. 7 (General Purpose) Squadron.....	
R.C.A.F. Photographic Establishment.....	
No. 8 (General Purpose) Squadron, Winnipeg, Man.....	Civil government air operations.
R.C.A.F. Training Group, Camp Borden, Ont.....	} Training.
Group Headquarters.....	
Air Armament School.....	
Flying Training School.....	
R.C.A.F. Station, Trenton, Ont.....	} Training and service.
Station Headquarters.....	
Technical Training School.....	
School of Army Co-operation.....	
Air Navigation and Seaplane School.....	
No. 2 (Army Co-operation) Squadron.....	
No. 3 (Bomber) Squadron.....	
No. 6 (Torpedo Bomber) Squadron.....	
No. 4 (Flying Boat) Squadron, Vancouver, B.C.....	} Coast reconnaissance and civil government air operations.
No. 5 (Flying Boat) Squadron, Dartmouth, N.S.....	
	} Coast reconnaissance and civil government air operations.

Non-Permanent Active Air Force units are located as follows:—

No. 10 (City of Toronto) (Army Co-operation) Squadron, Toronto, Ont.
No. 11 (Army Co-operation) Squadron, Vancouver, B.C.
No. 12 (Army Co-operation) Squadron, Winnipeg, Man.
No. 15 (Fighter) Squadron, Montreal, Que. (now in process of organization).
No. 18 (Bomber) Squadron, Montreal, Que. (now in process of organization).
No. 19 (Bomber) Squadron, Hamilton, Ont. (now in process of organization).
No. 20 (Bomber) Squadron, Regina, Sask. (now in process of organization).

The strength of the Royal Canadian Air Force on Dec. 31, 1935, was:—

	Officers.	Airmen.
Permanent Active Air Force.....	143	819
Non-Permanent Active Air Force.....	46	277

Subsection 4.—Civil Aviation.*

The Civil Aviation Branch is under the Controller of Civil Aviation, who is directly responsible to the Deputy Minister. Its duties include the inspection of licences and registration of aircraft, air harbours, commercial and private air pilots, air engineers and air navigators. In addition to these duties, the location and construction of air routes and any matters connected with airship services are administered in this Branch.

Civil aviation in the Dominion has had its chief development in connection with the exploration and conservation of the natural resources of the provinces, including forestry protection, air photography, and transport of men and supplies to remote points and mining districts. At the beginning of 1935, 20 regular air-mail routes were in operation. On Dec. 31, 1935, there were 30 air-mail routes in operation.

*See also pp. 697-699.

On Dec. 31, 1935, there were certificates and licences in force as follows: private air pilots, 496; commercial air pilots, 414; air engineers, 472; registration of aircraft, 380; air-harbour licences, 96.

Airway Development.—Construction work on aerodromes of the Trans-Canada Airway was conducted on 48 locations. Of these 20 are now usable, though not entirely completed, and on 9 others construction is sufficiently advanced to permit of their use in emergency. Ten additional sites have been acquired but construction has not been started. Hangars were erected at 4 main aerodromes at Wagaming, Kapuskasing, Emsdale and Mégantic. Radio beacon buildings were constructed at Kapuskasing, Dane, Emsdale and St. Hubert and quarters for signals personnel were built at Kapuskasing, Dane and Emsdale.

Subsection 5.—The Royal Military College.

The Royal Military College of Canada was founded in 1876 by the Honourable Alexander Mackenzie, then Prime Minister of Canada. Since its foundation, 2,508 gentleman cadets have been enrolled, and of this number 191 are now in attendance.

The maximum number of cadets who may be in residence at any one time is restricted by Order in Council to two hundred.

The Royal Military College has a very distinguished record in connection with the War. Of the 914 graduates and ex-cadets who served, 353 were granted commissions direct from the College, and 43 enlisted with a view to obtaining commissions; 156 ex-cadets were reported as killed in action, died of wounds, or missing. Ex-cadets of the College won the following honours and decorations: 1 Victoria Cross and 3 recommendations for the Victoria Cross, 106 Distinguished Service Orders, 109 Military Crosses, 2 Distinguished Flying Crosses, 62 other British decorations, 42 foreign decorations. Three Canadian and one Australian divisions were commanded by graduates of the College.

Ex-cadets who have served in the army, either in the regular forces or during the Great War, include 1 general, 5 lieutenant-generals, 17 major-generals, and 29 brigadier-generals or brigadiers. Eleven knighthoods have been conferred on ex-cadets for distinguished service.

The establishment of the College, as stated in the Act of 1874 (37 Vict., c. 36) was "for the purpose of imparting a complete education in all branches of military tactics, fortifications, engineering and general scientific knowledge in the subjects connected with and necessary to a thorough knowledge of the military profession, and for qualifying officers for command and staff appointments". In addition to the foregoing, the course of instruction is such as to afford a thorough practical and scientific training in civil engineering, surveying, physics and chemistry, English and French. The strict discipline maintained at the College is a valuable feature, and the constant practice of gymnastics, riding, drills and outdoor exercises of all kinds promotes the health and good physical condition of the cadets.

The College is situated one mile from Kingston on the St. Lawrence river where it emerges from lake Ontario. The buildings of the College proper occupy a beautiful peninsula of 60 acres, lying between the mouth of the Cataraqui river and Navy bay. Additional adjacent grounds, on which stands the historic Fort Henry, make up a total of about 500 acres which are at the disposal of the College for use as a training area. On the point of the peninsula is situated Fort Frederick, built in 1837 when Kingston became the capital of Canada, the fort forming part of the defences of Kingston at that time. The College is under the supervision

of the Department of National Defence, and is inspected annually by an advisory board composed of leading Canadian citizens, both civil and military, which makes its reports and recommendations to the Minister of National Defence. The College is commanded by a commandant, who is assisted by a staff-adjutant and a competent staff of civil and military professors and instructors.

A four-year course leads to a "diploma with honours", a "diploma" or a "certificate of military qualification". A number of commissions in the Canadian Permanent Force and the Royal Canadian Air Force, as well as commissions in the British Regular Forces, the Indian Army, and the Royal Air Force, are offered annually to graduates; and for cadets who desire to obtain commissions in the Royal Canadian Navy a limited number of naval cadetships are available each year to cadets who successfully complete the first two years of study and who are not over 20 years of age on the first of September of the year in which they desire to enter the Navy. To those graduates joining the British Army, the privilege of one year of seniority is granted in the British or Indian Armies. This has been arranged in order to equalize the seniority of graduates of the Royal Military College of Canada with those of the Royal Military Academy, Woolwich, or the Royal Military College, Sandhurst, since the courses at the latter institutions are shorter than the Canadian.

The principal Canadian universities admit recommended graduates to the fourth year of their civil engineering courses and to the third year of other engineering courses; and some of the universities admit graduates to the third years of arts and science courses.

The R.M.C. diploma is accepted by the Law Societies and Bar Associations of Nova Scotia, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia as the equivalent of a B.A. degree for admission to the study of law. The Dominion Association of Chartered Accountants likewise accepts R.M.C. graduates as registered students under the same conditions as university graduates.

Entrance to the College is on a competitive basis. Candidates are required to pass a rigid medical examination, and to have obtained junior matriculation or an acceptable equivalent. Applications for admission to the College should reach The Secretary, Department of National Defence, Ottawa, before May 31 of each year.

Section 3.—Department of Public Works.*

Since Confederation and before, the constructing department of the Dominion Government has been known as the Department of Public Works. In 1879 the railways and canals were placed under the control of a new department, the building and maintenance of penitentiaries were transferred to the Department of Justice, the maintenance and construction of lighthouses to the Marine and Fisheries Department, and the smaller drill halls and armouries to the Department of National Defence. The work of the Department of Public Works is now divided into three principal branches, *viz.*, the Engineering Branch, the Architect's Branch and the Telegraph Branch.

Engineering.—The Engineering Branch conducts the construction and repair of wharves, piers, breakwaters, dams, weirs, bank and beach protection works; the improvement of harbours and rivers by dredging; the construction, operation and maintenance of dredging plant and the construction, operation and maintenance of graving or dry docks. The construction and maintenance of interprovincial bridges

* Revised by J. M. Somerville, Secretary, Department of Public Works.

and approaches thereto, also the construction, operation and maintenance of bridges with movable spans on certain highways; hydrographical and topographical surveys which are required for the preparation of plans, reports and estimates; test borings for the purpose of ascertaining the nature of foundations; the testing of cements and materials of construction; the licensing of international and inter-provincial ferries, and the control of works constructed in or over navigable waters by authority of the Navigable Waters Protection Act (R.S.C., 1927, c. 140).

Architecture.—The Architect's Branch constructs and maintains Government buildings; post offices, customs houses, examining warehouses, quarantine stations, immigration and experimental farm buildings, military hospitals and telegraph offices. It also constructs armouries and drill halls and leases office accommodation as required for the various departments.

Telegraphs.—The Telegraph Branch has control of the construction, operation and maintenance of all Government-owned telegraph lines and cables. These lines are located in the provinces of Nova Scotia, New Brunswick, Quebec, Ontario, Saskatchewan, Alberta, British Columbia and Yukon (see also p. 725).

Graving Docks.—The Department constructed five dry docks, as are shown in Table 4. The dock at Kingston, Ont., is under lease to the Kingston Shipbuilding Company, while the old Esquimalt Dry Dock was temporarily transferred to the Department of National Defence on Nov. 1, 1934. This transfer is to be effective until such time as the dock is commercially required, when it will be returned to the control of the Department of Public Works. The large dry docks at Lauzon, Que., and Esquimalt, B.C., can be divided into two parts and were built at a cost of approximately \$3,850,000 each. Under the Dry Dock Subsidies Act, 1910 (9-10 Edw. VII, c. 17), several docks have been subsidized by payments of 3 to 4 p.c. per annum on the original cost for a given number of years, as shown in Table 5.

Section 4.—The Indians and Eskimos of Canada.

Subsection 1.—The Indians of Canada.*

The Indians of Canada whose affairs are administered by the Department of Indian Affairs number about 112,510 (according to a departmental census taken in 1934), their numbers varying slightly from year to year. A small yearly increase is evident, and the popular notion that the race is disappearing is not in accordance with facts. Before they were subjected to the degenerating effects of European civilization and the devastating results of the many colonial wars, the numbers of the Indians were undoubtedly larger, but any reliable information as to the aboriginal population during either the French or the early British *régime* is non-existent, and there is no adequate basis for a comparison between the past and present aboriginal populations. An interesting sketch of the progress of the Indians of Canada since Confederation will be found in the Report of the Department of Indian Affairs, 1927.

Administration.†—Reserves have been set aside for the various bands of Indians throughout the Dominion, and the Indians located thereon are under the supervision of the local agents of the Department. The activities of the Department as guardian of the Indians, include the control of Indian education, health, etc., the development of agriculture and other pursuits among them, the administration of their lands, community funds, estates, and the general supervision of their welfare.

*Revised by A. F. MacKenzie, Secretary, Department of Indian Affairs.

† For an outline of the early administration, see p. 937 of the 1932 Year Book.

The local administration of the Indian bands on the reserves scattered throughout the Dominion is conducted through the Department's agencies, of which there are in all 120. The number of bands included in an agency varies from one to more than 30. The staff of an agency usually includes various officers in addition to the agent, such as medical officer, clerk, farm instructor, field matron, constable, stockman, etc., according to the special requirements of the agency in question. The work of the agencies is supervised by the Department's inspectors, each inspector having charge of a certain number of agencies. Expenditures upon destitute Indians are made by the Dominion Government, either from public funds or from the tribal funds of the Indians themselves.

The Indian Act provides for the enfranchisement of Indians. When an Indian is enfranchised he ceases to be an Indian under the law and acquires the full status of citizenship. In the older provinces, where the Indians have been longer in contact with civilization, many are becoming enfranchised. Great discretion, however, is exercised by the Government in dealing with this problem, as Indians who become enfranchised lose the special protection attached to their wardship, so that it is necessary to guard against premature enfranchisement.

Treaties.—In the older eastern provinces, the history of the Indians has been one of slow development with that of the community. In western Ontario, the Prairie Provinces and the Territories the situation has been different. There, the rapid spread of civilization made it necessary to take prompt and effective measures to protect the moral claims of the Indians, which are recognized by the Government. Accordingly, treaties were entered into with the Indians, whereby the latter ceded to the Crown their aboriginal title and interest in the country. In consideration of such cession the Crown agreed to set aside adequate reserves, make cash grants, provide per capita annuities, give assistance in agriculture, stock-raising, hunting, trapping, etc., as particular circumstances might require, provide education for the Indian children, and otherwise safeguard the Indians' interests. These treaties have been made from time to time as occasion arose and as new territories were opened up. No treaty has been made with the Indians of British Columbia, but their welfare has received no less attention from the Government on that account.

Government Expenditure.—On Mar. 31, 1935, the capital of the Indian Trust Fund, which a year earlier had amounted to \$13,602,565, had increased to \$13,810,673. The amounts expended from the Consolidated Revenue Fund were as follows: voted by Parliament for the purposes of the Department, \$4,125,307; Public Works Construction, \$176,687; and annuities by statute, \$236,426.

Statistics.—Statistical tables of population, school attendance, income and agricultural activities of the Indians in Canada follow. In Table 7 the populations for 1871-1931 are compiled from reports of the various censuses since Confederation, while the statistics and other information in the remaining tables are taken from the latest Annual Report of the Department of Indian Affairs. The Department of Indian Affairs takes a quinquennial census of Indians under its control, whereas census figures include all persons of Indian origin. The quinquennial census taken by the Department in 1934 showed a total of 112,510 as compared with 108,012 in 1929 and 104,894 in 1924, an increase of 7.3 p.c. in ten years. The details of the Census of 1934 are given in the Annual Report of the Department for that year. The figures of the decennial census include some thousands of persons of Indian race who are living off the reserves as ordinary citizens of Canada.

7.—Indian Population of Canada at the Decennial Censuses of 1871-1931.

Province or Territory.	1871. ¹	1881. ¹	1891. ²	1901.	1911.	1921.	1931.

Totals.....	102,358	108,547	120,638	127,941³	105,492	110,596	122,920

¹ Census figures in the organized provinces and estimates for the rest of Canada. ² Racial origin not taken in 1891; the figures have been taken from the report of the Department of Indian Affairs of that year. ³ Includes 34,481 "half-breeds". ⁴ The smaller Indian population of the Northwest Territories in 1921 is to be ascribed to the extension of the boundaries of Quebec, Ontario and Manitoba in 1912. This also accounts for the increase in the 1921 Indian population of these provinces.

Indian Education.—The educational work of the Department is now very extensive. In the fiscal year ended Mar. 31, 1935, a total of 351 Indian schools were in operation, including 79 residential schools for Indians with an enrolment of 8,709, and 262 day schools for Indians with an enrolment of 8,638 Indian pupils, also 10 combined public and Indian schools, with 213 Indian pupils enrolled. The total enrolment in the Indian schools has increased from 12,799 in 1915-16 to 17,560 in 1934-35 and the average attendance from 8,080 to 13,442 or from 63.1 p.c. to 76.5 p.c. of the enrolment. Continuation and high school work is now being taught in several of the day and residential schools. The amount spent on Indian education in the fiscal year ended Mar. 31, 1935, was \$1,655,821.

¹Includes income received from timber and mining dues and from annuities earned as interest on Indian trust funds.

Subsection 2.—The Eskimos of Canada.*

The Eskimos are a littoral race, dwelling on the northern and northeastern mainland coasts and on islands in the Arctic archipelago and in Hudson bay. Though nomads, they never go far from the sea except to hunt caribou, the skin of which animal is required for clothing. They subsist largely on marine animals and fish. They inhabit chiefly the Northwest Territories, the Yukon Territory, and the Ungava district of Quebec. According to the Census of 1931 the total Eskimo population of Canada was 5,979, made up as follows: Northwest Territories 4,670, Yukon 85, Alberta 3, Manitoba 62, Quebec 1,159. The administrative care of those Eskimos outside of the organized provinces devolves upon the Department of the Interior, which has done much for them by providing medical attention, by setting aside wild-life preserves for the protection and conservation of game resources, by importation of reindeer, distribution of buffalo hides and meat and caribou skins for bedding and clothing, and the establishment of permanent stations in the eastern, central, and western Arctic, from which regular patrols are made.

*Revised by J. Lorne Turner, Director, Lands, Northwest Territories and Yukon Branch, Department of the Interior, Ottawa.

Section 5.—Pensions and other Provision for War Veterans.*

Pensions Section.—This Section is responsible for the administration of returned soldiers' affairs under the Department of Pensions and National Health Act and the War Veterans' Allowance Act. It is also responsible, by direction of the Canadian Pension Commission, for certain administrative duties under the Pension Act and the Returned Soldiers' Insurance Act. The Representative of the Treasury is responsible for all payments under these Acts.

The Annual Report for the fiscal year ended Mar. 31, 1935, shows an increase over the previous year in the number of ex-members of the Forces who received in-patient hospital treatment, the number being 12,560 as against 11,718 in 1933-34, 13,342 in 1932-33 and 14,267 in 1931-32. The Department maintains eight hospitals, situated in the following centres: Halifax, Saint John, Ste. Anne de Bellevue, Toronto, London, Winnipeg, Calgary and Vancouver. The sheltered employment workshops are still operated at Hamilton, Montreal and Halifax and one shop by the Red Cross Society at Victoria.

One of the features of the activities of the Department is provision in a departmental institution for pensioners who through age or infirmity are unable to care for themselves. The number of such cases shows a decrease during the year, the total on Mar. 31, 1935, being 235 as against 250 a year previous, 213 on Mar. 31, 1933, and 198 on Mar. 31, 1932. The issue of orthopædic and surgical appliances has been maintained with a slight decrease. The number of pensioners who have been granted relief was 11,541 in 1934-35 as compared with 12,735 in 1933-34, 14,368 in 1932-33, 12,303 in 1931-32 and 8,811 in 1930-31. The expenditure on relief in 1934-35 was \$2,042,355; in 1933-34, \$1,912,563; in 1932-33, \$1,978,284; 1931-32, \$2,082,052; and 1930-31, \$907,010.

The provision under which the Department assumes responsibility in respect of accidents sustained by pensioners of 25 p.c. and upwards when engaged in industry has been continued. During the fiscal year under review, the number of claims was 222; in 1933-34, 180; in 1932-33, 179; and in 1931-32, 200. The expenditure was as follows: 1934-35, \$23,103; 1933-34, \$36,420; 1932-33, \$17,641; 1931-32, \$49,878. The expenditure is largely governed by the number of fatal and serious accidents.

The following is a summary statement of the manner in which the funds appropriated by Parliament have been dealt with, and also sets forth the costs of administration and the adjudication of pensions. The cost of administration was 3.588 p.c. of the total disbursements.

	\$3,670,349

Cost of administration—3.588 p.c.

The Canadian Pension Commission.—By c. 45 of the Statutes of 1933, the Board of Pension Commissioners for Canada and the Pension Tribunal ceased to exist; their duties were taken over by the Canadian Pension Commission which was formed by the Act referred to, and the personnel of the Commission was increased from three to not less than eight nor more than twelve. Twelve members have been appointed.

The Commission is responsible for the adjudication and awarding of pensions in respect of disabilities connected with military service and the awarding of pensions to the dependants of those who die. It operates under the authority of the Pension Act. The following table shows the number of pensions in force at the end of the fiscal years 1918 to 1935, together with the annual liability. The large increase

in disability pensioners from 1930 to 1933 inclusive was primarily due to the reinstatement on pension of those who had commuted their pensions from 1920 onwards. This restoration was under the authority of an amendment to the Pension Act in 1930.

Veterans' Bureau.—Pursuant to legislation passed in 1930, a Veterans' Bureau was organized as a branch of the Department and came into active operation on Oct. 1, 1930. The duties of the Bureau were set forth on p. 945 of the Canada Year Book, 1932. Briefly stated, the Bureau was created and is operated to assist applicants for pension in the preparation and presentation of their cases. There is a Chief Pensions Advocate with his staff at Ottawa, and Pensions Advocates have their offices in all the principal cities of Canada.

War Veterans' Allowances.—A synopsis of the War Veterans' Allowance Act, which came into force on Sept. 1, 1930, appeared on p. 946 of the Canada Year Book, 1932. The following statistics show the activities of the War Veterans' Allowance Committee for the fiscal years ended Mar. 31, 1934 and 1935.

Section 6.—Soldier and General Land Settlement.*

The constantly changing nature of settlement under the Soldier Settlement of Canada is apparent from the following summary: Under the Soldier Settlement Act of 1919, 25,006 soldier settlers were established on the land with loans. At Dec. 31, 1935, there were 10,680 soldier settlers; 5,910 civilian settlers; and 2,025 British family settlers. There were 2,423 farms on hand, of which 1,765 are leased; 2,996 settlers had repaid their loans in full in cash; 2,090 properties had been transferred to municipalities and provinces under Section 21 (a) of the Soldier Settlement Act. The number of active settlers with loans on the date mentioned was 18,615, with a total of properties under administration of 21,038, representing a net investment of \$53,347,514.

Under the 3,000 British Family Scheme a total of 3,346 families came forward for settlement. The withdrawals from the Scheme have numbered 1,544 families, 16 families have repaid their loans leaving 1,786 British families operating their farms on Dec. 31, 1935.

Under the tripartite agreement between the British, Canadian and New Brunswick governments for settlement in the province of New Brunswick, 359 families came forward. Of these 239 remain in operation of their farms and 120 families have withdrawn.

The provisions of the Farmers' Creditors Arrangement Act are applicable to debtors of the Crown, and therefore all classes of settlers under the Department are eligible to apply for the benefits of this legislation. To Dec. 31, 1935, 226 soldier settlers, 195 civilian settlers, and 75 British family settlers have made application for adjustment of their debts under this legislation.

On request of the Minister of Finance, the Minister in Charge of Soldier Settlement agreed that the supervision staff of the Department would make land appraisals and furnish reports on applicants (other than settlers under the Department) under the Farmers' Creditors Arrangement Act when requested to do so by the Boards of Review established under the Act in the respective provinces. To Dec. 31, 1935, 2,374 land appraisals and reports on applicants have been made in the provinces of British Columbia, Alberta, Saskatchewan, Manitoba and Ontario.

The field supervision staff also performs general land settlement services not only for the Department proper, but for other Departments of the Government requiring land inspectional and general field investigational services such as the organization is equipped to render. In the calendar year 1935 the field staff have

*Revised by C. W. Cavers, Soldier Settlement of Canada.

investigated settlement conditions in 1,393 cases for the Department of Immigration and Colonization in connection with the proposed admission of immigrants to Canada. The Back-to-the-Land movement instituted in 1930 had, as its basis, the active co-operation of the Land Settlement Branch of the Department, and the colonization departments of the C.P.R. and C.N.R. in the settlement of families on farms and the placement of single unemployed men in farm work. In the period Oct. 1, 1930, to Dec. 31, 1935, the three organizations jointly were instrumental in settling 18,496 families on farms and placing 40,957 single men in farm employment. This Department settled 2,936 families, mainly on vacant Soldier Settlement lands in the period and placed 17,168 single men in farm work.

The field staff of the Department have conducted 16,722 investigations in rural districts with respect to applications under the War Veterans' Allowance Act of 1930. In the past calendar year these investigations numbered 3,667. Since the inception of the work in 1931, 13,954 investigations have been made for the Department of Pensions and National Health and the Canadian Pension Commission with respect to applications for relief allowances and special investigations of pension cases in rural districts. In the calendar year 2,946 field investigations were made. The field staff were also called upon to make 1,385 land appraisals for the Canadian Farm Loan Board pending appointment of their own appraisal staff.

Section 7.—Department of the Secretary of State.*

The Department of the Secretary of State was constituted in its present form in 1873, through the merging of the previously-existing offices of the Secretaries of State for Canada and for the provinces. The Secretary of State is the official mouthpiece of the Government as well as the medium of communication between the Dominion and Provincial Governments, all correspondence between the Governments being conducted by him with the Lieutenant-Governors. He is also the custodian of the Great Seal of Canada and the Privy Seal as well as the channel by which the general public may approach the Crown.

The Secretary of State is also the Registrar General, registering all proclamations, commissions, licences, warrants, writs, and other instruments issued under the Great Seal and the Privy Seal. He is further charged with the administration of the Boards of Trade Act, the Companies Act, the Canada Temperance Act, the Copyright Act, the Naturalization Act, the Patent Act, the Trade Unions Act, the Ticket of Leave Act, the Unfair Competition Act, and with the collection and tabling of Parliamentary Returns. Statistics regarding patents and copyrights appear under Chapter XVII at pp. 627-630. The following information on other subjects has been secured in the course of administration.

Charters of Incorporation.—The number of companies incorporated under the Companies Act and amending Acts during the fiscal year ended Mar. 31, 1935, was 472 with a total capitalization of \$171,689,140. Supplementary letters patent were granted during the year to 176 companies, 47 of which increased their capital stock by the aggregate amount of \$35,416,353; 60 decreased their capital stock by \$73,634,742; the remaining 69 were granted supplementary letters patent for various purposes, such as changing names, extending powers, etc. The total capitalization of new companies plus the increase of capital of existing companies amounted to \$207,105,493, partly offset by the above-mentioned decreases in capitalization totalling \$73,634,742.

*Revised by E. H. Coleman, K.C., Under-Secretary of State, Department of the Secretary of State.

In Table 14 will be found the number and capitalization of companies incorporated during the years 1900-35.

¹ Includes consideration of the amounts of capital received on the issue of shares without nominal or par value.

² Revised since the publication of the 1934-35 Year Book.

Naturalizations.—The naturalizations effected under the Naturalization Act (R.S.C., 1906, c. 77) for the calendar years 1908-17 inclusive, were given on p. 594 of the Year Book for 1919. Since Jan. 1, 1918, the only method of obtaining naturalization has been under what is known as the "Imperial" Naturalization Act, which came into force on Jan. 1, 1915. This Act was known under the title of the Naturalization Act, 1914, until July 7, 1919, when it was repealed and the Naturalization Act, 1919, came into force. On July 1, 1920, the Naturalization Act, 1919, was

repealed, and the Naturalization Act, 1914, was revived and amended under the title of the Naturalization Acts, 1914 and 1920. By an amendment passed by Parliament in 1923, the restriction by which persons of alien enemy birth were ineligible to receive certificates of naturalization for a period of 10 years after the termination of the War was removed, and at the present time any alien may apply for naturalization, regardless of his nationality. All these Acts have been consolidated in R.S.C., 1927, c. 138. Since Jan. 15, 1932, women British subjects, marrying aliens, retain their British nationality, unless they, by marriage, acquire their husbands' nationalities, and the wives of aliens no longer become British subjects through their husbands' naturalization. They must apply to the Secretary of State.

Table 15 shows the number of naturalization certificates issued to single persons or heads of families under these Acts during the calendar years from 1925 to 1934. The total numbers of persons naturalized during the fiscal years ended Mar. 31, 1934 and 1935, were 21,921 and 20,903 respectively, including (except as stated above) the wives and minor children of those to whom naturalization certificates were issued.

⁴ Turkish includes also Syrian, Armenian, Greek, Bulgarian, Palestinian and Mesopotamian Turks.

Canada Temperance Act.—Under Parts I and II of this Act, provision is made for the prohibition of the sale of intoxicating liquors in counties and cities. The last vote taken under these parts was in the County of Compton, Quebec, on April 28, 1930, in response to a petition for the repeal of the Act in that county. The vote resulted in favour of the repeal, which became effective on June 14, 1930. Part III of the Act relates to penalties and prosecutions, Part IV to the prohibition of the importation and exportation of intoxicating liquors into and from the provinces, while Part V enacts provisions in aid of provincial legislation for the control of the liquor traffic.

Section 8.—Royal Canadian Mounted Police.

The Royal Canadian Mounted Police is a constabulary maintained by the Dominion Government. It was organized in 1873, and was known as the North West Mounted Police, whose duties were confined to what was then known as the Northwest Territories. In 1904 its name was changed to Royal North West Mounted Police.

In 1905, when Alberta and Saskatchewan were constituted provinces, an arrangement was made whereby the Force continued to discharge its former functions, each province making a contribution towards defraying the cost. This was continued until 1917. Soon after the close of the Great War an extension of governmental activities made it obvious that the enforcement of Dominion Statutes was assuming increasing proportions, and that it would soon be necessary to have a police force responsible therefor. In 1918, the Royal North West Mounted Police were assigned to the duty of the enforcement of Dominion legislation for the whole of Western Canada, west of Port Arthur and Fort William and in 1920 for the whole of Canada.

In 1920, the name of the Force was changed to the Royal Canadian Mounted Police, and the former Dominion Police with headquarters at Ottawa, whose duties were largely connected with guarding public buildings in that city and the Canadian Government dockyards at Halifax, N.S., and Esquimalt, B.C., were absorbed by the Royal Canadian Mounted Police.

At the present time, the R.C.M. Police are responsible throughout Canada for the enforcement of the laws against smuggling by land, sea and air. It enforces the provisions of the Excise Act, is responsible for the suppression of the traffic in narcotic drugs, enforcement of the Migratory Birds Convention Act, and assists the Indian, Immigration, Fisheries and numerous other Dominion Departments in executing the provisions of their respective Acts, and in some cases in administrative duties. It is responsible for the protection of government buildings and dockyards. It is the sole police force operating in the Yukon Territory and the Northwest Territories, and performs a variety of services in all provinces and both Territories for the Dominion Government.

Under the R.C.M. Police Act any province may enter into an agreement with the Dominion Government for the services of the Royal Canadian Mounted Police, to enforce provincial laws and the Criminal Code, upon payment for its services, and at the present time such agreements are in force with the provinces of Prince Edward Island, Nova Scotia, New Brunswick, Manitoba, Saskatchewan and Alberta.

The Force is controlled and administered by a Minister of the Crown (at present the Minister of Justice), and it may be employed anywhere in Canada. From a force of 300 in 1873, it had a strength on Mar. 31, 1935, of 2,573. Its means

of transport at that time consisted of 277 horses, 464 motor vehicles and 413 sleigh dogs. The Force is organized into 14 divisions of varying strength, distributed over the entire country. The term of engagement is five years for recruits, with re-enlistment for one year or three years. The officers are commissioned by the Crown. Recruits are trained at Regina, Saskatchewan. The course of training is six months, and consists of drill, both mounted and on foot, physical training, including instruction in wrestling, boxing and ju-jitsu. Special attention is paid to police duties, both Dominion and provincial, and detailed lectures are given in these, including court procedure. Instructional courses for promotion are held and, where practical, an annual refresher course of training is given.

The Marine Section of the Force on Mar. 31, 1935, had a strength of 219 officers and men, distributed amongst 19 cruisers and patrol boats on the Atlantic and Pacific coasts and inland waters.

Section 9.—The Civil Service of Canada.

Organization.*—Prior to 1882, appointments to the Civil Service were made directly by the Government. In that year, a Board of Civil Service Examiners was appointed to examine candidates and issue certificates of qualification to those successful at examinations. Appointments, however, were still made by the Government of the day.

The Royal Commission of 1907, appointed to inquire into the Civil Service Act and its operation, reported in favour of the creation of a Civil Service Commission. In 1908 this body was appointed; it consisted of two members appointed by the Governor in Council and holding office during good behaviour, but removable by the Governor General on address of the Senate and House of Commons. The Civil Service was classified into three divisions under the Deputy Heads of Departments, each division consisting of two subdivisions, each of these having its scale of salaries. The Commission was charged with the organization of and appointments to the Inside Service (at Ottawa), certain appointments to be made after open competition and others after qualifying tests, also with holding qualifying examinations for the Outside Service (the Service apart from Ottawa) to obtain lists from which selections could be made by the various Departments. All British subjects between 18 and 35 years of age who had resided in Canada for three years were eligible to try these examinations.

In 1918 a third member of the Civil Service Commission was appointed, and by the Civil Service Act of that year the principle of appointment after open competition was applied to the Outside as well as the Inside Service. The Act also provided for the organization by the Commission of the various Government Departments, for a classification of all positions in the Service on a duties basis, for the establishment of new rates of compensation, and for the principle of promotion by merit wherever consistent with the best interests of the Service. Provision was also made for preference, in the matter of appointment to the Service, to be given to qualified applicants who had served in the Great War.

Civil Service Statistics.†—From April, 1924, a monthly return of personnel and salaries has been made by each Department to the Dominion Bureau of Statistics, according to a plan that ensures comparability between Departments and continuity in point of time. The institution of this system was preceded by an investigation back to 1912, the summary results of which are presented in Table 17.

During the war years, as will be seen from Table 17, the number of employees increased very rapidly, as a result of the enlargement of the functions of government and the imposition of new taxes, necessitating additional officials as collectors. Such new services as the Department of Pensions and National Health and the Soldier Settlement Board were also created. The maximum was reached in January, 1920, when 47,133 persons were employed; this number has since decreased to 41,348 in January, 1935. It may be added that, out of 40,792 in March, 1935, (see Table 18), 1,182 in the Income Tax Branch and 2,264 in the Department of Pensions and National Health, or 3,446 in all, were engaged in services of outstanding

* Revised by Wm. Foran, Secretary, Civil Service Commission, Ottawa.

† Revised by Col. J. R. Munro, Chief of the Finance Branch of the Dominion Bureau of Statistics, Ottawa.

importance which had no existence before the War. Further, an additional 10,780 persons were, in March, 1935, employed in the Post Office Department, performing services of an industrial rather than of a governmental type, and receiving their salaries out of the payments of the public for services immediately rendered, rather than out of taxation.

The statistics of numbers of employees and of salaries, now being secured monthly, are more comprehensive than those previously published, as a result of the inclusion of various classes of employees, largely "part-time", "seasonal" and "fees of office" employees, who were not included in the report published in 1925. These employees are largely in the Departments of Marine, Fisheries and Public Works. There remain, however, many persons in the "non-enumerated classes" whose numbers cannot be supplied monthly by the departmental officials but whose compensation is included in the monthly figures of expenditure on personnel, as shown in Table 18.

17.—Summary of Civil Service Employees (Permanent and Temporary) of the Government of Canada, together with Total Salaries, in the months of January of the years 1912-35, inclusive.

¹ Figures for January, 1925-35 are not comparable with those for preceding Januaries, because monthly records now being published include various classes of employees not included in the historical record for the 13 years 1912-24.

Table 18, which gives statistics by Departments, with a further classification by principal branches where such are recorded, is included to give comparable figures for the latest months. In the month of March, 1935, the total number of employees in the enumerated classes was 40,792 as compared with 40,469 in March, 1934. The total expenditure on wages and salaries for all classes of employees for March, 1935, was \$8,475,408 as compared with \$8,256,702 for March, 1934.

18.—Total Numbers of Civil Service Employees, by Departments and Principal Branches ("Non-Enumerated Classes" Excluded), and Total Expenditures on Salaries and Wages of all Employees ("Non-Enumerated Classes" Included), March, 1934, and March, 1935.

Section 10.—Harbour Commissions: Public Harbours and Harbour Masters.

A description of the two methods of administration of the harbours in Canada, by a Commission in the one case, and by a Harbour Master operating under the direct supervision of the Department of Marine in the other, together with a list of the harbours which are under the Commission form of administration, with the year each individual Commission was created, was given at p. 1013 of the Year Book for 1930. No legislative action having as yet been completed from the report and recommendations of Sir Alexander Gibb and partners in the year 1931, following their study of the major Canadian ports as to desirable changes in the form of administration thereof, the harbour administration remains the same as described in the above-mentioned article.

Section 11.—Supervision of Race Track Betting.

By an amendment to Section 235 of the Criminal Code, passed in 1920, the supervision of race track betting, under the pari-mutuel system, was placed in the hands of the Minister of Agriculture. The actual supervision is carried out by officers of the Royal Canadian Mounted Police and operated for the first time during the racing season of 1921. Statistics are available from the year 1924 and are shown in Table 19 for the Dominion as a whole, while Table 20 shows the operations by provinces for the year 1934.

Section 12.—The Tariff Board.*

The Tariff Board was constituted by Act of Parliament in 1931 (C. 55, 21-22 Geo. V). It consists of three members, a Chairman, a Vice-Chairman and a Member), and a Secretary, all appointed by the Governor in Council. The personnel of the Board was appointed in February, 1933. The first public sitting was held in July, 1933.

The constitution and duties of the Board are defined in two parts of the Act of 1931.

Under Part I, the Board makes inquiry into and reports upon any matter on which the Minister of Finance desires information, in relation to any goods which, if brought into Canada or produced in Canada, are subject to or exempt from duties or customs or excise. The investigation into any such matter may include inquiry as to the effect which an increase or decrease of the existing rate of duty upon a given commodity might have upon industry or trade, and the extent to which the consumer is protected from exploitation.

It is also the duty of the Board to inquire into any other matter or thing in relation to the trade or commerce of Canada which the Governor in Council sees fit to refer to the Board for inquiry and report.

In accordance with the provisions of Articles 10 to 15 of the United Kingdom-Canada Trade Agreement, His Majesty's Government in Canada has undertaken

* Contributed by James R. MacGregor, Secretary, Tariff Board.

that, on the request of His Majesty's Government in the United Kingdom, it will cause a review, in accordance with the principle laid down in Article 11 of the Agreement, to be made by the Tariff Board of the duties charged on any commodities specified in such request.

The principle laid down in Article 11 of the Agreement is that protective duties shall not exceed such level as will give United Kingdom producers full opportunity of reasonable competition on the basis of relative cost of economical and efficient production, provided that, in the application of such principle, special consideration shall be given to the case of industries not fully established.

The Act provides that reports shall be made to the Minister of Finance and tabled in the House of Commons. To Dec. 31, 1935, the Board has reported on 42 references. The principal commodities reported on were wool textiles; boots and shoes; jute yarns and twines; fruits and vegetables; hookless fasteners (zippers); wooden doors; silver-bearing articles (toiletware); dextrines; rabbit skins; brass, copper and nickel-silver commodities; boiler tubes; skelp; cocoa mats and matting; hats and hoods; biscuits; and cork boards, slabs and planks. During 1935 the Board held public sittings in Halifax, Saint John, Ottawa, Regina, Calgary and Vancouver on references dealing with crude petroleum and its derivatives and the automobile industry. Reports on these subjects will be submitted to the Minister of Finance in due course. On Dec. 23, 1935, the Minister of Finance authorized the Board to investigate the Canadian furniture industry.

Part II of the Act empowers the Board to hear and decide appeals from rulings made by the Department of National Revenue with respect to fair market value of goods for duty purposes, erroneous appraisals, and the rate of duty applicable to any class of goods. Findings of the Board on Appeals are published in the *Canada Gazette*. To Dec. 31, 1935, 56 appeals have been registered. Decisions by the Board have been made for 35; twelve were withdrawn after registration and nine are current.

Section 13.—Dominion Trade and Industry Commission.

The Dominion Trade and Industry Commission was constituted by Act of Parliament in 1935, (c. 59, 25-26 Geo. V). It consists of three Commissioners one of whom is the Chief Commissioner and another the Assistant Chief Commissioner. The Act provides that for the time being the members of the Tariff Board (see Section 12) shall be the Commissioners, and the Chairman and Vice-Chairman of the Tariff Board shall be the Chief Commissioner and Assistant Chief Commissioner respectively.

Under the Act the Commission is charged with the administration of the Combines Investigation Act. Other duties consist of recommending the prosecution of offences against Acts of Parliament relating to commodity standards; preparation of draft specifications for commodity standards; application of the national trademark "Canada Standard" to commodities which conform to specifications established under any Act of Parliament; investigation of complaints respecting unfair trade practices.

The Commission has received a number of applications and representations regarding the operation of the various sections of the Act. In view of the fact that the validity of the legislation as an Act of the Dominion Parliament has been referred to the Supreme Court effective organization of the Commission was delayed pending judgment.

Section 14.—Liquor Control in Canada.

During the years 1916 and 1917, as a war policy, legislation prohibiting the sale of alcoholic liquors except for medicinal and scientific purposes, was passed in all the provinces except Quebec, where similar legislation was passed in 1919. The prohibition extended to the sale of beer and wine except in Quebec. Native wine, however, could be sold in Ontario.

In aid of provincial legislation prohibiting or restricting the sale of intoxicating liquors, the Dominion Government in 1916 passed a law making it an offence to send intoxicating liquors into any province to be dealt in contrary to the law of that province. In 1919 this Act was changed to read that "on the request of the Legislative Assembly of a province a vote would be taken on the question that the importation and the bringing of intoxicating liquors into such province be forbidden." If the majority of those voting were found to be in favour of such prohibition, the Governor in Council was to declare it in force.

After the War the provinces continued under prohibition for varying periods. Plebiscites were taken from time to time to ascertain the will of the electorate as to whether the policy of prohibition, adopted as an emergency war measure, should be continued. During 1921 Quebec and British Columbia discarded the existing prohibition laws and adopted the policy of liquor sale under government control. The same course was followed by Manitoba in 1923, Alberta in 1924, Saskatchewan in 1925, Ontario and New Brunswick in 1927 and Nova Scotia in 1930. Thus Prince Edward Island is the only province still adhering to a policy of prohibition.

The provincial Liquor Control Acts have been framed to conform to conditions peculiar to the regions where they are in force and no two are exactly alike. The salient feature of all is the establishment of a provincial monopoly of the retail sale of alcoholic beverages, with the practical elimination of private profit therefrom. Partial exception is made in the retail sale of malt liquor by brewers, which certain provinces permit while reserving regulative rights and taxing such sales heavily. In all the provinces, however, spirits may be bought only at government liquor stores. The provincial monopoly extends only to the retail sale of alcoholic beverages, the manufacture being still in private hands but under the supervision of the Liquor Boards or Commissions. The original Liquor Control Acts have been modified from time to time as deemed advisable. Brief summaries of the legislation are given in the Bureau's Annual Report on the Control and Sale of Liquor.

Sales by Liquor Control Boards.—Data on gross sales, other revenue and net profits of the Provincial Liquor Boards, are tabulated in Table 21. In connection with the figures on gross sales it is essential to note that for Quebec, Manitoba and Alberta, the sales of beer made directly by the brewers to the licensees are not included. The proceeds from such sales do not pass through the Boards, but the purchasers must pay through the brewers to the Boards a tax equal to 5 p.c. of the purchases in the case of Quebec, 12½ cents per gallon in Manitoba, and 15½ cents per gallon in Alberta. For the latter two provinces it is possible to calculate from the taxes the gallonage of beer sold but the corresponding values are not available. For Quebec the quantity and value of sales are published by the Liquor Commission, as shown in the footnote to the table.

Further, it should be pointed out that the values as given for Quebec, Manitoba, Alberta and British Columbia do not represent the sales values to the final consumers, as in these provinces the sale of beer by the glass is permissible.* Of course, all the liquor sold in any province is not consumed within the province. The tourist traffic is a very important factor in this connection.

*Also in Ontario from July 24, 1934.

All the revenue resulting from the Liquor Control Acts is not paid to the Liquor Boards. In certain provinces, permit fees are paid directly to the governments and do not pass through the Board. Table 21 further indicates the total revenue accruing to the governments through the control of liquor sales.

The reports of the Boards do not in all cases show the quantities of liquors sold; in comparing values for a series of years or between provinces it should be borne in mind that price variations may be an important factor.

21.—Gross Sales and Net Profits of Liquor Control Boards, Additional Revenues Paid Directly to Governments, and Total Net Revenue from Liquor Control, 1931-34.

NOTE.—For Quebec, Manitoba and Alberta gross sales do not include beer sold direct by the brewers to the licensees.

Footnotes concluded at foot of p. 1075.

Apparent Consumption of Liquor in Canada.—It is not possible to obtain accurate figures on Canadian consumption of liquor. Except in Nova Scotia, Quebec, Ontario and Alberta, the Liquor Boards do not publish figures to show sales on a gallonage basis, and even were such data on quantity sales available for all provinces they would not necessarily represent Canadian consumption. For example, our great tourist traffic must be considered, for it is likely that the quantities consumed by individual tourists reach a considerable amount. Further, there is no definite information regarding the illegal traffic in liquor, though inquiry has revealed that such illicit business has reached fairly large proportions.

In Tables 22, 23 and 24 an attempt has been made to indicate separately the apparent consumption in Canada of spirits, malt liquors and wines. Obviously, these computations are subject to error for the reasons mentioned above, and also because no consideration has been given to increases or decreases in the quantities held in stock by the Boards or by licensees. For example, owing to exceptionally favourable conditions abroad, the Liquor Boards may in certain years buy heavily to replenish stocks or create reserves; such purchases would unduly weight the apparent consumption figure for these years. The figures in these tables have been arrived at as follows:—

Spirits.—Practically the total production of spirits is placed in bonded warehouses whence it is released for various purposes. The quantities shown as "entered for consumption" are released from warehouse, duty paid, presumably for consumption for beverage purposes in Canada. However, part of these may be exported. The supply of spirits available in Canada for home consumption or for export must be the sum of the quantities shown under (a) entered for consumption; (b) imports; and (c) exports in bond, and if the total domestic exports and re-exports of imported goods are deducted from this figure the remainder indicates the apparent consumption in Canada.

Malt Liquors.—Only a small part of the output of malt liquors is placed in warehouses. The available supply is, therefore, made up of (a) production; (b) changes in warehouse stock; and (c) imports, and by deducting the domestic exports and re-exports of imported goods from this total supply, it is possible to obtain a figure to show the apparent consumption in Canada.

Wines.—The apparent consumption of native wine is obtained by dividing the rates of excise tax into the total tax collections. This is believed to furnish a better measure of consumption than the method formerly used, *i.e.*, to subtract the exports from the production, since part of the product is not consumed in the year of production but is placed in storage for maturing. The apparent consumption of imported wines is arrived at by deducting from the imports into Canada, the re-exports of foreign supplies.

Footnotes to Table 21—concluded.

²In Manitoba and Alberta the value of beer sales is not given but the beer taxes paid to the Boards are tabulated below. In this connection it should be noted that the Board also pays the beer tax on its purchases from the brewers and the beer sales of the Board are included in the total gross sales shown above.

¹Revised since publication of the 1934-35 Year Book.**Section 15.—Other Miscellaneous Administration.**

In previous editions of the Canada Year Book this chapter has been brought to a close with outlines of Dominion Government administration as follows:—

The International Joint Commission.

The Geodetic Survey of Canada.

The Topographical Survey.

The Dominion Observatories.

No material change has taken place in the functions of these organizations and the reader is referred to pp. 1014-1017 of the 1930 Year Book for this information.

CHAPTER XXIX.—SOURCES OF OFFICIAL STATISTICAL AND OTHER INFORMATION RELATIVE TO CANADA.

The chief source of information on the current state of the country is the Dominion Bureau of Statistics, organized as the central statistical bureau for Canada, and described in the first part of this chapter; a list of its publications, which cover almost the whole field of the national statistics, is given in Section 1.

The second section of the chapter contains a list of the Acts of Parliament administered by the several Departments of the Dominion Government, and the third section a bibliography of the publications of these Departments. This is followed, in Section 4, by a bibliography of the publications of Provincial Governments.

Section 1.—The Dominion Bureau of Statistics.*

The Dominion Bureau of Statistics was set up by statute in 1918 as a central statistical department for Canada (8-9 Geo. V, c. 43).† The Act was a consolidation of all previous statistical legislation and was based on the report of a Commission on Statistics, appointed in 1912, which recommended (a) a series of specific reforms and enlargements in Canadian statistics, and (b) a policy of statistical co-ordination for the Dominion, under central direction. In 1915, following the recommendations in this report, the office of Dominion Statistician was created.

The Bureau has been constituted by the transfer or absorption, by Orders in Council, of the following work and branches: (1) the Census and Statistics Office (covering the census, and also agriculture, general manufactures and judicial statistics), (2) Fisheries Statistics, (3) Mining Statistics, (4) Forestry Statistics, (5) Dairying and Fruit Statistics, (6) Water- and Electric-Power Statistics, (7) the Railways and Canals Statistical Branch of the Department of Railways and Canals, (8) the Trade Statistical Branch (exports and imports), (9) Grain Trade Statistics, (10) Live-Stock Statistics, (11) Prices Statistics, and (12) Employment Statistics. In addition four new branches were created, dealing respectively with Public Finance, Internal Trade, Vital Statistics, and Education. Subsequently the statistical activities of the Fuel Controller and the Board of Commerce were absorbed. Modifications of the Bankruptcy, Public Health and Railway Acts, and of the regulation *re* franking privileges were also made, with a view to facilitating the collection of statistics.

The Bureau has completed the plans for a unified, nation-wide statistical system, covering every important phase of social and economic activity, and has carried them out to a considerable degree.

The main achievement of the Bureau has been in the organization of the several subjects in correlation with each other in accordance with this general plan, and the consequent establishment of a comprehensive viewpoint of the country as a "going concern". In addition, there has been created what is frequently called a central "thinking office" in statistics, continuously in touch with general conditions and the line of probable developments.

*A more complete account of the formation and activities of the Bureau of Statistics will be found on pp. 961-964 of the 1922-23 Year Book.

† Consolidated as the Statistics Act (c. 190, R.S.C., 1927.)

The final concept in the organization of the Bureau of Statistics is that of a national laboratory for social and economic research. Statistics are not merely a record of what has been, but are for use in planning what shall be; it is the duty of a statistical bureau to assist directly in the day-to-day problems of administration, as well as to provide their theoretic background. One of the most significant of recent developments in administration is the extent to which statistical organization has been increased as a guide to national policy. Though its usefulness has only begun, the Dominion Bureau of Statistics has laid the foundations for a service comparable with the increasingly important position taken by Canada in the economic and political world.

Publications of the Bureau.—The first annual report of the Dominion Statistician contained a full description of the organization of the Bureau and of its subject matter.* The main Branches of the Bureau are as follows: I. Administration; II. Demography—Census and Vital Statistics; III. Agricultural Statistics; IV. Fisheries, Furs, Animal and Dairy Products; V. Mining, Metallurgical and Chemical; VI. Forestry and Allied Industries; VII. General Manufactures; VIII. External Trade (Imports and Exports); IX. Internal Trade; X. Transportation and Public Utilities; XI. Financial Statistics; XII. Judicial Statistics; XIII. Education Statistics; XIV. Census of Institutions; XV. General Statistics. The publications of the several Branches are as follows:—

ADMINISTRATION—

Annual Report of the Dominion Statistician. *Price 10 cents.*

POPULATION—

I. CENSUS—

Report of the Seventh Census of Canada, 1931, as follows:—

- Vol. I. General—Administrative Report of the Seventh Census followed by a summary of the leading facts of the Censuses of Population and Agriculture, Institutions, Merchandising and Service Establishments, etc., and cross-analyses relating thereto. The Appendix gives a complete bibliography of census materials and reproduces the more salient figures for specified years, chronologically arranged, back to 1605. The volume also contains a series of life tables for the Dominion and each province. *In course of preparation.*
- Vol. II. Population by Local Subdivisions—Conjugal condition, racial origin, religion, birthplace, year of immigration, language, literacy, school attendance, etc. *Price, Cloth \$1.50, Paper \$1.*
- Vol. III. Ages of the People—Classified by sex, conjugal condition, racial origin, religion, birthplace, language, literacy, year of immigration, naturalization, etc. *Price, Cloth \$1, Paper 75 cents.*
- Vol. IV. Birthplace, Racial Origin and Year of Immigration of the People—Cross-classified and classified by conjugal condition, naturalization and citizenship, religion, language, literacy, illiteracy, school attendance. *Price, Cloth \$1, Paper 75 cents.*
- Vol. V. Families, Dwellings and Earnings—Cross-classified by birthplace, conjugal condition, year of immigration, naturalization and citizenship, racial origin, religion, language, literacy, illiteracy, school attendance. *In course of preparation.*
- Vol. VI. Unemployment—Classified by industry, occupation, cause, age, sex, conjugal condition, period of idleness, birthplace, racial origin, year of immigration. *Price, Cloth \$1, Paper 75 cents.*
- Vol. VII. Occupations and Industries—Cross-classified by birthplace, race, age, sex, etc. *In course of preparation.*
- Vol. VIII. Agriculture—agricultural population, farm holdings and land area, tenure, value of farm property and farm products, acreage and yields of crops, live stock, mortgage indebtedness and farm expenses, farm machinery, facilities and roads, co-operative marketing, etc. *In course of preparation.*

*This report for the year ended Mar. 31, 1919, is now out of print.

POPULATION—continued.

I. CENSUS—continued.

Report of the Seventh Census of Canada, 1931—concluded.

Vol. IX. Institutions—Hospitals for the Sick—Type, bed capacity, facilities, movement of patient population, personnel, capital investment, maintenance, receipts and expenditures, etc.; Mental Hospitals—Movement of patient population and their psychoses, age, nativity, racial origin, economic condition, conjugal condition, environment, literacy, religion, administration and personnel, etc.; Charitable and Benevolent Institutions—by type, movement of population, finances, inmates, age, sex, administration and personnel, etc.; Penitentiaries and Corrective and Reformatory Institutions—by inmates, offences, sentences, age, birthplace, citizenship, racial origin, previous employment, environment, educational status, conjugal condition, social habits, overseas service, administrative staff, receipts and expenditures. *In course of preparation.*

Vols. X and XI. Merchandising and Service Establishments—Retail merchandise trade cross-classified by kind of business, type of operation, size of business, employees, salaries and wages, capital investment, rent and other operating expenses, credit, etc.; wholesale trade cross-classified by type of establishment, kind of business, operating expenses, etc.; with special reports on retail trade in urban and rural areas, chain stores, food retailing, drug stores, hotels, moving picture theatres. co-operative marketing and purchasing, etc. *In course of preparation.*

Vols. XII and XIII. Census Monographs—Consisting of a series of studies of such outstanding Canadian problems as Growth of Population in Canada; Age Distribution of the Canadian People; Fertility of the Population; Origin, Language, Birthplace and Nationality of the Canadian People; Illiteracy and Educational Status; The Racial and Urban Composition of the Canadian Population since Confederation; The Canadian Family—Its Composition, Size and Condition from the Earliest Times; Housing and Rentals; Dependency; The Evolution and Present-Day Significance of the Canadian Occupational Structure; Unemployment; The Population Basis of Agriculture. *In course of preparation.*

Vol. XIV. Statistical Atlas—Maps, charts and diagrams classified under the main headings of the census and accompanied by descriptive textual material. *In course of preparation.*

AGRICULTURE.—

Prince Edward Island—Farm population, areas, tenure, values, facilities and live stock; value of field crops, vegetables, fruits and forest products. *Price, 25 cents.*

Nova Scotia—Farm population, areas, tenure, values, facilities and live stock; value of field crops, vegetables, fruits and forest products. *Price, 25 cents.*

New Brunswick—Farm population, areas, tenure, values, facilities and live stock; value of field crops, vegetables, fruits and forest products. *Price, 25 cents.*

Quebec—Farm population, areas, tenure, values, facilities and live stock; value of field crops, vegetables, fruits and forest products. *Price, 25 cents.*

Ontario—Farm population, areas, tenure, values, facilities and live stock; value of field crops, vegetables, fruits and forest products. *Price, 25 cents.*

Manitoba—Farm population, areas, tenure, values, facilities and live stock; value of field crops, vegetables, fruits and forest products. *Price, 25 cents.*

Saskatchewan—Farm population, areas, tenure, values, facilities and live stock; value of field crops, vegetables, fruits and forest products. *Price, 25 cents.*

Alberta—Farm population, areas, tenure, values, facilities and live stock; value of field crops, vegetables, fruits and forest products. *Price, 25 cents.*

British Columbia—Farm population, areas, tenure, values, facilities and live stock; value of field crops, vegetables, fruits and forest products. *Price, 25 cents.*

Bulletins of the Seventh Census of Canada, 1931, as follows:—

- (1) POPULATION.—*Preliminary Bulletins.*—(1) to (3) Cities, Towns and Villages. (4) Ontario Villages. (5) Montreal Island. (6) Cities, Towns and Villages. (7) Villages of Manitoba, Saskatchewan and Alberta. (8) Villages of Quebec. (9) Cities, Towns and Villages. (10) Maritime Provinces by Federal Electoral Districts. (11) Ontario by Federal Electoral Districts. (12) Prairie Provinces by Federal Electoral Districts. (13) Quebec by Federal Electoral Districts. (14) British Columbia by Federal Electoral Districts; Yukon and Northwest Territories. (15) Canada by Provinces. (16) Cities replacing Census Bulletins 1, 2, 3, 5 and 6. (17) Towns replacing Bulletins 1, 2, 3, 5, 6 and 9. *Final Bulletins.*—(I) New Brunswick. (II) Nova Scotia. (III) Manitoba. (IV) Canada by Provinces. (V)

POPULATION—continued.

I. CENSUS—continued.

Bulletins of the Seventh Census of Canada, 1931—continued.

(1) POPULATION—concluded.

Saskatchewan. (VI) Alberta. (VII) Quebec. (VIII) Ontario. (IX) British Columbia. (X) Prince Edward Island. (XI) Rural and Urban Population. (XII) Yukon and Northwest Territories. (XIII) Cities, Towns and Villages in Canada, by Provinces. (XIV) Religions, by Provinces. (XV) Birthplaces, by Provinces. (XVI) Ages, by Provinces. (XVII) Conjugal Condition, by Provinces. (XVIII) School Attendance and Literacy, by Provinces. (XIX) Radio Sets in Canada, 1931. (XX) Population of Canada, 1931, by Provinces, Electoral Districts and Subdistricts. (XXI) Population of Canada, 1931, by Religious Denominations. (XXII) Population of Canada, 1931, by Racial Origins. (XXIII) Immigrants by Years of Arrival in Canada. (XXV) Number and Percentage of Single, Married, Widowed or Divorced of the Total Population, by Sex and Provinces, 1911, 1921, and 1931. (XXVI) Age Distribution by Single Years of Age for Canada, by Provinces, 1931. (XXVII) Immigrant Population Classified by Sex, Country of Birth, Province of Residence, Years of Arrival in Canada and Citizenship of the Foreign Born, 1931. (XXVIII) Gainfully Employed Ten Years of Age and Over, Classified According to Occupation and Sex for Cities of 30,000 and Over, 1931. (XXIX) Birthplace of the Population Classified According to Nativity of Parents for Canada and Provinces, 1931. (XXX) Canadians and other Nationals. (XXXI) Gainfully Employed Ten Years of Age and Over for Canada and Provinces, 1931. (XXXII) Literacy, Language Spoken, and Conjugal Condition of the Population Ten Years of Age and Over, 1931. (XXXIII) Earnings Among Wage-Earners for Canada and Provinces, 1931. (XXXIV) Ages of the Gainfully Employed Ten Years of Age and Over for Canada and Provinces, 1931. (XXXV) Religious Denominations by Racial Origins, 1931. (XXXVI) Gainfully Employed Ten Years of Age and Over by Industry and Sex for Canada and the Provinces and for Cities of 30,000 and Over, 1931. (XXXVII) Age Distribution by Five-Year Age Groups for Cities, Towns and Villages of 5,000 Population and Over, 1931. (XXXVIII) Population of the Municipal Wards of Montreal City by Quinquennial Age Groups, Conjugal Condition, Birthplace, Racial Origin, Religion, School Attendance and Literacy, by Sex, 1931. (XXXIX) Houses and Dwellings. (XL) Population of the Municipal Wards of the Cities of Toronto, Vancouver, Winnipeg, Hamilton, Quebec and Ottawa by Quinquennial Age Groups, Conjugal Condition, Birthplace, Racial Origin, Religion, School Attendance and Literacy, by Sex, Census of 1931. (XLI) Orientals, Ten Years of Age and Over, Gainfully Employed by Race, Occupation and Sex, in British Columbia, 1931. (XLII) Persons Speaking Gaelic. (XLIII) Blind. (XLIV) Deaf Mutes. (XLV) Racial Origins of Gainfully Occupied, Ten Years of Age and Over for Canada and the Provinces. (XLVI) Birthplaces of Gainfully Occupied Ten Years of Age and Over for Canada and the Provinces, 1931. (XLVII) Conjugal Condition of Gainfully Occupied Females. Fifteen Years of Age and Over, for Canada and the Provinces, 1931. UNEMPLOYMENT AMONG WAGE-EARNERS.—(I) Saint John, N.B.; (II) Winnipeg, Man.; (III) Kitchener, Ont.; (IV) Ottawa, Ont.; (V) Vancouver, B.C.; (VI) Hamilton, Ont.; (VII) Calgary, Alta.; (VIII) Toronto, Ont.; (IX) Montreal, Que.

(2) CENSUS OF INSTITUTIONS.—*Preliminary Bulletins.* (1) Mental Institutions. (2) Directory of Hospitals. (3) Penitentiaries. (4) Charitable and Benevolent Institutions. (5) Reformative and Corrective Institutions. (6) Annual Report of Mental Institutions, 1932, 1933, 1934 and 1935. (7) Annual Report on Hospitals, 1932, 1933, 1934 and 1935. (8) Directory of Hospitals, 1935.

(3) AGRICULTURE.—*Preliminary Bulletins.*—(1) Number of Occupied Farms, by Counties or Census Divisions, 1931 and 1921; and the Number of Vacant or Abandoned Farms, 1931. Preliminary Acreage:—(1) Prince Edward Island; (2) New Brunswick; (3) Saskatchewan; (4) Manitoba; (5) British Columbia; (6) Ontario; (7) Nova Scotia; (8) Quebec; (9) Alberta; (10) Canada. Live Stock by Counties:—(11) Prince Edward Island; (12) Nova Scotia; (13) New Brunswick. (14) Ontario Preliminary Acreage, by Counties. (15) Manitoba Live Stock, by Census Divisions. (16) New Brunswick Preliminary Acreage, by Counties. (17) Alberta Live Stock, by Census Divisions. (18) Saskatchewan Live Stock, by Census Divisions. (19) British Columbia Live Stock, by Federal Electoral Districts. (20) Quebec Live Stock, by Counties. (21) Ontario Live Stock, by Counties. Farm Holdings, by Size, for Provinces, Counties or Census Divisions. Farm Facilities, by Provinces. Total Number of Farms, Farm Tenure, Farm Acreage, Farm Values, Mortgage Debt and Farm Expenses, by Provinces. Farms Reporting Live Stock, by Kinds and Total Number of Animals Reported for Each Kind. Area and Yield of Field Crops, 1930 and 1920:—(22) Prince Edward Island; (23) Nova Scotia; (24) New Brunswick; (25) Ontario; (26) Quebec. Live Stock on Farms by Provinces. Tenure

POPULATION—concluded.**I. CENSUS—concluded.**

Bulletins of the Seventh Census of Canada, 1931—concluded.

(3) AGRICULTURE—concluded.

of Farm Lands, by Provinces, Counties or Census Divisions. Number of Farm Workers, Weeks and Cost of Hired Labour, 1930. Fruit Trees on Farms, by Provinces, 1931 and 1921. Vegetables:—Area in 1931 and Area, Production and Value in 1930, by Provinces. *Final Bulletins.*—ANIMAL PRODUCTS ON FARMS, BY COUNTIES:—(I) Prince Edward Island; (II) Nova Scotia; (III) New Brunswick; (IV) Manitoba; (V) Saskatchewan; (VI) Alberta; (VII) Ontario; (VIII) Quebec; (IX) British Columbia. LIVE STOCK ON FARMS, BY COUNTIES:—(X) Prince Edward Island; (XI) Nova Scotia; (XII) New Brunswick; (XIII) Manitoba; (XIV) Saskatchewan; (XV) Alberta; (XVI) British Columbia; (XVII) Ontario. (XVIII) Live Stock on Farms by Counties, Quebec. (XIX) Tenure, Farm Values, Farm Facilities and Mortgage Debt, 1931, and Farm Expenses for 1930, by Counties or Census Divisions. (XX) Stock Sold Alive, Stock Slaughtered, Young Animals Raised, 1930, and Pure-Bred Live Stock on Farms, 1931, by Counties or Census Divisions. (XXI) Pure-Bred Live Stock on Farms and Elsewhere, 1931. (XXII) Fruit Trees, 1931, Maple Products, 1931, Fruit Production and Value, 1930. (XXIII) Greenhouse and Hothouse Establishments on Farms and Elsewhere, by Provinces, 1931, 1921. (XXIV) Forest Products of Farms, by Counties or Census Divisions, 1930. (XXV) Condition of Farm Land, by Counties or Census Divisions, 1931. (XXVI) Area of Field Crops, by Counties or Census Divisions, 1931.

II. INTERCENSAL ESTIMATES OF POPULATION.**III. VITAL STATISTICS.**

Annual Report on Vital Statistics of Canada by Provinces and Municipalities, *Price, \$1*; Preliminary Annual Report on Vital Statistics of Canada; Preliminary Quarterly Report on Vital Statistics of Canada; Monthly Report of Births, Deaths and Marriages registered in Cities; Report of Conference on Vital Statistics, held June 19-20, 1918; Special Report on Contributory Causes of Death, 1926; Order of Birth in the Registration Area of Canada, 1925; Physicians' Pocket Reference to the International List of Causes of Death; Manual of the International List of Causes of Death, Revision of 1929; Special Report on Mortality in Canada from Cerebral Hæmorrhage and Certain Diseases of the Heart, Arteries and Kidneys, 1921-32; Special Report on Mortality in Canada According to Place of Residence, 1930-32; Special Report on Mortality from Tuberculosis in Canada According to Place of Residence, 1930-32; Special Report on Births in Canada According to Place of Residence of Mother, 1930-32; Special Report on Mortality in Canada, 1921-32.

PRODUCTION—**I. ANNUAL SUMMARY OF PRODUCTION.**

Including and differentiating gross and net—(1) Primary Production (agriculture, fishing, furs, forestry and mining) and (2) Secondary Production, or General Manufactures and Construction.

II. AGRICULTURE.

(1) *Agricultural Production*—Monthly Bulletin of Agricultural Statistics; *Price \$1 per year.* (The official record of current statistical data relating to agriculture. Contains reports on agricultural conditions, prices, weather, etc.—estimates of areas, yields, quality and value of field crops—value of farm lands—wages of farm help—number and values of farm live stock and poultry—statistics of fruit and floriculture—dairying—tobacco—hives and honey—maple syrup and sugar—clover and grass seed—miscellaneous crops—stocks of grain—annual summary of value of agricultural production—index numbers of agricultural prices, yields and values—international agricultural statistics.) Advance Summaries of Agricultural Statistics. Telegraphic Crop Reports: (Between June 1 and Sept. 1, weekly for the Prairie Provinces and every two weeks for the rest of Canada). Agricultural Statistics by Counties and Crop Districts, 1922-24 and 1925-29. Annual Statistics of Fruit and Floriculture. Advance Summaries on Fruit Conditions, Yields, etc. Handbook of Instructions to Crop Correspondents, and Summary of Annual Agricultural Statistics, 1931. (See also Census of Agriculture under "Population".)

(2) *Grain and Grain Products*—(a) Annual Report on the Grain Trade of Canada, *Price 50 cents*; (b) Preliminary Report on the Grain Trade of Canada, *Price 25 cents*; (c) Monthly Review of the Wheat Situation, *Price \$1 per year*; (d) Canadian Grain Statistics—(Weekly report on grain supplies and movements); (e) Canadian Milling Statistics—(Monthly); (f) List of Mills with Capacity—(Latest issue, 1934); (g) The Grain Situation in the Argentine—(Monthly); (h) The Production and Distribution of Canadian Grains and Seeds—(1) Barley, (2) Oats, (3) Rye, (4) Flaxseed (i) World Trade in Barley.

PRODUCTION—continued.**II. AGRICULTURE—concluded.**

- (3) *Live Stock and Animal Products*—(a) Annual Report on Live-stock and Animal Products Statistics, *Price 25 cents*; (b) Monthly Reports on Stocks in Cold Storage (Advance, preliminary and final); (c) Monthly Estimates of Creamery Butter Production, by Provinces; (d) Annual Estimates of the Consumption of Meats, Butter, Cheese, Eggs and Poultry in Canada.
- (4) *Other*—Monthly Report on Raw and Refined Sugar. (Visible supply, meltings, shipments, exports and imports.)

III. FURS.

Annual Report on Fur Farms, *Price 25 cents*. Advance Bulletin of Statistics of the Production of Raw Furs. Annual Bulletin on the Production of Raw Furs (comprising the pelts taken by trappers and those sold from fur farms).

IV. FISHERIES.

Annual Report of Fisheries Statistics, *Price 35 cents*. Advance Bulletins of Fish Caught and Marketed, by Provinces.

V. FORESTRY.

Annual Summary of the Value, etc., of Forest Production: (Includes operations in the woods for saw-mills, shingle mills, pulp and paper mills, etc., production of mining timber, production of poles and cross ties, and farm production of firewood, posts, etc.).

[See also Reports on Manufactures of Forestry Products listed under "Manufactures," Section VII, Subsection (5).]

VI. MINERAL PRODUCTION: (MINING AND METALLURGY).

- (1) *General*—(a) Annual Report on the Mineral Production of Canada, *Price 50 cents*; (b) Preliminary Reports (semi-annual) on the Mineral Production of Canada; (c) Monthly Reports on Leading Minerals; (d) Preliminary Estimate of Canada's Mineral Production.
- (2) *Coal*—(a) Annual Report on Coal Statistics for Canada, *Price 25 cents*; (b) Monthly Summary Report on Coal and Coke Statistics for Canada; (c) Quarterly Report on Coal and Coke Statistics for Canada, *Price 50 cents per year*.
- (3) *Annual Bulletins on Mining*—Metals—The Gold-Mining Industry in Canada: (includes alluvial gold mining, auriferous quartz mining, copper-gold-silver mining, and tables showing Canadian and world production of gold). The Silver-Mining Industry in Canada: (includes silver-cobalt-arsenic mining, silver-lead-zinc mining, and tables showing Canadian and world production of arsenic, cobalt, lead, silver, and zinc). The Nickel-Copper Mining, Smelting and Refining Industry: (includes Canadian and world production of nickel). The Copper-Mining Industry: (includes Canadian and world production of copper). Metals of the Platinum Group. The Production of Miscellaneous Metals: (includes antimony, beryl, bismuth, cadmium, chromite, lithium, manganese, mercury, molybdenite, radium, selenium, tin, titanium, tungsten). The Non-Ferrous Smelting and Refining Industry.

Non-Metals—Abrasives; Asbestos; Feldspar and Quartz; Gypsum; Iron Oxide; Mica; Natural Gas; Petroleum; Salt; Talc and Soapstone; Miscellaneous Non-metallic Minerals (includes actinolite, barytes, bituminous sands, fluorspar, graphite, magnesitic-dolomite, magnesium sulphate, bog manganese, mineral waters, peat, phosphate, silica brick, sodium carbonate, sodium sulphate, sulphur—pyrites).

Structural Materials—Cement; Clay and Clay Products; Lime; Sand and Gravel; Stone.

[See also Reports on Iron and Steel and their Products, Manufactures of Non-Ferrous Metals, and Chemicals and Allied Products, listed under "Manufactures," Section VII, Subsections (6), (7), (8) and (9).]

VII. MANUFACTURES.

- (1) *General*—General Report on the Manufacturing Industries of Canada, *Price 25 cents*. Geographical Distribution of the Manufacturing Industries of Canada, *Price 20 cents*. Also Reports for the Provinces and Leading Cities; Alphabetical List of Products (annual report); Quantity of Manufacturing Production in Canada, 1923-29; Consumption of Luxuries (annual report).

PRODUCTION—continued.

VII. MANUFACTURES—continued.

- (2) *Manufactures of Vegetable Products*—General Report of Manufactures of Vegetable Products, *Price 50 cents*. Annual bulletins as follows: (a) Coffee, Tea, Spices and Miscellaneous Foods; (b) Fruit and Vegetable Preparation (including canning, evaporating and preserving, and pickles, sauces, vinegar and cider); (c) Flour and Grist-Mill Products; (d) Bread and Other Bakery Products; (e) Biscuits and Confectionery, including Cocoa and Chocolate; (f) Macaroni and Vermicelli; (g) Liquors, Distilled; (h) Liquors, Malt; (i) Liquors, Vinous; (j) Rubber Goods and Rubber Boots and Shoes; (k) Prepared Breakfast Foods; (l) Sugar Refineries; (m) Tobacco Products; (n) Linseed and Soya Bean Oil; (o) The Canned Foods Industry; (p) Ice Cream; (q) Pack of Fruits and Vegetables (preliminary); (r) Barley and Its Production; (s) Mixed Feed Trade in Canada; (t) Stocks of Unmanufactured Tobacco on Hand (quarterly report).
- (3) *Animal Products and Their Manufactures*—Annual Report as follows: The Dairy Factory Industry, *Price 25 cents*. Annual Bulletins: (a) Slaughtering and Meat Packing and Sausage and Sausage Casings; (b) Leather Tanneries; (c) Miscellaneous Leather Goods, Leather Belting, Boot and Shoe Findings, Leather; (d) Leather Boots and Shoes; (e) Leather Gloves and Mitts; (f) Fur Goods, Fur Dressing, Monthly Bulletin on Boot and Shoe Production. Monthly Bulletin on Concentrated Milk Products.
- [See also Reports on Live Stock, etc., listed under "Agriculture".]
- (4) *Textile and Allied Industries*—General Report on the Textile Industries of Canada, *Price 50 cents*. Annual Bulletins as follows: (a) Cotton Textiles (cloth, yarn, thread and waste); (b) Woollen Textiles (cloth, yarn, waste, carpets, etc., and woollen goods, *n.e.s.*); (c) The Silk Industry; (d) Clothing, Men's, Factory; (e) Clothing, Women's, Factory; (f) Hats and Caps; (g) Hosiery and Knitted Goods; (h) Men's Furnishings, *n.e.s.*; (i) Oiled Clothing and Waterproofs; (j) Cordage, Rope and Twine; (k) Corsets; (l) Cotton and Jute Bags; (m) Dyeing, Cleaning and Laundry Work; (n) Dyeing and Finishing of Textiles; (o) Awnings, Tents and Sails; (p) Production and Consumption of Raw Wool in Canada, 1931; (q) Consumption of Wool, Tops and Yarns, 1932.
- (5) *Manufactures of Forestry Products*.—Annual Reports, *Price 25 cents each*: (a) The Lumber Industry; (b) The Pulp and Paper Industry; (c) Wood-Using Industries; (d) Paper-Using Industries. Annual Bulletins: (a) The Lumber Industry; (b) Lumber Distribution in Canada and the United States (biennial); (c) The Pulp and Paper Industry. Annual Preliminary Reports on Wood-Using Industries: (a) Planing Mills, Sash and Door Factories; (b) Hardwood Flooring; (c) Furniture, (d) Boxes, Baskets and Crates; (e) Carriages, Wagons and Materials; (f) Cooperage; (g) Coffins and Caskets; (h) Sporting Goods; (i) Boat Building; (j) Lasts, Trees and Shoe Findings; (k) Handles, Spools and Woodturning; (l) Wooden-ware; (m) Excelsior; (n) Charcoal Manufacture; (o) Beekeepers' and Poultrymen's Supplies; (p) Miscellaneous Wood-Using Industries. Annual Preliminary Reports on Paper-Using Industries: (a) Printing and Publishing; (b) Printing and Bookbinding; (c) Lithographing; (d) Engraving, Electrotyping and Stereotyping; (e) Trade Composition; (f) Paper Boxes and Bags; (g) Blueprinting; (h) Roofing Paper; (i) Miscellaneous Paper Goods. The Printing Trades [combining (a), (b), (c), (d), (e), and (f)]. Monthly Bulletins: (a) Asphalt Roofing; (b) Rigid Insulating Board.
- (6) *Iron and Steel and Their Products*—Biennial Report, *Price 25 cents*. Annual Bulletins as follows: Preliminary Summary on the Iron and Steel Industry—(a) Primary Iron and Steel; (b) Castings and Forgings; (c) Boilers, Tanks and Engines; (d) Farm Implements; (e) Machinery; (f) Automobiles; (g) Automobile Parts; (h) Railway Rolling Stock; (i) Wire and Wire Goods; (j) Sheet Metal Products; (k) Hardware, Tools and Cutlery; (l) Bridge Building and Structural Steel; (m) Miscellaneous Iron and Steel Products. Commodity Bulletins on the production of pig iron; steel; washing machines; cream separators; warm air furnaces; galvanized sheets; wire nails; wire rope and cable; steel wire; wire fencing; stoves, etc. Monthly Reports: (a) Iron and Steel; (b) Automobile Statistics.
- (7) *Manufactures of Non-Ferrous Metals*—Biennial Report, *Price 25 cents*. Annual Bulletins as follows: Preliminary Summary on Manufactures of Non-Ferrous Metals—(a) Aluminium Products; (b) Brass and Copper Products; (c) White Metal Alloys; (d) Jewellery and Silverware; (e) Electrical Apparatus and Supplies; (f) Miscellaneous Non-Ferrous Metal Goods. Quarterly Reports on production and sales of radio sets and sales of storage batteries. Commodity Bulletins on the production of batteries; silverware; vacuum cleaners; electric motors and generators; electric transformers; incandescent lamps, etc.

PRODUCTION—concluded.**VII. MANUFACTURES—concluded.**

- (8) *Manufactures of the Non-Metallic Minerals*—Biennial Report, *Price 25 cents*. Annual Bulletins as follows: Preliminary Summary on Manufactures of Non-Metallic Minerals—(a) Aerated Waters; (b) Asbestos Products; (c) Cement; (d) Cement Products; (e) Coke and Gas; (f) Glass (blown, cut and ornamental, etc.); (g) Lime; (h) Petroleum Products; (i) Products from Domestic Clays; (j) Products from Imported Clays; (k) Salt; (l) Sand-Lime Brick; (m) Dressed Stone; (n) Artificial Abrasives and Abrasive Products; (o) Miscellaneous Non-Metallic Mineral Products (including carbon electrodes—gypsum products—mica products—non-metallic minerals, *n.e.s.*). Also Special Report on the consumption of coke in Canada. Monthly Report on Coke Statistics.
- (9) *Chemicals and Allied Products*—Biennial Report, *Price 25 cents*. Annual Bulletins as follows: Preliminary Summary on Chemicals and Allied Products—(a) Coal Tar Distillation; (b) Acids, Alkalies and Salts; (c) Compressed Gases; (d) Explosives, Ammunition and Fireworks; (e) Fertilizers; (f) Medicinal and Pharmaceutical Preparations; (g) Paints, Pigments and Varnishes; (h) Soaps, Cleaning Preparations and Washing Compounds; (i) Toilet Preparations; (j) Inks; (k) Adhesives; (l) Polishes and Dressings; (m) Wood Distillation; (n) Miscellaneous Chemical Products, (including boiler compounds—cellulose products—insecticides—sweeping compounds—disinfectants—matches—dyes and colours—chemical products, *n.e.s.*). Special Report on the Fertilizer Trade in Canada. Commodity Bulletins on Sulphuric Acid, Ammonium Sulphate, etc. Special Report—Directory of Chemical Industries in Canada, as of July 1, 1932. Special Report on the Consumption of Chemicals in Municipal Waterworks in Canada, 1934 and 1935.
- (10) *Miscellaneous Manufactures*—General Report. Annual Bulletins as follows: (a) Brooms, Brushes and Mops; (b) Musical Instruments (including pianos, organs and phonographs) and Musical Instrument Materials and Parts; (c) Buttons; (d) Bed Springs and Mattresses.

NOTE.—For statistics of water power and central electric stations, see under heading "Public Utilities".

VIII. CONSTRUCTION.

Building Permits—Monthly and Annual Record.

EXTERNAL TRADE (IMPORTS AND EXPORTS)—

- (1) Annual Report of the Trade of Canada, for the fiscal year ended Mar. 31 (showing summary historical tables, analyses of current trends, detailed tables by items, group analyses according to component material, origin and degree of manufacture, and purpose, and comparisons of the volume of trade). *Price \$3*.
- (2) Condensed Preliminary Report of the Trade of Canada, for the fiscal year ended Mar. 31. *Price 25 cents*.
- (3) Annual Report of the Trade of Canada for the calendar year. *Price 50 cents*. (Free to subscribers to Quarterly Trade Report.)
- (4) Review of Canada's Foreign Trade during the calendar year. *Price 25 cents*.
- (5) Quarterly Report of the Trade of Canada (showing statistics of imports and exports by months and cumulative quarters). *Price \$2 per year*.
- (6) Monthly Summary of the Trade of Canada (for latest month and latest 12 months). *Price \$1 per year*.
- (7) Monthly Bulletins on Trade Statistics as follows: (a) Abstract of Imports, Exports, and Duty Collected (by latest month, accrued period, and latest 12 months); (b) Summary of Canada's Imports (for latest month); (c) Summary of Canada's Exports (for latest month); (d) Canada's Imports from Principal Countries (for latest month and accrued period); (e) Canada's Domestic Exports to Principal Countries (for latest month and accrued period); (f) Canada's Monthly Trade Trends (by months and accrued period); (g) Canada's Monthly Trade Trends with Empire Countries (by months and accrued period); (h) Canada's Monthly Trade Trends with Foreign Countries (by months and accrued period).
- (8) Monthly Commodity Bulletins: (a) Imports and Exports of Asbestos; (b) Imports and Exports of Coffee and Tea; (c) Imports of Farm Implements and Machinery; (d) Exports of Farm Implements and Machinery; (e) Imports and Exports of Fertilizers; (f) Imports and Exports of Footwear (except rubber); (g) Exports of Grain and Flour; (h) Imports and Exports of Hides and Skins; (i) Imports of Lumber;

EXTERNAL TRADE (IMPORTS AND EXPORTS)—concluded.

(j) Exports of Lumber; (k) Imports of Meats, Lard and Sausage Casings; (l) Exports of Meats, Lard and Sausage Casings; (m) Imports of Milk, Milk Products and Eggs; (n) Exports of Milk, Milk Products and Eggs; (o) Imports of Non-Ferrous Metals and Smelter Products; (p) Exports of Non-Ferrous Metals and Smelter Products; (q) Imports of Paints and Varnishes; (r) Exports of Paints and Varnishes; (s) Imports of Petroleum and Products; (t) Exports of Petroleum and Products; (u) Imports and Exports of Pipes, Tubes and Fittings; (v) Imports of Pulpwood, Pulp and Paper; (w) Exports of Pulpwood, Pulp and Paper; (x) Imports of Rubber and Products; (y) Exports of Rubber and Products; (z) Imports of Sheet Metal Products (aa) Imports and Exports of Vegetable Oils; (bb) Imports of Vehicles (of iron,) (cc) Imports and Exports of Wire; (dd) Imports and Exports of Soap; (ee) Imports and Exports of Fresh Fruits; (ff) Imports and Exports of Fresh Vegetables; (gg) Imports and Exports of Pickles and Canned Vegetables; (hh) Imports and Exports of Canned and Preserved Fruits. Price \$1 per year for imports and exports of one commodity; \$5 per year for all the above commodity bulletins.

- (9) Special Trade Reports: (a) Trade of Canada with Pacific Countries (1932); (b) Canada-Belgium Trade, 1933; (c) Canada's Imports of Commodities not produced in Canada, 1929-1933; (d) Canada-Austria Trade, 1934; (e) Canada-Germany Trade, 1934.

INTERNAL TRADE—

1. RETAIL AND WHOLESALE TRADE (See Vols. X and XI under *Report of the Seventh Census*, p. 1080):

Census of Merchandising and Service Establishments, 1931:—

Statistics of Retail and Wholesale Trade in 1930.

Preliminary Bulletins (mimeographed)—(a) Retail Trade of cities with a population of 10,000 and over, showing number of establishments, kinds of business, types of operation, employees, wages, sales, etc.; (b) Wholesale Trade of cities with a population of 20,000 and over.

Final Reports (mimeographed)—(a) Retail Merchandise Trade in Canada; (b) Retail Services in Canada; (c) Wholesale Trade in Canada; (d) Summary of Retail Facts; Credit and Commodity Sales; Size of Business; Operating Expenses by Provinces; (e) Retail Sales by Commodities; (f) Mail Order Sales; (g) Food Retailing; (h) Drug Retailing; (i) Retail Trade in Rural and Urban Areas; (j) Wholesale Trade by Provinces; (k) Operating Results of Wholesale Establishments, Showing Operating Expenses, Size of Business, Number of Units, etc.; (l) Commodity Sales by Wholesale Establishments; (m) Chain Stores, Food Chains, Variety Chains, Drug Chains, Filling Station Chains, Lumber and Building Material Chains; (n) Hotel Operations, by Provinces; (o) Hotel Operations in Canada; (p) Co-operative Marketing and Purchasing Associations; (q) Motor-Vehicle Transportation; (r) Distribution of Sales of Coal Mines; (s) Distribution of Sales of Manufacturing Establishments.

Final Reports (printed)—Retail Trade for the Dominion and the Provinces, showing number of establishments, kinds of business, types of operation, full-time and part-time employees and wages, operating expenses, size of business, credit sales, forms of organization, capital invested, and sales by commodities; details for cities with populations of 30,000 and over by kinds of business and types of operation, and by kinds of business for counties or census divisions and incorporated places with populations of 1,000 and over. Retail Trade, Canada, Price 50 cents; Ontario, Price 50 cents; Quebec, Price 50 cents; similar reports for each of the other provinces, Price 25 cents. Wholesale Trade by Provinces, similar in form to retail reports. Reports now available for Ontario, Price 25 cents; Quebec, Price 25 cents; Dominion summary and reports on wholesale trade for other provinces available in near future.

Annual Reports on Retail and Wholesale Trade—Reports for 1934 as follows: (a) Chain Stores; (b) Retail Merchandise Trade by Provinces and for Canada; (c) Motion Picture Statistics; (d) Wholesale Trade in Canada and the Provinces.

Divisions of the Experimental Farms Branch. Bulletins, pamphlets and circulars of the Experimental Farms Branch on a great variety of agricultural subjects, including publications of the following Divisions: Field Husbandry; Animal Husbandry; Horticulture; Cereal; Chemistry; Forage Plants; Botanical; Poultry; Tobacco; Economic Fibre; Bacteriology; Bees; and Illustration Stations. Bulletins of the Dairy and Cold Storage Branch relating to the dairying and cold storage industries in Canada, the making of butter and cheese, dairying experiments, co-operation, etc. Reports, bulletins, pamphlets, etc., of the Live Stock Branch on cattle, sheep, swine and poultry, marketing of eggs, wool, etc. Bulletins of the Health of Animals Branch, with regulations as to: contagious abortion; rabies; sheep scab; actinomycosis; anthrax; glanders; hog cholera; maladie du coit; tuberculosis; foot and mouth disease; quarantine; and meat inspection. Bulletins and reports of the Seed Branch as to seed-testing, the production and use of seed grains, the Seed Control Act, the Feeding Stuffs Act and the Fertilizers Act. Bulletins and circulars of the Entomological Branch and instructions to importers of nursery stock. Fruit Branch reports relating to the marketing of fruits and vegetables and their preservation, the Fruit and Honey Act and the Maple Sugar Industry Act.

A pamphlet entitled "List of Publications" contains a list of the publications of the Department, numbering more than 400. These publications include, in addition to the reports, bulletins and pamphlets on field crops, live stock, dairying, orchard and garden, animal, insect and plant diseases, bee-keeping, poultry, and miscellaneous topics. With few exceptions, the publications of the Department are free on application to its Publicity and Extension Branch.

Auditor General.—Annual Report.

Board of Railway Commissioners for Canada.—Annual Report. Pamphlet containing Judgments, Orders, Regulations and Rulings, issued fortnightly.

Civil Service Commission.—Annual Report; Regulations of the Civil Service Commission; How Appointments are made in the Public Service; Examinations for Clerks, Stenographers and Typists; Examinations for Customs Service; Examinations for Postal Service; Examinations for Junior Trade Commissioners.

Dominion Fuel Board.—The Dominion Fuel Board was created in 1922 primarily to instigate a thorough study of the underlying causes of recurring fuel shortages in Canada and of the methods by which they might be counteracted. It is composed of officers of the Department of Mines and of the Interior and the co-operation of both Departments is given to the Board in its investigations. Partly as a result of the investigations and recom-

mentations of the Board and of the publicity given to its findings, diversified sources of fuel supply have been developed and fuel shortages are no longer experienced. The Board has been instrumental in enabling Canadian coal to find markets in territory previously supplied from foreign sources. At the present time the work of the Board covers continued investigation of the fuel situation in relation to Canada; the Board also administers the Domestic Fuel Act, and the Orders in Council providing assistance to the coal industry. The following reports and publications have been issued: Interim Report of the Dominion Fuel Board (1923); Central and District Heating—Possibilities of Application in Canada, by F. A. Combe (1924)¹; Coke as a Household Fuel in Central Canada, by J. L. Landt (1925)¹; The Smoky River Coal Field, by James McEvoy (1925)²; Coking Experiments on Coals from the Maritime Provinces, by B. F. Haanel and R. E. Gilmore (1926)³; Instructions for Burning Coal, Coke and Peat (1927)³; Tests of Various Fuels Made in a Domestic Hot Water Boiler, by E. S. Malloch and C. E. Baltzer (1927), revised 1929³; Why you Should Insulate your Home, by G. D. Mallory (1927)⁴; Industrial Fuel and Power Statistics for Ontario, Calendar Year 1925, by E. S. Malloch and C. E. Baltzer (1928)⁵; Dominion Fuel Board, Second Progress Report, 1923-28 (1928); Humidity in House Heating, by E. S. Martindale (1929)⁴; Cards bearing instructions on "How to Burn Coke"; Comparison of the Cost and Convenience of House Heating with Various Fuels, by E. S. Malloch (1929)¹; The Insulation of New and Old Houses, by G. D. Mallory (1932)⁶; Graph Showing the Supply and Distribution of Coal in Canada, 1923-1931 (1932); Graphs Showing Operating Costs and Revenues of Canadian Coal Mining Districts for 1931, 1932 and 1933; Fuels Sold for Domestic Purposes in Ontario and Quebec, 1926¹; Fuels Sold for Domestic Purposes in Ontario, Quebec and Manitoba, 1927¹; Fuels Distributed for Domestic Heating in the Maritimes, Ontario, Quebec and Manitoba, 1928 and 1929¹; Fuels Distributed for Domestic Heating in Quebec, Ontario and Manitoba for 1930, 1931 and for the period 1928-1932¹; Petroleum Fuels in Canada, 1930, '31, '32, by J. M. Casey (1934)³; Graph showing the Supply and Distribution of Coal in Canada, 1925-1934 (1934); Graph showing Operating Costs and Revenues of Canadian Coal Mining Districts for the years 1931-1934 inclusive (1934); Petroleum Fuels in Canada 1933, by J. M. Casey (1935).

External Affairs.—Annual Report. Annual Treaty Series. British and Foreign Government Representatives in Canada. Report of the Canadian Delegates to the Assembly of the League of Nations.

Finance.—Annual Report on the Public Accounts of the Dominion of Canada. Monthly Statements of the Chartered Banks of Canada. Estimates. Particulars of Dominion of Canada Loans Outstanding.

Fisheries.—(*Publications marked * are available in both English and French editions.*)
—Annual Report, including Fish Culture Report. Annual Statistical Report (contains both English and French sections). Fish Culture Report. Popular Account of a Number of Canadian Fishes—A. Halkett. *Canada's Fisheries. Map of the Atlantic Coast Provinces showing the Inshore and Deep-sea Fishing Grounds. Statistics of the Haddock Fishery in North American Waters—A. W. H. Needler. Statistics of the Catch of Cod off the East Coast of North America, 1926.—O. E. Sette. Statistics of the Mackerel Fishery off the East Coast of North America, 1904 to 1930—O. E. Sette and A. W. H. Needler. Fisheries Investigations in Hudson and James Bays and Tributary Waters, 1914—Melville, Lower and Comeau. Discoloration, Smut or Blackening of Canned Lobsters—Harrison and Hood. Historical Account of the Lobster Canning Industry—R. H. Williams. *Fish Canning in Canada (non-technical). *Fisheries News Bulletin (monthly). "The Salmon Fishery of British Columbia. Report on Fisheries Investigations in Hudson Bay, 1930. *Summary of the Report by Messrs. Cockfield, Brown and Company, Limited, on the Marketing of Canadian Fish and Fish Products. *Oyster Farming on the Atlantic Coast of Canada. Hardening Mud Bottoms for Oyster Culture (mimeographed). *Red Discoloration of Cured Codfish. *Factors in the Shipment of Live Lobsters from Eastern Nova Scotia. Investigations into the Natural History of the Herring—Hjort. *Fish and How to Cook it. *The Life of the Atlantic Salmon. *Proceedings No. 1 of the North American Council on Fishery Investigations, 1921-1930, and *Proceedings No. 2, 1931-1933. *Report of the Royal Commission Investigating the Fisheries of the Maritime Provinces and the Magdalen Islands, 1927. *The Storage of Oysters—A. W. H. Needler. Check List of the Fishes of the Dominion of Canada and Newfoundland, illustrated (\$2.00)—A. Halkett. *Memoranda (mimeographed) dealing with some methods of fish processing.

Geographic Board of Canada.—18th Report, containing all decisions to Mar. 31, 1924; 19th Report, containing all decisions from April 1, 1924, to July 31, 1927, with supplementary numbers 1 to 12; "Place-Names of Alberta", 1928, 25 cents; "Place-Names of Mani-

¹ Published by the Dominion Fuel Board in co-operation with the Mines Branch, Department of Mines.

² Published by the Dominion Fuel Board in co-operation with the Geological Survey, Department of Mines.

³ Published by the Mines Branch, Department of Mines, in co-operation with the Dominion Fuel Board.

⁴ Published by the Natural Resources Intelligence Bureau, Department of the Interior, for the Dominion Fuel Board.

⁵ Published by the Mines Branch, Department of Mines, in co-operation with the Dominion Fuel Board and the Dominion Bureau of Statistics.

⁶ Published by the National Development Bureau, in co-operation with the Dominion Fuel Board.

toba", 1931; "Meaning of Canadian City Names", 1922; "Place-Names on Magdalen Islands, Quebec", 1922; "Place-Names of Prince Edward Island with Meanings", 1925, 25 cents; "Place-Names in Thousand Islands, St. Lawrence River", 1910; "Place-Names on Anticosti Island, Quebec", 1922; Catalogue and Graphical Index of Maps in the Geographic Board Library, two volumes, 1922, supplement, 1925.

Indian Affairs.—Annual Report. Indian Act, (c. 98, R.S.C., 1927). Schedule of Indian Reserves, 1928, price \$1. Indian Treaties and Surrenders, Vols. I, II, III, price \$15. Census of Indians in Canada, 1934.

Insurance.—Quarterly Statement showing List of Registered Companies. Annual Abstract of Statements of Insurance Companies in Canada (subject to correction). Annual Reports of the Insurance Department, Vol. I (Fire and Miscellaneous), Vol. II (Life Companies and Fraternal Benefit Societies). Annual List of Securities held by Insurance, Trust and Loan Companies in Canada, with Department's Valuation thereof. Abstract of Statements of Loan and Trust Companies in Canada. Annual Report of Loan and Trust Companies incorporated by the Dominion. Classification of Fire Insurance Risks. Table of Bond Values.

Interior.—Annual Report. The Department of the Interior issues publications dealing with the work of the following branches: National Parks Branch, including Historic Sites and Migratory Birds. Dominion Forest Service. Topographical and Air Survey Bureau. Dominion Water Power and Hydrometric Bureau. Geodetic Survey of Canada. International Boundary Commission. Lands, Northwest Territories and Yukon Branch. Dominion Observatory, Ottawa. Dominion Astrophysical Observatory, Victoria. Reports on the work of the above branches may be had, if available, upon application to the Branch concerned, Department of the Interior, Ottawa, Canada.

International Boundary Commission.—*Reports.*—Joint Report upon the Survey and Demarcation of the Boundary between the United States and Canada from the source of the St. Croix River to the Atlantic Ocean, 1934, \$5; Joint Report upon the Survey and Demarcation of the Boundary between the United States and Canada from the source of the St. Croix River to the St. Lawrence River, 1925, \$5; Report of the International Waterways Commission upon the International Boundary between the Dominion of Canada and the United States, through the River St. Lawrence and the Great Lakes, with full set of 30 maps, 1915, \$7.50; Joint Report upon the Survey and Demarcation of the Boundary between the United States and Canada from the Northwesternmost Point of Lake of the Woods to Lake Superior, 1931, \$5. Joint Report upon the Survey and Demarcation of the Boundary between the United States and Canada from the Western Terminus of the Land Boundary along the 49th Parallel, on the west side of Point Roberts, through Georgia, Haro and Juan de Fuca Straits, to the Pacific Ocean, with accompanying Chart, 1921, \$5; Joint Report upon the Survey and Demarcation of the Boundary between the United States and Canada along the 141st Meridian from the Arctic Ocean to Mount St. Elias, 1918, \$5. *Maps.*—From the source of the St. Croix River to the Atlantic Ocean, 18 sheets and index sheet, various scales, sizes 26 by 38 inches, 50 cents each; from the St. Lawrence River to the source of the St. Croix River, 61 sheets and index sheet, various scales, 26 by 38 inches, 50 cents each; from the St. Lawrence River at St. Regis to the head of Pigeon Bay in Lake Superior, 29 sheets and index sheet, International Waterways Commission, various scales 29½ by 36 inches, 25 cents each; Northwesternmost Point of Lake of the Woods to the head of Pigeon Bay in Lake Superior, 36 sheets and index sheet, various scales, 26 by 38 inches, 50 cents each; 49th Parallel, Point Roberts to Northwesternmost Point of the Lake of the Woods, 59 sheets, index and profile sheets, scale 1:62,500, size 15 by 30 inches, sheets 1 to 19, 50 cents each, sheets 20 to 59, 25 cents each; west side of Point Roberts through Georgia, Haro and Juan de Fuca Straits to the Pacific Ocean, 1 sheet, scale 1:200,000, 28 by 41 inches, 50 cents; Cape Muzon to Mount St. Elias, 13 sheets 25 by 29 inches, scale 1:250,000, sheets 1 and 2 not yet published, 50 cents each; 141st Meridian from the Arctic Ocean to Mount St. Elias, 38 sheets, scale 1:62,500 with profile sheet, index sheet and special Arctic Coast sheet, size 18 by 27½ inches, 25 cents each; Mount St. Elias to White River sheet, scale 1:250,000, size 19 by 28 inches, 25 cents.

These reports or maps may be obtained on application to the International Boundary Commission, Department of the Interior, Ottawa. Cheques should be made payable to the Receiver General of Canada.

Justice.—Annual Report of the Superintendent of Penitentiaries.

King's Printer and Controller of Stationery.—*The Canada Gazette*, published weekly, with occasional supplement and extras; subscription, in Canada and United States, \$8 per annum payable in advance, single copies 20 cents each, other countries \$10 per annum and 25 cents per single copy. Judgments of the Board of Railway Commissioners, semi-monthly, \$3 per annum, single copies, 20 cents. Canada Law Reports, published monthly, yearly subscriptions, \$6. Revised Statutes of Canada, 1927 (5 vols.), \$10. Annual Statutes, 1928-35, \$5 each. Acts, Public and Private, with Amendments to date, 10 cents to \$1 per copy. Canadian Postal Guide, \$1 paper cover, \$1.50 cloth cover; including supplements, additional 25 cents. Parliamentary Debates, "Hansard", issued daily during session,

French and English, \$3 per session each for House of Commons and Senate Debates; single copies, 5 cents. Prices of bluebooks are in nearly every case printed upon the front cover and are based practically on cost. They may be ordered direct from the King's Printer, Ottawa. A catalogue of official publications of the Parliament and Government of Canada is issued regularly once a year with supplements when required and copies may be obtained from the King's Printer, Ottawa.

Labour.—*Monthly.*—The *Labour Gazette* (published in English and French) at a subscription price of 20 cents per annum. *Annually.*—Report of the Department of Labour (including: Reports of Proceedings under the Industrial Disputes Investigation Act, Conciliation and Labour Act, Employment Offices Co-ordination Act, Technical Education Act, Government Annuities Act, Combines Investigation Act, Old Age Pensions Act, Fair Wages and Eight-Hour Day Act, and the Relief Legislation). Labour Legislation in Canada as existing on Dec. 31, 1928 (a supplementary report thereto on Labour Legislation is published annually in February or March). Labour Organization in Canada. Wages and Hours of Labour in Canada. Prices in Canada and other Countries. Strikes and Lockouts in Canada and other Countries. *General Reports.*—Judicial Proceedings respecting Constitutional Validity of the Industrial Disputes Investigation Act, 1907, and Amendments of 1910, 1918, 1920 and 1925. The Employment of Children and Young Persons in Canada. Trade Union Law in Canada. *Reports of Investigations under the Combines Investigation Act.*—(1) Investigation into Alleged Combine in the Distribution of Fruits and Vegetables in Western Canada, 1925; (2) Investigation into Alleged Combine limiting Competition in the Marketing of New Brunswick Potatoes, 1925; (3) Investigation into Alleged Combine in the Manufacture and Sale of Bread in the City of Montreal, 1926; (4) Investigation into Alleged Combine in the Distribution of Fruits and Vegetables produced in Ontario, 1926; (5) Investigation by Registrar into the Proprietary Articles Trade Association, 1926; (6) Investigation of the Commissioner on the Amalgamated Builders' Council, 1929; (8) Report of Commissioner on the Electrical Estimators' Association, 1930; (9) Report of Registrar into Alleged Combine in the Bread-Baking Industry in Canada, 1931; (10) Report of Commissioner on Alleged Combine in the Motion Picture Industry in Canada, 1931. *Bulletins in Industrial Relations Series.*—(1) Joint Councils in Industry; (2) Report of a Conference on Industrial Relations, 1921; (3) Joint Conference of the Building and Construction Industries in Canada, 1921; (5) Canada and the International Labour Conference; (7) Canadian Railway Board of Adjustment, No. 1, Second Report; (8) National Conference Regarding Winter Employment in Canada, 1924; (9) Canadian Railway Board of Adjustment, No. 1, Third Report; (10) Canadian Railway Board of Adjustment, No. 1, Fourth Report; (11) Government Intervention in Labour Disputes in Canada; (12) Canadian Railway Board of Adjustment, No. 1, Fifth Report.

Marine.—Annual Report. 25 cents. List of Canadian Shipping. 50 cents. Reports of Expeditions to Hudson Bay, Northern Waters and Arctic Archipelago. List of Lights, etc., in Canada: (a) Pacific Coast, 15 cents; (b) Atlantic Coast, 25 cents; (c) Inland Waters, 10 cents.

Charts and Publications of the Hydrographic Service of Canada.—Catalogue of Nautical Charts, Sailing Directions, Tidal Information and other Canadian Government publications of interest to mariners (free). *Pilots.*—(Price \$1 per copy payable in advance by P.O. order, express order or marked cheque, only.) Gulf of St. Lawrence Pilot, 1934. St. Lawrence Pilot (below Quebec), comprising sailing directions from cap des Rosiers to Quebec, 5th edition, 1929. Supplement No. 2 to above, 1933. St. Lawrence River Pilot, Quebec to Montreal and Richelieu River, 1931. Supplement No. 1 to above, 1933. St. Lawrence Pilot, Montreal to Kingston and Ottawa River, 1933. Great Lakes Pilot, Vol. II (Lake Huron & Georgian Bay), 1933. Great Lakes Pilot, Vol. I (Lakes Ontario, Erie and St. Clair and Welland Canal, Niagara, Detroit and St. Clair Rivers, 1933), Sailing directions for the Canadian shores of lake Superior, 1st edition, 1922. Supplement No. 2 to the above, 1931. Sailing directions for lake Melville and approaches (Coast of Labrador), 1931. Sailing directions for the Hudson Bay route, 1933. British Columbia Pilot, Vol. I, southern portion of the coast of British Columbia from Juan de Fuca strait to cape Caution including Vancouver I. and inner passages, 1st edition, 1933. British Columbia Pilot, Vol. II, northern portion of the coast of British Columbia from cape Caution to Portland inlet and Queen Charlotte islands, 1st edition, 1930. Saint John River sailing directions, 1934. Nautical charts. *Reports of the International Waterways Commission.*—On the International Boundary Line through the St. Lawrence river, Great Lakes and connecting waters, 1915. *Tidal and Current Survey Reports.*—(issued free of charge)—Currents in the gulf of St. Lawrence, including the Anticosti region, Cabot strait and Northumberland strait. Currents in Belle Isle strait (temporarily out of print). Currents in the entrance to the St. Lawrence estuary. Tables of hourly directions and velocity of currents and time of slack water in the bay of Fundy. Tide levels and datum planes on the Pacific coast of Canada. Tide levels and datum planes in Eastern Canada, giving the levels in 86 harbours and other localities. Tides at the head of the bay of Fundy, with diagrams. Tidal investigations and results; Arctic tides, with map. Tides and tidal streams; a general description of the various types of tide and the behaviour of currents, with plates. Temperatures and densities of the waters of

Eastern Canada, with maps. *Tide Tables*.—(issued free of charge)—Tide tables for the Pacific coast of Canada, including: Juan de Fuca strait, the strait of Georgia, and the northern coast with data for slack water in the navigable passes and narrows and information on currents. Tide Tables for the Atlantic coast of Canada, including: the river and gulf of St. Lawrence, the Atlantic coast, the bay of Fundy, Northumberland and Cabot straits, Hudson bay, and information on currents. Abridged edition for Quebec, Father point and the St. Lawrence river. Abridged edition for Saint John, N.B., and the bay of Fundy (with time of high water at Windsor, N.S.). Abridged edition for Halifax, N.S. and Sydney, N.S. Abridged edition for Charlottetown, P.E.I., Pictou, N.S., St. Paul I. with tidal differences for north shore of Prince Edward I., Sydney, Northumberland strait, Cape Breton, Magdalen Is., etc. Abridged edition for Vancouver, Sand Heads and the strait of Georgia, B.C. Abridged edition for Prince Rupert, B.C., with tidal differences for the northern coasts of British Columbia. Slack water tables for the strait of Canso and Great Bras d'Or lake, N.S. Slack water tables for first Narrows, Vancouver harbour, Active pass and Turn point, B.C. (Mimeograph copies of tide tables for Port Nelson.)

Charts of the Hydrographic Service of Canada.—(Price 50 cents each.) Nearly four hundred and sixty charts and plans are published of the Atlantic coast and its harbours, Hudson bay, Hudson strait and harbours and anchorages, the St. Lawrence river, the Ottawa river, lake Ontario and harbours, lake Erie and harbours, lake Huron and Georgian bay and harbours, lake Superior and harbours, lake of the Woods, lake Winnipeg, Nelson river, Great Slave lake, Pacific coast and harbours. There is also a number of International Waterways Commission charts, not intended for navigation.

Obtainable from the King's Printer, Ottawa—Meteorological Observations in the Dominion of Canada, Bermuda and Newfoundland, (single copies 10 cents, yearly subscription \$1.00); Regulations, Government Wharves in Canada (10 cents); Rules and Regulations relating to the Examination of Masters and Mates of Foreign Sea-going Ships (French and English) (25 cents); Rules and Regulations relating to the Examination of Masters and Mates of Coasting and Inland Vessels (French and English) (25 cents); Rules of the Road, International (French and English) (10 cents); Rules of the Road, Great Lakes (French and English) (10 cents); Tide Tables, St. Lawrence Ship Channel (bilingual) (25 cents); Regulations for Shipping Grain Cargoes (10 cents); Expedition to Hudson Bay, SS. *Diana*, 1897 (\$1.00); Expedition to Hudson Bay, N. B. McLean, Director in Charge, 1927-28 (50 cents). Steamship Inspection (Marine Department).—(10 cents each); Inspection Boilers and Machinery of Steamships; Rules for Life Saving Appliances; Rules for Inspection of Hulls and Equipment; Rules for Motor Engineers' Certificates; Rules for Examination of Engineers on Steamships; Rules for Fire Extinguishers on Steamships.

Radio Branch.—Obtainable from the Director, Radio Branch, Department of Marine, Ottawa.—Map showing radio stations operated as Aids to Navigation, 1935 (25 cents); British Postmaster-General's Handbook for Wireless Telegraph Operators (25 cents); Official List of Radio Stations in Canada (25 cents); Kilocycle-Metre Conversion Chart (10 cents); Radiotelegraph Act and Regulations issued thereunder (10 cents); Pamphlet containing Extracts from the Radiotelegraph Act and Regulations issued thereunder with reference to Amateur Experimental Radio Stations (free); Pamphlet containing Examination Procedure for Certificates of Proficiency in Radio for Commercial Operators (free). Notices to Mariners re: Weather, Ice and Other Reports Transmitted by Radio-Telegraph (free).

Obtainable from The King's Printer, Government Printing Bureau, Ottawa.—International Telecommunication Convention of Madrid, 1932, together with the Radio Communication Regulations annexed thereto (25 cents); Radiotelegraphy Requirements for Ships registered in Canada and engaged on international voyages in accordance with the Safety of Life at Sea and Loadline Conventions Act, 1931, and the Regulations issued thereunder (10 cents). Bulletin No. 2 (1932) Radio Inductive Interference (35 cents); Supplement "A" (1934) to Bulletin No. 2 (15 cents). Navigation conditions on the Hudson Bay Route from the Atlantic Seaboard to Port Churchill, seasons of navigation 1929-30-31-32-33-34-35 (10 cents each); Hudson Bay Report, 1927. (25 cents.)

Mines.—The scientific and investigatory work of the Department of Mines, which is chiefly concerned with the development of the Dominion's mineral industries, is carried on by the Department's four principal branches—the Bureau of Economic Geology (with which is associated the Geological Survey); the Mines Branch, the National Museum of Canada and the Explosives Division.

The Bureau of Economic Geology (and the associated Geological Survey) carries on areal and economic investigations and research work in geology and mineralogy; the Mines Branch carries on field, laboratory, and industrial investigations covering the various phases of the mining and metallurgical industries from the primary occurrence of the ores to the utilization of the finished products; the National Museum of Canada carries on scientific investigations in all branches of natural history; and the Explosives Division, under the provisions of the Explosives Act (R.S.C., 1927, c. 62) has supervision of the manufacture, testing, storage and importation of explosives and issues the licences and permits authorized by the Act.

The Department of Mines publishes an annual administrative report covering the activities of the whole Department, and occasional pamphlets illustrating the services rendered the mining and metallurgical industries. Each of the branches publishes memoirs, bulletins and preliminary reports on special investigations and districts.

Bureau of Economic Geology.—The Geological Survey from 1842 to 1904 published annual volumes. From 1904 to 1910, upwards of 80 reports were issued, all separately. Since then the publications have consisted of memoirs and bulletins appearing at irregular intervals and miscellaneous publications, including geological and topographical maps, geological guide books and handbooks. The subjects dealt with include areal and economic geology of particular districts, mineralogy, palaeontology and related topics. In 1926 the first volume of a new Economic Geology Series was published, and further volumes of this series have since been issued. A list of the reports published by this Branch may be obtained on application to the Director, Bureau of Economic Geology, Ottawa.

The National Museum of Canada has published a series of *Museum Bulletins* in many branches of natural history. A list of these may be obtained on application to The Director, National Museum of Canada, Ottawa.

The Mines Branch, since its inception in 1908, has published annual summary reports covering the investigations of the Divisions of Mineral Resources, Ore Dressing and Metallurgy, Fuels and Fuel Testing, Ceramic and Road Materials and Chemistry. More detailed and comprehensive reports have also been published by this branch, dealing with the technology of most of the economic minerals of Canada. A list of the Mines Branch reports may be had on application to The Director, Mines Branch, Ottawa.

The Explosives Division has published annual reports since 1919 and a number of pamphlets on the proper care and handling of explosives. Copies may be obtained on application to The Chief Inspector of Explosives, Department of Mines, Ottawa.

The publications of the Department of Mines cover all phases of mining from preliminary explorations and surveys of unmapped territory through the mining, milling, smelting and refining of the ores to the marketing and utilization of the finished product. Most of these reports and maps may be obtained free of charge by residents of Canada, on application to the Deputy Minister of Mines, Ottawa, or to the Directors of the Branches concerned, whose addresses are given above. Many of these reports may be had in French translations. Price lists for distribution of reports outside of Canada are available from the Branch Heads.

National Defence.—Annual Report; List of Officers, Defence Forces of Canada, Naval, Military and Air Services; Canadian Navy List; Naval General Orders; General Orders, Militia and Air Services; Militia Orders; Air Regulations.

National Research Council.—Annual Reports.—Reports of the National Research Council for the years 1917-18 to 1934-35. *Technical Reports.*—(For Nos. 1 to 21 see p. 1042 of the 1927-28 Year Book. Nos. 3, 4, 6, 8 and 12 are now out of print.) No. 22, An Experimental Study of Sieving, by J. B. Porter, Ph.D., D.Sc.; No. 23, The Storage of Apples in Air-cooled Warehouses in Nova Scotia, by S. G. Lipsett, Ph.D., covering investigation by Associate Committee on Fruit Storage; No. 24, The Drying of Wheat, covering an investigation by the Associate Committee on Grain Research; No. 25, The Drying of Wheat (Second Report), by E. Stansfield and W. H. Cook, covering an investigation under the Associate Committee on Grain Research; No. 26, Weed Survey of the Prairie Provinces, by J. M. Manson, prepared under the auspices of the Associate Committee on Weed Control; No. 27, Weeds and Their Control, by G. P. McRostie, L. E. Kirk, G. Godel, W. G. Smith and J. M. Manson; No. 28, Report on Comparative Feeding Values for Livestock of Barley, Oats, Wheat, Rye and Corn, by E. W. Crampton. *Bulletins.*—(For Nos. 1 to 12, see p. 1042 of the 1927-28 Year Book. Nos. 3, 4, 6, 7, 9, and 11 are now out of print. No. 13, Interim Report on Protein Content as a Factor in Grading Wheat, prepared by the Associate Committee on Grain Research; No. 14, Report on Inquiry in Europe Regarding the Feasibility of Using Protein Content as a Factor in Grading and Marketing Canadian Wheat, by R. Newton, Ph.D.; No. 15, Review of Literature dealing with Health Hazards in Spray Painting, submitted by the Associate Committee on Spray Painting; No. 16, Health Hazards in the Radium Industry, by John D. Leitch. *Periodical.*—Canadian Journal of Research, at present issued in two parts, devoted respectively to (a) physical and chemical sciences and (b) botanical and zoological sciences.

National Revenue.—Annual Report, containing statements relative to Imports, Exports, Excise and Income. Annual Report of Shipping. National Revenue Review (monthly).

Pensions and National Health.—(1) Sanitation—Sewage Treatment for Isolated Houses and Small Institutions where Municipal Sewage System is not available; (2) The Canadian Mother's Book; (17) Wells; (18) Home Treatment, Rural Water Supplies; (24) Information for Men—Syphilis and Gonorrhoea; (25) Information for Young Women about Sex Hygiene; (26) Information for Parents—Teaching Sexual Hygiene to Children; (27) Prevention of Blindness in Babies; (30) How to Build Sound Teeth; (31) What You Should Know about Tuberculosis; (32) Smallpox and Vaccination.

Post Office.—Annual Report of the Postmaster General. Official Postal Guide. Regulations as to Rural Mail Delivery. Booklet of Postal Information.

Public Works.—Annual Report.

Railways and Canals.—Annual Report of the Department; Canals of Canada; The Trent Canal System; Canal Rules and Regulations; Port Colborne Elevator Tariff and Regulations; Prescott Government Grain Elevator Tariff.

Secretary of State.—Annual Report. The Arms of Canada.

Trade and Commerce.—(NOTE.—Requests for those publications marked with an asterisk should be addressed to the King's Printer; the remaining publications may be obtained from the Deputy Minister, Department of Trade and Commerce.) *Annual Report of the Dept. of Trade and Commerce, *25 cents*; *Annual Report of the Board of Grain Commissioners for Canada, *25 cents*; *Annual Report of Electricity and Gas, *25 cents*; Annual Reports of Dominion Grain Research Laboratory; Electrical Standards and their application to Trade and Commerce; *List of Licensed Elevators, etc., *50 cents*; Motion Pictures (catalogue of), *25 cents*

Publications of the Commercial Intelligence Service—NOTE.—Publications of the Commercial Intelligence Service are compiled with a view to furnishing Canadian exporters with information respecting the possibilities for the sale of Canadian goods abroad, the nature of the competition to be encountered, Customs requirements, etc., and are not intended for general distribution. Although subscribers to the Commercial Intelligence Journal are entitled to receive such reports free of charge, in all other cases their distribution is controlled by the King's Printer, who fixes a price therefor as indicated in the following list: Commercial Intelligence Journal Weekly (in English and French), containing Reports of Trade Commissioners and other Commercial Information. Annual subscription: In Canada, *\$1*; single copies, *5 cents*. Outside Canada, *\$3.50*; single copies, *10 cents*. Australian Market for Fish Products (1931); French-Canadian Homespun Industry; Greece as a Market (1931) *25 cents*; Invoice Requirements—Leaflets covering countries included in the territories assigned to Trade Commissioners are available to exporters *free of charge*. Yugoslavia as a Market (1930), *25 cents*; Map of the World showing Trade Routes (1930 Edition); Markets of Central America (1929), *25 cents*. Points for Exporters—Leaflets covering countries included in the territories assigned to Trade Commissioners are available to exporters *free of charge*. CHAPTER XXX.—THE ANNUAL REGISTER, 1934-36.

Section 1.—Dominion Legislation, 1934-35.

NOTE.—In the review of Dominion legislation of the Fifth Session of the Seventeenth Parliament, pp. 1178 to 1189 of the 1934-35 Year Book, the Canada Shipping Act, c. 44, was not dealt with since, at the time of going to press, it had not been proclaimed. Notice has been given that the Act will come into force on Aug. 1, 1936, and it is, therefore, summarized hereunder.

The reasons for the enactment of the Shipping Act, which is a very comprehensive piece of legislation, are as follows: Until the passage of the Statute of Westminster, in 1931, the Canadian Parliament had not the full responsibility of regulating Canadian shipping. That is, certain phases of our shipping business were regulated by the provisions of the Imperial Merchant Shipping Acts. With the passage of the Statute of Westminster the responsibility to legislate with regard to shipping was entirely passed to the Parliament of Canada. By that statute the Parliament of Canada is enabled, if it so desires, to repeal sections of Imperial statutes applicable to this Dominion and to re-enact their provisions or to substitute other provisions in lieu thereof. The purpose of the Shipping Act of 1934 was to meet this provision of the Statute of Westminster (it repeals certain provisions of the Merchant Shipping Acts of the United Kingdom which have heretofore been applicable to Canadian shipping) and at the same time to remodel the Shipping Act of Canada so as to bring it more into conformity with present developments. There are also included in the new Act provisions of certain international conventions on the subject of shipping which are of importance. The four which are included practically in their entirety in this Act are the Safety of Life at Sea Convention, the Load Line Convention, the International Convention Concerning Seamen's Articles of Agreement, and the International Convention concerning the Repatriation of Seamen. The incorporation of these conventions into the fabric of our shipping law involved a large number of changes.

Certain other Acts of the Parliament of Canada have been incorporated into the present shipping law as the subject matter of this legislation properly comes under this heading of Dominion legislative authority. For example, the Maritime Conventions Act, Chapter 126 of the Revised Statutes of Canada, has been incorporated in the new revision and is now made a part of the Shipping Act of Canada.

The Act has been framed so as to be in conformity with any similar Acts which may be enacted by the other Dominions or by the Imperial Parliament.

The Canada Shipping Act—Passed at Fifth Session, Seventeenth Parliament, Jan. 25 to July 3, 1934.

Canada Shipping Act.—This Act, administered by the Minister of Marine (except as regards Part V, which governs the health and hospitalization of mariners) deals in 16 parts with the regulation of coasting and inland as well as ocean shipping. Part I deals with the conditions governing the recording and the registering of vessels; vessels about to be built *may* be recorded, and vessels being built or equipped *must* be recorded, by a registrar of British ships under the Act. Section 7 states that unregistered ships, even though owned by persons qualified to be owners of British ships, are not recognized as British ships unless of a class exempt from registration. The procedure for the registration in Canada of British ships and the issuance of certificates is laid down in ss. 9-36. Ss. 64-70 govern the registry of alterations (or the registering anew if such be required) and lay down penalties for non-compliance with the requirements. The conditions governing transfer of registry are also laid down.

Part II of the Act deals in detail with the proper certification of masters, mates and engineers of all except certain smaller vessels.

Part III is concerned with the engagement and discharge of seamen and the facilities to be provided by shipping masters for this purpose, as well as for the making of apprenticeships to the sea service. The payment of wages to seamen, and the rights of seamen in respect thereto, are dealt with in ss. 184-214. The remainder of this Part is concerned with various protective measures for the employment and welfare of seamen.

Part IV lays down provisions for the relief and repatriation of distressed seamen.

Part V governs the treatment of sick mariners and the establishment of marine hospitals. This Part of the Act is to be administered by the Minister named by the Governor in Council.

Part VI treats of pilotage, defines the pilotage districts and allows for the constitution of pilotage authorities and the creation of new districts. The duties and powers of pilotage authorities are laid down and the requirements with regard to the payment of pilotage dues.

Part VII has reference to the safety of shipping, which is ensured through a properly appointed and competent steamship inspection service. Penalties are provided against the overloading of passenger ships, safety precautions are laid down, and the installation of radio equipment made compulsory on all passenger ships and other ships of 1,600 tons gross and upwards registered in Canada. Regulations governing the inspection of radiotelegraph apparatus and the qualification of radio operators are described. Elaborate provisions are made regarding load lines and loading as these matters refer to different classes of ships registered in Canada or not registered in Canada.

Part VIII treats of wrecks, salvage and investigations into shipping casualties. An official Receiver of Wrecks, or, in his absence, the Chief Officer of Customs, or the agent of the Department of Marine, shall have power to take command of a wreck in his district and assign duties to each and all persons present, for the preservation of the vessel and lives of shipwrecked persons. Important further powers of Receivers of Wrecks are also enumerated. All wrecks (including aircraft) shall be delivered to the Receiver as soon as possible by any person taking possession. Conditions governing disposition of wrecks, of procedure in salvage and inquiries into casualties are laid down.

Part IX deals with safeguards to navigation—lighthouses, buoys, beacons and the government of Sable island.

Parts X and XI govern the creation and extension of Public Harbours, the appointment of Harbour Masters and Port Wardens.

Part XII lays down the rules, regulations and orders regarding collisions and limitation of liability of owners.

Parts XIII–XVI are taken up with matters pertaining to the coasting trade, delivery of goods, legal proceedings, etc.

Appended to the Act are twelve schedules, the first six set out the text of certain international conventions which have been incorporated to a large extent in the Act and which are referred to in the definition section and in other sections of the Act. The other schedules are forms which are used in connection with the administration of the Act.

Legislation of the Sixth Session, Seventeenth Parliament, Jan. 17, 1935, to July 5, 1935.

Finance and Taxation.—Six Appropriation Acts were passed during the session, *viz.*, cc. 11, 12, 15, 27, 49 and 50, c. 12 applying to the fiscal year ended Mar. 31, 1935, and cc. 11, 15, 27, 49 and 50 to the fiscal year ended Mar. 31, 1936. C. 11 granted \$16,058,144·05 towards defraying the expenses of the public service, being one-twelfth of the amount of each of the items set forth in the Estimates for the said year; an interim vote of \$3,914,063·00, being one-sixth of the amount of each of the several items set forth in Schedule A to the Act; and a further sum of \$278,083·33, being one-twelfth of each of the items set forth in Schedule B. By c. 12, the sum of \$49,285,095·37 was granted towards defraying the expenses of the public service set forth in the Schedule to that Act and based on the Supple-

mentary Estimates, 1934-35. C. 15 granted \$16,058,144.05, being one-twelfth of the amount of the several items set forth in the Estimates for the said year, and further sums of \$820,889.37 and \$278,083.33, the said sums being one-sixth of the amount of the items set forth in Schedule A to the Act and one-twelfth of the items in Schedule B, respectively. C. 27 provided for \$16,058,144.05 to cover one-twelfth of the items set forth in the Estimates. Further grants towards defraying the expenses of the public service were made under this chapter of: \$1,063,339.90, being one-twelfth of the items set forth in Schedule A; \$82,633.33, being one-third of the items in Schedule B; and \$278,083.33, being one-twelfth of the items in Schedule C. By c. 49 an amount of \$138,642,370.82 was granted to meet the items set forth in the Estimates (Schedule A to the Act), less certain deductions voted in cc. 11, 15 and 27. A further grant was also made of \$2,502,750.01, being three-fourths of the several items set forth in Schedule B. Under s. 4 of this same chapter, the Governor in Council was empowered to raise a loan of \$200,000,000 for public works and general purposes. C. 50 granted the sum of \$16,359,978.34 towards defraying the expenses of the public service set forth in the Schedule to the Act and based on the Supplementary Estimates for 1935-36.

C. 21 amends the Gold Export Act (c. 33 of the Statutes of 1932) by providing that the Bank of Canada may issue licences for export of gold.

By the Loan Act, 1935 (c. 43), the Governor in Council is empowered to raise certain sums of money for the public service by way of loan, principal and interest of same to be a charge on the Consolidated Fund.

The establishment of an exchange fund is provided for by the Exchange Fund Act (c. 60), the aim being to aid in the control and protection of the Canadian monetary unit. The basis of this fund is the profit resulting from the taking over by the Bank of Canada of gold reserves (except when held against liabilities elsewhere than in Canada) of the chartered banks, on the basis established by the Currency Act, and the current market price of such gold. The manner of investment of the fund and how surplus funds are to be dealt with, as well as provision regarding the winding up of the account when expedient and the non-disclosure of information regarding the operation of the account, are laid down.

Income Tax.—C. 22 continues the levy of a special income tax on the salaries of members of the judiciary and commissioned officers of the military, naval and air forces and R.C.M.P. for the fiscal year ending Mar. 31, 1936, the rate being reduced from 10 p.c. to 5 p.c.

C. 40 provides for additional rates on investment income surtax of all such taxpayers other than corporations and joint-stock companies. The corporation income tax is increased from $12\frac{1}{2}$ p.c. to $13\frac{1}{2}$ p.c., and on consolidated returns from $13\frac{1}{2}$ p.c. to 15 p.c. "Earned income", "investment income" and "income bond" or "income bond debenture" are defined. All income in excess of \$14,000, from whatever source, is considered investment income, but under s. 5 all income up to \$5,000, whether "investment income" or "earned income" or both, is not liable to surtax. The income of religious, charitable, agricultural and educational institutions is exempt when no part of the income inures to the personal profit of any proprietor or shareholder. The Minister may in certain circumstances disallow as a deduction expenses payable to controlling companies abroad; losses sustained abroad; dividends on income bonds or income debentures. Under s. 7, the amount of any "earned income" may be reduced when, in the opinion of the Minister, it is not commensurate with the services actually rendered, and such reduction shall be treated as "invest-

ment income". Under s. 8, the manner in which the total income of a taxpayer other than a corporation or joint-stock company shall be compiled is defined in order to determine the additional rate payable on investment income. Certain copyrights and copyrighted works used and produced or reproduced in Canada are subject, under s. 9, to the additional 5 p.c. tax applicable to non-residents of Canada. Provision is made to guard against evasion of the tax through the exemption from the special tax of 5 p.c. allowed in the case of dividends paid to a non-resident company by a Canadian company. Payments on income bonds or income debentures are considered to be a dividend. Under s. 14, a tax ranging from 2 p.c. to 10 p.c. on gifts and donations is imposed and the conditions of its application and the varying rates defined as well as the exemptions allowed. The gift tax is effective from Jan. 1, 1935, and the provisions with respect to most other sections are applicable to the 1934 taxation period.

National Revenue.—C. 28 is an Act to amend the Customs Tariff (c. 44, R.S.C., 1927) as regards the extension or withdrawal of most-favoured-nation treatment to any British country. Under s. 2, the Netherlands, Indies, Surinam and Curaçao are regarded as part of the Netherlands. It is also provided that a reduction of duty on spirituous or alcoholic liquors shall be passed on to the consumer or the full duties may be restored. Schedules A, B and C of the Customs Tariff are amended as regards specific items enumerated in the Act.

The Excise Act (c. 52 of the Statutes of 1934) is amended by c. 29 to reduce the duty on spirits distilled in Canada from \$7 per proof gallon to \$4. It is also provided that, as in the case of c. 28 above, duties reduced may be fully restored if the benefit is not passed on to the consumer in full.

Under c. 33, the Special War Revenue Act (c. 179, R.S.C. 1927) is amended in several respects. The excise tax on duty-paid value on articles enumerated in Schedule V is modified; refunds of taxes paid under certain Parts of the Act are granted where goods are sold to Provincial Governments and are not for resale or for use by any business organization or university operated by the province concerned; and also, in certain cases, as regards the collection of taxes direct from third parties by the Minister instead of through a licensee. Schedules I, III, IV and V to the Act are amended as regards specific items, and a section is added after s. 120 to the effect that rights and obligations under Part XV of the Act shall not be affected by expiration of that Part.

Agriculture.—The Farm Loan Act (c. 66, R.S.C. 1927), as amended by c. 46 of the Statutes of 1934 (see p. 1182 of the 1934-35 Year Book), is further amended by c. 16 as regards the constitution of the Canadian Farm Loan Board, how the capital requirements shall be provided, provisions respecting loans and their repayment, priority of liens made or given to the Board. The aggregate loans made to one borrower under the Act and the 1934 amendment is reduced from \$7,500 to \$6,000 and is not to exceed 60 p.c. (instead of two-thirds) of the appraised value of the land and buildings in any province where chattel security may not be taken. Provision is made to incorporate Part II of the 1934 Amendment Act into the original statute as Part II thereof.

C. 20 amends the Farmers' Creditors Arrangement Act of 1934. The jurisdiction in bankruptcy is restricted as to release of debtors under the Act. Provision is also made under s. 7 for insolvent debtors resident in the province of Quebec, whose provable liabilities exceed \$500, to make assignments under the Bankruptcy Act in any case where the Board declines to formulate a proposal and certifies that

the debtor's affairs can be best administered under the Bankruptcy Act. The effective term of a stay of proceedings under s. 11 of the Act is extended from 60 days to 90 days. Commissioners under the Act are given power to name an *ad hoc* Commissioner to hear and deal with any case if either of the Commissioners, previously appointed to represent either debtor or creditor respectively under s. 12 of the original Act, is unable to hear such case.

C. 61 of the Statutes relates to the application of the Farmers' Creditors Arrangement Act in British Columbia. It is enacted that upon proclamation of the Governor in Council the Farmers' Creditors Arrangement Act shall cease to be in force in that province except in the case of proposals duly approved before c. 61 was enacted.

C. 23 is cited as the Prairie Farm Rehabilitation Act and provides for the rehabilitation of drought and soil drifting areas in Manitoba, Saskatchewan and Alberta and the taking of such measures as will afford greater economic security to the area. The constitution of a Committee formed for this purpose is outlined, and an appropriation of \$750,000 during the fiscal year 1935-36, and for each fiscal year for a further period of four years a sum not exceeding \$1,000,000 per annum, is appropriated.

By c. 31, an amendment is made to the Meat and Canned Foods Act vesting in the Governor in Council power to prescribe fees for inspection of canned fish and shellfish. Without the concurrence of the creditor the Act is not to apply in case of any debt incurred after May 1, 1935.

An amendment to the Live Stock and Live Stock Products Act (c. 120 R.S.C., 1927) is the purpose of c. 42. The amendment covers the defining of new terms, or redefinition of certain terms used in the original legislation, and certain minor amendments regarding regulations which may be made under the Act.

The creation, constitution and powers of the Canadian Wheat Board are provided for by c. 53. The Board is to consist of three members appointed by the Governor in Council—a Chief Commissioner who shall preside at sessions, and an Assistant Chief Commissioner are to be appointed from among the three members. The powers of the Board respecting the marketing of wheat in interprovincial and export trade are detailed and the duties of the Board, which include: the fixing of the price to be paid to producers; the sale of wheat at such price as the Board may consider reasonable, and of contracts for delivery acquired from Canadian Co-operative Wheat Producers Limited; to utilize without discrimination such marketing agencies as the Board may determine; to offer continuously wheat for sale in the markets of the world through established channels, provided that the Board may, if need be, take such steps as it deems expedient to establish its own marketing agencies or channels; to make investigations, if necessary under certain circumstances, of the operations of the Winnipeg and Vancouver Grain Exchanges and the Winnipeg Grain and Produce Clearing Association. Every grain elevator shall be operated for and on behalf of the Board, but such as are excepted from the operations of the Act. Such elevators as do not conform are penalized. The approved form of official certificates is to be decided by the Board; the proper deductions to be made from money receipts are laid down and the method of distributing the balance. The Act may, by approval of the Governor in Council, be made to apply to oats, barley, rye or flax produced in Western Canada, as well as to wheat.

C. 62 is the Fruit, Vegetables and Honey Act. The Minister of Agriculture is empowered to make regulations with respect to grading and classifying, inspection,

the issuance of licences and other matters. The powers of inspectors appointed under the Act are laid down. Commission agents, dealers and brokers, as defined in the Act, must be licensed and honey exporters must be registered. The Act also provides for proper transportation, packing, sale, etc., of produce of proper grade (except green vegetables and certified seed potatoes), and penalties are laid down for offences against and infractions of the legislation. S. 26 of the Act repeals the Root Vegetables Act (c. 181, R.S.C., 1927) and the Fruit and Honey Act, 1934.

The Natural Products Marketing Act is amended by c. 64. A new section provides for the equalization of returns received from the sale of regulated products as between producers. By an amendment to s. 3, the Dominion Marketing Board is authorized to make loans to local boards upon such terms as the Governor in Council approves.

Civil Service.—C. 26 is cited as the Salary Deduction (Continuance) Act. Provision is made for the deduction of 5 p.c. (in place of 10 p.c. as provided for in c. 22, 1934 and earlier legislation) from the compensation of members of the public service for the fiscal year 1935-36, except those in receipt of \$1,200 and less per annum. "Member of the public service" is defined as covering the same groups and classes in the earlier legislation governing salary deduction. (See pp. 1184-1185 of the 1934-35 Year Book.)

Fisheries.—C. 5 is an amendment to the Fisheries Act, 1932, whereby power to prescribe fees for fishing licences, except where already prescribed, are vested in the Governor in Council.

The Canadian Fisherman's Loan Act, c. 52 of the Statutes, empowers the Canadian Farm Loan Board to make long-term loans to fishermen and invests the Board with all the necessary authority to hold real estate secured to it, issue and sell or buy and retire Fisherman's Loan bonds, invest its funds, accept and hold collateral, make compositions, etc., as may be necessary for carrying out the purposes of the Act. The capital requirements of the Board are provided for by subscription on the part of the Government of Canada of an amount not exceeding \$300,000 and the issue of capital shares by the Board of \$1 each, subscribed for by the Government of Canada from time to time as loans are made under the Act and to an amount equal to 5 p.c. of such loans. A limit on outstanding bonds to twenty times the paid-up capital stock subscribed by the Government is set. Terms of issue of the bonds, conditions for loans and their repayment, establishment of reserve funds, payment of dividends and other matters connected with the purpose of the legislation are dealt with.

Justice.—The Interpretation Act (c. 1, R.S.C., 1927) is amended by c. 6 and c. 30, in the first case to include Armistice Day in the definition of "holiday" and in c. 30 as regards the effect of revision or consolidation.

References in unrepealed legislation to repealed legislation shall be references to substituted legislation where such relates to the same subject matters or in case of there being no substituted legislation the repealed legislation shall stand good and unrepealed, but only in so far as it is necessary to the interpretation of unrepealed legislation.

C. 35 amends s. 24 of the Admiralty Act, 1934, in a minor detail.

C. 36 amends s. 215 of the Criminal Code (c. 36, R.S.C. 1927) as amended by c. 53, 1932-33, in two particulars. A proviso is added to the definition of what shall be regarded as "irrebuttable presumption" in connection with the moral corruption of children, where a child is the offspring of unmarried persons living

together as man and wife; prosecutions under this section are limited in time to a period of one year after commission of an offence. C. 56 amends s. 235 of the Criminal Code as regards race meetings and trotting or pacing races, as regards the duration of such meetings and races in any year; the Minister of Agriculture is also empowered to make regulations governing betting, pool-selling and book-making. Amendment is also made to the subsection of s. 236 relating to the conduct of gambling devices; to s. 405 by making untrue or misleading statements given to procure passports an indictable offence; to s. 406 whereby the publication of a false statement regarding the efficacy of any product, which statement is not based on adequate tests, is made an indictable offence except where such statement is accepted in good faith and in the ordinary course of business by the person publishing such advertisement—"adequate and proper test" is defined; to s. 415 by the addition of a section making the employment of persons at lower rates than the minimum wage fixed by law an indictable offence, as well as the falsification of records and certain other deceptions; to s. 431 in minor details; to s. 498 by making stated discriminations against competitors in trade an indictable offence, except that co-operative societies are allowed to distribute to members surpluses made in trading operations; to s. 970 regarding the removal of feeble-minded or mentally ill prisoners to places of safe keeping and their disposition when not liable to return; amendments also extend to other minor matters.

The Juvenile Delinquents Act (c. 46, 1929) is amended by c. 41. Probation officers are now put under the control of the judge of the court with which connected in all provinces including Alberta, and, with regard to the liability of adults who contribute to the delinquency of children it shall not be valid defence if the child is of too tender years to understand the conduct of the accused. Other minor amendments are also included.

Labour.—The Relief Act, 1935 (c. 13), enacted for a period of one year, continues the powers vested in the Governor in Council by previous legislation to make agreements with the provinces respecting unemployment relief measures; to take all means deemed advisable to maintain peace, order and good government, and to provide special relief works.

C. 14 is the Weekly Rest in Industrial Undertakings Act and provides for a weekly day of rest in accordance with a Convention adopted by the General Conference of the International Labour Organization of the League of Nations. In every period of seven days, a period of rest of at least 24 consecutive hours shall be granted to the whole of the staff employed in any industrial undertaking as defined by the Act. Such period of rest shall be granted simultaneously to the whole staff and shall be the Lord's Day, whenever possible. These provisions, however, do not apply to persons employed in industrial undertakings, as defined, who hold positions of supervision or management, nor to persons employed in a confidential capacity. The Governor in Council may make regulations for total or partial exception in special cases with compensatory periods of rest, as far as possible. Penalties are imposed for breaches of the Act.

The Employment and Social Insurance Act (c. 38), is an Act to establish an employment and social insurance commission, provide for a national employment service, for insurance against unemployment, and for other forms of social security. The Act is in five Parts and three Schedules are appended. Part I relates to the organization, duties and powers of the Employment and Social Insurance Commission: the Commission shall undertake investigations, based upon which, proposals are to be made to the Governor in Council with regard to providing unemployment

insurance in special cases not otherwise covered (in Part III) and providing for assistance or training during unemployment. Part II deals with the organization of the Employment Service by the Commission, with regional divisions each with a central office co-ordinated under the Commission. Local committees may be established for any such central office for the purpose of advising and assisting the Commission. The Commission is further empowered to advance funds to workers towards meeting travelling expenses incurred in taking up employment found for them through an employment office. Part III relates to unemployment insurance and defines the classes of persons to be so insured, the contributions to be made by employers and by employed persons through such employers, and how payment is to be made. The conditions which qualify a contributor to unemployment benefits are also laid down in detail and disqualification for unemployment benefits by insured contributors. Ordinarily benefits may run for 78 days of continuous unemployment but additional days may be allowed under conditions laid down in the Act. Provision is made for the determination of all questions which might arise concerning the rights of persons and the refereeing of claims. Legal proceedings, when found necessary for various offences under the Act, are provided for, and the management of the Insurance Fund by the Minister of Finance is outlined. An Unemployment Insurance Advisory Committee is to be set up to advise and assist the Commission and to perform specified duties. Part IV requires the co-operation of the Commission, as far as practicable, with official public health bodies throughout Canada in matters of health insurance, in relation to the collection of data, and in the making available of assembled information. Part V is concerned with details regarding the general administration of the Act.

By c. 39—the Fair Wages and Hours of Labour Act, 1935—the Fair Wages and Eight Hour Day Act, 1930, is repealed and revised conditions governing the employment of workmen by the Government, except under the Civil Service Act, are outlined with regard to fair wages, the eight-hour day and forty-four hour week. The latter shall govern except in such special cases as the Governor in Council may provide or except in cases of emergency approved by the Minister of Labour. In all works involving government aid, conditions shall be stipulated in the agreement designed to secure the conditions of fair wages, the eight-hour day and forty-four hour week, except in special or emergency cases.

C. 44 is cited as the Minimum Wages Act and provides for minimum wages in accordance with a convention adopted by the International Labour Organization of the League of Nations. The Minister of Labour is given power to specify rateable trades and to create machinery for the fixing of minimum wages in such trades. The employer and operators, however, must be associated in the operation of such machinery. Under certain conditions the Governor in Council may fix minimum wages where he is satisfied that the particular trade is injuriously affected by the absence of such rates, or that workers are being oppressed.

Under c. 54, the Combines Investigation Act is amended mainly as regards the definitions of "combine", "merger, trust or monopoly" and as regards details concerning the duties of the Dominion Trade and Industry Commission and the administration of the Act.

The Limitation of Hours of Work Act (c. 63) provides for the eight-hour day and forty-eight hour week in industrial undertakings as defined in the Act. Where the hours of work on one or more days are less than eight, the limit may be exceeded on the remaining days by sanction of the Governor in Council or by agreement between employers' and workers' organizations or representatives, but in no case

shall the limit be exceeded by more than one hour in any one day. Special provisions govern persons employed in shifts and cases of urgency or *vis major*, and the Governor in Council may except any industry under prescribed conditions. The duties of employers in carrying out the provisions of the Act are laid down, and this legislation is not to relieve any employer from obligations under any provincial statute establishing still shorter hours of employment.

Legislation to assist the construction of houses is the subject of c. 58, the Dominion Housing Act. The Economic Council of Canada, when so required, must investigate and report as to housing conditions and accommodation, upon schemes submitted by local authorities and other stated matters. The Minister of Finance may, with the approval of the Governor in Council, make loans, upon conditions set forth in the Act, to assist in the building of houses. The Minister may only advance up to 20 p.c. of the cost of construction or appraised value, whichever is lower, and a lending institution or local authority must advance 60 p.c. The security for such loans is to be a first mortgage or hypothec given in favour of the Minister and the lending institution. Rates of interest and other terms of the loans are laid down. Further details regarding this legislation are given on pp. 472-473.

Parliamentary Representation.—The Representation Act is amended by c. 10 as regards the description of the electoral districts of Hamilton East and Hamilton West.

By cc. 37 and 57, the Dominion Franchise Act and the Dominion Elections Act are amended. In the former case, a subsection is added denying a judge power to rescind the final ruling of a registrar with regard to appeals affecting the addition or removal of names from the list of electors, unless evidence satisfactory to the judge has been adduced at the hearing. In the case of the Dominion Elections Act, amendments govern matters of detail and no fundamental changes are made.

Pensions and Soldier Settlement.—Cc. 8 and 45 amend the Pension Act as regards the tenure of office of Commissioners and the Acting Chairman, respectively.

The Soldier Settlement Act is amended by c. 66 whereby officers and employees whose positions are certified to be of indeterminate duration on July 1, 1935, shall, on the recommendation of the Treasury Board, be deemed to be permanent employees.

Post Office.—The Post Office Act is amended by c. 46, permitting the Postmaster General to extend or renew contracts for a further term of four years or terms not exceeding four years each.

Public Works.—The Public Works Construction Act (c. 34) authorizes the creation of employment by certain public works and undertakings throughout Canada, and guarantees certain railway equipment securities to the amounts of \$8,000,000 for the C.N.R. and \$7,000,000 for the C.P.R. under certain conditions to be approved by the Governor in Council, or, in lieu of guarantee of securities, empowers the Minister of Finance to expend money for the purchase, on behalf of the Crown, of railway equipment and sell or lease same to the two railways.

The several works and expenditures authorized in the first part of the legislation are detailed in Schedule A to the Act and are estimated to cost \$17,940,000. Preference in employment is to be shown to unemployed ex-service men and unemployed married and single men with dependants.

Railways.—Auditors for the National Railways are appointed by c. 1 for the year 1935 to make a continuous audit under the Canadian National-Canadian Pacific Act, 1933.

C. 3 is the Canadian National Railways Refunding Act, 1935, under which the Governor in Council may, after approval of certain conditions, provide for the refunding of maturing or callable or other obligations of the C.N.R. "Substituted securities" guaranteed by the Government, may be issued by the C.N.R., but only of sufficient amount to provide for such refunding and not to exceed \$200,000,000. The proper cancellation of the original security is provided for.

By the Canadian National Railway Financing Act, 1935, c. 17 of the Statutes, the C.N.R. is given power, subject to the approval of the Governor in Council, to issue notes for refunding and capital expenditures to meet authorized expenditures or indebtedness incurred in 1935 and not sufficiently covered by net operating income or investments. It is stipulated, however, that there shall not be more than \$14,200,000 value of such notes outstanding at any one time. The Minister of Finance with the approval of the Governor in Council may make loans out of the Consolidated Revenue Fund for the purpose of meeting authorized expenditures, and may take the notes as security therefor to the value of \$14,200,000. The Minister of Finance may also make advances on account of net income deficits to the amount of \$44,000,000 during the year 1935-36 out of the Consolidated Fund.

Radio.—Under c. 65—an Act respecting Radio Broadcasting, the provisions of certain sections of c. 35, 1932-33 are extended from April 30, 1934 to Mar. 31, 1936, and c. 35 of the Statutes of 1932-33, c. 60 of the Statutes of 1934, and c. 24 of the Statutes of 1935 are not to influence the interpretation of c. 51 of the Statutes of 1932 on and after April 1, 1936.

Trade and Commerce.—C. 4 of the Statutes is an amendment to the French version of the Electricity Inspection Act, 1928.

The Precious Metals Marking Act, 1928, is amended mainly with regard to the definitions of "mount" and "Sheffield reproduction", and it is further enacted that in regard to the marks "B.M." and "W.M.", used for plated ware, when the inferior metal contains less than 90 p.c. of pure tin, the name of the predominating metal must be legibly stamped on the article.

C. 18 amends the Copyright Amendment Act, 1931. The right of action for infringement of the performing right in dramatico-musical or musical work is barred against any person who has tendered or paid fees in accordance with the Act, or pending an official inquiry.

A consolidation of the legislation relating to patents of invention (c. 150, R.S.C., 1927, as amended by c. 4, 1928; c. 34, 1930; and c. 21, 1932) is brought about in the Patent Act, 1935—c. 32 of the Statutes.

The Weights and Measures Act (c. 212, R.S.C., 1927) is amended by c. 48. "Pre-packaged goods or articles" are defined, the meaning of "inspector" is amended, and the units "cord" and "fluid ounce" are clearly described. A subsection is added to s. 41 of the original legislation enacting that an official certificate of comparison and verification of local standards of measure and weight shall be *prima facie* evidence that the comparison and verification has been performed as described. The powers of "inspectors" to enter places within their divisions are more specifically defined and the proceedings and penalties in case of offences for short weights, measure or counts, for false weights, etc., are extended under ss. 63 and 64 of the original legislation. The size or capacity of containers is to be in terms of Dominion measure as laid down in an amendment to s. 74. Other amendments of a minor nature are included.

C. 55 amends the Companies Act, 1934. A company carrying on business not within the scope of its letters patent may be wound-up or dissolved. Consideration for any shares allotted must be a fair equivalent of cash except where a declaratory order of a court is obtained. No shares are to be issued with exclusive rights of control (preferred shares with preferential voting rights in a stated event only are not affected). The conditions under s. 75 of the 1934 Act, under which applications for any of its securities may be accepted by a company, are modified. S. 83 is amended with regard to the non-payment of dividends by insolvent companies and how solvency is to be determined. Subsections are added to ss. 88, 94, 96 and 98 regarding the responsibility of elected directors, the action to be taken where serious impairment of capital is discovered, the extension of the liability of directors, and the voting rights of shareholders, respectively. There are other amendments of lesser importance.

The Dominion Trade and Industry Commission is established under c. 59 of the Statutes, the members for the time being to be the Commissioners. Where the Commission, after investigation, finds that wasteful or demoralizing competition exists in any specific industry, it may advise the Governor in Council and recommend certain arrangements. The Commission is charged with the responsibility for prosecution of offences relating to commodity standards and is vested with certain powers in that regard. A Director of Prosecutions with specified duties may be appointed. The Commission may call upon the National Research Council to assist in investigations. The words "Canada Standard" or initials "C.S." shall be a national trade mark, the exclusive property of which is declared vested in His Majesty in the right of the Dominion of Canada. The Commission may investigate unfair trade practices on receipt of complaints and may convoke fair trade conferences, co-operate with boards of trade, investigate economic or social conditions when so required and co-operate with the Economic Council of Canada to this end.

International Trade Agreements.—An additional protocol is made to the Canada-France Trade Agreement of 1933 by c. 2—the Supplementary Canada-France Trade Agreement Act, 1935. This protocol is set out in thirteen Articles as a Schedule and there are four itemized Supplementary Schedules listing the products affected by the legislation. The legislation is outlined in the chapter on External Trade, pp. 487-488. Similarly c. 51 is the Canada-Poland Convention of Commerce Act, 1935. The main Schedule here consists of twenty articles and there are two itemized Supplementary Schedules.

Miscellaneous.—Under c. 7, the Agreement of Mar. 30, 1920, with the city of Ottawa is extended for one year from July 1, 1932.

C. 19 establishes the Economic Council of Canada, which is to consist of the Prime Minister and fifteen duly appointed members selected from the Public Service or representing organized bodies (not to exceed five in number) or persons having special experience (not to exceed three in number). No fees or emoluments are to be paid to members except actual travelling and living expenses incurred in connection with the business of the Council. The Dominion Statistician is to be Secretary of the Council. The duties of the Council are specifically defined.

The Royal Canadian Mounted Police Act (c. 160, R.S.C., 1927) is amended by c. 25 with regard to certain offenders, under s. 31 of the original legislation as amended in 1934, being required to pay the amount specified in the charge by pay stoppages. S. 33 is also amended with regard to penalties imposed under ss. 30, 31 and 32 and ss. 78 and 81 with regard to widows' and orphans' pensions.

Section 2.—Provincial Legislation.

A list of the public Acts of the Provincial Legislatures usually appears at this place in the Year Book. In order to conserve space, it has been decided to refer the reader to the different provincial authorities for information in this connection. It is felt that whatever is lost to those readers who are interested in having all provincial legislation brought together and listed under one head, is more than offset by the information of more general interest which it has been possible to include in the limited space available, but which would otherwise have had to be omitted.

Section 3.—Principal Events of the Year.

Subsection 1.—The Economic and Financial Year 1935.*

The trend of economic conditions was irregularly upward during the year 1935. Productive operations on the whole were more active, a few industries, such as metal-mining and metallurgical operations, even reaching the levels of the period culminating in 1929. Such cases, however, were exceptional and factors significant of productive activity indicate that a normal position has not yet been regained especially if adequate allowance is made for the long-term growth.

Industrial production in the United States and Great Britain with which Canada has close trading relations, recorded gains over 1934. The volume of Canadian crops, despite the decline in the wheat harvest, was greater than in the preceding year. The activity of the industries producing materials for the expansion of plant and equipment was considerably accelerated in 1935. This suggested that many enterprises were preparing for greater operations. The production of manufacturing plants, according to the official index, was appreciably in advance of the preceding year, while the gain in manufacturing employment was 7.6 p.c. The general average of wholesale prices was stable at the level maintained since the beginning of 1934. High-grade bonds for the greater part of the year were quoted at the highest level since the war period, when Dominion issues first became an important factor in the domestic market. Such high bond prices indicate an abundance of cheap money which is a potent influence for recovery. The deposit liabilities of the chartered banks showed a significant gain commencing with the summer of 1934. Reflecting the lack of expansion in bank loans, the security holdings and the readily available assets of the banks reached new high levels.

Agriculture.—The agricultural situation showed little improvement in 1935. Drought, rust and frost reduced the yields and quality of grain in the Prairie Provinces and the prices for oats and barley particularly were considerably below the 1934 level. Potatoes returned a poor harvest in the Maritime and Eastern Provinces, but prices were sharply increased. The reduced revenue from cash crops was slightly more than offset by increased revenue from live stock, dairying and certain minor farm enterprises. The inventory value of farm live stock and poultry, as at June 1, 1935, showed a pronounced increase over the figure for the previous year.

Forestry.—The forestry group has recently shown marked expansion. While prices of newsprint have remained close to depression levels, production schedules have recently reached a new maximum in history. Production of newsprint at 2,753,289 tons increased 6 p.c. over 1934, and the export of wood pulp was 9.4 p.c. greater. External markets developed for shingles, the export at 2,756,882 squares being 96 p.c. greater than in 1934. Owing mainly to the reduced shipments to the

*Abbreviated from the bulletin "Business Conditions in Canada, 1935", prepared by Sydney B. Smith M.A., Dominion Bureau of Statistics.

British market, the export of planks and boards declined 2·2 p.c. to 1,337,041 M ft. b.m. Employment in the lumber and paper industries was on a much larger scale in 1935. The gain of employment in the lumber industry was computed at 8·0 p.c., while that of the pulp and paper industry was 4 p.c.

Minerals.—The activity displayed by metal mining was one of the factors in alleviating the worst phases of the economic dislocation. The mining industry has contributed a constructive influence beyond the mere monetary measure of the output, for exploration and development precede recorded production. Canada's mineral production, valued at \$310,162,455 in 1935, showed a gain of 11·5 p.c. over the preceding year. The results almost equalled the peak year of 1929, when the production was valued at \$310,850,000. The quantity production of gold, copper, nickel, and zinc established new records. With the higher price of gold offsetting the lower prices of other metals as compared with 1929, the value of metal production in 1935 was 44 p.c. greater than that of 1929. Values for fuels, other non-metallies and structural materials, however, were still considerably below those of 1929. The index of employment in the mining industry was 123·3 for 1935, as compared with 110·8 for 1934 and 120·1 for 1929.

Hydro-Electric Power.—The output of central electric stations, which supply over 90 p.c. of the electric power production of Canada, was, for the latest calendar year, 23,404 million kilowatt hours. The December output was 2,157 million hours as against 2,053 million hours in December, 1934. The peak annual production of electric power previous to the year under review was placed at 21,160 million kilowatt hours, the figure for 1934. The previous peak was recorded in 1930 at 17,863 million kilowatt hours.

Manufacturing.—Sufficient evidence is at hand to indicate that a modest increase was shown in the putput of manufacturing plants in the year under review. The official index of manufacturing production based on 29 factors indicating the trend in the principal industries showed an appreciable gain over 1934. The index of employment computed from returns received from plants employing 15 hands and over, averaged 7·6 p.c. greater.

The output of industries engaged in the manufacture of producer goods showed the marked gain of nearly 16 p.c. in the same comparison. The decline in the operations of this group was severe for four years, the turning-point being reached in the early part of 1933. The extremely low level of operation was one of the elements in the depression, and the repeated gains of the group in the latest three years have contributed to the recovery. The iron and steel industry is typical of this group. The gain in the output of consumer goods, on the other hand, was less than 3 p.c. The demand for consumer goods such as food and clothing, is normally without wide fluctuation. If the decline from 1929 to 1933 was relatively moderate, the increases since that time have also been of slight proportions. The index of the output of consumer goods was 107·6 in 1935 as against 104·9 in the preceding year.

Construction.—While marked percentage gains over the preceding year were shown in the records of new business obtained by the construction industry in 1935, the level was still low relative to the pre-depression years. The gain in contracts awarded, from \$125,812,000 in 1934 to \$160,305,000 in 1935 was 27·4 p.c. Engineering projects took the lead in the main groups of construction, the total advancing from \$49,705,000 to \$65,162,000, a gain of no less than 31·1 p.c. The gains in residential and business contracts were 19·0 p.c. and 29·2 p.c. respectively, while the increase in industrial projects was 28·0 p.c.

External Trade.—The substantial gain in external trade was a feature of the economic betterment of the year. The total exports of merchandise in 1935 were \$742,400,000 compared with \$660,300,000 in 1934, an increase of \$82,000,000 or 12·4 p.c. Exports of coin and bullion not included with merchandise exports also scored an advance due to the increase in the quantity. The value of imports advanced from \$513,500,000 in the preceding year to \$550,300,000, a gain of 7·2 p.c.

Transportation.—Railway traffic in 1935 showed only a modest increase over the preceding year. The gain in carloadings over 1934 was 1·5 p.c., the total having been 2,358,393 cars against 2,324,621. The decline in the grain movement was 10,218 cars, or 3·2 p.c., and coke recorded a decline of 5·2 p.c. Minor recessions were shown in live stock, coal and lumber. An encouraging feature was the gain of nearly 24,000 cars, or 4·6 p.c. in the movement of miscellaneous commodities. Forestry products such as pulpwood, pulp and paper and miscellaneous wood products were moved in greater volume. Ore recorded a gain of 8·0 p.c. The index of employment in transportation averaged 81·2 for 1935, compared with 80·3 in 1934 and 79·0 in 1933.

Employment.—From Jan. 1 to Dec. 1, there were only two interruptions in the general upward movement of employment. The index on Dec. 1, stood at 104·6 or 10·8 p.c. higher than at the opening of the year. The average increase during this period in the years 1921 to 1934, was between 7 and 8 p.c., so that the increase during 1935 was unusually great. The index of employment, based on the 1926 average as 100, averaged 99·4 in the twelve months, satisfactorily comparing with the averages of 96·0 in 1934, 83·4 in 1933 and 87·5 in 1932. However, the 1935 average was lower than in 1931 and immediately preceding years.

Prices.—The general level of wholesale prices was well maintained for the two years following the sharp rebound from the low point of the depression during 1933. Since January, 1934, the Canadian index of wholesale prices has fluctuated within a narrow range, around 72 p.c. of the 1926 levels, although a slight gain in the last quarter was sufficient to result in a new high point on the recovery. Animal products and non-ferrous metals recorded advances in the latter part of the year, while several main groups were at a lower level than in the last quarter of 1934.

Throughout the decline persisting from August, 1929, to the early months of 1933, raw material prices had fallen more rapidly than those for finished products and the resultant contraction in primary producers' incomes affected business adversely. Abnormally low prices received by primary producers, who represent roughly one-half of the occupied population of Canada, had greatly diminished purchasing power. This disparity had been greatly reduced during 1933 and 1934, and the gain in the prices of raw materials of about 4 p.c. compared with a slight decline in the price of manufactured goods, shows that the gap was further narrowed in the twelve months ended December, 1935.

Subsection 2.—Other Principal Events of 1935 and 1936.

The Throne.—On May 6, 1935, the twenty-fifth anniversary of the accession of H. M. King George V to the Throne was celebrated throughout the British Commonwealth of Nations. On Jan. 20, 1936, the news of the death of His Majesty was received with world-wide regret. The Prince of Wales succeeded to the Throne, taking the title of King Edward the Eighth.

The Governor General.—On the retirement of the Earl of Bessborough, G.C.M.G., Baron Tweedsmuir of Elsfield, G.C.M.G., C.H., was appointed Governor General and Commander-in-Chief of the Dominion of Canada. Lord Tweedsmuir took the oath of office at Quebec on Nov. 2, 1935.

Dominion General Election.—A General Election to the House of Commons was held on Oct. 14, 1935, when the Administration of the Rt. Hon. R. B. Bennett was defeated by the Liberal Party under the Rt. Hon. W. L. Mackenzie King. A list of the members returned will be found at pp. 82-86 of this volume.

Provincial General Elections.—General elections took place in 1935 in four of the provinces. In New Brunswick, on June 27, 1935, the Conservative Administration of Hon. L. P. D. Tilley was defeated by the Liberals under A. A. Dysart. In Prince Edward Island, on July 23, 1935, the Liberals under W. M. Lea defeated the Conservative Administration of Hon. J. P. MacMillan. In Alberta, on Aug. 22, 1935, the United Farmers of Alberta Administration of Hon. R. G. Reid was defeated by the Social Credit Party under W. Aberhart. In Quebec, on Nov. 25, 1935, the Liberal Administration of Hon. L. A. Taschereau was returned to office.

International Relations.—During the past twelve months, three events were of significance to Canada, as a member of the League of Nations, *viz.*, the outbreak of hostilities between Italy and Ethiopia on Oct. 2, 1935, the reoccupation of the demilitarized zone of the Rhineland by Germany on Mar. 8, 1936, and the similar reoccupation by Turkey of the Dardanelles region on Apr. 17, 1936.

Trade Agreements.—During the year agreements were concluded with the United States and New Zealand, while further mutual concessions were made on Feb. 26, 1935, in the Trade Agreement between Canada and France of 1933 following an exchange of Notes of 1934. An exchange of Notes with Japan resulted in the clarifying of the exchange situation which had been the cause of some friction. Particulars of these agreements and changes in trade relations will be found at pp. 485-489 of this volume.

Dominion-Provincial Conference.—From Dec. 9 to Dec. 13, 1935, a conference between the Dominion and Provincial Governments was held at Ottawa. Important among the matters upon which future policy was defined were: amendments to the Constitution, unemployment, the regulation of provincial finance, mining development, agricultural and marketing problems.

Day of General Thanksgiving.—Thursday, Oct. 24, 1935, was appointed by proclamation as a “day of general thanksgiving to Almighty God for the bountiful harvests and other blessings with which Canada has been favoured”.

APPENDIX.

1.—Immigration in the fiscal year 1935-36.

During the fiscal year ended Mar. 31, 1936, the immigrants into Canada, classified as in Table 2 of the Immigration Chapter, appearing on p. 186 of this volume, were as follows: from U.K., 2,049; from U.S.A., 5,121; from other countries, 3,933; total, 11,103.

Canadians returned from the United States during the fiscal year ended Mar. 31, 1936 were classified as follows: Canadian-born, 4,854; British-born with Canadian domicile, 418; naturalized Canadian citizens, 542; total, 5,814. Corresponding figures for the calendar year 1935 were 4,961, 632, 785 and 6,378, respectively.

2.—External Trade of Canada in the fiscal year 1935-36.

Preliminary figures of the external trade of Canada for the fiscal year ended Mar. 31, 1936, show a grand total trade of \$1,341,876,197, as compared with a figure of \$1,189,990,110 in the preceding year, or an increase of \$151,886,087. The increase in the imports was \$40,387,822. Domestic exports increased by \$105,715,569 and foreign exports by \$5,782,696. Figures by industrial groups are given in the following table, where the figures of imports and exports may be compared with the totals given for previous years in the tables on pp. 526, 532-533 of this volume.
